

ASX Release

25 January 2023

December 2022 Quarterly Report

HIGHLIGHTS

Duketon Project

- C2 nickel resource increased to **8.06Mt @ 0.57% Ni**
 - Equates to **46,243 tonnes contained nickel, 2,339 tonnes contained copper and 25,684 ounces of contained PGEs** (only Pt + Pd assayed)
 - This includes a **41% increase in tonnes & a 22% increase in nickel metal tonnes**
 - **99% of the C2 Mineral Resource** is now in the **Indicated category**
- Total combined JORC resource for Rosie and C2 is **102,527 nickel tonnes, 14,163 copper tonnes and 254,712 ounces PGEs**
- Diamond drilling completed at Rosie and Albany
- Duketon North MLEM Survey Phase 2 completed
- Bulge MLEM Survey completed

Tate Project

- MLEM Survey completed

Corporate

- Review of development options for Rosie and C2 Resources continuing.
- Cash and liquids at 31 December 2022 of \$18.2 million
- Post completion of quarter – sale of Tanami tenements to Black Cat Syndicate (ASX:BC8) for 1,500,000 BC8 shares and 1% NSR

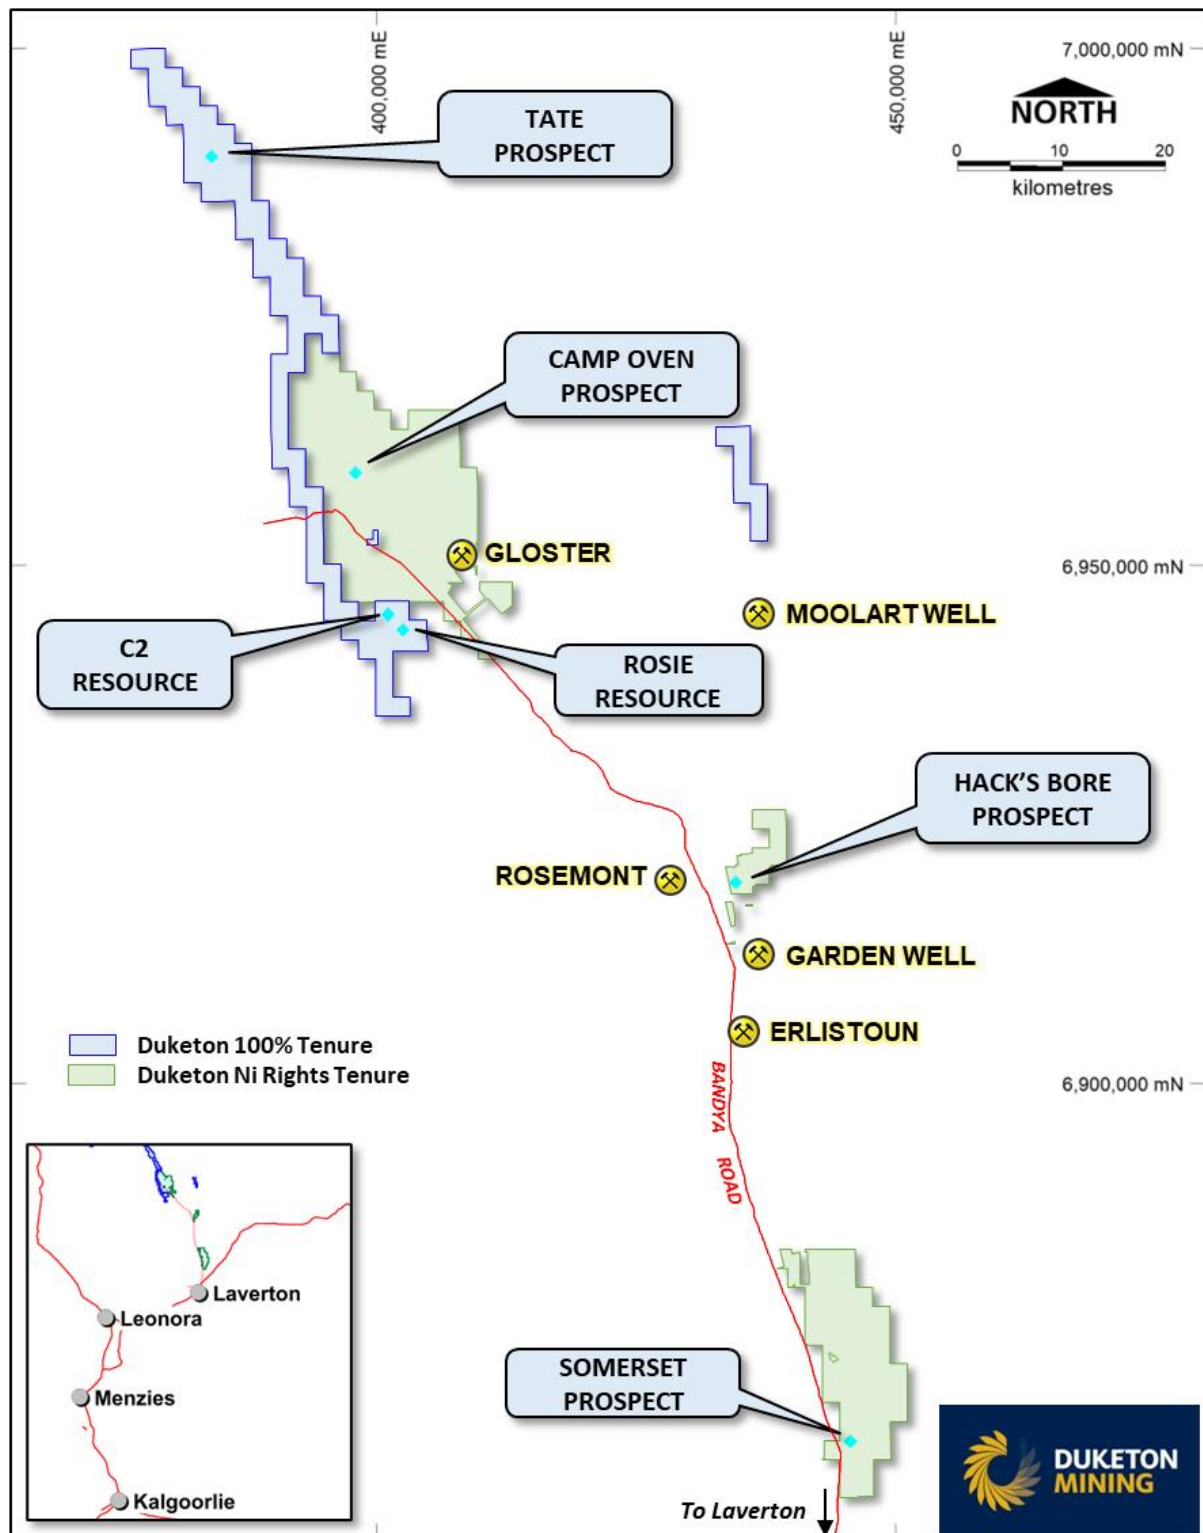

Figure 1: Plan View of the Duketon area showing Nickel Resources, Prospects and Tenements.

C2 Resource Increase (100% DKM)

