Commenting on the latest gold sale, Barton MD Alex Scanlon said:

"Our substantial asset base gives us unique advantages, not only in terms of a future low-cost and low-risk transition back to operations, but also opportunities to carefully monetise these assets and extend our treasury.

"Since our June 2022 IPO, our revenue initiatives have generated over AUD \$5 million non-dilutive cash (net of costs) for Barton. We are very pleased to create this type of value for our shareholders.

"We are focused on building additional Resources for an optimal future restart of operations, and will continue to advance asset monetisation opportunities in parallel, including gold sales from our December 2022 work."
