

Talga Presentation at Euroz Hartleys Electric Vehicle Anode and Graphite Forum

Battery and advanced materials company Talga Group Ltd (“**Talga**” or “**the Company**”) (**ASX:TLG**) is pleased to provide a copy of the presentation that was delivered by the Company’s Managing Director Mark Thompson during the Euroz Hartleys EV Anode and Graphite Forum today, Tuesday 31 January 2023.

The presentation is available on the Company’s website via the link below:

About Talga

Talga Group Ltd (ASX:TLG) is building a European battery materials supply chain to offer products critical to the green transition. Talga's innovative technology and vertical integration of 100% owned Swedish graphite resources provides security of supply and creates additional value for stakeholders.

Forward-Looking Statements & Disclaimer

Statements in this document regarding the Company's business or proposed business, which are not historical facts, are forward-looking statements that involve risks and uncertainties, such as estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Since forward-looking statements address future events and conditions, by their very nature, they involve inherent risks and uncertainties. Actual results in each case could differ materially from those currently anticipated in such statements. Investors are cautioned not to place undue reliance on forward-looking statements.

This announcement may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction. This document does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this representation are not intended to represent recommendations of particular investments to particular persons.

Mark Thompson
Managing Director

Cautionary Statement and Disclaimer

Talga Group Ltd ACN 138 405 419 (the Company) is the issuer of this presentation.

Niska Scoping Study

The Niska Scoping Study is a preliminary technical and economic study of the potential viability of developing the Nunasvaara North, Niska South and Niska North graphite deposits by constructing an integrated mining and refining operation to produce Talga's anode products for Li-ion batteries. It is based on low level technical and economic assessments that are not sufficient to support the estimation of ore reserves or to provide assurance of an economic development case. Further evaluation work and appropriate studies are required before the Company will be in a position to estimate any ore reserves or to provide any assurance of an economic development case or certainty that the conclusions of the Scoping Study will be realised. The Scoping Study is based on the material assumptions outlined in the announcement of 7 December 2020. These include assumptions about the availability of funding. While Talga considers all of the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the Scoping Study will be achieved. To achieve the range of outcomes indicated in the Scoping Study, funding in the order of US\$1,000 million plus contingencies may be required. Investors should note that there is no certainty that the Company will be able to raise that amount of funding when needed. It is also possible that such funding may only be available on terms that may be dilutive to or otherwise affect the value of the Company's existing shares. It is also possible that the Company could pursue other 'value realisation' strategies such as a sale, partial sale or joint venture of the project. If it does, this could materially reduce the Company's proportionate ownership of the deposits covered by the Niska Scoping Study. Given the uncertainties involved, investors should not make any investment decisions based solely on the results of the Scoping Study.

Forward-looking statements

This presentation contains forward-looking statements. Those forward-looking statements reflect views held only as at the date of this presentation. Any such statement is subject to inherent risks and uncertainties. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement, and such deviations are both normal and to be expected. Recipients must make their own assessment about the likelihood of a matter, about which a forward-looking statement is made, occurring. The Company makes no representation about the likelihood of a matter, about which a forward-looking statement is made, occurring. The Company and its directors, employees, agents, advisers and consultants: give no representation or warranty to a recipient of this presentation as to the accuracy or completeness of the statements contained in this presentation or in relation to any other matter; and to the fullest extent permitted by law, disclaim responsibility for and have no liability to a recipient of this presentation for any error or omission in or for any statement in this presentation.

Reliance on presentation

A recipient of this presentation must make their own assessment of the matters contained herein and rely on their own investigations and judgment in making an investment in the Company. This presentation does not purport to contain all of the information required to make an informed decision whether to invest in the Company. Specifically, this presentation does not purport to contain all the information that investors and their professional advisers would reasonably require to make an informed assessment of the Company's assets and liabilities, financial position and performance, profits, losses and prospects.

Not a recommendation or financial advice

The information in this presentation is not a recommendation to subscribe for securities in the Company and does not constitute financial advice. Any person who intends to subscribe for securities must conduct their own investigations, assessment and analysis of the Company and its operations and prospects and must base their investment decision solely on those investigations and that assessment and analysis. Prospective investors should consult their own legal, accounting and financial advisers about an investment in the Company.

Photographs and images

Photographs, maps, charts, diagrams and schematic drawings in this presentation are owned by and have been prepared or commissioned by the Company, unless otherwise stated. Maps and diagrams used are illustrative only and may not be drawn to scale. Unless stated otherwise, all data contained in charts, graphs and tables is based on information available at the date of this presentation.