During the quarter Duketon Mining Ltd (ASX: DKM, “Duketon” or “the Company”) announced an update to the JORC 2012 Indicated and Inferred Mineral Resource Estimate (MRE) for the C2 Nickel Deposit in the Duketon Belt, 120km north of Laverton. This update is based on additional drilling conducted since the last MRE in 2015 and includes all drilling conducted to date (see ASX announcement 12 December 2022).

The Indicated and Inferred Mineral Resource Estimate for C2 is **8.06 million tonnes at 0.57% nickel** and is reported in accordance with the 2012 JORC Code (Table 1). The resource estimate is reported at >0.4% Ni grade. Previously 100% of the C2 resource was reported as Inferred. Over **99% of the Resource is now classified as Indicated**. Mineralisation remains open in all directions.

The Mineral Resource contained metal is **46,263 tonnes of nickel, 2,339 tonnes of copper, 1,505 tonnes of cobalt and 25,684 oz of total PGEs** (Table 4).

Table 4: C2 Mineral Resource Contained Metal (December 2022)

Figure 2: Nickel Resource Growth Over Time by Category, The Bulge Area.

Diamond Drilling Rosie

Three diamond drillholes (DKDD0031-0033) were drilled at the Rosie Prospect for approximately 1400 metres (Figure 4). All three holes intersected mineralisation with assays expected late January.

