# QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDING 30 SEPTEMBER 2022

#### HIGHLIGHTS

- The Company completed 7,965m of drilling across the Santy and Hawkins Projects during the September Quarter.
- Drilling programs at the Santy Gold Project targeted the Santy Prospect, the 2.2kmlong structural target with rock chips returning results up to 100g/t Au and mineralisation remaining open in all directions.
- Drilling at Hawkins intersected mineralisation along multiple traverses with portable XRF analysis confirming the presence of Lead-zinc mineralisation at shallow depths (40-100m) with assays imminent.
- Claw Gold Project granted with early exploration completed along highly prospective 33km-long structural corridor.
- Claw Located in Western Australia's emerging frontier gold country, directly abutting Capricorn Metals (ASX: CMM) 2.1 Moz Mt Gibson Gold deposit.

**BPM Minerals Limited** (ASX:BPM, 'BPM' or 'the Company') is pleased to present its quarterly activities report for the quarter ended 30<sup>th</sup> September 2022.

#### **Hawkins Drilling**

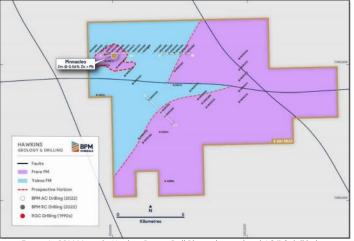

Initial drilling at the Hawkins Lead-Zinc Project, located in Western Australia's Earaheedy Basin.

Importantly, drilling intersected the target Frere-Yelma contact at depths 40-100m below surface across five key areas of interest, with a portable XRF confirming broad zones of shallow lead-zinc mineralisation, delivering near-surface Phase-2 drilling targets (Fig. 1).

346 samples were collected and sent to the laboratory for multi-element assay, with the Company expecting to undertake follow-up exploration with results imminent.

Aircore drilling was initially completed to map out the prospective Yelma-Frere contact that is concealed beneath younger alluvial and colluvial cover sequences. Initial drilling was also targeting the deeper Iroquois Dolomite Formation, host of the Pb-Zn mineralisation at Strickland Metals Ltd's (ASX: STK) Iroquois Project.

#### **Santy Drilling**

In late September Drilling got underway at Santy Gold Project gold targeting priority gold and base metal targets, including the 'Santy Prospect' (Figure 2). The program consisted of a 100-hole (totalling 3,500 metres) program comprising Reverse Circulation (RC) and Air Core drilling.

Previous AC drilling completed by BPM across base-metal targets intersected anomalous Nickel, Cobalt and Platinum Group Elements (PGE's), highlighting the potential for Julimar-style ultramafic intrusive mineralisation.

## **Claw Gold Project**

Claw Gold Project (E70/5600) granted with early exploration completed along highly prospective 33km-long structural corridor.

Early exploration included the acquisition of a 3,472-line km aeromagnetic survey with Dr Barry Murphy (ASX:PDI, NYSE:KL) completing a geophysical interpretation using automated edge detection, identifying several large structural targets.

Drill ready targets were identified during a review of historical open file drill data, and confirmed by the aeromagnetic interpretation, identifying two drill-ready gold anomalies at the Claw Gold Project.

The Company has sought to consolidate its position in the Murchison, with a further tenement under application (E70/6176) representing a potentially large and untested extensions of the Mt Gibson Shear Zone (Figure. 3).

#### CORPORATE
