

1 February 2023

Expiry of At-the-Market Subscription Agreement

Lithium Australia Limited (ASX: LIT) (**Lithium Australia** or the **Company**) wishes to advise that the At-the-Market Subscription Agreement ('ATM') with Acuity Capital¹ (also referred to as a Controlled Placement Agreement or CPA) has expired. There were no fees or costs associated with the expiry of the ATM.

The Company recently completed the sale of the Greenbushes South Lithium Project to Galan Lithium (ASX: GLN) for total consideration of A\$3.0 million, consisting of A\$2.0 million in cash and A\$1.0 million in equity. As at 31 December 2022, the Company had a cash balance of A\$13.5 million and investments in listed equities of A\$6.2 million. Due to the position at 31 December 2022, the decision was made not to extend the ATM.

In accordance with the terms of the ATM, the Company will buy back for nil cash consideration (and cancel) the 32,250,000 fully paid ordinary LIT shares ('Collateral Shares') issued to Acuity Capital as security for the ATM (subject to shareholder approval at the next general meeting to be held by the Company).

Accompanying this announcement is an Appendix 3C.

Authorised for release by the Board.

About Lithium Australia

Lithium Australia (ASX:LIT) is at the forefront of advanced materials development to ensure an ethical and sustainable future for the global battery industry. Lithium Australia is achieving this via its business divisions:

Envirostream (100%-owned LIT subsidiary): Envirostream, which is leading Australia's battery recycling industry, is at the cutting edge of delivering safe and innovative management solutions to one of the Australian waste industry's biggest (and getting bigger) challenges – battery disposal.

Its state-of-the-art Victorian-based battery processing facilities are providing a sustainable solution by collecting, sorting and processing critical battery metals from all types of spent batteries to power the batteries of tomorrow.

With battery recycling partnerships alongside some of Australia's leading brands (including Bunnings Warehouse, LG Energy Solution, Officeworks and Battery World), Envirostream benefits from the Australian government-backed battery recycling scheme which is providing rebates across collection, sorting, and processing of batteries. These combined provide the platform for national expansion.

VSPC (100%-owned LIT subsidiary): With over 20 years' experience, VSPC develops leading-edge materials for e-mobility and energy storage applications and, ultimately, a zero-carbon economy. Its patents cover the production of advanced powders for next generation lithium-ion batteries, especially lithium ferro phosphate ('LFP').

Currently, demand for LFP represents more than half the global market for lithium-ion battery materials. The Company is one of only a few entities outside of China with the technical expertise to manufacture LFP powder of the highest quality to meet those burgeoning market pressures.

VSPC is now on a clear path to production. With a Research & Development (R&D) facility (pilot plant) located in Queensland, a Definitive Feasibility Study ('DFS') for an initial 10,000tpa LFP manufacturing facility is well underway, and with customer offtake discussions advancing in parallel, VSPC is positioning for its first commercial footprint.
