Gregory H. Solomon
Chairman

In particular, the Company reserves the right, subject to the Corporations Act and the Listing Rules, to extend the Closing Date, to accept late Entitlement and Acceptance Forms either generally or in particular cases, or to withdraw or reduce the size of the Offer without prior notice. Any extension of the Closing Date will have a consequential effect on the date for the issue of new Shares.

2.3. PURPOSE OF THE ISSUE

The funds raised under this Issue are to:

- fund administrative costs and expenses and provide ongoing working capital to cover operating expenses;
- enable Tasman to continue to support its investments in either or both of Eden and Conico, as the Directors in their discretion may decide is reasonably required; and

None of the funds from this Issue have been allocated to exploration of any of the tenements in which the Company holds an interest, as the exploration expenditure on the Company's primary tenements is currently being sole funded by its joint venture partner.

Given the speculative nature of the Company's business, the intended allocation of funds as set out above may change depending upon market conditions.

2.4. OFFER NOT UNDERWRITTEN

The Offer is not underwritten.

2.5. EFFECT ON CAPITAL STRUCTURE

The capital structure of the Company on completion of the Offer will be as follows:

Shares	
Shares currently on issue	671,152,582

Total Options on issue on completion of the Offer (est.) ^{(2), (3)}	78,369,879

(1) Assuming the Offer is fully subscribed and none of the Options currently on issue by the Company are exercised before the Record Date. If this occurs, the number of Shares may increase and the number of Options may decrease.

(2) No Options will be issued pursuant this Offer.

(3) Assuming none of the Options currently on issue in the Company are exercised before completion of the Offer.

2.6. ENTITLEMENT TO PARTICIPATE IN OFFER

Only Qualifying Shareholders are eligible to participate in the Offer.

The number of Shares to which each Qualifying Shareholder is entitled is shown on the personalised Entitlement and Acceptance Form which accompanies this Offer Document.

In the calculation of Entitlements, fractions will be rounded up to the nearest whole number. If the Company considers that holdings have been split to take advantage of rounding, the Company reserves the right to aggregate holdings held by associated Shareholders for the purpose of calculating Entitlements.

In relation to Foreign Shareholders, please refer to section 2.17 of this Offer Document.

2.7. NON - RENOUNCEABLE - NO RIGHTS TRADING

This Offer is made on a non-renounceable basis such that Qualifying Shareholders may not sell or transfer all or any part of their Entitlement. If Qualifying Shareholders do not take up their Entitlement by the Closing Date, their Entitlement to new Shares under this Offer will lapse.

2.8. APPLICATIONS

This Offer may be accepted by Qualifying Shareholders in whole or in part prior to the Closing Date, subject to the right of the Company to extend the Offer Period or withdraw the Offer.

Instructions for accepting an Entitlement are set out in section 3 of this Offer Document and on the Entitlement and Acceptance Form that accompanies this Offer Document.

2.9. APPLICATION MONEY

All Applicants who exercise their Rights in full will receive their Entitlement in full.

New Shares will be issued to Applicants only after all of their Application Money has been received and ASX has granted permission for the new Shares to be quoted.

Application Moneys received by the Company from Applicants for new Shares will be held in a separate account by the Company until those Shares are issued. Any interest earned on Application Moneys will be applied against the costs of the Issue, with any balance being retained by the Company.

If the Offer does not proceed (for whatever reason), the Application Moneys will be returned without interest.

2.10. CLOSING DATE

The Closing Date for the Issue is 5.00 pm WST on 3 March 2023. Subject to the Corporations Act and Listing Rules, the Directors may extend the Closing Date at any time prior to the date set out in the timetable in section 2.2 of this Prospectus. The date the Shares are expected to commence trading on ASX may vary with any change to the Closing Date.

2.11. ISSUE OF NEW SHARES

The new Shares will be issued to Applicants, and holding statements for the new Shares will be dispatched to Applicants, as soon as practicable after the Closing Date.

2.12. RANKING OF NEW SHARES

On issue, the new Shares will rank equally with all other Shares then on issue.

2.13. SHORTFALL

If not all Qualifying Shareholders take up their Entitlements under this Offer in full, the portion not taken up will form part of the Shortfall.

Qualifying Shareholders may, in addition to their Entitlement, apply for additional new Shares forming part of the Shortfall, regardless of the size of their present holding.

