

1 DECEMBER 2022

Wolf Pack Operations Update Intermediate Section, Drilled, Cased and Cemented in Place

HIGHLIGHTS

- Operations are proceeding on schedule, safely and without incident
- Intermediate section drilled, cased, and cemented in place
- · Commenced drilling of the curve

Perth, Western Australia – Brookside Energy Limited (ASX: BRK) (OTC Pink: RDFEF) (Brookside or the **Company)** is pleased to provide shareholders and investors with an update on operations from Brookside's Phase Two development drilling in the SWISH Area of Interest (**AOI**) in the world-class Anadarko Basin, the high-impact Wolf Pack 36-25-1S-4W SXH 2 Well (**Wolf Pack Well**) (Figure 2).

Present Operations

The intermediate hole has been successfully drilled and cased with steel pipe that has been cemented in place. Operations to commence drilling of the curve are currently underway (see Figure 1.)

Activity Planned

Continue to drill the curve.

Commenting on the announcement, Brookside Managing Director, David Prentice said:

"We are very pleased to provide this important update on the Wolf Pack Well operations.

"Successfully drilling to this point and setting the intermediate casing string is a critical part of the overall drilling operations and significantly de-risks forward operations as we set about drilling and landing the curve and ultimately drilling the horizontal section.

"We are looking forward to providing further updates as we finish up the curve and land the well in the target bench of the Sycamore formation."

Note:

- 1) The volumes stated in Figure 2 above for wells operated by companies other than Brookside are actual volumes produced, drawn from publicly available information reported by each of those entities.
- 2) In respect of the wells operated by Brookside (Jewell, Rangers, and Flames), please refer to the Company's relevant ASX releases for further information in respect of the flow rates. The Company confirms that it is not aware of any new information or data that materially affects the information included in that release and that all the material assumptions and technical parameters underpinning the estimates in that release continue to apply and have not materially changed

About the Wolf Pack Well

The Wolf Pack Well is a Black Mesa Energy, LLC (a controlled subsidiary of Brookside) operated well that is being drilled by Latshaw Rig 12 in Stephens County, Oklahoma. The well is being drilled as a mid-length horizontal well targeting the Sycamore Formation at an average depth of ~9,750 feet. The well will be drilled to a projected total measured depth of ~17,750 feet, with ~7,500 feet of lateral section drilled in the Sycamore that will subsequently be cased with production tubing to be perforated and treated to allow production of oil and rich gas.

ABOUT BROOKSIDE ENERGY LIMITED

Brookside is an Australian public company listed on the Australian (ASX: BRK), Frankfurt (8F3: FSE) and USA (OTC Pink: RDFEF) stock exchanges. The Company was founded in 2015, to focus on the mid-continent region of the US, where our deep and valued relationships enable us to work with local communities to ensure sustainable growth and value creation through the safe and efficient development of energy assets. Focused on exploitation not exploration, the Company generates shareholder value through a disciplined portfolio approach to the acquisition and development of oil and gas assets and the leasing and development of acreage opportunities. The Company's US subsidiary and manager of operations, Black Mesa, is an experienced mid-continent operator, which identifies opportunities and executes development for Brookside. Our business model effectively assigns risk and provides commercial incentives to maximize value for both parties.

ABOUT BLACK MESA ENERGY, LLC

Black Mesa Energy, a Brookside Energy controlled subsidiary, is a Tulsa-based oil & gas exploration and production company focused on profitable development of petroleum properties located in the Mid-Continent oil province of the United States. Our lean and highly specialized technical and operations team is committed to providing attractive returns for our investors and shareholders by generating and drilling high quality oil and gas prospects. The founders of Black Mesa have worked together for over 30 years at companies they previously founded, including Medallion Petroleum, InterCoast Energy and Brighton Energy. Over the course of their careers, the Black Mesa team has drilled hundreds of horizontal wells and thousands of vertical wells in numerous mid-continent oil and gas basins. In addition to the financial backing from the Black Mesa shareholders, Black Mesa partners with outside investors on larger-scale projects by offering non-operated direct working interest participation.