Figure 3: Massive sulphides in DKDD0033 at Rosie

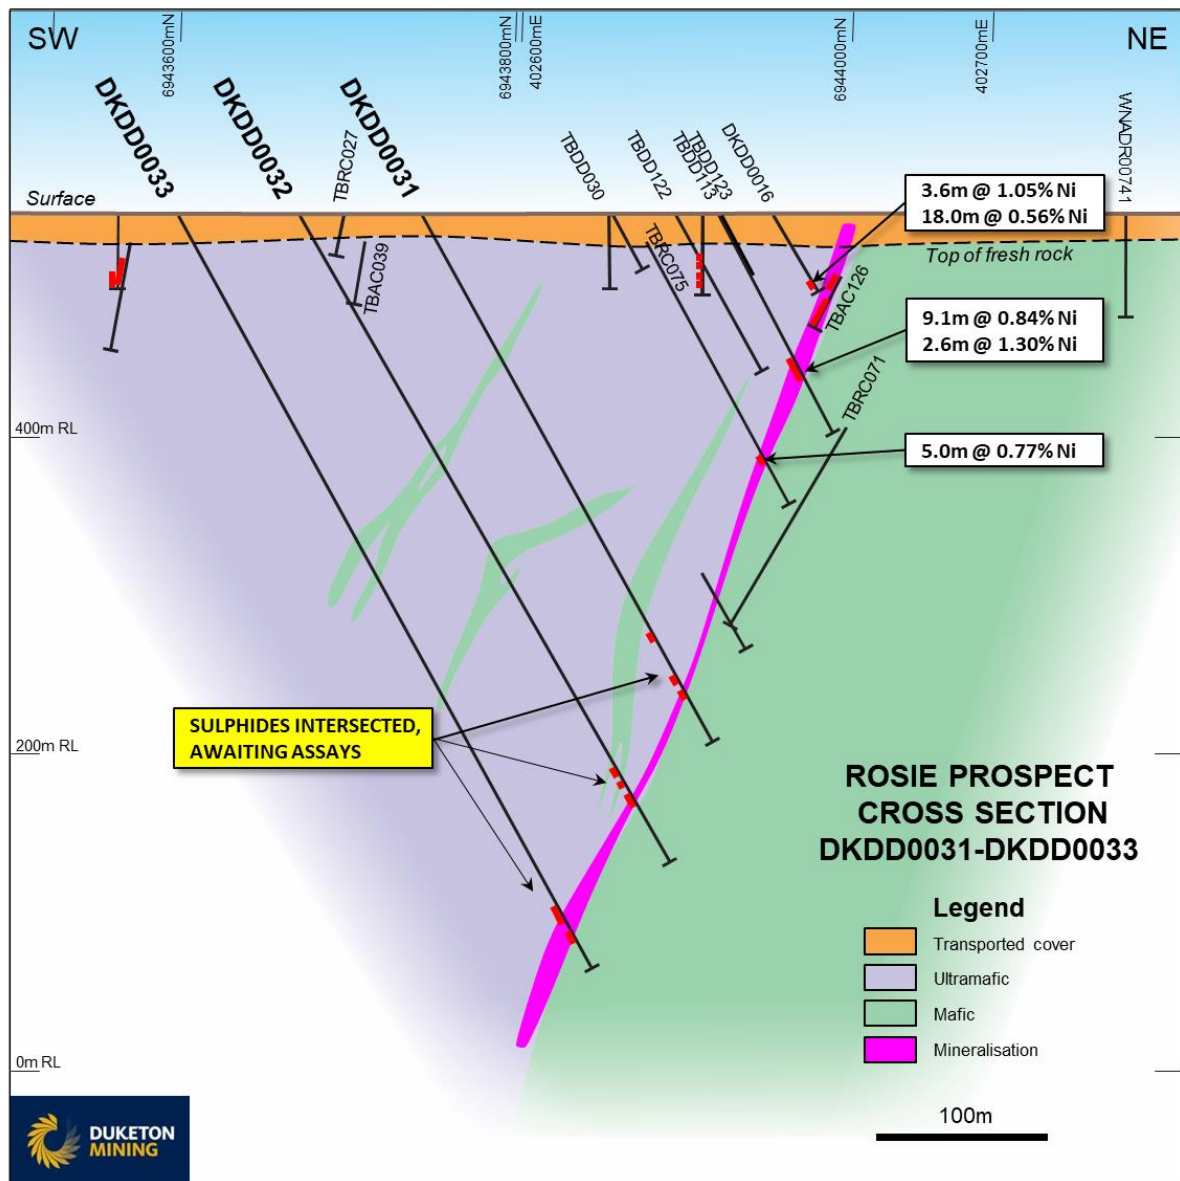

Figure 4: Cross Section of recent diamond drilling, Rosie.

Diamond Drilling Albany

One diamond drillhole was completed at Albany during the quarter, testing a MLEM anomaly. The hole was drilled to 541 metres and intersected a zone of heavily disseminated to matrix pyrite and pyrrhotite (iron sulphides) in sheared mafic rock from 495.6m to 500.5m.

Duketon North MLEM Survey

Phase 2 of the Moving Loop Electromagnetic (MLEM) survey that was continuing in the northern sector of the Duketon Project has now been completed. Numerous EM anomalies have been identified in this program. These are all mid-time anomalies and require further geological work prior to being drilled.

Bulge MLEM Survey

Additional lines of MLEM survey over the Bulge ultramafic was completed during the quarter with multiple anomalies identified that require follow up.

