Bulletin Resources Limited (“Bulletin”, “BNR”) is pleased to announce that two new tenement applications have been added to the Mt Farmer Project.

These new tenement applications almost double the area of the Mt Farmer Project from 59km² to 106km². The project completely surrounds Aldoro’s 2km² P59/2137 which hosts the Niobe Rubidium-Lithium Project and a resource of 4.6Mt @ 0.17% Rb₂O and 0.07% Li₂O (Figure 1) (refer ARN ASX announcement dated 12 October 2022).

Bulletin’s tenement applications have over 5km strike of the potential greenstone host to the Rubidium bearing pegmatite unit. The applications also cover potential northeast extensions to the Dalgara gold mine.

The applications are progressing through the DMIRS tenement grant process and on-ground works will commence upon grant of the Exploration Licences.
