About Anson Resources Ltd

Anson Resources (ASX: ASN) is an ASX-listed mineral resources company, with a portfolio of minerals projects in key demand-driven commodities. Its core asset is the Paradox Lithium Project in Utah, in the USA. Anson is focused on developing the Paradox Project into a significant lithium producing operation.

The Company's goal is to create long-term shareholder value through the discovery, acquisition and development of natural resources that meet the demand of tomorrow's new energy and technology markets.

Anson has published a positive Definitive Feasibility Study for the Phase 1 development the Paradox Lithium Project. The Paradox Lithium Project will utilize Direct Lithium Extraction (DLE) to process mineral rich sub-surface brine to produce battery grade lithium carbonate for supply to domestic (US. based) automakers and cell makers.

Anson has entered rapid pace of project development with a larger lithium resource delivered¹, and binding MoU executed with commercially proven DLE partner, Sunresin.

The Phase 2 development of the Project will see an expansion of lithium production capacity and commencement of bromine production.