Introduction to Talga Group

Talga is building a European supply chain of battery & advanced materials critical to the shift towards a more sustainable world

The company is differentiated by:

- **Full mine-to-anode vertical integration**
- **Ownership of product technology**
- **Unique high grade mineral sources**
- **Green products and proximity to market**

Our strong in-house expertise spans battery materials and processing technology, product development and marketing as well as mineral exploration and mining

Talga Operations

Perth, Australia

Group head office

Luleå & Kiruna, Sweden

Anode production & graphite deposits

Cambridge, UK

Product and R&D technology centre

Rudolstadt, Germany

Production process pilot facility & EU customer network

Osaka, Japan & Hong Kong

Commercial offices & product development

Experienced Board and Management Team

Strong technological and operational leadership with on the ground European presence

Board of Directors

Terry Stinson

Non-Executive Chairman

Over 35 years' Executive and Non-Executive Director experience, working for global innovation companies. Formerly the CEO and Managing Director of Orbital Corporation, VP for Global Fuel Systems at Siemens AG and CEO of Synerject. Currently the Non-Executive Chairman of Carnegie Clean Energy Limited and Non-Executive Director of Aurora Labs.

Mark Thompson

Managing Director & Founder

Over 30 years' global experience in the mineral industry including resource project development, technology and management. Founded Talga in 2009 and listed the company on the Australia Securities Exchange in mid 2010. A member of the Australian Institute of Geoscientists and the Society of Economic Geologists.

Grant Mooney

Non-Executive Director

Strong corporate advisory background with extensive experience in equity capital markets, corporate governance and M&A transactions. A member of the Institute of Chartered Accountants in Australia. Currently a Non-Executive Director of several ASX listed companies.

Steve Lowe

Non-Executive Director

Strong business management and taxation background with more than 20 years' experience consulting to corporate and high wealth clients. A Fellow of the Taxation Institute of Australia and a member of the Australian Institute of Company Directors.

Ola Rinnan

Non-Executive Director

Extensive commercialisation and leadership experience across the energy, banking and finance sectors. Has held numerous board positions for European listed companies and financial institutions including Non-Executive Directorships in Smedvig group companies and DFCU Bank.

Key Management Personnel and Technical Leadership

Per-Erik Lindvall

Talga AB Chairman

A well-known business leader in northern Sweden with a long standing background in the Swedish mining industry including as former Vice President of LKAB. Per-Erik also holds several board assignments and has for many years been a driving force in creating a new, sustainable industrial cluster in northern Sweden.

Melissa Roberts

Chief Financial Officer

Over 20 years' experience in the global resources industry across corporate and commercial roles, most recently with global mineral producer Iluka Resources. Melissa joined Iluka in 2009 and held a range of senior roles within the business in Commercial, Investor Relations, Business Development and Information Technology.

Martin Phillips

Chief Operating Officer & European CEO

Experienced commercial and project manager with over 25 years of global metals and mining sector experience. Previous positions include engineering and management roles in battery recycling programs and smelting innovations at MIM's Mt Isa and UK operations. Mr Phillips was former Commercial Manager of Iluka Resources Ltd.

Dean Scarparolo

Company Secretary

A wealth of experience in developing and managing finance departments of ASX listed resource companies. A member of CPA Australia with over 25 years in roles spanning exploration, development and operations across Australia, Africa and Europe.

Corporate Overview

ASX:TLG (12 months)

STOCKMARKET CODES/TICKERS

Primary listing in Australia on the ASX (**TLG**)
with OTC trading in Germany (**TGX**) and US (**TLGRF**)

CAPITAL STRUCTURE

Market Capitalisation:	\$584.2M
Listed Shares:	334.3M
Unlisted Options:	12.1M ⁽¹⁾
Cash as at 31 December 2022:	\$23.3M

MAJOR SHAREHOLDERS

Kinetic Investment Partners	4.8%
Mark Thompson – M. Director	4.3%
Pentwater Capital Management	3.6%
UBS AG (Private Banking)	2.9%
Yandal Investment Pty Ltd	1.6%

Total number of shareholders 11,596

Quality ESG commitment

- ▶ 1st resource company committed to EU Principles for Sustainable Raw Materials
- ▶ High standard of corporate governance
- ▶ Social and Environmental Management Systems and Policies in place accords to Equator Principles
- ▶ Sustainability and People report published annually. Environmental studies and stakeholder consultations completed with diligence and care. 11 years of operating experience in Sweden
- ▶ Committed to positively contribute to development of communities and minimise adverse impact on the environment

