3. DETAILS OF THE OFFER

3.1 Background

The Company has been suspended from trading on ASX since 28 February 2022. The purpose of this Prospectus is therefore to ensure that any Shares issued during the period that the Company was suspended are capable of being traded from the date of the reinstatement to trading of the Company. During the period of suspension, the Company has continued to make announcements to ASX, and details of the Company's assets and its current activities are available from the ASX website.

3.2 Offer

Under this Prospectus, the Company invites investors identified by the Directors to apply for up to 1,000 Shares at an issue price of \$0.05 per Share to raise up to \$50 (before expenses).

The Offer will only be extended to specific parties on invitation from the Directors. Application Forms will only be provided by the Company to these parties.

All of the Shares offered under this Prospectus will rank equally with Shares on issue at the date of this Prospectus.

3.3 Objective

The Company is seeking to raise only a nominal amount of \$50 under this Prospectus and, accordingly, the purpose of this Prospectus is not to raise capital.

The primary purpose of this Prospectus is to remove any trading restrictions that may have attached to Shares issued by the Company prior to the Closing Date.

Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body; and
- (b) either:
 - (i) a prospectus is lodged with the ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

3.4 Application for Shares

Applications for Shares must be made by investors at the direction of the Company and must be made using the Application Form accompanying this Prospectus.

Payment for the Shares must be made in full at the issue price of \$0.05 per Share.

Issue of Shares under the Offer will take place as soon as practicable after the Closing Date. Application moneys will be held in a separate subscription account until the Shares are issued. This account will be established and kept by the Company in trust for each Applicant. Any interest earned on the application moneys will be for the benefit of the Company and will be retained by the Company irrespective of whether any Shares are issued, and each Applicant waives the right to claim any interest.

The Directors will determine the recipients of all the Shares. The Directors reserve the right to reject any application or to allocate any Applicant fewer Shares than the number applied for.

Where the number of Shares issued is less than the number applied for, the surplus moneys will be returned by cheque as soon as practicable after the Closing Date. Where no issue of Shares is made, the amount tendered on application will be returned in full as soon as practicable after the Closing Date. Interest will not be paid on moneys refunded.

3.7 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within 7 days of the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of 3 months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

3.8 Restrictions on the distribution of the Prospectus

The distribution of this Prospectus outside the Commonwealth of Australia may be restricted by law.

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

Residents of countries outside Australia should consult their professional advisers as to whether any government or other consents are required, or whether any formalities need to be observed should they wish to make an application to take up Shares on the basis of this Prospectus. The return of a duly completed Application Form will be taken to constitute a representation and warranty that there has been no breach of such laws and that all approvals and consents have been obtained.

3.9 Enquiries

Any questions concerning the Offer should be directed to the Company share registry on +61 8 9389 8033 or the Company Secretary, on +61 8 9389 2111.

4. PURPOSE AND EFFECT OF THE OFFER

4.3 Financial effect of the Offer

After expenses of the Offer of approximately \$10,000, there will be no proceeds from the Offer. The expenses of the Offer (exceeding \$50) will be met from the Company's existing cash reserves.

As such, the Offer will have an effect on the Company's financial position, being receipt of funds of \$50 less costs of preparing the Prospectus of approximately \$10,000.

5. RIGHTS AND LIABILITIES ATTACHING TO SHARES

The following is a summary of the more significant rights and liabilities attaching to Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

5.1 General Meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

5.2 Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (a) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (b) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (c) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

5.3 Dividend rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

5.4 Winding-up

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

5.5 Shareholder liability

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

5.6 Transfer of shares

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

5.7 Future increase in capital

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of Securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

5.8 Variation of rights

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

5.9 Alteration of constitution

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

6. RISK FACTORS

6.1 Introduction

The Shares offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this Section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

6.2 Company specific

(a) Exploration risks

The mineral tenements of the Company are in the early stages of exploration. Because mineral exploration and development are high-risk undertakings, there can be no assurance that exploration of these other or any future tenements will result in the discovery of an economic deposit. If exploration is successful, there will be additional costs and processes involved in moving to the development phase.

Exploration and development costs are based on estimates and assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may differ materially from these estimates and assumptions. Such differences may materially and adversely affect the Company's viability.

(b) New projects and acquisitions

The Company has to date and will continue to pursue and assess other new business opportunities. These new business opportunities may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits, or direct equity participation.

The acquisition of projects or other assets (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence and prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or successful. If the proposed acquisition is not completed, monies already advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is completed, the Directors will need to reassess, at that time, the funding allocated to current projects and new projects or assets, which may result in the Company reallocating funds from other projects and/or the raising of additional capital (if available). Furthermore, notwithstanding that an acquisition may proceed upon the completion of due diligence, the usual risks associated with the new project/business activities will remain.

Furthermore, if a new investment or acquisition by the Company is completed, ASX may require the Company to seek Shareholder approval and to meet the admission requirements under Chapters 1 and 2 of the ASX Listing Rules as if the Company were a new listing. There would be costs associated in re-complying with the admission requirements. The Company may be required to incur these costs in any event, were it to proceed to seek to acquire a new project which is considered to result in a significant change to the nature or scale of its existing operations.

If a new investment or acquisition is not completed, then the Company may not be in a position to comply with the ongoing ASX Listing Rules, which includes but is not limited to, maintaining a sufficient level of operations and financial position. Given the nature of resource exploration, this may also occur if the Company abandons and/or relinquishes a project which is no longer considered viable.

