Aeris Resources Limited Bell Potter Unearthed Conference

8 February 2023

Presented by: Andre Labuschagne

Disclaimer

This investor presentation has been prepared by Aeris Resources Limited ("Aeris" or the "Company"). By attending an investor presentation or briefing, or accepting, accessing or reviewing this presentation, you acknowledge and agree to the terms set out below.

Summary information

This presentation is for information purposes only and should be read in conjunction with the most recent financial reports and other documents lodged by Aeris with the Australian Securities Exchange ("ASX") in connection with its continuous disclosure obligations. This presentation does not purport to contain all of the information that an investor should consider when making an investment decision nor does it contain all of the information which would be required in a product disclosure statement or prospectus prepared in accordance with the requirements of the Corporations Act.

No reliance should be placed on the information or opinions contained in this presentation, which are provided as at the date of this presentation (unless otherwise stated) and to the maximum extent permitted by law, Aeris has no obligation to update the information contained in this presentation. An investment in securities is subject to known and unknown risks, some of which are beyond the control of Aeris. Investors should consult with their own legal, tax, business and/or financial advisors in connection with any acquisition of securities.

Financial information

All financial information set out in this presentation is expressed in Australian Dollars unless stated otherwise.

Investors should be aware that certain financial measures included in this presentation are "non-IFRS financial information" under ASIC Regulatory Guide 230: "Disclosing non-IFRS financial information" published by ASIC and also "Non-GAAP financial measures" within the meaning of Regulation G under the US Securities Exchange Act of 1934 and are not recognised under the AAS or IFRS. Aeris believes the non-IFRS financial information and non-GAAP financial measures provide useful information to users in measuring the financial performance and condition of Aeris. However, investors should note that the non-IFRS financial information and non-GAAP financial measures do not have standardised meanings prescribed by AAS or IFRS. Therefore, the non-IFRS financial information is not a measure of financial performance, liquidity or value under the IFRS and may not be comparable to similarly titled measures presented by other entities, nor should the information be construed as an alternative to other financial measures determined in accordance with AAS or IFRS. Investors are cautioned, therefore, not to place undue reliance on any non-IFRS financial information included in this presentation.

Future performance and forward-looking statements

This presentation contains certain 'forward-looking' statements, opinions and estimates, which are based on assumptions and contingencies that are subject to change without notice and involve known and unknown risks and uncertainties beyond the control of Aeris and its officers. This includes statements about market and industry trends, which are based on interpretations of current market conditions.

Indications of, and guidance on, future earnings and financial position and performance are forward-looking statements. As are statements containing the words "expect", "anticipate", "estimate", "intend", "believe", "guidance", "should", "could", "may", "will", "predict", "plan" and other similar expressions.

Forward-looking statements are based on information available to Aeris as at the date of this presentation and should not be relied upon as an indication or guarantee of future performance. Except as required by law or regulation (including the ASX Listing Rules), none of Aeris, its representatives or advisers undertakes any obligation to provide any additional or updated information whether as a result of a change in expectations or assumptions, new information, future events or results or otherwise.

Investors are strongly cautioned against placing undue reliance on forward-looking statements, especially considering the current economic climate and significant volatility, uncertainty and disruption caused by recent world events such as the COVID-19 pandemic and international hostilities and associated economic changes.

Disclaimer

Production Targets Cautionary Statement

The Ore Reserve and Mineral Resource estimates underpinning the Stockman Production Targets (refer to slide 25) were prepared by a Competent Person in accordance with the JORC Code 2012.

The material assumptions on which the Production Targets are based is set out in Appendix C of the ASX Release of Aeris dated 28 April 2022 "Transformational Acquisition and Capital Raise" (Initial Report). Aeris confirms that all material assumptions underpinning the production targets in the Initial Report continue to apply and have not materially changed.

The modifying factors used in the estimation of the Ore Reserve were also applied to the Mineral Resources in the generation of the Production Targets.

Disclaimer

To the maximum extent permitted by law, Aeris and each of its respective related bodies corporate, shareholders and affiliates, and each of their respective officers, directors, partners, employees, representatives, affiliates, agents, consultants and advisers (each a "Limited Party"):

- expressly disclaim any and all responsibility and liability (including, without limitation, any liability arising from fault, negligence or negligent misstatement) for any direct, indirect, consequential or contingent loss or damage arising from this presentation or reliance on anything contained in or omitted from it or otherwise arising in connection with this presentation;
- disclaim any obligations or undertaking to release any updates or revisions to the information in this presentation; and
- do not make any representation or warranty, express or implied, as to the accuracy, reliability, completeness or fairness of the information, opinions and conclusions contained in this presentation or that this presentation contains all material information about Aeris or the Transaction or that a prospective investor or purchaser may require in evaluating a possible investment in Aeris or acquisition of shares in Aeris, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement.