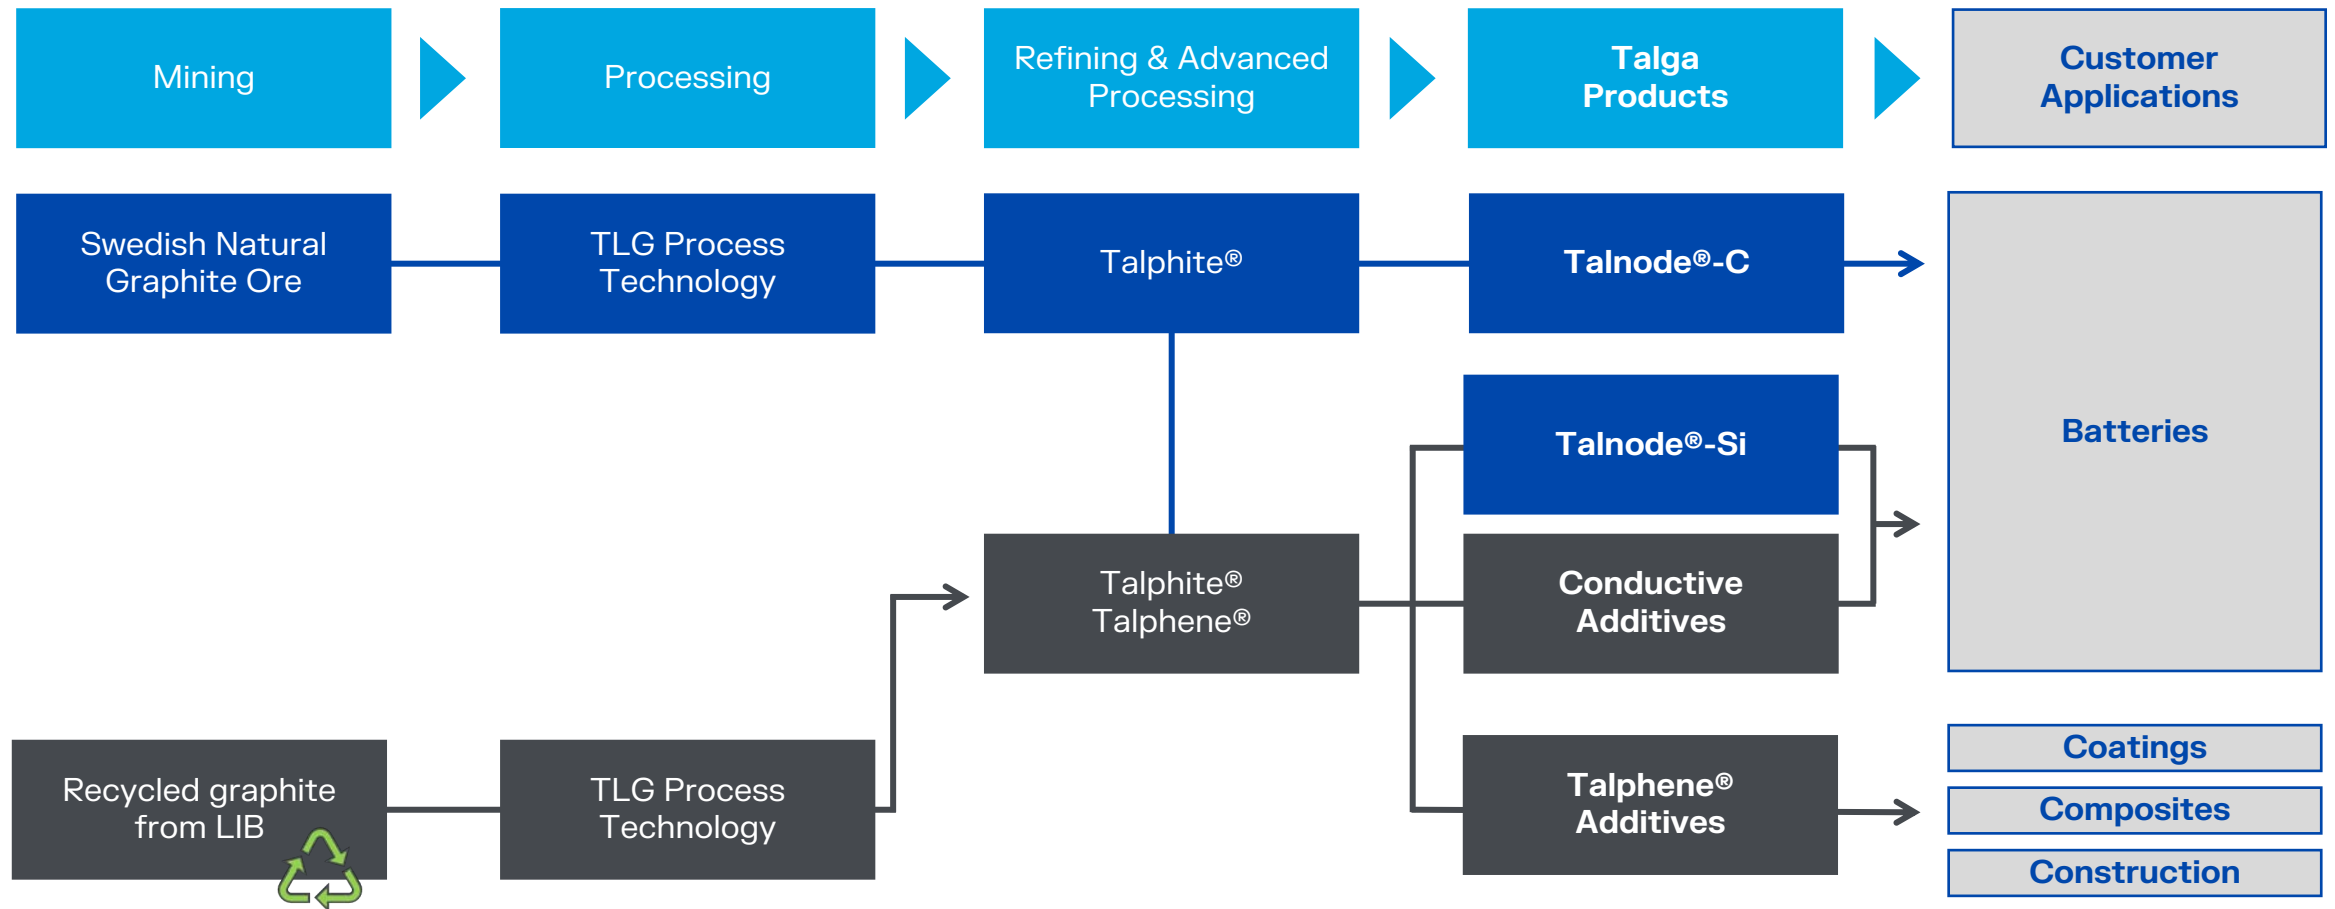

An aerial photograph of a two-lane asphalt road that curves through a dense forest. A small, bright pink car is driving on the road. The trees are mostly green, with some yellowing foliage visible. The overall scene is serene and natural.

