

NORFOLK
METALS LTD.

ASX:NFL

Q4 2022 INVESTOR UPDATE BRIEF

IMPORTANT NOTICES AND DISCLAIMERS

Presentation: This presentation has been prepared and issued by Norfolk Metals Limited (ASX: **NFL, Norfolk or the Company**) to provide general information about the Company. The information in this document is in summary form and should not be relied upon as a complete and accurate representation of any matters that a reader should consider in evaluating the Company. While management has taken every effort to ensure the accuracy of the material in this presentation, the Company and its advisers have not verified the accuracy or completeness of the material contained in this presentation.

Forward-looking statements: This presentation contains forward looking information about the Company and its operations. In certain cases, forward looking information may be identified by such terms as "anticipates", "believes", "should", "could", "estimates", "target", "likely", "plan", "expects", "may", "intend", "shall", "will", or "would". These statements are based on information currently available to the Company and the Company provides no assurance that actual results will meet management's expectations. Forward looking statements are subject to risk factors associated with the Company's business, many of which are beyond the control of the Company. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially from those expressed or implied in such statements. There can be no assurance that actual outcomes will not differ materially from these statements.

Disclaimer: No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or proved correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisors and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any effort or omission therefrom. The Company will not update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

Not financial product advice: This presentation is not financial product nor investment advice or a recommendation to acquire securities in the Company. It has been prepared without taking into account the objectives, financial situation or needs of individuals. Before making any investment decision, prospective investors should consider the appropriateness of the information having regard to their own objectives, financial situation and needs and seek legal and taxation advice.

No offer: This presentation and its contents are not an invitation, offer, solicitation or recommendation with respect to the purchase or sale of any securities in the Company in any jurisdiction and must not be distributed, transmitted, or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any other jurisdiction. This presentation is not a prospectus or any other offering document under Australian law (and will not be lodged with the Australian Securities and Investments Commission) or any other law.

Competent Persons Statement: The information in this presentation that relates to Exploration Results for the Roger River Project, is based on, and fairly represents, information and supporting documentation prepared by Mr Leo Pilapil, a competent person who is a member of the Australasian Institute of Mining and Metallurgy. Mr Pilapil has a minimum of five years' experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a competent person as defined in the 2012 Edition of the Joint Ore Reserves Committee Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Pilapil is a related party of the Company, being the Technical Director, and holds securities in the Company. Mr Pilapil has consented to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.

The information in this presentation that relates to Exploration Results which have been previously reported are extracted from ASX announcements made by NFL on 18 and 29 March 2022, 22 July 2022 and 3 November 2022 which are available to view of the Company's website: www.norfolkmetals.com.au. NFL confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. NFL confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

INVESTMENT THEMATIC

1

High Risk/Reward.

Genuine greenfield exploration.
Highly prospective permits acquired prior to IPO.
All landholdings expanded by NFL since IPO.

2

100% Ownership.

Granted tenure, 100% owned by NFL.
Own the region and own the outcome.

3

Diversified.

One precious/base metal exploration project.
One future/green energy exploration project.

4

Nimble.

Lean, motivated board and key management team seeking to implement efficient work programs.

INVESTMENT HIGHLIGHTS

1

Recent Success.

Visual mineralisation in first hole of maiden drill program at Roger River Project (Gold and Copper, Tasmania)

**See Norfolk's ASX announcement
3 November 2022*

2

Dual Exploration Programs.

Exploration expected to commence at Orroroo Project early Q1 2023 (Uranium, South Australia)

3

Strong News Flow.

Pending drill program assays and uranium exploration updates

4

Funded.

\$4,250,000 in cash and zero debt at Sept Quarter 2022

5

Market Aware.

Board to consider complementary acquisition opportunities as presented

**Refer to Norfolk's prospectus released to ASX on
18 March 2022*

Ben Phillips

Executive Chair

Mr Phillips has over 15 years' experience in commercial negotiations with a broad spectrum of industries including Oil and Gas, Resources, Medical technology, SaaS and Defence.

Mr Phillips previously held a Non-Executive Director position at Bronson Group BGR:ASX and subsequently Mandrake Resources MAN:ASX.

Position as a Corporate Executive at Ironside Capital Mr Phillips is focused on sourcing, structuring, funding and management requirements for small-cap companies both private and public.