Aeris Resources

Australian mid-tier base and precious metals producer

4 producing operations

1 long life development project

Resources of 780kt Cu, 993kt Zn, 1.4Moz Au¹

FY23 production of 57 – 71kt Cu equivalent²

Strong long-term exposure to copper

Excellent platform for growth

Corporate overview

Robust balance sheet and supportive shareholder base

Capitalisation

	A\$
Market capitalisation ¹	\$480 million
Cash ²	\$67 million
Debt ²	-
Enterprise value	\$413 million

Broker coverage

Shareholders³

■ WHSP ■ Australian Institutions ■ Foreign Institutions ■ Retail & Other

Sustainability

Commitment to transparency, integrity and sustainability

Water and Containment

Using resources efficiently in water, energy and consumables (including waste)

Carbon and Climate Change

Reducing carbon footprint and supporting renewable energy

Diversity and Inclusion

Building more equal, diverse, fair and inclusive workplaces which align to the diversity of our community

Biodiversity and Land

Planning and delivering positive environment, economic and social legacy from discovery to closure

An aerial night photograph of a large industrial facility, likely a water treatment plant. The scene is illuminated by numerous yellow and white lights. On the left, there are several large, cylindrical storage tanks. The central and right portions of the image are dominated by a complex network of metal structures, including walkways, ladders, and large circular tanks. A prominent feature is a long, elevated conveyor belt system that runs diagonally across the right side of the frame. The ground in the foreground is dark and appears to be covered in sand or gravel. The sky is a deep, dark blue, indicating twilight or night.

Tritton Operations

Tritton

Improving ore grades and extending mine life

Displacing 1.1% Cu from Tritton deeps with:

- ✓ 1.8% Cu ore from Budgerygar (in production)¹
- ✓ 2.5% Cu and 0.8g/t Au ore from Avoca Tank (in production Q4 FY23)¹
- ✓ Extending Tritton to high grade ore only
- ✓ Extensions at Murrawombie
- ✓ All deposits open at depth