Any new project or business acquisition may change the risk profile of the Company, particularly if the new project is located in another jurisdiction, involving a new commodity and/or changes to the Company's capital/funding requirements. Should the Company propose or complete the acquisition of a new project or business activity, investors should re-assess their investment in the Company in light of the new project/business activity.

(c) Regulatory Risks

The Company's exploration and development activities are subject to extensive laws and regulations relating to numerous matters including, without limitation, tenement and concession requirements and risks, conditions including environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. The Company requires environmental licences from regulatory authorities to authorise the Company's operations. These licences relate to development, production and rehabilitation activities (although no such activities are currently in progress).

Obtaining necessary licences can be a time-consuming process and there is a risk that the Company will not obtain these licences on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary licences and complying with these licences and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a project. Any failure to comply with applicable laws and regulations or licences, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the projects in which the Company currently holds an interest.

(d) Resource and Reserve estimates

An estimate is an expression of judgement based on knowledge, experience and industry practice. Estimates that were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further

information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development.

(e) **Liquidity of Shares**

There may be relatively few potential buyers or sellers of the Shares on ASX at any time. This may increase the volatility of the market price of the Shares. It may also affect the prevailing market price at which Shareholders are able to sell their Shares. This may result in Shareholders receiving a market price for their Shares that is less than the price that Shareholders paid to acquire their Shares.

(f) **Additional requirements for capital**

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(g) **Key personnel and employee's risk**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance that there will be no detrimental impact on the Company if one or more of these key personnel ceases their involvement with the Company.

(h) **Government policy changes**

Adverse changes in government policies or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations, and mining and exploration activities of the Company.

6.3 Industry specific

(a) **Operating risks**

The current and future operations of the Company, including exploration, appraisal and possible production activities may be affected by a range of factors, including:

- (i) adverse geological conditions;
- (ii) failure to achieve predicted grades in exploration and mining;
- (iii) limitations on activities due to seasonal weather patterns and cyclone activity;
- (iv) unanticipated operational and technical difficulties encountered in geophysical surveys, drilling and production activities;
- (v) difficulties in commissioning and operating plant and equipment;
- (vi) mechanical failure of operating plant and equipment;

- (vii) unanticipated metallurgical problems which may affect extraction recoveries and costs;
- (viii) industrial and environmental accidents, industrial disputes and other force majeure events;
- (ix) unexpected shortages or increases in the costs of labour, consumables, spare parts, plant and equipment; and
- (x) inability to obtain or maintain any necessary consents or approvals.

No assurances can be given that the Company will achieve commercial viability through successful exploration and/or mining. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(b) Commodity price volatility and exchange rate risks

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for commodities, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

(c) Mineral resources estimate risk

Mineral Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

(d) Title risk

Although the Company has investigated title to all of its tenements, the Company cannot give any assurance that title to such tenements will not be challenged or impugned. Accordingly, there is a residual risk that, despite the Company's investigations, the tenements may be subject to prior unregistered agreements or transfers or title may be affected by unregistered encumbrances, third party interests or defects. Tenements are also subject to minimum expenditure requirements. In the event that these minimum expenditure requirements are not met, those tenements may be subject to forfeiture proceedings.

(e) Environmental risks

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds.

The Company intends to conduct its activities in an environmentally responsible manner and in accordance with applicable laws and industry standards. Areas disturbed by the Company's activities will be rehabilitated as required by the relevant regulatory authorities.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires, may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive.

Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay or modification to anticipated exploration programmes or mining activities. There is always a risk that detailed environmental investigations will identify endangered or other protected species that may affect the ability of the Company to obtain any necessary government approvals or carry out its operations as planned.

(f) Legislative changes and government policy risk

Changes in government regulations and policies may adversely affect the financial performance of the Company. The Company's capacity to explore and mine, in particular the Company's ability to explore and mine any reserves, may be affected by changes in government policy, which are beyond the control of the Company.

(g) Force Majeure

The Company's projects now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

6.4 General risks

The value of the Company's securities is affected by a number of general factors which are beyond the control of the Company and its Directors including those set out below.

(a) Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development, and production activities, as well as on its ability to fund those activities.

(b) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) **Dividends**

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(d) **Taxation**

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.

6.5 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Prospectus.

Therefore, the Shares to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

7. ADDITIONAL INFORMATION

7.1 Litigation

As at the date of this Prospectus, the Company is not involved in any legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company.

7.2 Continuous disclosure obligations

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company’s securities.

This Prospectus is a “transaction specific prospectus”. In general terms a “transaction specific prospectus” is only required to contain information in relation to the effect of the issue of securities on the Company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 3 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
 - (i) the annual financial report most recently lodged by the Company with the ASIC;
 - (ii) any half-year financial report lodged by the Company with the ASIC after the lodgement of the annual financial report referred to in (i) and before the lodgement of this Prospectus with the ASIC; and

- (iii) any continuous disclosure documents given by the Company to ASX in accordance with the ASX Listing Rules as referred to in section 674(1) of the Corporations Act after the lodgement of the annual financial report referred to in (i) and before the lodgement of this Prospectus with the ASIC.

Copies of all documents lodged with the ASIC in relation to the Company can be inspected at the registered office of the Company or an ASIC office during normal office hours.

The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of Shares can be transferred without having to rely upon paper documentation. Further, monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month. Shareholders may request a holding statement at any other time, however a charge may be made for such additional statements.