Leo Pilapil

Non-Executive, Technical Director

Mr Pilapil has over 30 years' experience as a Geoscientist and three years as a Financial Planner.

As a geoscientist, he has held director positions for several junior companies in Australia, Africa and Turkey, mainly responsible for technical project evaluations, project acquisitions, project management and business development.

Responsible for the discovery of the Harlequin Gold Deposit (1Moz) under salt lake conditions in Norseman WA Australia and has also been responsible for the mine extensions and discoveries of several ore deposits in Australia, Africa, Turkey and more recently in Lao PDR.

Mr Pilapil has established drilling companies in Turkey and Lao PDR servicing several major exploration and mining companies to complement the acquisition of his own personal projects.

Patrick Holywell

Independent, Non-Executive Director

Mr Holywell has over 15 years of experience in accounting, finance and corporate governance, including employment at Deloitte and Patersons (now Canaccord Genuity).

Mr Holywell is a Chartered Accountant and a Fellow of the Governance Institute of Australia with the last ten years focused on Director and Company Secretarial roles in the resources and technology space.

Mr Holywell's most recent involvements include roles with De Grey Mining Limited, Si6 Metals Limited and Pentanet Limited.

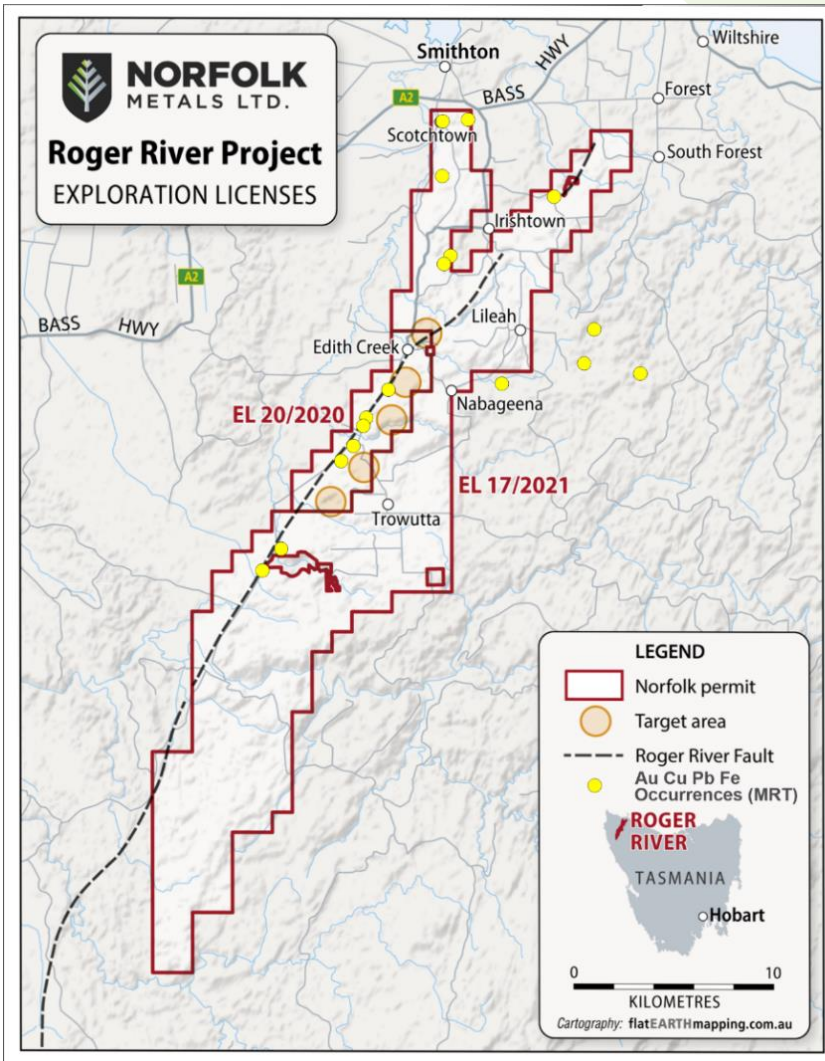

Mr Holywell has completed a Bachelor of Commerce at UWA, a Graduate Diploma of Chartered Accounting with the Institute of Chartered Accountants and the Company Directors Course with the Australian Institute of Company Directors.