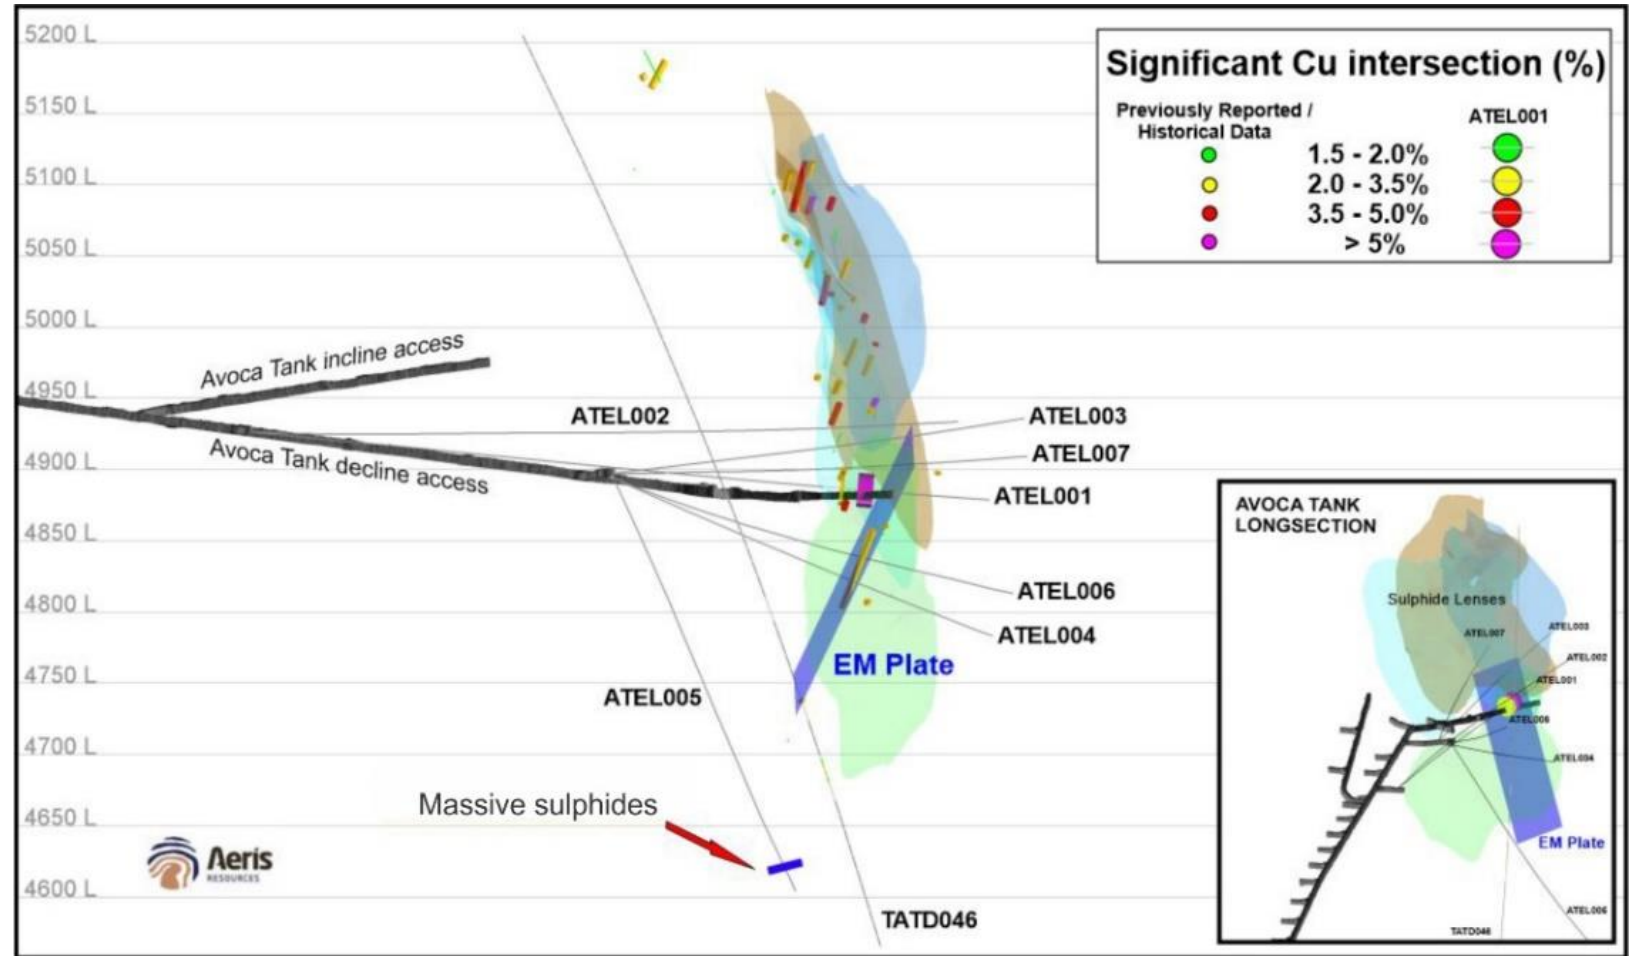

Murrawombie Underground

Showing EM plates 250m below current resource

Avoca Tank development

New high-grade intersections

- Resource definition drilling¹ within initial production block returned high grade intersections:
 - 10.7m at 5.48% Cu, 0.3g/t Au (10.7²)
 - 6.0m at 0.36% Cu, 2.78g/t Au (6.0²)
- Massive sulphides also intersected 180m below mineral resource in hole ATEL005^{3,4}