The offer of the Shortfall is a separate offer pursuant to this Offer Document ("QS Shortfall Offer"). The issue price of any new Shares comprising part of the Shortfall shall be \$0.008, being the same price at which the Shares are being offered to Qualifying Shareholders pursuant to this Offer Document.

Qualifying Shareholders who wish to participate in the offer of the Shortfall by applying for new Shares above their Entitlement, should insert the number of additional new Shares they wish to apply for in that section of the table in the Entitlement and Acceptance Form headed "Number of Shortfall Shares (if any) applied for in excess of the Entitlement shown above". Any additional new Shares applied for must be paid in the same manner as the Entitlement Shares are paid for. A single payment should be made for the Application Moneys for any new Shares a Qualifying Shareholder has applied for as part of its Entitlement and any additional new Shares applied for as part of the Shortfall. It is an express term of the offer of the Shortfall that applicants for new Shares comprised in the Shortfall will be bound to accept a lesser number of additional new Shares than the number applied for.

The Shortfall will be placed at the discretion of the Company, and the Company reserves the right to not allot any of the Shortfall or to allot to a Qualifying Shareholder a lesser number of the new Shares comprising the Shortfall than the number for which the Qualifying Shareholder applies or to reject an application. In assessing any application by a Qualifying Shareholder to take up a portion of the Shortfall, the Company will take into account the number of Shares held by that Qualifying Shareholder as at the Record Date and the Company does not intend that a Qualifying Shareholder with a small shareholding in the Company will be issued a large portion of the Shortfall (if any). Qualifying Shareholders who apply for additional new Shares in excess of their Entitlement receive no guarantee that they shall receive all or any of those additional new Shares for which they apply. If a Qualifying Shareholder does not receive all or any of the additional new Shares they apply for, any excess Application Moneys will be returned to them (without interest).

The Directors (whether personally or through their associated companies or trusts) will not apply for any additional new Shares forming part of the Shortfall under the QS Shortfall Offer.

The Directors also reserve the right to place the balance of the Shortfall not subscribed for by Qualifying Shareholders under the QS Shortfall Offer within 3 months of the Closing Date, at an issue price of not less than the issue price under this Offer, being \$0.008 per Share. The Directors intend, in placing any remaining Shortfall (if any), to allocate it to sophisticated and professional investors.

2.14. ASX QUOTATION

The Company will apply to ASX to have the Shares to be issued under this Offer granted official quotation.

2.15. MINIMUM SUBSCRIPTION

There is no minimum subscription.

2.16. OVERSUBSCRIPTIONS

Oversubscriptions will not be accepted.

2.17. FOREIGN SHAREHOLDERS

The Company is of the view that it is unreasonable to extend this Offer to Foreign Shareholders having regard to the number of Foreign Shareholders in each jurisdiction outside Australia and New Zealand, the number and value of Shares that would be offered to them and the costs of complying with the laws, and any requirements of regulatory authorities, of the applicable jurisdictions outside of Australia and New Zealand.

Recipients (including Custodians) may not send or otherwise distribute this Offer Document or the Accompanying Entitlement and Acceptance Form to any person outside Australia or New Zealand.

Accordingly this Offer is not extended to, and no Shares will be issued to, Foreign Shareholders, and no Entitlement and Acceptance Form will be sent to Foreign Shareholders. However, in compliance with Listing Rule 7.7.1, the Company will send each Foreign Shareholder details of this Offer and advise them that the Company will not offer Shares to them.

2.18. DIRECTOR SHAREHOLDING

As at the date of this Offer Document, all of the Directors (either personally, or through associated companies or trusts) hold Shares in the Company. All of the Company's Directors are therefore Qualifying Shareholders and will receive Rights to subscribe for new Shares pursuant to this Offer.

The relevant interest of each of the Directors in the Shares and Options of the Company as at the date of this Offer Document, and the Rights they will receive under this Offer are as follows:

	Gregory Solomon and Arkenstone Pty Ltd (and associated companies and trusts) (“ Arkenstone Group ”)	Douglas Solomon and March Bells Pty Ltd (and associated companies and trusts) (“ MB Group ”)	Guy T. Le Page
Shares currently held	114,165,258	117,744,018	1,874,062
New Shares offered under this Offer (estimated)	14,270,658	14,718,003	234,258
Options currently held	5,263,549	7,900,579	44,621

Nothing in this Offer Document will be taken to preclude any of the Directors, officers or employees of the Company or any of their subsidiary companies from applying for new Shares under this Offer.