CAPITAL STRUCTURE

SHARES ON ISSUE	33,000,000
OPTIONS	8,500,000
PERFORMANCE SHARES	1,400,000
CASH	\$4,250,000 (September Quarterly 2022)
DEBT	Nil
SHARE PRICE	\$0.21 (8 th November 2022)
MARKET CAPITALISATION	\$6,930,000.00
ENTERPRISE VALUE	\$2,680,000

ROGER RIVER PROJECT

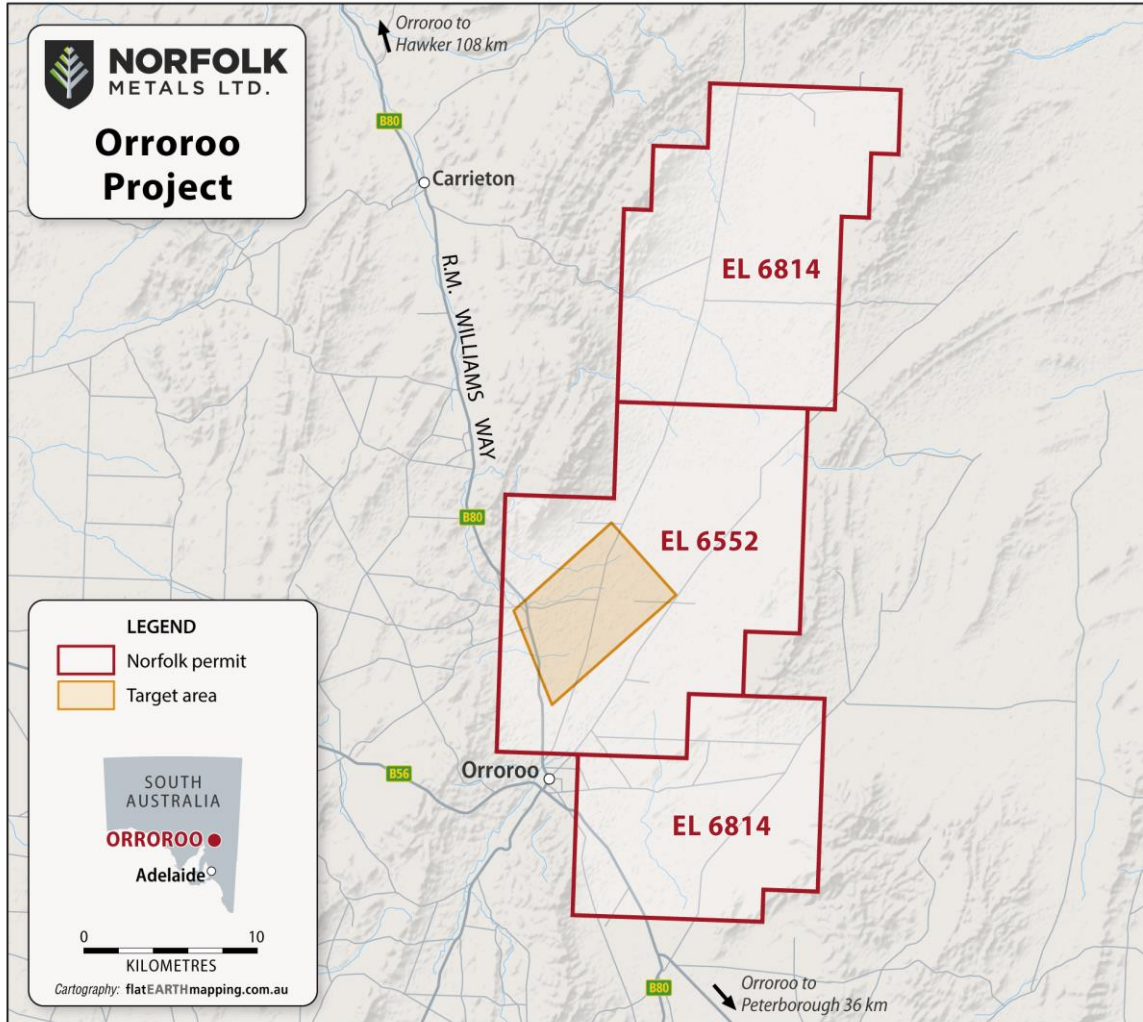

Gold, Copper and Base Metals

- ▶ Comprised of two 100% owned exploration licences (EL20/2020 and EL17/2021)
- ▶ 261km² located 410km northwest of Hobart, Tasmania
- ▶ Highly accessible and favourable to mineral exploration
- ▶ Norfolk holds over **30km of the Roger River Fault with recently proven mineralised splays**
- ▶ Historically underexplored region prospective for gold, copper and base metals
- ▶ Drill targets defined/redefined throughout maiden drill program currently underway

ORROROO PROJECT

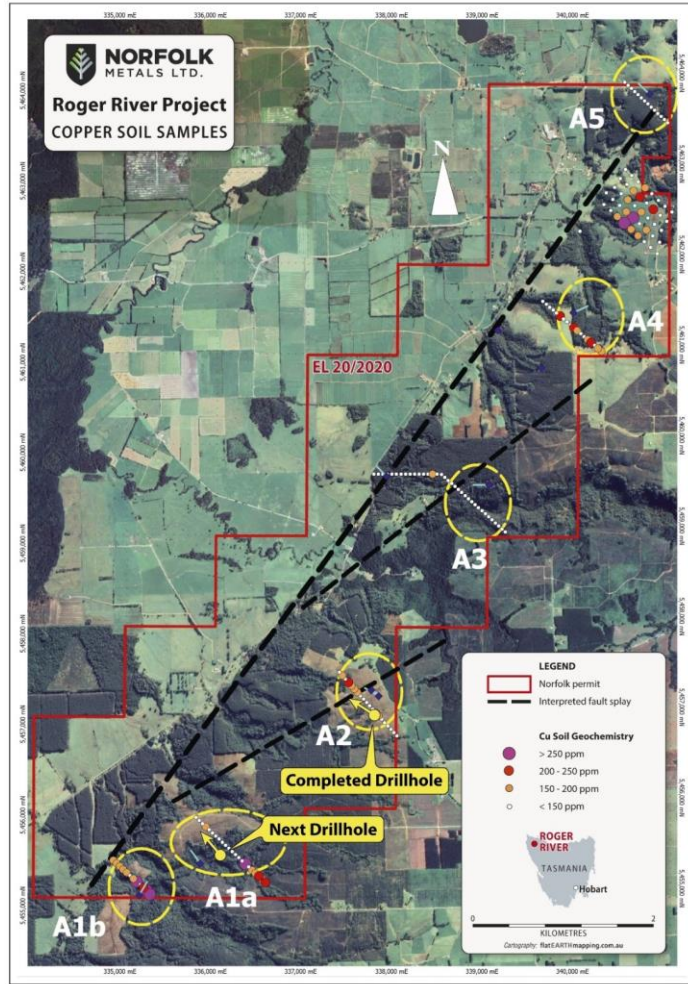

Uranium

- ▶ Comprised of two 100% owned exploration licences (EL6552 and EL6814)
- ▶ 659km² located approximately 274km northwest of the capital city of Adelaide
- ▶ Highly accessible and favourable to mineral exploration
- ▶ Norfolk has a significant landholding in the Walloway Basin near Orroroo with **sediments of the same age as the Frome Embayment**
- ▶ Opportunity to define a potentially new uranium district within well endowed region
- ▶ Exploration work program expected to be finalised imminently

CURRENT WORK PROGRAM

Roger River Project

- ▶ 318m diamond drilling completed in ~2000m maiden program
- ▶ **Target A2** first hole (22RRD-001) with favourable visual results
- ▶ Assay results and program updates expected in Q4 2022

22RRD-001 Altered magnetic basalt with native copper in quartz carbonate veins at approximately 145m depth.