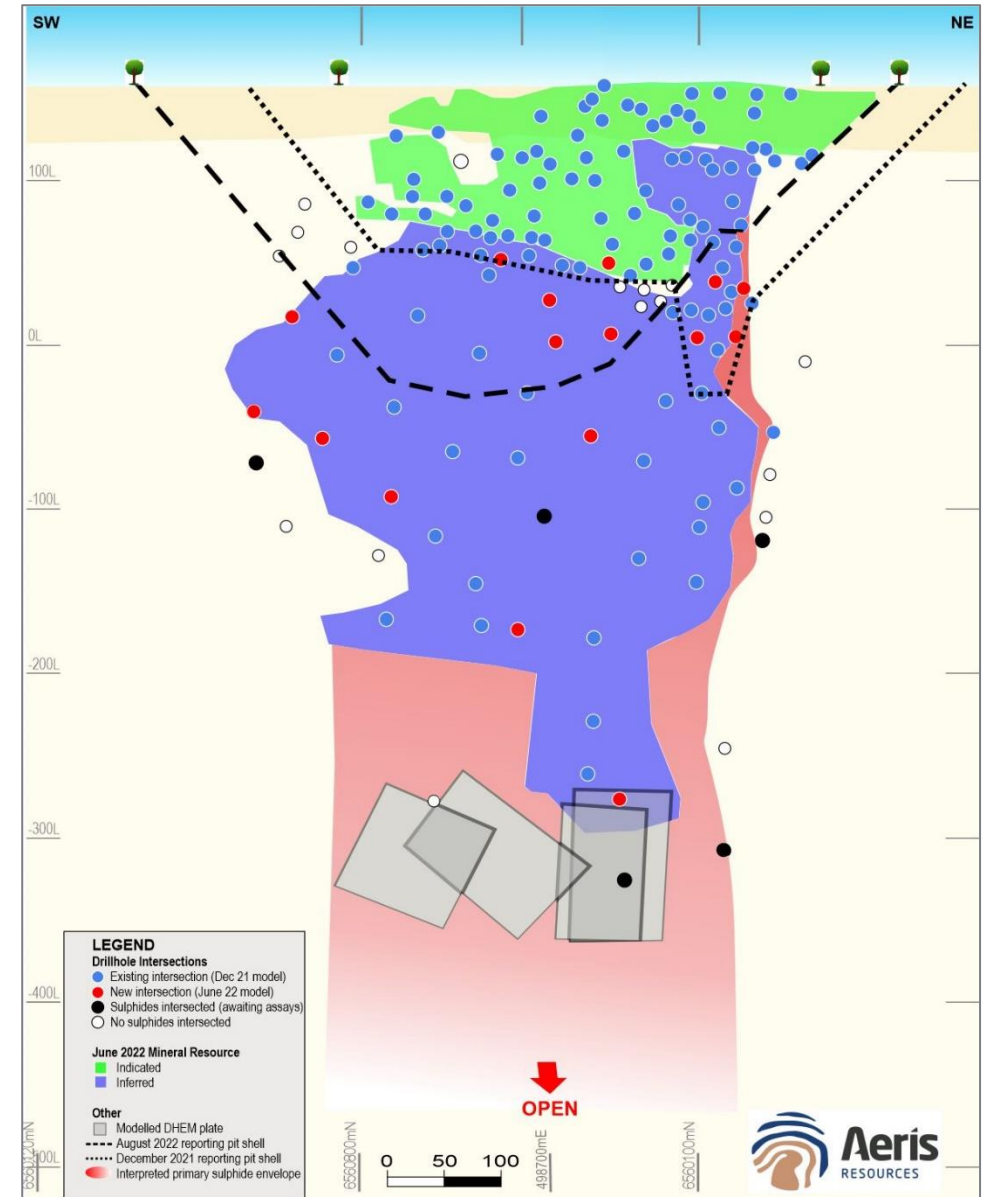

1. Refer to ASX announcement “High Grade Copper and Gold Intersected at Avoca Tank” dated 10 January 2023
2. True thickness (m)
3. Refer ASX Announcement “Tritton Exploration Update” dated 30 January 2023.
4. Cautionary Statement: In relation to the disclosure of visual mineralisation, the Company cautions that visual estimates of sulphide material abundance should never be considered a proxy or substitute for laboratory analysis.

Laboratory assay results are required to determine widths and grade of the visible mineralisation reported in preliminary geological logging. The Company will update the market when laboratory analytical results become available.

