

ASX ANNOUNCEMENT

17 JANUARY 2023

Entyr issued International Sustainability Certification

Entyr Limited ('Entyr' or 'the Company') (ASX: ETR) advises that, following a comprehensive audit of the Company's unique thermal desorption process and operation procedures for the processing of waste tyres, the Company has been issued certification under the International Sustainability and Carbon Certification program. Successful certification endorses and confirms the value of Entyr's process as **a source of sustainable products** for its tyre derived fuel and recovered carbon black to the chemical industry.

Late in 2022, an onsite audit was carried out by SGS Australia with performance data provided to SGS Germany to support the Company's application for the International Sustainability and Carbon Certification (ISCC Plus) program.

Entyr successfully achieved certification under the ISCC network (Cert-DE100-14040123). ISCC validates the principles of environmentally, economically and socially sustainable production with traceability, monitoring of carbon footprints and greenhouse gas emissions. Annual audits are required to maintain certification.

ISCC provides a physical, transparent system for certifying the sustainability of products that allow companies to utilize verified sustainable products along the whole supply chain. According to the ISCC Association website, examples of participants in the program include PepsiCo, Chevron, Siemens, Bayer, BP and Dow Chemicals.

Commercial Advantages

The ability to produce certified sustainable products is a key pillar of Entyr's ESG credentials. Certification under the scheme opens more national and international commercial markets to Entyr, with the potential to charge price premiums to customers given the proven sustainable nature of our products. Concurrently it allows customers to apply for carbon offsets to support their path to net zero. Certification supports and facilitates acceptance of Entyr's products in international markets such as EU, USA and UK, regions in which the Company is considering for future operations.

This validation continues to strengthen Entyr as a true ESG investment whilst increasing the commercial value of its products and process.

About Entyr Limited

Entyr Limited (formerly Pearl Global) (Entyr) (ASX: ETR) is a revolutionary tyre processing company that applies unique, next-generation thermal desorption technology to cleanly convert tyres into valuable sustainable products including waste to energy opportunities. Entyr holds Australia's first environmental approvals for thermal treatment of rubber and is in commercial production at its facility in Stapylton, Queensland.

Entyr's technology is a significant advancement on other methods of processing waste tyres due to low emissions, no hazardous by-products and requires no chemical intervention. It is the only process that meets the standard emissions criteria set by the Australian regulators for this type of technology.