Nine (9) lines in total were completed over The Bulge in two parts for 15 line kilometres and 150 stations.

A large, deep, sub vertical and southerly plunging anomaly was modelled along strike from the C2 contact to the south. The anomaly is broad and deep with this modelled scenario best fitting the known geology. The conductance is modelled at approximately **5,000 siemens** which is the right order of magnitude for nickel sulphides.

Historic drilling up dip of this plate at the base of the ultramafic has intersected significant nickel and PGE mineralisation including:

- **4.56m @ 1.40g/t Pt + Pd & 0.53% Ni**
- **3.25m @ 1.78g/t Pt + Pd & 0.74% Ni**
- **5.25m @ 1.27g/t Pt + Pd & 0.87% Ni**

This survey has also extended the MLEM response to the north and down dip of the northern extent of Rosie mineralisation. Several other anomalies were identified in the area but are attributed to known stratigraphic conductors. Further technical review is being undertaken.

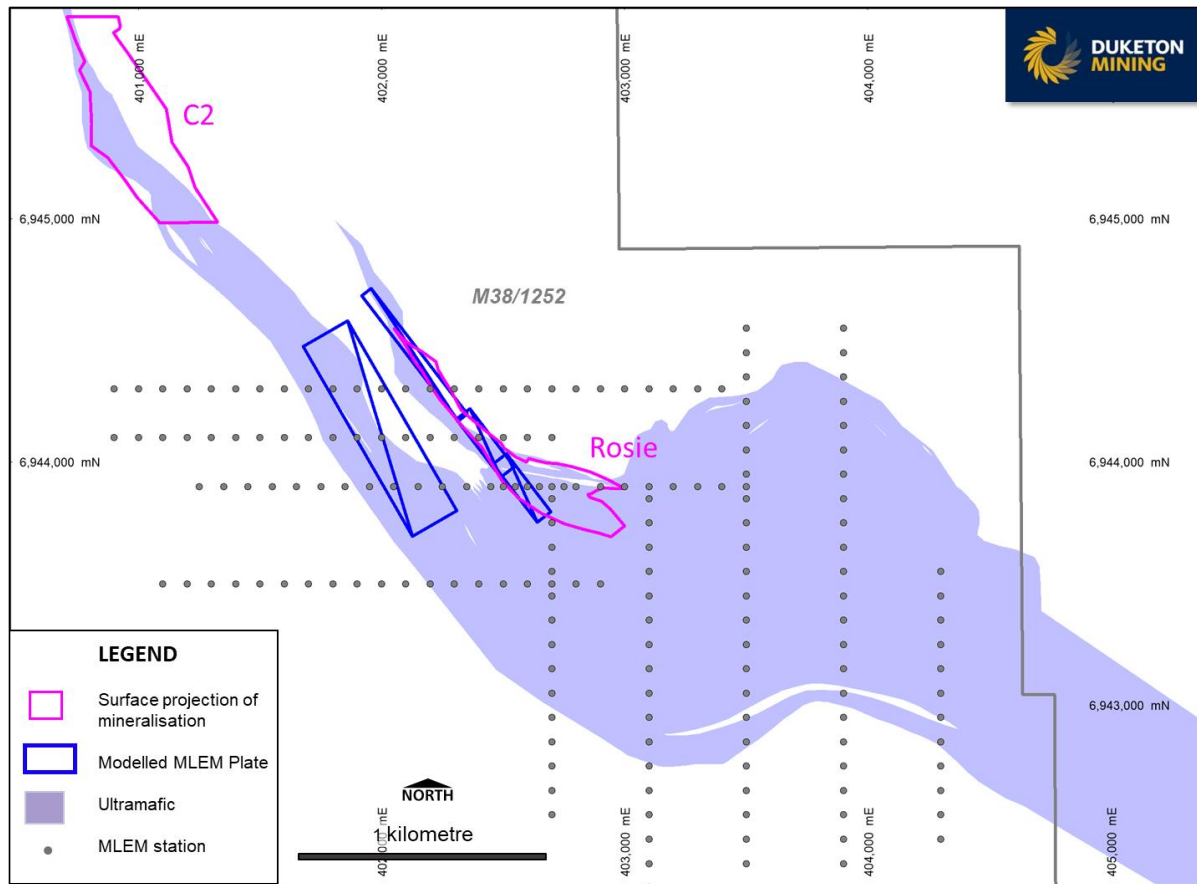

Figure 5: Map of modelled MLEM plates over an interpreted geology image showing the host ultramafic.

Tate MLEM Survey

The MLEM survey over the Tate project has been completed and has identified several EM anomalies both internal and flanking the larger of the two intrusions. This area is covered by transported sands and very little is known about these intrusions. Further geological and geophysical work is required to put these into context (see Figure 6).

