21 February 2023

Volt CEO's Vote of Confidence

Graphite producer and battery materials developer **Volt Resources Limited (ASX: VRC)** ("**Volt**" or "**the Company**") provides a short update for investors on some of the key initiatives being pursued across different parts of the Volt business:

Financials

- CEO, Prashant Chintawar, has purchased the first of a number of intended tranches of Volt shares, following the end of a blackout period, demonstrating his conviction in Volt's strategy, and aligning him more closely with existing investors.
- As part of Volt's refocused fiscal management, three service provider agreements have been terminated, and discretionary spending is under scrutiny.

Bunyu

- Volt management met recently with Tanzanian advisers in readiness for the negotiation of the Framework and Shareholders Agreement with the Tanzanian Government for the Bunyu project. The Agreement addresses the Tanzanian's Government's Free Carry Interest in the Bunyu project.

Natural Graphite Anode

- Customer evaluation of the Company's natural graphite anode continues, with an additional request for 200kg of material, indicating that our product is advancing in the qualification process. More broadly, we are receiving greater interest from battery and automotive companies regarding collaborations, reflecting in part the rapidly tightening conditions in the natural graphite market.

Volt's CEO, Prashant Chintawar commented: "Executing our growth strategy while maintaining fiscal discipline is critical for our near-term success. I am excited about Volt's growth potential, as testified by my on-market purchases, and look forward greatly to providing further details on the initiatives above as further information becomes available."

-ENDS-

About Volt Resources Limited

Volt Resources Limited (“Volt”) is a graphite producer/developer and gold exploration company listed on the Australian Stock Exchange under the ASX code VRC. Volt has a 70% interest in the Zavalievsky Graphite business in Ukraine. Zavalievsky is in close proximity to key markets with significant developments in LIB facilities planned to service the European based car makers and renewable energy sector. ZG benefits from an existing customer base and graphite product supply chains based on excellent transport infrastructure covering road, rail, river, and sea freight combined with reliable grid power, ample potable ground water supply and good communications¹.

Volt acquired three licence applications that are considered to be prospective for lithium-borate mineralisation. The licence applications are in respect to a total area of 291km², located in Serbia and are west and south-west of the Serbian capital, Belgrade².

Volt is progressing the development of its large wholly-owned Bunyu Graphite Project in Tanzania, as well as gold exploration in Guinea leveraging the Company’s existing extensive networks in Africa.

The Bunyu Graphite Project is ideally located near to critical infrastructure with sealed roads running through the project area and ready access to the deep-water port of Mtwara 140km from the Project. In 2018, Volt reported the completion of the Feasibility Study (“FS”) into the Stage 1 development of the Bunyu Graphite Project. The Stage 1 development is based on a mining and processing plant annual throughput rate of 400,000 tonnes of ore to produce on average 23,700tpa of graphite products³. A key objective of the Stage 1 development is to establish infrastructure and market position in support of the development of the significantly larger Stage 2 expansion project at Bunyu.

The Guinea Gold Projects comprise 6 permits in Guinea, West Africa having a total area of 348km. The Projects are located in the prolific Siguiri Basin which forms part of the richly mineralised West African Birimian Gold Belt.

¹ Refer to Volt’s ASX announcements titled “Volt to Acquire European Graphite Business following Completion of Due Diligence” dated 14 May 2021 and “Completion of the ZG Group Transaction Following Execution of New Convertible Securities Facility” dated 26 July 2021.

² Refer to Volt’s ASX announcement titled “Strategic European Lithium Acquisition – Jadar North” dated 18 November 2021.

³ Refer to Volt’s ASX announcement titled “Positive Stage 1 Feasibility Study Bunyu Graphite Project” dated 31 July 2018. The Company confirms that it is not aware of any new information or data that materially affects the information included in this document and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.