Our Mission

**to enable the world's most
sustainable batteries and consumer products
through innovative graphitic materials**

Talga Technology and Products Map

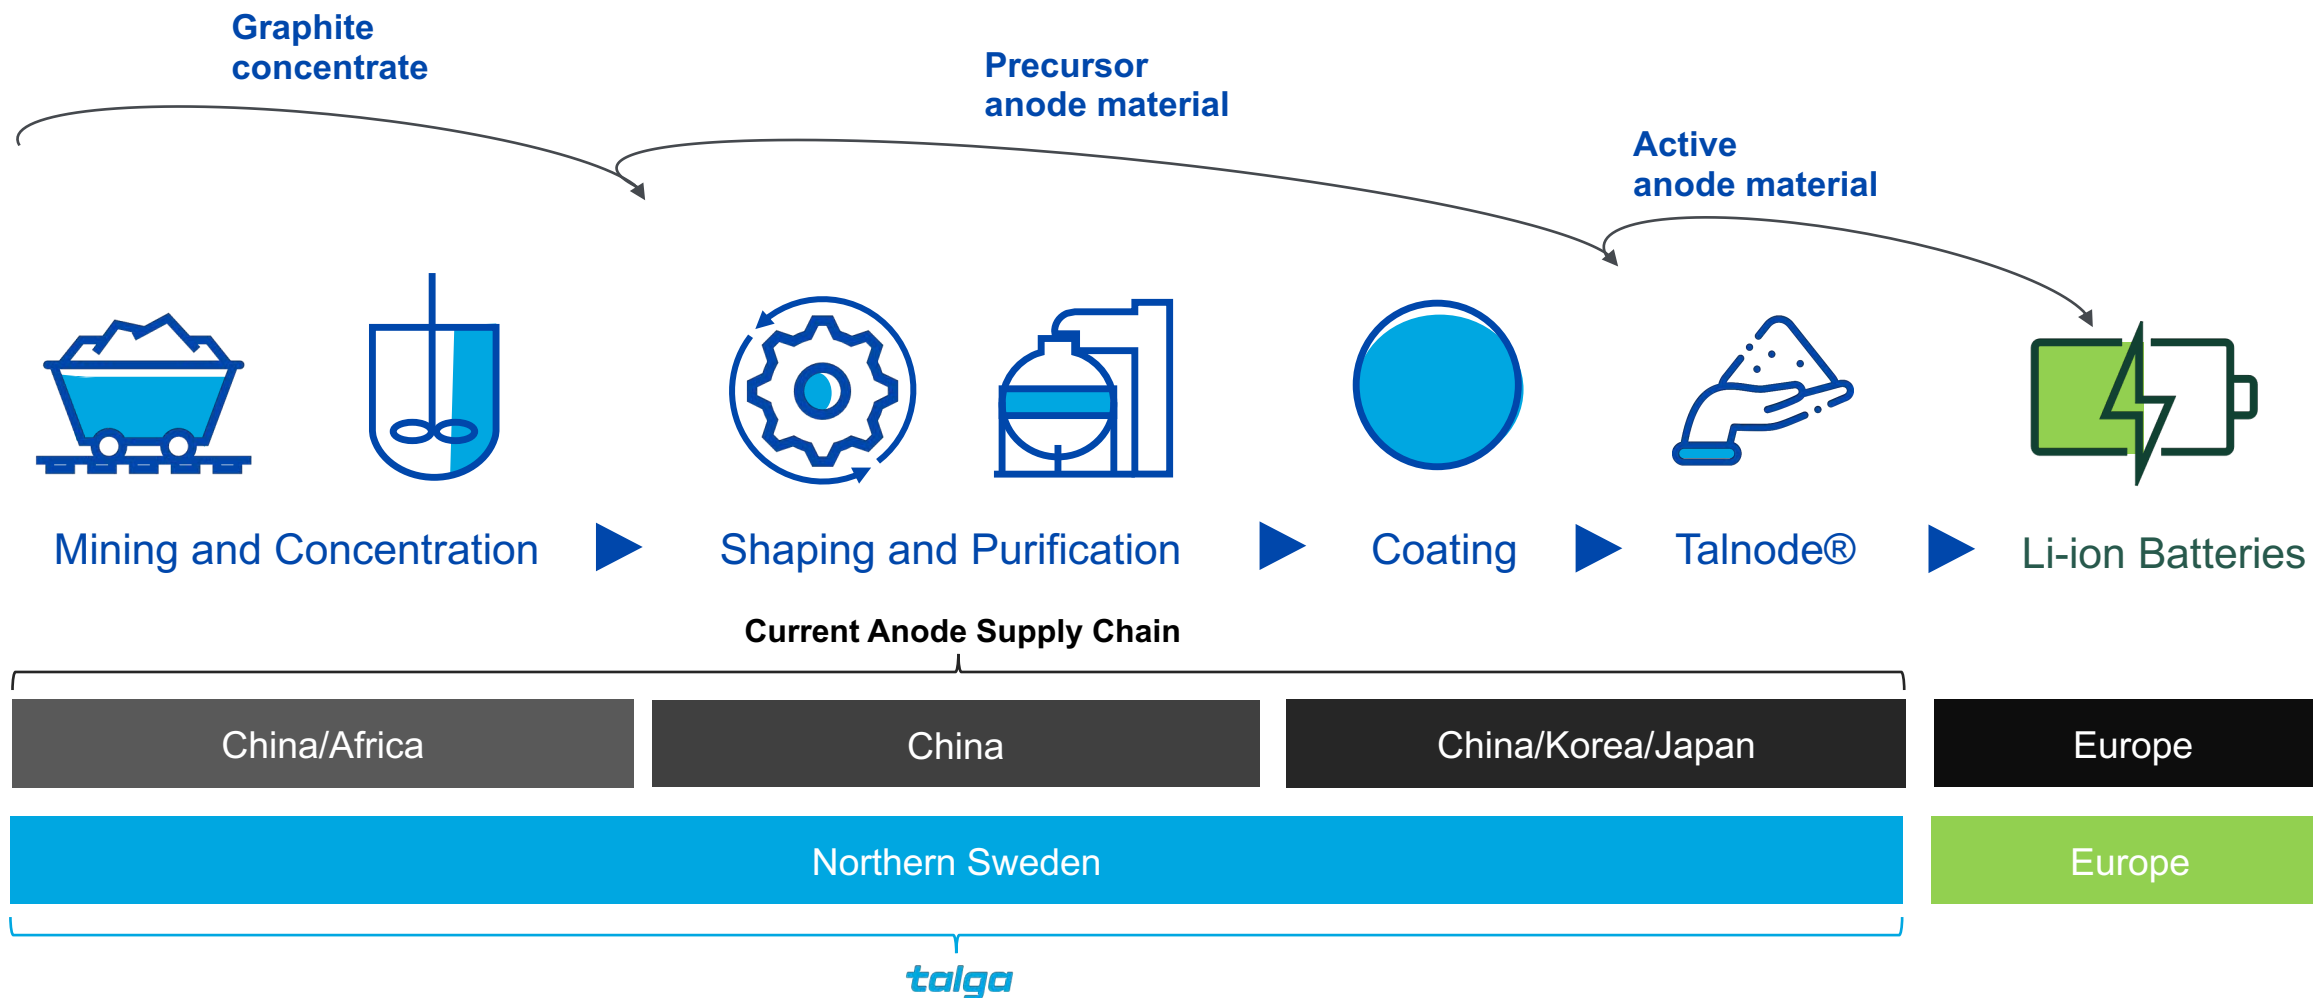

Diverse range of battery and advanced materials produced from graphite sources

Talga is building a fully integrated Li-ion battery anode supply chain in Sweden

Initial 19,500tpa of coated anode production
using renewable energy and high grade,
responsibly extracted natural graphite from
Talga's Vittangi project

Swedish anode for the European green transition

Flagship anode product: Talnode®-C

Suitable as stand-alone battery anode or blend due to its high energy density

- ✓ Low resistance, higher thermal efficiency and low swelling more akin to synthetic anodes than natural