Figure 6: Map of EM Conductors at Tate against a magnetic image. Black dots are EM stations. Red dots and white lines are EM anomalies.

Mineral Resources (100% DKM)

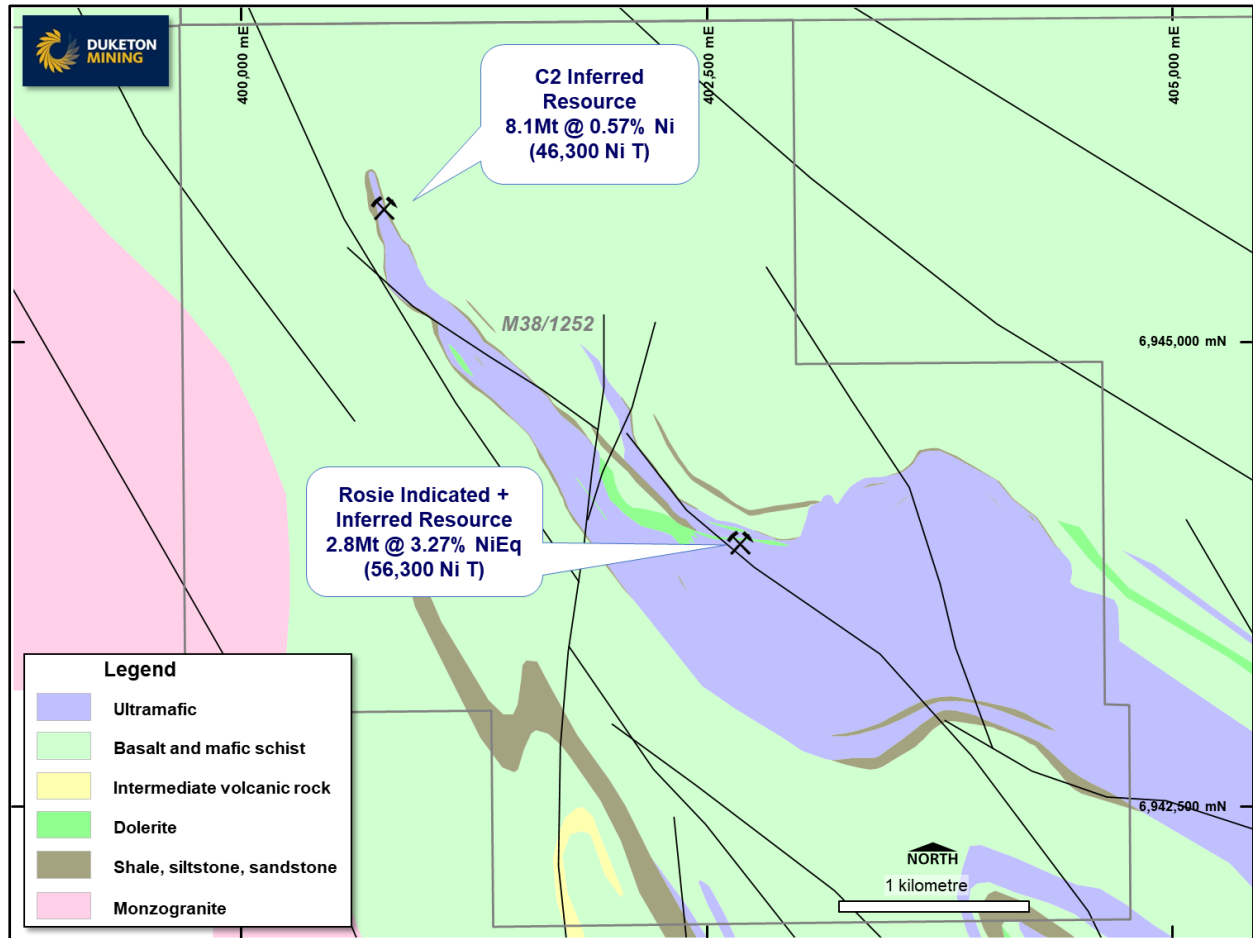

Figure 7: Plan of The Bulge Complex

Rosie

The Indicated and Inferred Mineral Resource Estimate for Rosie of 2.77 million tonnes at 3.27% nickel equivalent is reported in accordance with the 2012 JORC Code. The resource estimate is reported at >1% NiEq. Over 72% of the Resource has been classified as Indicated with the remainder in the Inferred Category. Mineralisation remains open in all directions.

The Mineral Resource contained metal stands at 56,300 tonnes of nickel, 11,800 tonnes of copper, 1,610 tonnes of cobalt and over 229,000 oz of total PGEs (Table 8).