**Refer to Norfolk's ASX announcement released 3 November 2022.*

CURRENT WORK PROGRAM

Roger River Project

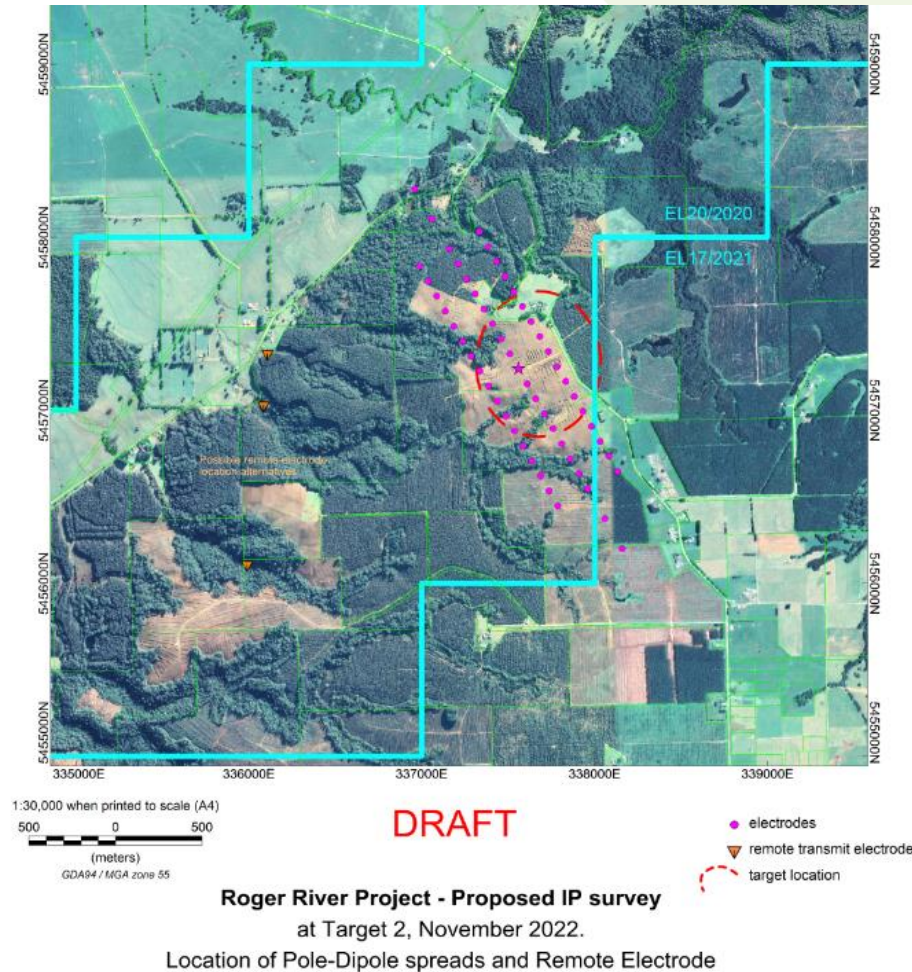

First hole - 22RRD-001 drill hole **completed at Target A2** testing intersection of the magnetic body (green) and as a secondary objective continuing through to the deeper portion of the gravity body (brown)

Second hole - 22RRD-002 drill hole **underway at Target A1** testing the linear magnetic body (green) located approximately 2km to the southwest of 22RRD-001 and along the same interpreted fault splay. The shallow tabular gravity body (brown) may be due to the irregular topography and insufficient data points

