

Drill Contract Awarded for Falcon Lake Lithium Project

BM8 awards maiden drilling contract to Rodren Drilling of Manitoba

Battery Age Minerals Ltd (ASX: **BM8**; “**Battery Age**” or “**the Company**”) is pleased to advise that it has awarded the drilling contract for its maiden programme to highly regarded drilling contractor Rodren Drilling, based out of Winnipeg, Manitoba Canada.

Rodren Drilling has over 40 years’ experience in drilling across a range of commodities and industrial sectors. They are well known for their unique ability to understand the needs of their clients along with their innovation, safety and the quality of their service.

Final planning and mobilisation activities for the maiden drilling programme are now well underway, with drilling operations expected to commence in 4-6 weeks.

Battery Age CEO, Gerard O’ Donovan, commented:

“We are delighted to partner with the Rodren Drilling team moving forward as our preferred drilling contractor. Rodren are extremely experienced drillers who will bring a wealth of knowledge to the table with respect to Canadian drilling operations. We look forward to working with them into the future.”

“This is an exciting time for Battery Age, with mobilisation activities well advanced for the start of drilling in the coming weeks.”

Falcon Lake Lithium Project¹

The Falcon Lake Lithium Project is located in the Tier-1 Thunder Bay mining jurisdiction in north-western Ontario, Canada.

Comprising 214 mining claims covering an area of 4,280 hectares (42.8km²), Falcon Lake is located in a highly fertile region for spodumene-bearing pegmatites within a prospective 5km corridor with notable historic intercepts of 24.4m at 1.43% Li₂O from 10.9m, including 9.0m at 1.95% Li₂O. All of the historical drilling results for this Project is set out in Appendix B of the Independent Geologist Report, which is annexed as Annexure A of the Prospectus.

The Project lies just 10km along strike from the Seymour Lake Lithium Project, owned by Green Technology Metals (ASX: GT1), which has defined a JORC reported Global Inferred and Indicated Mineral Resource of 9.9Mt grading 1.04% Li₂O².

The area has excellent all-weather infrastructure including road and rail connecting it with the regional centre of Thunder Bay.