Resource Category	Tonnes (kt)	Ni%	NiEq_% ⁽¹⁾
Indicated	2,012	2.11	3.35
Inferred	761	1.81	3.06
TOTAL	2,773	2.03	3.27

Table 5: Rosie Mineral Resource Statement (February 2022) >1.0% NiEq

(1) Assumptions for the nickel equivalent are: Prices (in USD) \$8.00/lb Ni, \$3.65/lb Cu, \$15.30/lb Co, \$1,100/oz Pt, \$2,300/oz Pd and \$15,500/oz Rh. Recovery assumptions from metallurgical test work are: Pentlandite domain 96.9% Ni, 99.5% Cu, 95.1% Co, 78.2% Pt, 97.6% Pd and 83.4% Rh. Violarite domain 88.7% Ni, 94.5% Cu, 88.5% Co, 57.6% Pt, 87.3% Pd and 64.8% Rh.

Rosie Nickel Resource >1% NiEq							
Classification	Sulphide	Tonnes	Ni (%)	Cu (%)	Co (ppm)	Total PGEs (g/t)	NiEq (%)
Indicated	Pentlandite	1,191,555	2.4	0.42	642	2.7	3.76
	Violarite	820,999	1.7	0.39	504	2.5	2.75
	Sub-Total	2,012,553	2.1	0.41	585	2.6	3.35

Table 6: Rosie Mineral Resource Grade

Classification	Ore Type	Contained Metal			
		Ni (t)	Cu (t)	Co (t)	Total PGEs (oz)
Indicated	Pentlandite	28,524	4,978	764	104,868
	Violarite	13,966	3,230	414	64,869
	Sub-Total	42,490	8,208	1,178	169,737
Inferred	Pentlandite	12,786	3,337	403	55,740
	Violarite	987	279	29	3,551
	Sub-Total	13,774	3,616	432	59,291
Total		56,264	11,824	1,610	229,028

Table 7: Rosie Mineral Resource Contained Metal

- (3) The following equations were used to calculate nickel equivalent – Cu and Co measured in ppm and PGEs measured in ppb – all converted to percentages for NiEq calculation:
- (4) Pentlandite domain: $NiEq = Ni\% + (Cu\% * 0.995 * (3.65/8)) + (Co\% * 0.951 * (15.3/8)) + (Pt\% * 0.782 * (1100 * 14.583/8)) + (Pd\% * 0.976 * (2300 * 14.583/8)) + (Rh\% * 0.834 * (15500 * 14.583/8))$
- (5) Violarite domain: $NiEq = Ni\% + (Cu\% * 0.945 * (3.65/8)) + (Co\% * 0.885 * (15.3/8)) + (Pt\% * 0.576 * (1100 * 14.583/8)) + (Pd\% * 0.873 * (2300 * 14.583/8)) + (Rh\% * 0.648 * (15500 * 14.583/8))$ where 14.583 is the amount of troy ounces per pound.

The resource includes a reportable nickel equivalent number based on metallurgical work completed to determine recoveries (see ASX announcement 8th July 2020 & 10th July 2020). It is the opinion of DKM that all the elements included in the metal equivalents calculation have a reasonable potential to be recovered and sold.

C2

The Indicated and Inferred Mineral Resource Estimate for C2 is **8.06 million tonnes at 0.57% nickel** and is reported in accordance with the 2012 JORC Code. The resource estimate is reported at >0.4% Ni grade. Over **99% of the Resource is classified as Indicated**. Mineralisation remains open in all directions.

The Mineral Resource contained metal stands at **46,263 tonnes of nickel, 2,339 tonnes of copper, 1,505 tonnes of cobalt and 25,684 oz of total PGEs** (Table 9).

C2 Nickel Resource >0.4%Ni

Indicated	45,790	2,325	1,490	25,455
Inferred	474	15	14	229
Total	46,263	2,339	1,505	25,684

Table 9: C2 Mineral Resource Contained Metal

Combined Rosie and C2

The total JORC compliant nickel resource for the Bulge Area (Rosie and C2) now stands at 102,527 tonnes of nickel, 14,163 tonnes of copper and 254,712 ounces of PGEs.