SUBSEQUENT WORK PROGRAM

Roger River Project

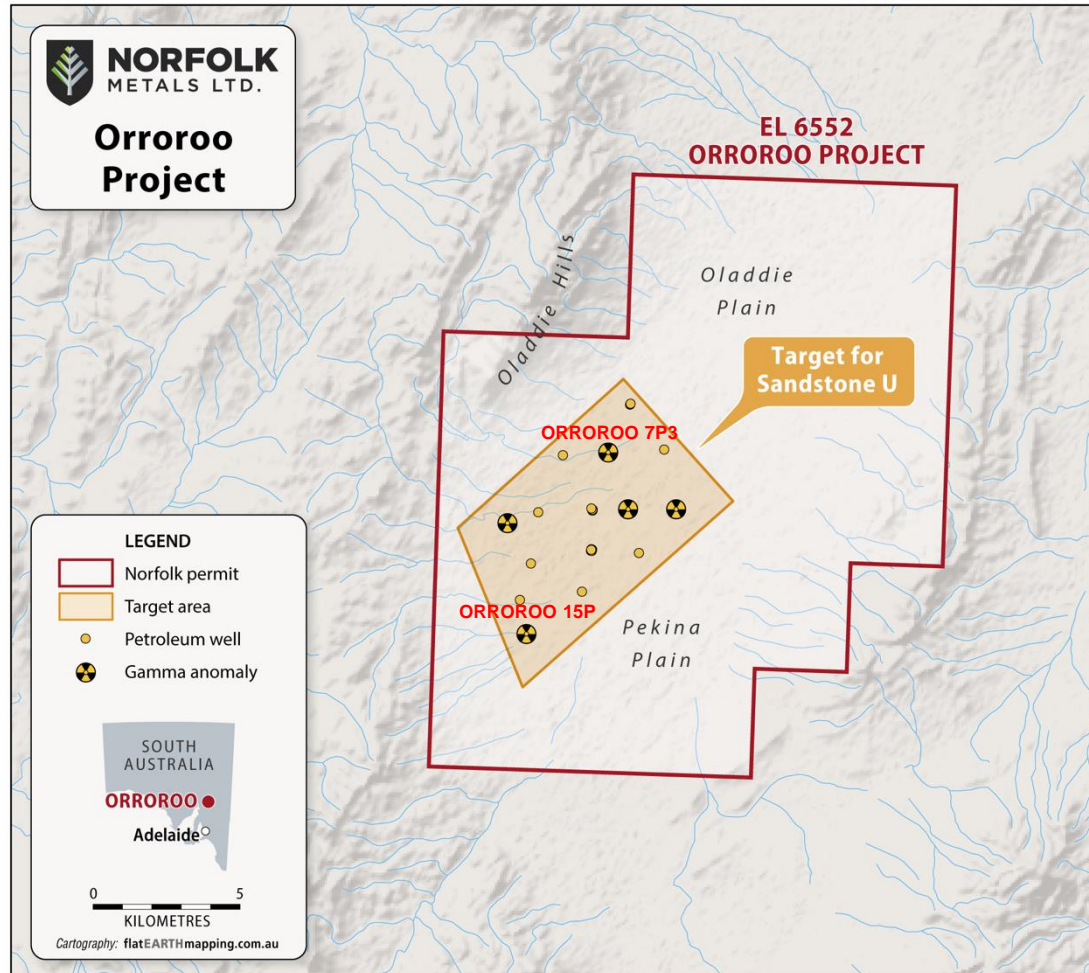

- ▶ Induced Polarization (IP) program covering the recently drilled **Target A2**
- ▶ IP program in approval process with Mineral Resources Tasmania (MRT)
- ▶ Seeking to identify conductor plates up to 300m depth
- ▶ Successful conductor plate identification **may indicate massive sulphide mineralization**

Proposed IP lines over Target A2 post successful visual results of 22RRD-001

SUBSEQUENT WORK PROGRAM

Orroroo Project

- ▶ Company to focus on IPO listed EL6552 utilising elevated gamma reading data from boreholes (32) drilled by Linc Energy in 2010
- ▶ Historical exploration within the Walloway Basin has been limited to its hydrocarbon potential
- ▶ Walloway Basin ‘hydrocarbon basin’ is similar to Kazakhstan and Niger which are host to world-class sandstone hosted uranium deposits
- ▶ Paleochannel (palaeoriver) hosted uranium roll fronts amenable to low cost in-situ recovery methods

SUBSEQUENT WORK PROGRAM

Orroroo Project

The highest single gamma anomalies are in wells **ORROROO 15P** (>900API) and **ORROROO 7P3** (>500API) *see map on slide 12

Gamma anomalies at depths of 100-140m

Orroroo work program planning;

- Completion of all necessary approvals
- Contract low cost re-entry to cased boreholes. PFN and Spectral Gamma.
- Aiming to determine if previous gamma anomalies were in fact one of three outcomes highlighted in IPO Independent Geologists Report as outlined below;
 1. **Direct detection of 'roll-front style' uranium mineralisation**
 2. **An oxidized tail environment where uranium has been leached from originally ore grade material, leaving behind unsupported 226Ra**
 3. Radiogenic elements unrelated to uranium mineralisation, such as mobile radium circulating in groundwaters or co-precipitated in sulphates

*Refer to Norfolk's prospectus released on ASX on 18 March 2022.
