## ABOUT TOMBADOR IRON LIMITED

Tombador Iron Ltd owns 100% of the fully permitted Tombador Iron Ore mine located in Bahia State Brazil.

Tombador commenced production of premium-grade lump and fines hematite iron ore in May 2021 from a low-capex open-pit mining operation.

Tombador's lump ore is in scarce supply globally and is suitable for Direct Reduced Iron and/or Blast Furnace steelmakers. Offtake partner Trafigura will purchase 100% of lump and fines product which Tombador sells into the international export market. Tombador is building sales volumes within the Brazilian steel industry with repeat orders received from several domestic steel mills and other potential Brazilian customers currently trialling the Company's high-grade lump and fines products.

The Company's board of directors is focused on maximising profit margins from mining operations and returning dividends to shareholders.