Combined Metal Inventory, The Bulge Area			
Deposit	Ni tonnes	Cu tonnes	PGE oz
Rosie	56,264	11,824	229,028
C2	46,263	2,339	25,684
TOTAL	102,527	14,163	254,712

Table 10: Combined Metal Inventory, The Bulge Area

Regional Exploration

Projects include:

- Stephens – base metals VMS project in the Gullewa-Koolanooka Greenstone Belt with a number of historical significant drill intercepts
- Doris – uranium tenement within the Narryer Terrane, 125km north of Meekatharra
- Cunyu – project covering the entire Merrie Greenstone Belt, early stage exploration
- Lake Barlee – gold project surrounding Halleys East Gold Mine, 200km north of Southern Cross
- Fisher South – gold and nickel project at the southern end of the Fisher Greenstone Belt

Tenement applications:

- Otways – copper project located in the Pilbara

Tenement Disposal:

- Eagle – sale of Tanami tenements to Black Cat Syndicate (ASX:BC8) for 1,500,000 BC8 shares and 1% NSR

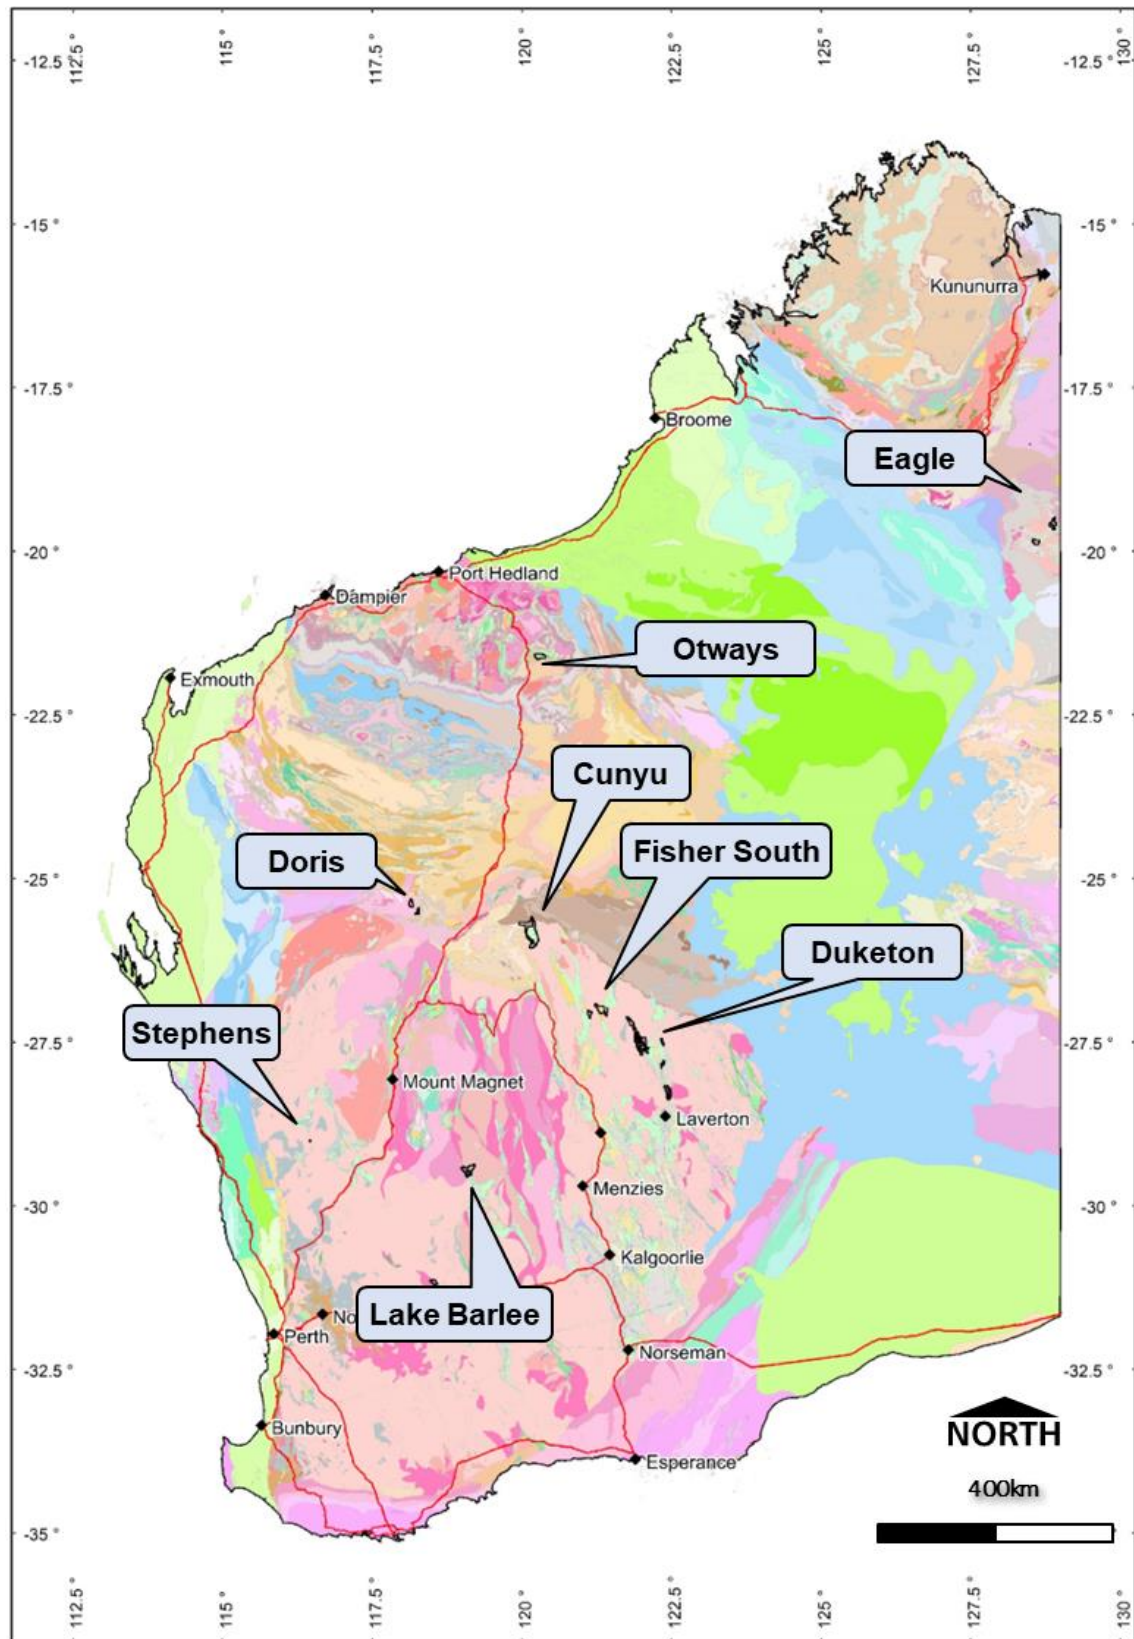

Figure 8: Duketon Regional Tenement Acquisition

Ongoing Strategy

Duketon remains well positioned to drive value from two approaches:

1. Expand/Study Nickel Resources - Complete mining study and target extensions to Rosie C2 and the greater area for Ni-Cu-PGE's
2. New Tenure – Opportunistically acquire new tenure via opportunistic applications or by simple/low-cost commercial means.

Corporate

At 31 December 2022 Duketon had approximately **A\$18.2M** available from cash reserves of **A\$14.2M** and a liquids position of circa **A\$4.0M**.

ASX Additional Information

Exploration and evaluation expenditure during the quarter was \$1,640,000 associated with diamond drilling, assaying, geophysical surveys, resource updates, mining studies and tenement compliance costs. Details of exploration activity during the quarter are set out in this report. There were no substantive mining production and development activities during the quarter. During the quarter, the Company made cash payments of \$106,000 to related parties and their associates. This was the aggregate amount paid to the directors including salary, directors' fees, consulting fees and superannuation.

Authorised for release by:

Stuart Fogarty
Duketon Mining - Managing Director