- ✓ Fast charge rate, high performance at low temperatures and excellent capacity retention
- ✓ In advanced qualification processes with numerous battery and auto OEM customers

Green credentials

Talnode[®]-C has a vastly lower emissions profile than incumbent graphite anodes. It is produced with:

- **Responsible mining of high-grade (low volume) natural graphite**
- **100% renewable electricity**
- **Secure, short supply chain directly to customers**

Hitachi Life Cycle Assessment shows production of 1kg Talnode[®]-C emits 1.47kg CO₂-eq¹ (~20x lower than incumbents)

Path to >100,000tpa anode production

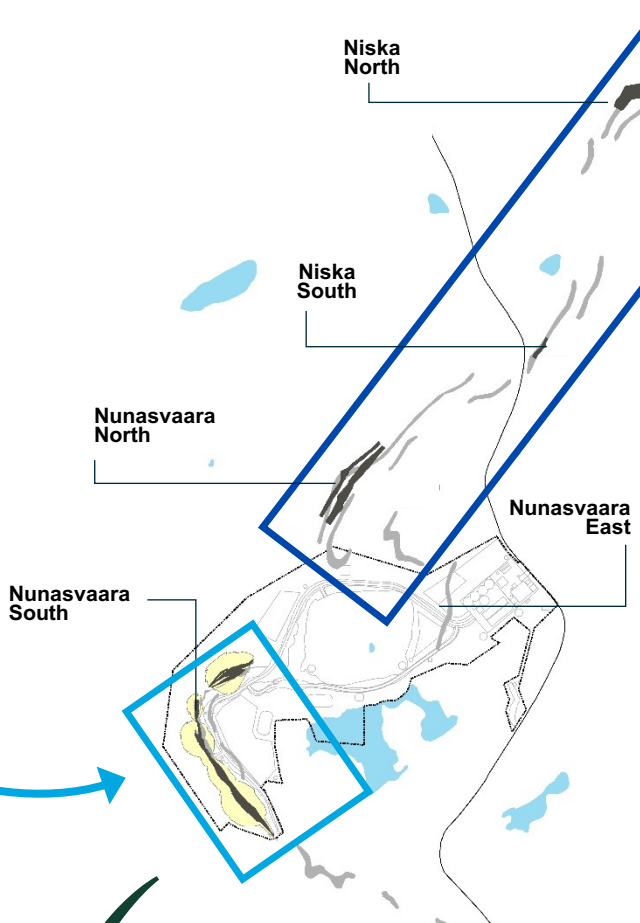

Niska adds to Vittangi to make Talga one of the largest anode producers outside China