Constellation deposit

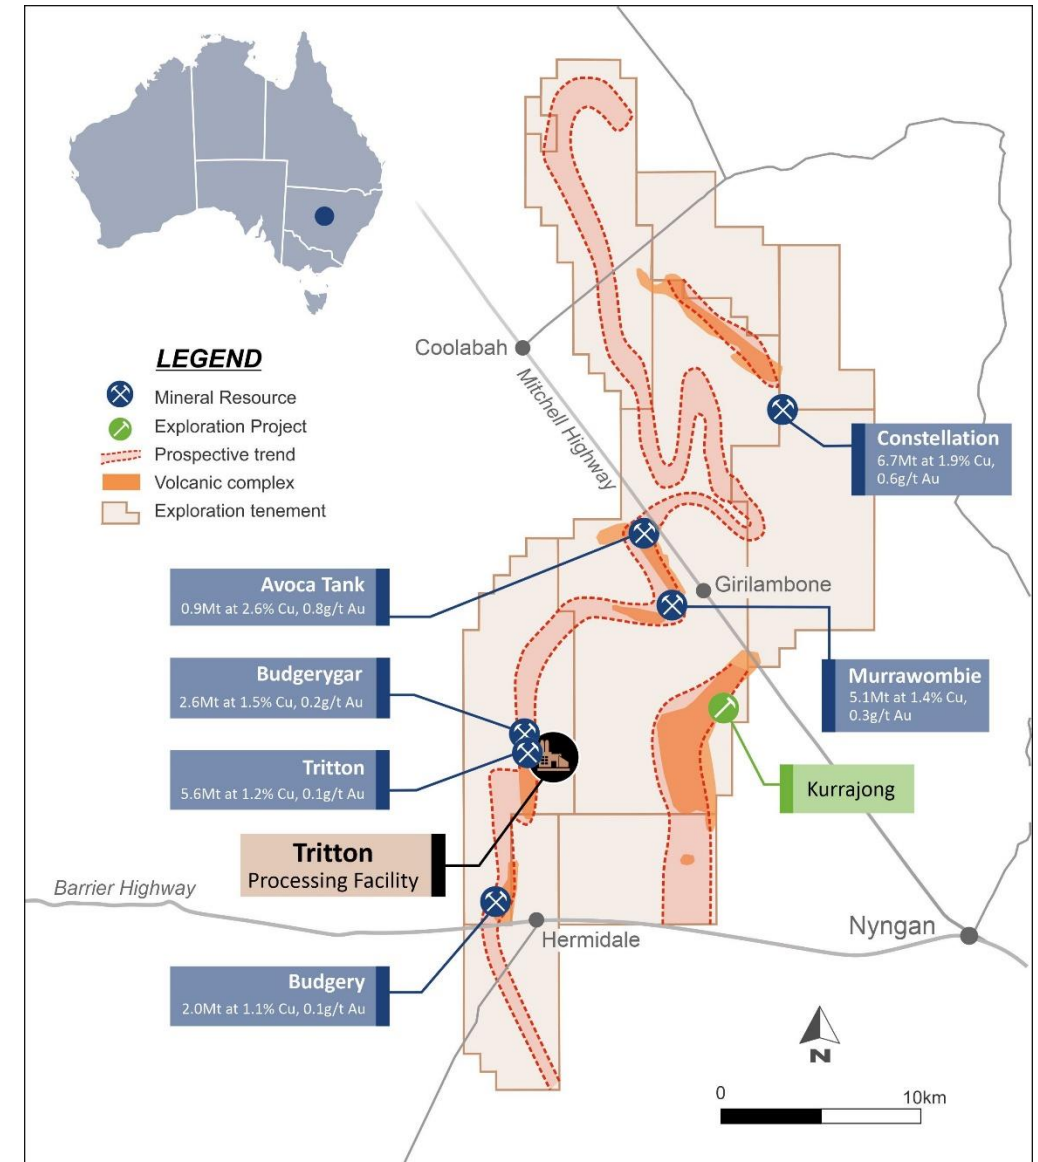

New potential mine

- Located 45km northeast of the Tritton plant
- Mineral Resource¹ of **6.7Mt at 1.85% Cu and 0.58g/t Au**
 - Containing 123kt copper and 125koz gold
 - Approximately 3.1Mt of oxide, supergene and primary mineralisation is open pitable
- Resource extended from near surface to 450m depth
- Mineralisation remains open down plunge and along strike at depth
- Pre-feasibility study underway

Tritton exploration pipeline

- Highly endowed region and 2,330km² tenement package
- 750kt copper already discovered and produced from deposits south of the Mitchell Highway
- EM survey completed on northern tenements – 14 priority targets identified
- Drill testing 5M7 prospect
- Resource update at Kurrajong planned for FY23
- High grade Kurrajong drill results¹ include:
 - 21.2m at 2.75% Cu, 0.17g/t Au (18²)
 - 18.5m at 3.14% Cu, 0.30g/t Au (15.7²)
 - 13.7m at 1.13% Cu, 0.10g/t Au (11.6²)

