Mining

Raleigh

Production that commenced in December 2004 at the Raleigh Underground Mine was placed on care and maintenance due to seismic activity in April 2020. A full review of the mine plan was initiated by the JV Manager and will result in rescheduling the mining of remaining reserves to a later date.

The depth of the decline is approximately 743 metres ("m") below the surface. The top of the Sadler incline remains at 356m below the surface and the bottom of the Sadler Decline is approximately 401 m below the surface.

There was no mine production at Raleigh and there was no capital or operating development during the half-year.

Rubicon/Hornet/Pegasus

Production at the Rubicon Underground Mine that commenced in August 2011 continues.

Rubicon and Hornet Ore Bodies

Capital development for the half-year totalled 413 m including 253 m of decline development. Operating development for the half-year totalled 1,022 m; including 205 m in waste, 611 m in ore and 205 m through paste fill.

Tribune Resources Limited

Directors' report

31 December 2022

Mine production during the half-year totalled 227,690 tonnes ('t') grading 4.8 grams per tonne ("g/t") containing 35,201 ounces ("oz") of gold, based on grade control estimates. Tribune's entitlement to mined ore tonnes in the half-year was 83,676 t for 12,936 oz.

Exploration

EKJV

Underground drilling activity in the period across the East Kundana Joint Venture ("EKJV") focused on the Nugget ore body, a shallow, southwest dipping narrow vein, in the hanging wall of the K2B mineralised horizon. A total of 5 diamond drill holes for 906.7 metres were completed between 1st July 2022 and 30th September 2022 targeting the down dip extensions to the Nugget Zone prospect and parallel lodes.

Surface drilling activity completed during the period included surface RC resource development drilling at Golden Hind and Hornet open pit deposits. A total of 4,222 metres of surface RC drilling was completed, to further define continuity of the geological model.

Details of all EKJV exploration activities are contained in the September and December Quarterly EKJV Exploration Reports released to the market on 20 October 2022 and 16 January 2023.

Seven Mile Hill (Tribune's Interest 50%)

During the period, geological field work and ongoing logging of drill core from the previous diamond drilling campaign was conducted for the Seven Mile Hill joint venture.

No drilling was conducted during the period.

West Kundana Joint Venture (Tribune's Interest 24.5%)

No exploration activity was undertaken within the WKJV.

Tribune Resources Ghana Limited (Tribune's Interest 100%)

Japa Concession (Tribune's Interest 80%)

Planned drilling activities in Ghana were rescheduled due to delay by the government of Ghana to finalise Tribune Resources licences and documentation with Agencies and its regulatory bodies such as the Land Commission, the Environmental Protection Agency and the Minerals Commission. Tribune is awaiting the ratification of its Mining Lease by the Parliament of Ghana.

An infill diamond core and reverse circulation drilling program of about 8,000 m has been planned for execution. The focus of this program is to upgrade the indicated resource to a measured category for future reserve estimation. Metallurgical, Sterilization and Hydrological drill holes for plant, infrastructural, water and tailings dam management will follow.

No mineral production was undertaken by Tribune during the quarter.

Diwalwal Gold Project (Philippines)

Surface and underground exploration in Lantawan extended the strike length of the vein to more than 1,200m with mineralisation horizon above 1,000m RL. Work included surface and underground geologic mapping and geochemical sampling, trenching, and test-pitting. Trenching and test-pit activities tested vein extensions, returning appreciable gold results, the highest so far at 29.3ppm.

Victory tunnel operations include regular inspection and maintenance activities for tunnel stability and safety inspections.

Tree nursery and materials recovery operations, as well as tree-planting and maintenance activities, carried on throughout the period, ensuring efforts to protect the environment are in place.

No drilling was conducted during the period.

There were no transfers between levels during the financial half-year.

Unless otherwise stated, the carrying amounts of financial instruments reflect their fair value. The carrying amounts of trade receivables and trade payables are assumed to approximate their fair values due to their short-term nature. The fair value of financial liabilities is estimated by discounting the remaining contractual maturities at the current market interest rate that is available for similar financial instruments.

Valuation techniques for fair value measurements categorised within level 2 and level 3

On 31 May 2021, the Company revalued its office building in East Legon. The fair value used represents the amount for which the asset could be exchanged between knowledgeable parties in an arm's length transaction, based on current prices in an active market for similar properties in the same location and condition. The valuation was performed by an independent valuation company which is also a member of the Ghana Institute of Surveyors. The directors do not believe that there has been a material movement in fair value since the revaluation date.