Each of the Arkenstone Group and MB Group have indicated to the Company that they intend to support the Offer and to take up all or a significant percentage of their respective Entitlements.

2.19. EFFECT ON EXISTING SHAREHOLDERS AND OPTIONHOLDERS

Qualifying Shareholders who take up their Rights in full will not have their proportionate interest in the Company diluted by this Offer. The proportionate interest of a Qualifying Shareholder who takes up their Entitlement in full and applies for (and is issued) additional new Shares forming part of the Shortfall will increase.

Qualifying Shareholders who do not exercise their Rights in full will have their interest in the Company diluted.

Foreign Shareholders will have their interest in the Company diluted.

Existing Optionholders who do not exercise all or any of their Options before the Record Date will not be entitled to participate in this Issue with respect to those Options (and, if the Options are subsequently exercised, the interest which the Shares issued consequent upon the exercise of the Options will confer in the Company will have been diluted by this Issue).

2.20. IMPACT ON CONTROL

The new Shares offered under this Offer represent 12.5% of the Company’s current issued Share capital.

The Arkenstone Group and MB Group (see section 2.18) are the Company’s two largest Shareholders. They have each indicated to the Company that they intend to support this Offer and to take up all or a significant percentage of their Entitlements. Neither the Arkenstone Group nor MB Group will apply for any of the Shortfall.

The following table summaries the potential increase in the shareholding of the Arkenstone Group and MB Group in the Company at the completion of the Offer, depending on the level of take up of the Rights.

	Arkenstone Group	% of total	MB Group	% of total
Shares currently held	114,165,258	17.01%	117,744,018	17.54%
New Shares offered under this Offer (estimated)	14,270,658	-	14,718,003	-
Maximum Shares held on completion of this Offer (estimated)	128,435,916 ⁽¹⁾	18.34% ^{(1), (2)}	132,462,021 ⁽¹⁾	18.92% ^{(1), (2)}

*On the assumption that:

(1) Neither the Arkenstone Group nor the MB Group exercise any of their existing Options prior to the Record Date and they take up their Entitlements in full.

(2) Arkenstone Group and the MB Group take up all of their Rights and no Rights are taken up by any other Shareholders, which would result in the total number of Shares on issue at Completion of the Rights Issue being 700,141,243. If the Arkenstone Group and the MB Group take up all of their Rights and this Rights Issue is fully subscribed, the percentage shareholding of the Arkenstone Group and MB Group in the Company will not change.

In addition, the Arkenstone Group and MB Group hold the number of Options in the Company which are set out in section 2.18 of this Prospectus.

This Offer will not therefore have any material effect on the control of the Company.

In any event, both the Arkenstone Group and the MB Group have indicated to the Company that they have no present intention to try to change the Company's main activities, business or direction.

2.21. MARKET PRICES OF EXISTING SHARES ON ASX

The highest and lowest market sale price of the existing Shares during the 3 months immediately preceding the lodgement of this Offer Document with ASX, and the last market sale price on the Business Day immediately preceding the lodgement date of this Offer Document, are set out below.

	3-Month High (on 3 November 2022, 7 November 2022, 8 November 2022)	3-Month Low (on 6 December 2022)	Last Market Price (on 3 February 2023)
Existing Shares	\$0.015	\$0.0075	\$0.009

2.22. RISKS

Investing in new Shares in the Company involves risk. There are a number of factors, both specific to the Company and of a general nature, which may affect the future operating and financial performance of the Company and the value of an investment with the Company. Further, given the Company holds shares in both Eden and Conico (both ASX listed companies), the future operating and financial performance of these companies may also affect the value of the Company. In relation to the Company's investment in these companies:

- There is no guarantee that Eden's commercialisation of EdenCrete[®], EdenCrete[®]Pz, EdenCrete[®]Pz7, Optiblend[®] or Hythane[®], or the proposed commercialisation of any other new technologies it may develop, will be successful. The commercialisation of new products and technologies is always subject to substantial risk, including competition from new inventions, unforeseen technical issues, securing sufficient working capital to fund the operations prior to the company becoming profitable, and establishment of a viable market for new products, and
- As neither of Eden or Conico is currently profitable there is no guarantee that they will achieve commercial viability. Further Eden's inability to extend, refinance and/or raise funds (as applicable) to repay third party debt owing by it as and when such debt becomes due and payable could also have a material adverse effect on Eden's activities.