Cracow Operations

Cracow

High-grade gold mine with long history of reserve replacement

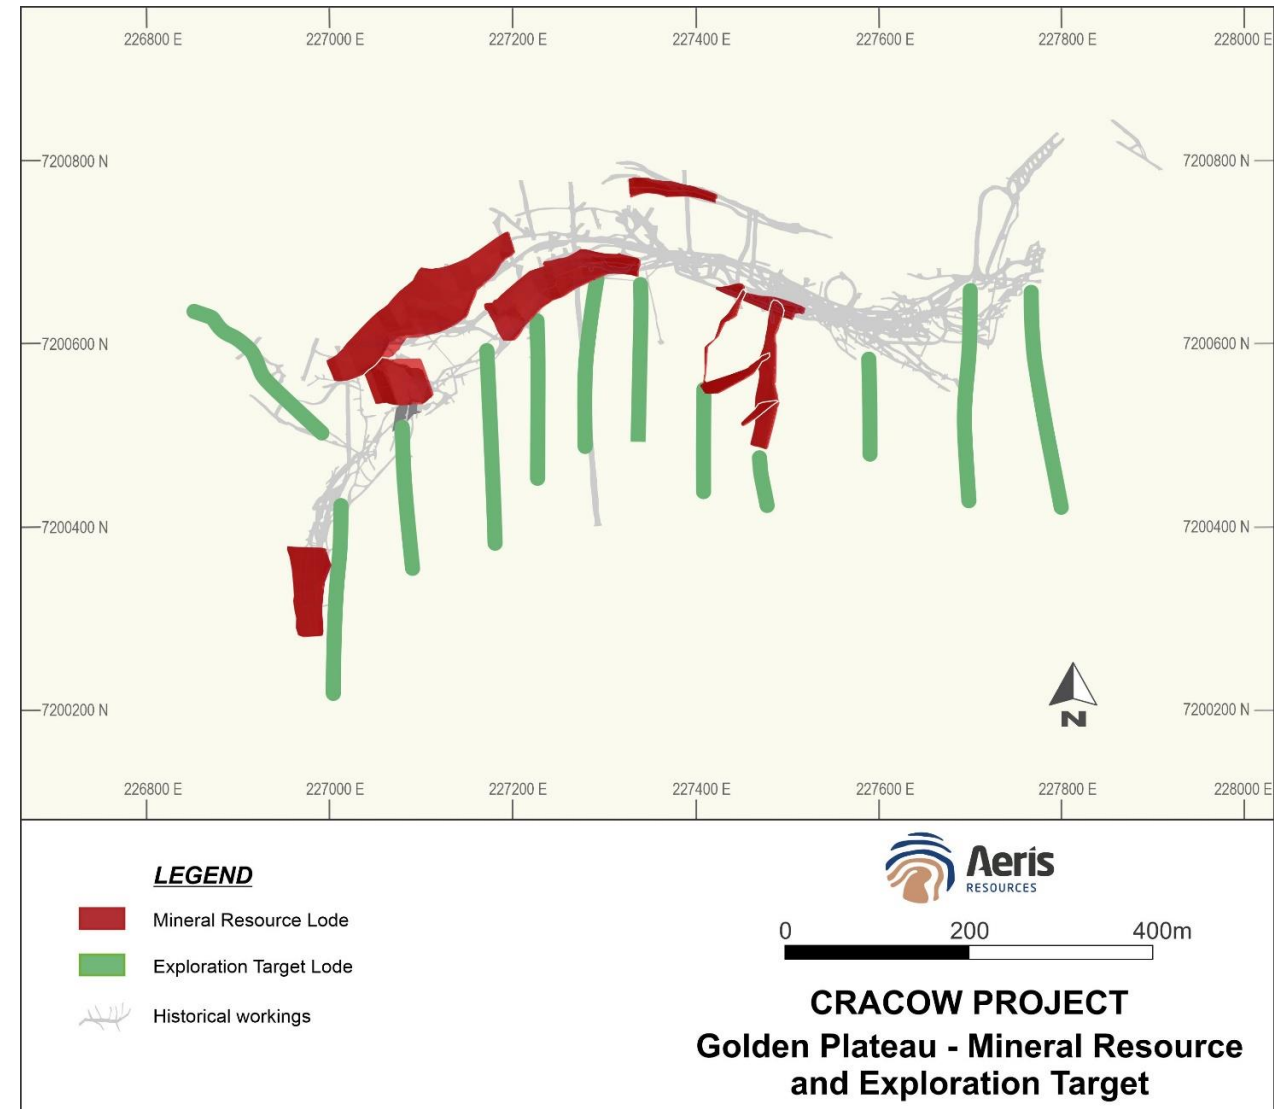

- ✓ Mature operation with high quality infrastructure
- ✓ Declining grades in the Western Vein Field
- ✓ Reinvesting cash flows in exploration
- ✓ Golden Plateau is the focus area
- ✓ Southern Vein Field underexplored due to thick cover and is future target area

Golden Plateau exploration

- Maiden Mineral Resource estimate released in January 2023¹ of 620kt at 3.1g/t Au and 15g/t Ag
- Contained metal of 62koz Au and 300koz Ag
- Significant potential to increase the resource with additional drilling
- Conceptual mining studies have commenced on open pit and underground options
- Exploration Target of 60 – 130koz Au² has been defined outside of the Mineral Resource

The potential quantity and grade of the Exploration Target is conceptual in nature and is therefore an approximation. There has been insufficient exploration drilling to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource. The Exploration Target has been prepared and reported in accordance with the 2012 edition of the JORC Code.

An aerial photograph of a large-scale mining operation in a desert environment. The central feature is a massive, rectangular open-pit mine with steep, reddish-brown soil walls. A paved road runs along the inner edge of the pit, leading to a dark tunnel entrance. Several large yellow haul trucks are visible on the road, and a smaller white vehicle is also present. In the background, there are some industrial structures and water tanks. The sky is filled with scattered clouds.

Jaguar Operations

Jaguar Operations

Consistent, polymetallic underground mine

- ✓ Investing capital to extend Bentley operations at depth
- ✓ New Turbo lens discovered in 2021 to extend Bentley mine life
- ✓ Other high grade exploration targets at Bentley and regionally including the fully permitted Triumph project
- ✓ Investigating potential at the closed Jaguar copper-zinc mine

Bentley exploration potential

Significant resource growth potential at depth

- Bentley deposit open along strike and down plunge
- Turbo lens resource increased to 1.26Mt with drilling outside the resource envelop demonstrating potential for further extensions
- Java Deeps target has also returned high-grade intersections¹:
 - 7.1m at 2.15% Cu, 16.7% Zn, 1.98g/t Au, 228g/t Ag (3.2²)
- Awaiting further deep drilling results

