QUARTERLY ACTIVITIES REPORT- DECEMBER 2022

Wiluna Mining Corporation Limited (Administrators Appointed) (“Wiluna”, “WMC” or the “Company”) (ASX:WMC) provides the following update on the Company and its activities.

OPERATIONS

- Mining operations ceased on 14 December 2022, with mining contractor Byrncut demobilised from site by quarter end and the underground mine placed on care and maintenance.
- Processing of low-grade stockpiles is still underway and expected to continue until mid-February 2023. Concentrate shipments are expected to continue until end of February.
- Dewatering systems and access to key areas underground will continue to be maintained during care and maintenance to facilitate the restart of future operations.
- During the December quarter, the Company produced 7,729t of gold in concentrate at an average grade of 78.02g/t.
- The Company received DMIRS approval for the planned reprocessing of tailings from its Western Cell tailings storage facility on 14 February 2022, a further announcement on this will be released in the coming days.
- Total gold production for the quarter of 20,775oz.
- Total ore tonnes mined for the quarter was 176,154t at an average grade of 4.05g/t (Sep 2022 qtr: 186,181t at grade of 4.01 g/t)

FINANCIAL

- Cash & bullion at 31 December 2022 totalled \$3.3M (30 September 2022: \$2.3M).
- Total gold bullion and concentrate sales for the December quarter of 22,096oz of gold in concentrate and 642oz of gold bullion at spot for gross total revenue of \$49.59M (September quarter: 8,101oz of gold in concentrate and 764oz of gold bullion at spot for gross total revenue of \$18.8M).

CORPORATE

- The Company was placed in Voluntary Administration on 20 July 2022 with Michael Ryan, Kathryn Warwick, Daniel Woodhouse and Ian Francis of FTI Consulting appointed as joint and several voluntary administrators of the Company and its subsidiaries (“Administrators”).
- During the December quarter the Administrators obtained court approval to extend the convening period of the second meeting of creditors to 16 February 2023. Subsequent to quarter end, the Administrators have been granted court approval to further extend the convening period of the second meeting of creditors to 30 June 2023.

OPERATIONS

During the December 2022 quarter underground mining operations were wound down, with mining ceasing on 14 December 2022 and the mining contractor, Byrncut, subsequently demobilising from site. Processing of mining stockpiles to produce gold doré is expected to continue until mid- February 2023. The Company is planning to commence a low capital operation of reprocessing tailings, following completion of the processing of the abovementioned mined materials. These processing options would be aimed at funding the underground care and maintenance programs and future restart studies. Care and maintenance of the underground mine involves maintaining dewatering systems and access to key underground areas to facilitate restart of operations as may be required in the future. A final site inspection report was completed by a geotechnical consultant. In total, the geotechnical consultants completed three site visits during November and December to ensure underground operations were satisfactorily inspected for geotechnical issues prior to closure, including areas that will remain active for pumping during care and maintenance.

Total gold production for the December quarter was 20,603oz, a decrease from the 21,823oz of gold produced in the September quarter. Mining and production activities continued during the quarter up until mining was ceased on 14 December 2022. Total mining tonnes, grade and gold production are set out in the table below.

	Dec Qtr	Sep Qtr
Gold mined (oz)	22,953	24,017
Gold produced (oz)	22,603	21,823
Tonnes mined	176,154	186,181
Head grade mined (g/t)	4.05	4.01
Tonnes processed	199,868	196,954
Grade processed (g/t)	3.71	3.94

DECEMBER 2022 QUARTER PRODUCTION

As mentioned above, mining operations were suspended on 14 December 2022. A summary of the production results for the current and previous quarter is set out below.

TAILINGS RETREATMENT PROJECT

The Company received approval from DMIRS to begin the reprocessing of tailings from its Western Cell tailings storage facility on 14 February 2022. The Western Cell historic tailings facility is planned to provide an economically viable supply of low-grade ore for processing using the Company's existing plant for approximately 12-18 months. A further announcement on this will be made in the coming days.

EXPLORATION AND RESOURCE DRILLING

Following the appointment of the Administrators in July 2022, all exploration and resource drilling activities have been suspended.

CORPORATE

VOLUNTARY ADMINISTRATION

On 20 July 2022, the Directors of Wiluna Mining Corporation Limited and its subsidiaries listed in Annexure A resolved to appoint Michael Ryan, Kathryn Warwick, Daniel Woodhouse and Ian Francis of FTI Consulting as joint and several voluntary administrators.

As advised in the ASX announcement dated 16 December 2022, the Administrators engaged in a dual track sale and recapitalisation process with a view to maximise value of Wiluna and ancillary assets for all stakeholders. Several non-binding indicative offers for the sale and/or recapitalisation of Wiluna were received and assessed, however none were considered to be in the commercial interests of creditors. As a result, the Administrators have suspended the sale process.

Whilst the sale and/or recapitalisation process was ongoing the administrators sought extra time to complete these activities. As such, pursuant to section 439A (6) of the *Corporations Act 2001* (Cth), a second extension of the convening period of the second meeting of creditors (“Meeting”) for Wiluna was granted by the Supreme Court of Western Australia on 13 December 2022 which extended the timeframe to convene the second meeting of creditors to 16 February 2023. Subsequent to quarter end, the Administrators have been granted court approval to further extend the convening period of the second meeting of creditors to 30 June 2023. The Administrators requested the further extension to enable the completion of additional studies which were commissioned to advance the Administrators’ efforts to recapitalize or sell the Companies.

The Administrators will issue a further notice to all creditors advising the exact time, date and place for the Meeting providing creditors at least five (5) business days’ notice. The notice for the Meeting will include the Administrators detailed report into the affairs of the Companies and articulate the options available to creditors going forward.

Information will be released to the ASX website (www.asx.com.au), the Wiluna Mining website (<https://wilunamining.com.au/>) and uploaded to the FTI Consulting website (www.fticonsulting.com).

FINANCIAL & TREASURY

Cash & bullion as at 31 December 2022 increased by \$1M from the previous quarter from \$2.3M to \$3.3M. No further drawdowns or principal repayments were made on the Mercuria debt facility during the December quarter, however a strengthening of the AUD against the USD during the period resulted in a reduced AUD debt value as at 31 December of \$54.3M, down from \$56.7M as at 30 September 2022.

Gold concentrate sales continued during the December quarter, with the Administrators focussed on expediting the shipping of concentrate inventory to support the Company’s cashflow position. Total gold bullion and concentrate sales for the December quarter of 22,096oz of gold in concentrate for gross revenue of \$47.6M and 512.5oz of gold bullion at spot for gross revenue of \$1.7M (30 September 2022 quarter of 8,101oz of gold in concentrate and 764oz of gold bullion at spot for gross revenue of \$18.8M).

QUARTERLY CASH FLOW SUMMARY