(See sections 2.22.7 to 2.22.9 inclusive of this Offer Document for a more detailed explanation of the risks which will affect the future operating and financial performance of Conico and Eden).

2.22.1. Exploration Risk

Mineral exploration and mining are speculative operations that may be hampered by circumstances beyond the control of the Company. Profitability depends on successful exploration and identification and/or acquisition of reserves. Exploration is a speculative endeavour and the Company may not be successful in identifying any commercial mineral deposits on any of the tenements in which it holds an interest.

2.22.2. Operating Risks

The operations of the Company may be affected by various factors including failure to identify or acquire mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in exploration and mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, inadequate water supplies, unanticipated technical or metallurgical problems which may affect extraction rates and costs, inability to obtain satisfactory, or retain existing, joint venture partners, difficulties in

obtaining requisite planning approvals, adverse weather conditions, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the cost of consumables, spare parts, plant and equipment. No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or operation of any of the tenements in which it holds an interest. Until the Company is able to realise value from its projects, it will incur ongoing operating losses.

2.22.3. Production Risks

Even assuming that viable deposits of minerals are identified and able to be mined (of which there is no guarantee), the quality and rate of extraction of minerals will be variable (depending, for example, on the size of the deposits, timing and/or success of development work and mineral quality). Production may be impacted or shut down for considerable periods of time due to any of the following factors:

- government regulation;
- processing interruptions;
- equipment failure;
- equipment or manpower shortages;
- force majeure;
- well blowouts;
- explosions;
- fires;
- pollution;
- releases of toxic gas; or
- other environmental hazards and risks.

2.22.4. Commodity Price Volatility & Exchange Rate Risks

If the Company achieves success which results in mineral production (of which there is no guarantee), the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company, including the current Russia/Ukraine conflict, supply and demand fluctuations for precious and base metals, technological advancement, forward selling activities and other micro and macro economic factors. International prices of various commodities are largely denominated in United States dollars, whereas the income and expenditure of the Company, whilst operating on Australian projects, will be in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar.

2.22.5. Title Risks and Native Title

Interests in exploration and mining tenements in Australia are governed by State legislation and are evidenced by the granting of leases or licences. Each lease or licence is for a specific term and carries with it annual expenditure and reporting conditions as well as other conditions requiring compliance. These conditions include the requirement, particularly for exploration licences, for compulsory reduction in the area held under licence from time to time. Consequently, the Company could lose title to or its interest in the tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments. In relation to tenements in which the Company has an interest, there are areas over which legitimate common law native title rights of Aboriginal Australians exist (and in relation to tenements in which the Company in the future may acquire an interest, it is possible this could also be the case). The ability of the Company to obtain the consent of any relevant land owner, or to progress from the exploration phase to the development and mining phases of the operation (if a commercial mineral deposit is identified), may be adversely affected. In addition, Aboriginal heritage sites are known to exist on various parts of the tenement areas, and exploration and mining activity is not permitted over such areas. The Directors closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

2.22.6. Environmental Risks

The operations and proposed activities of the Company are subject to State and Federal laws and regulation concerning the environment. As with most exploration projects and mining operations, the Company's activities are

expected to have an impact on the environment, particularly if the Company identifies a commercial mineral deposit (of which there is no guarantee) and advanced exploration or mine development proceeds. The Company attempts to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. Although the Company is not aware of any endangered species of fauna or flora within the tenement area, no definitive study has been carried out over the area, and if any were discovered this could prevent mining occurring.

2.22.7. Investments

The Company holds a 28.90% shareholding in Eden (through Noble) and a 7.96% shareholding in Conico, both ASX listed entities. Any change in the market value of, or the trading price of the shares in, those companies may therefore have an impact on the value of the Shares in the Company. Neither of Eden or Conico is currently profitable and there is no guarantee that either of these companies will achieve commercial viability in the future.