Extension of Turbo lens

- Turbo resource updated to 1.26Mt at 1.82% Cu, 8.5% Zn, 0.72g/t Au and 47g/t Ag¹
- Majority of resource in Indicated status
- Increased tonnage by 23% and contained zinc metal by 37%
- Strike length doubled to 400m
- Deposit is open along strike and down plunge
- Drilling has also intersected high grade mineralisation outside of the resource footprint including:
 - 14.7m at 0.79% Cu, 11.2% Zn, 0.5g/t Au and 26g/t Ag
 - 10.2m at 2.98% Cu, 1.5% Zn, 2.1g/t Au and 46g/t Ag
- Mineralised system at Bentley remains highly prospective for new discoveries

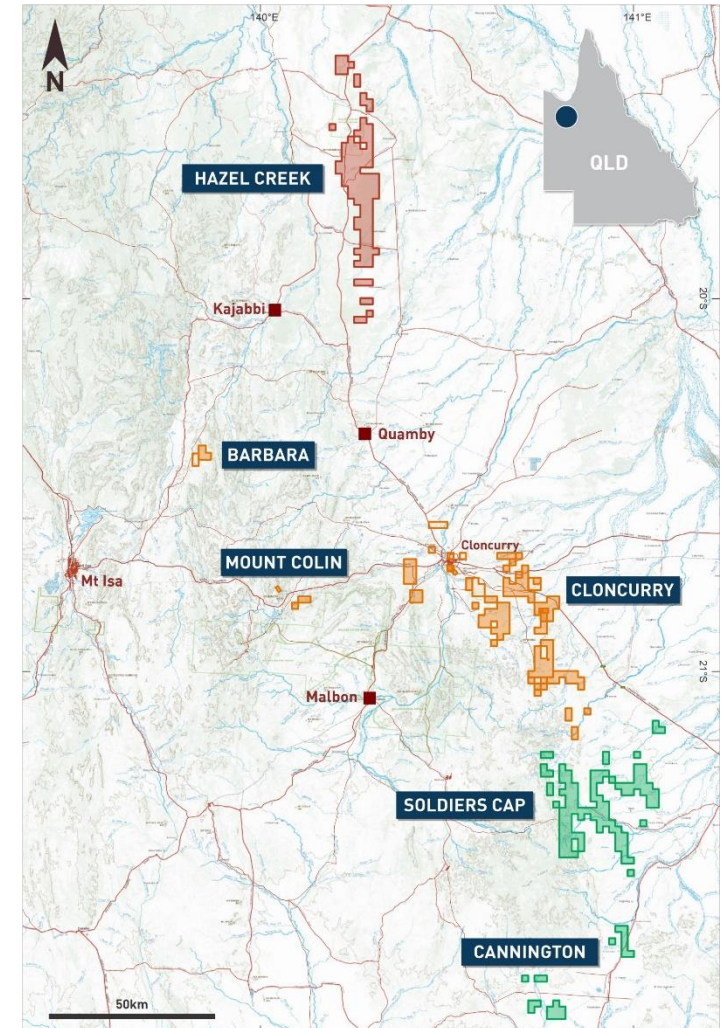

North Queensland Operations

North Queensland

Cash generative copper-gold mine and large exploration portfolio

- ✓ Harvesting cash from Mt Colin mine to fund other group capital developments
- ✓ Low cost toll treatment options with regional mills
- ✓ Potential underground operation at Barbara
- ✓ Large tenement package in highly prospective region to be explored
- ✓ Strategy to build a pipeline of operating mines in the region

North Queensland growth projects

Near-term potential at Barbara and large regional portfolio

Barbara

- Open pit mining finished in Dec 2020
- Mineralisation extends below current pit and is open at depth
- Mining study on a potential underground operation of similar scale to Mt Colin
- Drill program underway

Stockman Project

Stockman

High-grade, long life, polymetallic development project

- ✓ Mining Lease – approved
- ✓ Infrastructure Lease for tailings dam – approved
- ✓ Project work plan – approved
- ✓ High-grade, +10 year Ore Reserve of 9.6Mt at 2.9% CuEq (recovered)¹
- ✓ Significant onsite road infrastructure already in place
- ✓ GM Projects appointed to progress Stockman

Stockman

Advanced technical studies

- Underground mining operations at the Wilga and Currawong deposits targeting 1Mtpa
- Conventional flotation plant to produce copper and zinc concentrates with significant precious metals by-products

Wilga mine targeting ~200ktpa

Currawong mine targeting ~800ktpa

Stockman

Clear path to development

- Feasibility study underway and due for completion FY23
- Opportunities to extend mine life with Bigfoot and Eureka resources
- Highly prospective tenements with over 50 drill targets identified

The future

FY23 plans – an exciting year ahead!

