

ASX RELEASE

28 March 2023

ASX: NVU

## Appointment of Dr Michael Winlo as Non-Executive Director

Nanoveu Limited (“**Nanoveu**” or the “**Company**”) (**ASX: NVU**), a company specialising in films and coatings for cutting-edge applications, advises that it has appointed Dr Michael Winlo to its board as a Non-Executive Director.

Dr Michael Winlo has extensive experience in leading high-growth teams across the biotech, pharmaceutical and technology sectors, and is currently the Managing Director of Emyria Limited (ASX:EMD). Dr Winlo is also a Director and former CEO of Linear Clinical Research, a world-class provider of early and late stage pharmaceutical trials.

Prior to his role at Linear, Michael was based in Silicon Valley as the health lead for Palantir Technologies - one of the largest big data companies in the world (NYSE: PLTR). There, Michael led deployments for health companies and government organisations across the US and UK.

Dr Winlo has a Master of Business Administration (MBA) from Stanford University and a Bachelor of Medicine, Bachelor of Surgery (MBBS) from the University of Western Australia.

Nanoveu’s Non-Executive Chairman, Dr. David Pevcic said, *“We are delighted to announce the appointment of Dr. Winlo to our Board of Directors. Dr. Winlo is a dynamic and innovative executive with extensive experience in the life sciences and technology sectors. We are eager to collaborate with Dr. Winlo as we work towards growing our sales pipeline for our current product offerings, and exploring new avenues for film and coating technologies that have significant market potential. We believe that Dr. Winlo’s expertise and leadership will strengthen our organization as we continue to drive growth and innovation in our industry.”*

The relevant Appendix 3X disclosing interests of Dr Winlo has been lodged.

*This announcement has been authorised for release by the Board of Directors.*

#### **About Nanoveu Limited**

Nanoveu is a company specialising in films and coatings for modern, cutting-edge applications. <https://www.nanoveu.com/>

**Nanoshield™** - is a film which uses a patented polymer of Cuprous embedded film to self-disinfect surfaces. Nanoshield antiviral protection which is available in a variety of shapes and forms, from mobile screen covers, to mobile phone cases and as a PVC commercial film, capable of being applied to a number of surfaces such as doorhandles and push panels. The perfectly clear plastic film contains a layer of charged copper nanoparticles which have antiviral and antimicrobial properties. This technology is also being applied to fabric applications targeting use in the personal protective equipment sector.

**EyeFly3D™** - is a film applied to digital displays that allowed users to experience 3D without the need for glasses on everyday mobile handheld devices.

**Customskins** - are vending machines capable of precisely applying screen covers to mobile phones with an alignment accuracy of 150 microns.

**EyeFyx** - currently in research and development stage, EyeFyx is a vision correction solution using hardware and software to manipulate screen output addressing long-sightedness without the need to wear reading glasses.