2.22.8. Conico Risks

Conico is a mining exploration company and faces risks similar to those which are faced by the Company as specified in sections 2.22.1 to 2.22.6 inclusive and also faces those risks of a general nature which are specified in sections 2.22.10 to 2.22.14 inclusive of this Offer Document. There is no guarantee that Conico will be successful in identifying any commercial mineral deposits on any of the tenements in which it holds an interest.

2.22.9. Eden Risk

Eden and its wholly owned subsidiaries (the “Eden Group”) is the developer of a pyrolysis process to produce carbon nanotubes and carbon nanofibers (Hythane®), a carbon-strengthened concrete additive (EdenCrete®, EdenCrete®Pz and EdenCrete®Pz7), and a dual fuel system capable of operating on diesel engines and displacing a large amount of diesel fuel with natural gas (Optiblend®). In addition to the risks set out below, Eden also faces those risks of a general nature as specified in sections 2.22.10 to 2.22.14 inclusive of this Offer Document.

2.22.9.1. Risks associated with establishment of market share and competing technologies

Although all of the Eden Group's products are, or have been, sold commercially, the Eden Group may not be able to achieve sufficient growth in market acceptance for these products, in order for it to establish a large enough market share to achieve financial self-sufficiency. The establishment of market share may be impeded by, for example, adverse market conditions, unforeseen technical or environmental issues, the failure of patent applications to be granted, and competition from competing technologies or products (including new technologies).

2.22.9.2. Product price volatility and exchange rate risks

The revenue which the Eden Group will derive through the sale of its products exposes the potential income of the Eden Group to product price and exchange rate risks. Product prices fluctuate and are affected by many factors beyond the control of the Eden Group, including the current Russia/Ukraine conflict, supply and demand fluctuations, prices of competing technologies, technological advancements and other micro and macro economic factors. As the Eden Group's operations are primarily based in the US and India, the Eden Group will also be exposed to the fluctuations and volatility of the rate of exchange between the United States dollar, Indian rupee and the Australian dollar.

2.22.9.3. External Borrowings

One of Eden's US subsidiary owes US \$6.475 million to iBorrow REIT, LP, which is secured against three properties in the United States which are owned by the Eden Group. This loan is guaranteed by Eden, is interest bearing and is for a period of 12 months expiring 25 July 2023, with an option for Eden to extend the term, subject to certain conditions, for an additional 12 months upon payment of an agreed fee. Eden's US subsidiary also has a COVID-19 stimulus small business loan outstanding of US \$26,929 (principle). The Eden Group's failure to extend, refinance and/or raise funds (as applicable) to repay these loans as and when they become due could have a material adverse effect on the Eden Group's activities (including requiring the sale of the three properties in the United States which are owned by the

Eden Group). The Eden Group may also only be able to extend or refinance its existing borrowings at a higher interest rate, which will increase its loan repayments and adversely impact its financial position.

2.22.9.4. Environmental Risks

Whilst the Eden Group endeavours to comply with all present and proposed laws and standards, before the Eden Group reaches the stage where 70 tonnes of carbon have been produced (which is not anticipated by Eden to occur for some time), the Eden Group will need to complete further testing in order to give more information to the Environmental Protection Authority in the US (EPA). It is only once this information has been provided to the EPA, and the EPA is satisfied with the information, that further production of carbon will be able to occur. Whilst the Eden Group anticipates that it will be able to comply with the necessary standards, there is no certainty that the EPA will be satisfied with the further information supplied by the Eden Group.

2.22.9.5. Operating Risks and Working Capital

The operations of the Eden Group may be affected by various factors including operational and technical difficulties encountered in production and commercialisation of its technologies, difficulties in obtaining environmental approvals, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, industrial and environmental accidents, shortages of skilled contractors, industrial disputes, unexpected shortages and increases in the cost of consumables, spare parts, plant and equipment. No assurances can be given that the Eden Group will achieve commercial viability through the sale of its products.

Until the income which is generated by Eden's US and Indian subsidiaries from sales of EdenCrete®, EdenCrete®Pz, EdenCrete®Pz7, OptiBlend® and Hythane® exceed the Eden Group's expenses, the Eden Group will continue to incur ongoing operating losses. Subject only to the terms of any joint venture or other commercial arrangement which may be entered into, Eden has indicated it is likely to have to raise further capital or the Eden Group will likely have to borrow funds in the future. There is no guarantee that such additional funds will be available to the Eden Group.

The Eden Group's failure to raise capital if and when needed could delay or suspend the Eden Group's business strategy and could have a material adverse effect on the Eden Group's activities.