Tritton

- 19- 23 kt Cu
- 5 – 7koz Au
- Emphasis on cost control
- Bring Avoca Tank mine into production Q4 FY23
- Maiden resource for Kurrajong

Jaguar

- 3 – 5 kt Cu
- 24 – 29kt Zn
- 5 – 7koz Au
- 0.9 – 1.1Moz Ag
- Emphasis on cost control
- Explore mine extension opportunities at Bentley (Turbo and Java Deeps) and Jaguar (on c&m)

Stockman

- Complete feasibility study
- Focus on community engagement and securing outstanding secondary permits
- \$9 – 11 million capital spend¹

Cracow

- 48 – 59koz Au
- Emphasis on cost control
- Maiden resource at Golden Plateau

North Queensland

- 10 – 12kt Cu
- 4 – 5koz Au
- Progress drilling and underground mining study at Barbara
- Assess regional exploration potential

Corporate

- 57 – 71kt Cu equivalent² group production
- Significant investment in growth capital (\$50 – 62 million) and exploration (\$23 – 28 million) across all sites
- Shared services between operations to reduce cost structure

Thank you

We are Aeris

Appendix

Highly experienced board and management

Board of Directors

Andre Labuschagne – Executive Chairman

Experienced mining executive with a career spanning more than 30 years. Held various executive roles in South Africa, PNG, Fiji and Australia. Previously as the Managing Director of ASX-listed gold company Norton Gold Fields Limited, led the company's growth to become a significant Australian gold producer, prior to its sale to a major Chinese Gold company in 2012.

Sylvia Wiggins – Non-Executive Director

A senior executive and investment banker with a demonstrated track record over 25 years in public markets, with a focus on finance, strategy and risk. Experience as CEO and CFO of public listed entities including most recently as CFO of Infigen Energy.

Robert Millner – Non-Executive Director

Chairman of WHSP. Extensive experience in the investment industry including current board positions with Apex Healthcare Berhad, Brickworks, BKI Investment Company, New Hope Corporation & TPG Telecom

Michele Muscillo – Non-Executive Director

Partner specialising in corporate law with HopgoodGanim Lawyers. He is an admitted Solicitor and has a practice focused almost exclusively on mergers and acquisitions, and capital raising.

Colin Moorhead – Non-Executive Director

Experienced industry executive with a geology background and a demonstrated track record of over three decades building value in mining companies. Extensive experience in developing and financing mining projects internationally. Significant ASX board experience in the resources sector.

Senior Executives

Robert Brainsbury – CFO

More than 30 years' experience in the mining and mining services sectors including senior roles with Rio Tinto, Xstrata, MIM Holdings and BIS Industrial Logistics. Previously was CFO at Norton Gold Fields Limited.

Ian Sheppard – COO

More than 30 years' experience in mine operations, technical studies and business development gained in gold, base metals and iron ore. Worked in Australia, Canada and Papua New Guinea. Was previously COO at Norton Gold Fields Limited.

Kim Franks – CPO

A Senior People and Culture Executive with over 20 years experience; more than a decade of which has been in the mining industry. Career history includes senior leadership roles with BHP, Santos and New Hope Corporation.

Copper equivalent calculation

Copper Equivalent Calculation

In this presentation, production is presented on a recovered CuEq metal produced basis and AISC costs are presented on a payable CuEq metal sold basis.

Recovered CuEq Metal Produced

$$\text{CuEq Metal Recovered } t = \frac{\left(\begin{array}{l} (\text{Recovered Cu Metal } t \times \text{Cu Price } \$/t) \\ + (\text{Recovered Zn Metal } t \times \text{Zn Price } \$/t) \\ + (\text{Recovered Au Metal oz} \times \text{Au Price } \$/\text{oz}) \\ + (\text{Recovered Ag Metal oz} \times \text{Ag Price } \$/\text{oz}) \end{array} \right)}{\text{Cu Price } \$/t} \text{ where each Recovered Metal is Contained Metal } \times \text{ recovery } \%$$

Payable CuEq Metal Sold

$$\text{CuEq Metal Payable } t = \frac{\left(\begin{array}{l} (\text{Cu Payable Metal } t \times \text{Cu Price } \$/t) \\ + (\text{Zn Payable Metal } t \times \text{Zn Price } \$/t) \\ + (\text{Au Payable Metal oz} \times \text{Au Price } \$/\text{oz}) \\ + (\text{Ag Payable Metal oz} \times \text{Ag Price } \$/\text{oz}) \end{array} \right)}{\text{Cu Price } \$/t}, \text{ where each Payable Metal is Recovered Metal in concentrate sold } \times \text{ actual payability } \% \text{ paid.}$$

With respect to historical metrics, CuEq has been calculated using the average realised metal prices over the cited period (except as otherwise stated).

With respect to CuEq metrics, forecast metal prices applied are as follows unless otherwise stated:

Base Price Deck		CY 2022	CY 2023	CY 2024	CY 2025	CY 2026	CY 2027	2028+
Copper	USD / lb	4.50	4.30	4.10	3.90	3.80	3.80	3.80
Silver	USD / oz	23.00	22.50	22.00	21.50	21.00	21.00	21.00