The information in the announcement that relates to production targets or financial information derived from a production target is extracted from the ASX announcement 28 April 2021 for the Rosie Scoping Study and is available to view on the Company's website (www.duketonmining.com.au). The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and that all material assumptions underpinning the production target or the financial information derived from the production target in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in the announcement that relates to Mineral Resources for Rosie is extracted from the ASX announcement 10 March 2022 and is available to view on the Company's website (www.duketonmining.com.au). The information in the announcement that relates to Mineral Resources for C2 is extracted from ASX announcement 12 December 2023. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and

have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in this report that relates to exploration results is based on information compiled by Ms Kirsty Culver, Member of the Australian Institute of Geoscientists (AIG) and an employee of Duketon Mining Limited. Ms Culver has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity that is being undertaken to qualify as a competent person as defined in the JORC Code 2012. Ms Culver consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

Appendix 1. Summary of Mining Tenements

As at 31 December 2022 the Company had an interest in the following tenements:

Tenement number	Project	State	Status	Interest at beginning of quarter	Interest at end of quarter	Acquired/Disposed
E38/1997	Mt Mabel	WA	Granted	100% Ni (note 1)	100% Ni (note 1)	N/A
E38/2666	Duketon	WA	Granted	100% Ni (note 1)	100% Ni (note 1)	N/A

(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
6. By the Company lodging this Appendix 5B, the Managing Director and CFO declare that the Appendix 5B for the relevant quarter:
 - presents a true and fair view, in all material respects, of the cashflows of the Company for the relevant quarter and is in accordance with relevant accounting standards;
 - the statement given above is founded on a sound system of risk management and internal compliance and control which implements the policies adopted by the Board; and
 - the Company's financial records have been properly maintained and the Company's risk management and internal compliance and control system is operating efficiently and effectively in all material respects.