2.22.9.6. Intellectual property protection

The Eden Group owns intellectual property which it endeavours to protect by patents, trademarks and other general security systems. There is a risk that third parties could challenge the Eden Group's ownership of that intellectual property or allege that the Eden Group has infringed upon their intellectual property. The Eden Group can also not guarantee that the patent and trademark protection that it has endeavoured to obtain will continue to be observed by third parties, or that the security systems it has in place will not be breached. If the Eden Group did receive a challenge from a third party to ownership, an infringement notice, or experience a security breach, this could result in litigation and have an impact on the Eden Group's financial position.

2.22.10. Share Market Conditions

The price of the Shares when quoted on the ASX will be influenced by international and domestic factors affecting market conditions in equity, financial and commodity markets. These factors may affect the share price for all listed companies, and the price of the new Shares may fall or rise, and the price of the new Shares may trade below or above the issue price of \$0.008.

2.22.11. Working Capital

Until the Company is able to realise value from its projects or investments, it will incur ongoing operating losses. It is therefore likely the Company will have to raise further capital or borrow funds in the future. There is no guarantee

that such additional funds will be available to the Company. Further, any additional equity financing which is available may be dilutive to Shareholders.

The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.

2.22.12. No formal valuation of Shares, tenements or assets

No formal valuation of any of the Shares, any of the tenements in which the Company has an interest or of the Company's shareholding in Eden or Conico have been carried out.

2.22.13. General investment risks

In addition, there is a risk that the price of the Shares and returns to Shareholders may be affected by changes in many general factors including local and world economic conditions and outlook, general movements in local and international stock markets, investor sentiment, interest rates, the rate of inflation, exchange rates, levels of tax, taxation law and accounting practice, government legislation or intervention, inflation or inflationary expectations, natural disasters, social disorder or war in Australia or overseas, international hostilities and acts of terrorism, pandemics (including the impacts of COVID-19), as well as many other factors which are beyond the control of the Company.

2.22.14. Other risks

The above list of risk factors is not exhaustive of the risks faced by the Company and its Shareholders and investors. The above risks, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the new Shares offered under this Offer Document. Therefore, no assurances or guarantees of future profitability, distributions, payment of dividends, return of capital, the future performance of the Company or its Shares, the price of the Shares or the return on any investment in the Company can be, or is, provided by the Company.

Before deciding to invest in the Company, potential Applicants should read this Offer Document in its entirety and, in particular, should consider the risk factors that could affect the financial performance of the Company. Applicants should carefully consider these factors in light of their personal circumstances and should consult their professional advisers (for example, their accountant, stockbroker, lawyer or other professional adviser) before deciding whether to invest.

Neither the Company nor its officers, employees, agents and advisers guarantee that any specific objectives of the Company will be achieved or that any particular performance of the Shares, including the new Shares offered under this Offer Document, will be achieved.

As with any equity investment, substantial fluctuations in the value of your investment may occur. This Offer Document does not set out all the risks you may face in applying for, and holding, new Shares in the Company.

2.23. EXPENSES OF THE ISSUE

The total expenses of the Offer are estimated to be \$25,000 (exclusive of any GST) comprising legal fees, printing, postage, share registry costs and ASX quotation fees.

2.25. CONTINUOUS DISCLOSURE OBLIGATIONS

The Company is a “disclosing entity” (as defined in s.111AC of the Corporations Act) for the purposes of the Corporations Act and its Shares are enhanced disclosure securities quoted on ASX and, as such, the Company is subject to regular reporting and disclosure obligations under the Corporations Act and the Listing Rules.

This Offer Document is intended to be read in conjunction with the publically available information in relation to the Company which has been notified to ASX and does not include information that would be included in a disclosure document or which investors ought to have regard to in deciding whether to subscribe for new Shares under the Offer. Qualifying Shareholders should therefore have regard to the other publically available information in relation to the Company before making a decision whether or not to invest.

All announcements made by the Company are available from its website www.tasmanresources.com.au or on ASX’s website www.asx.com.au. Additionally, the Company is also required to prepare and lodge with ASX yearly and half-yearly financial statements accompanied by a directors’ statement and report, and an audit report or audit review. Copies of documents lodged with ASX in relation to the Company may be obtained from the ASX website.