Nunasvaara South⁽¹⁾ (2021 DFS)

Talnode®-C	19,500tpa

2022 Trial Mining - Vittangi Graphite Project

Electric Vehicle Anode Plant (EVA), Luleå, Sweden

Customer offtake strategy

Talga is securing anode supply agreements with multiple customers

- ▶ ACC (co-owned by Mercedes-Benz, Stellantis, and Saft) non-binding offtake term sheet for:
 - ▶ Supply of 60,000 tonnes of Talnode®-C over initial 5-year term starting 2026 from Talga's Vittangi Anode Project in Sweden
 - ▶ Expected to include supply of ramp up volumes over 2023 – 2025
- ▶ Verkor
 - ▶ LOI sets out non-binding terms to supply Talnode®-C over a 4- to 8-year period
 - ▶ Binding term sheet targeting Q1 2023

Graphite Battery Anode Pricing

- ✓ Rising demand for Li-ion batteries for EV production will continue to build pressure in the graphite anode supply chain
- ✓ Benchmark Mineral Intelligence has launched an anode price assessment to provide price transparency for this critical part of the battery supply chain
- ✓ Assessment reports current anode prices as stable, with anode producers absorbing the increased supply costs amid local economic slowdowns
- ✓ Global supply and demand dynamics are expected to positively affect anode pricing in the mid-term

Anode Price Assessment (DDP China spot basis)

Benchmark releases anode price assessment

Anode prices have remained relatively stable in recent months

Source: Benchmark Anode Price Assessment

Right time, right place: European ambition

EU is exploring bold legislative actions to establish local supply chains critical to a low-carbon future

- ✓ Electric vehicles and battery production considered key to the European Green Deal
- ✓ Natural graphite classified as Critical Raw Material for green transition
- ✓ Critical Raw Materials Act to be published in March 2023
- ✓ Net-Zero Industry Act to include sovereign wealth fund for green projects

Project Funding

Project financing strategy targets a mix of project equity and debt

- ▶ Discussions progressing with multilateral financial institutions, development banks and export credit agencies with due diligence processes commenced
- ▶ Advanced discussions with select strategic partners that have indicated an interest in project equity investments and developing long-term partnerships
- ▶ Two-day site visit by from EIB, SEK, NIB and multiple green development banks

Permitting

- ✓ Court completed its scheduled project site visit in September 2022
- ✓ **Hearing scheduled to commence on 31 January 2023 and expected to conclude on 23 February 2023**
- ✓ The environmental permit will be decided and published after the hearing
- ✓ Exploitation applications for Niska Stage 2 (additional 85,000tpa) submitted mid-2021
- ✓ Environmental permit for Luleå anode refinery production site submitted in June 2022 and advancing

Company Update – Delivering on strategy

2021/2022 Milestones reached

- ✓ Completed DFS for 100% owned Vittangi Mine-to-Anode Project. FEEDs and project optimisation near completion
- ✓ Commissioned (on time, under budget) and operating EVA Plant. Qualification uses graphite concentrate to produce Talnode®-C
- ✓ Environmental permit application progressed
- ✓ Vittangi 54% resource increase completed
- ✓ 25,000 tonne trial mine complete at Niska
- ✓ 60,000 tonne non-binding offtake term sheet signed with ACC
- ✓ Non-binding Letter of Intent signed with Verkor

Targeted upcoming catalysts/milestones

- ✓ CY2023 project financing and commencement of construction
- ✓ Commercial agreements: >20 battery and automotive customers receiving Talnode®-C for large-scale EV battery qualification and procurement processes
- ✓ Scheduled formal hearing (Q1 2023) for environmental permit for Vittangi graphite mining operation
- ✓ Further development and commercialisation of next-gen anode technology
- ✓ Development of strategy for further expansion beyond 100tpa anode production

ASX:TLG

Vittangi DFS & Niska Scoping Study Key Outcomes

Parameter	Units	Vittangi	Niska
Annual ore mining rate	tonnes	100,000	400,000
Average annual production of Talnode®-C	tonnes	19,500	84,700
Average annual production of Talphene®	tonnes	-	8,470
Life of Mine (LOM)	years	24	14
Pre-tax NPV ₈ (real)	\$M	\$1,054	\$3,540¹
Pre-tax IRR	%	30%	47%
Capex	\$M	\$484²	\$1,246
Payback	years	2.5	1.7
Talnode®-C price	\$/t product	\$11,875³	\$9,375⁴
Talphene® price	\$/t product	-	\$15,000
Revenue (LOM)	\$M	\$5,352	\$11,700
Cash cost of production of Talnode®-C	\$/t product	\$2,363	\$2,380
EBITDA (LOM)	\$M	\$4,081	\$8,850

Note: Estimated Key Economic Outcomes all in USD. Talnode®-C Price based on Benchmark Assessment Report. Talga confirms all material assumptions underpinning the production target and corresponding financial information continue to apply and have not materially changed as per listing rule 5.19.2 (1) Pre-tax NPV₈ is base case (range of \$2,430M to \$4,650M); (2) excluding 9.1% contingency and owners' costs; (3) The calculated average weighted input price over the 24 years of LOM is US\$12,312/t anode and is forecast as a flat price of US\$11,875/t anode from 2030. (4) Price is base case price (range \$7,500 to 11,250/t).

JORC Graphite Reserve and Resources

Ore Reserve ^{3,5}	Tonnes	Graphite (% Cg)
Nunasvaara (JORC 2012)	2,260,140	24.1
Probable	2,260,140	24.1

Mineral Resources ^{1,2,4,6,7,8}	Tonnes	Graphite (% Cg)
Vittangi (JORC 2012)	30,100,000	24.1
Indicated	22,600,000	24.9
Inferred	7,500,000	21.8
Jalkunen (JORC 2012)	31,500,000	14.9
Inferred	31,500,000	14.9
Raitajärvi (JORC 2004)	4,300,000	7.1
Indicated	3,400,000	7.3
Inferred	900,000	6.4
Total Mineral Resources	65,900,000	18.6

- Note:
1. Mineral resources are inclusive of ore reserves.
 2. Mineral Resources are reported at various cut off grades: Vittangi 10% Cg, Jalkunen 5% Cg and Raitajärvi 5% Cg.
 3. Ore Reserve is reported at a cut off grade of 12% Cg.
 4. Errors may exist due to rounding.

JORC Exploration Target

2021 Exploration Target Vittangi Graphite Project		
Vittangi (JORC 2012)	Low	High
Tonnage Range	170Mt	200Mt
Grade Range	20% Cg	30% Cg

Note that the potential quantity and grade of the Exploration Target is conceptual in nature, there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

Talga completed new ground electromagnetic geophysical ("EM") surveys of graphite targets at Vittangi following the 2020 upgrade of the Vittangi graphite resource. The EM survey results have been reviewed in combination with prior Talga geochemical samples collected from the surface within the conductors, which averaged 26.2% graphite ("Cg") (ASX:TLG 15 Nov 2012). Modelling of this data in conjunction with positive outcomes of the Niska underground mining scoping study have enabled a revised JORC-compliant Exploration Target estimate totalling 170-200Mt at 20-30% Cg at Vittangi (ASX:TLG 20 Jul 2021). This is a significant increase from the previous 26-46Mt at 20-30% Cg (ASX:TLG 17 Sep 2020). The majority of this estimate is proximal along strike and down dip from Talga's existing Vittangi JORC (2012) graphite resources of 30.1Mt @ 24.1% Cg. Additional targets are located along the mapped graphite units around the greater Nunasvaara Dome area.

New rounds of diamond core drilling commenced at Vittangi in mid-2021. The staged 69 hole diamond drilling program totalling ~8,000m tested parts of the JORC Exploration Target as down-dip extensions of the current JORC Resources as well as shallow subcrop targets between Nunasvaara North and Niska South. Reviews of JORC Exploration Targets will be undertaken where significant changes are indicated by continued exploration.

See Talga's ASX announcement dated 20 July 2021 for further information.

Competent Person Statements

The Vittangi Mineral Resource estimate was first reported in the Company's announcement dated 27 May 2022 titled 'Talga's battery anode growth ambitions boosted with 54% graphite resource increase'. The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcement and that all material assumptions and technical parameters underpinning the Resource estimate in the previous market announcement continue to apply and have not materially changed.

The Nunasvaara Ore Reserve statement was first reported in the Company's announcement dated 1 July 2021 titled 'Robust Vittangi Anode Project DFS'.
