Almonty's Chairman, President and CEO Lewis Black commented:

"While operations at our Panasqueira mine in Portugal continues to show income and positive EBITDA from mining operations with a 9 fold increase in EBITDA compared to 2021 and a disciplined management of costs during some extraordinary inflationary events, the Company recorded a non-cash unrealized foreign exchange loss of \$2.9 million during the year as a result of an 8.5% swing in the relative USD vs. CAD foreign exchange rates as well as a non-cash charge for share-based payments of \$3.8 million on the granting of stock options during the year that were directly linked to the successful closing of the KfW debt financing. A further update on the progress at site will follow shortly."

(1) Non-GAAP Financial Measures

This press release makes reference to certain non-GAAP financial measures. These measures are not recognized measures under IFRS, do not have a standardized meaning prescribed by IFRS and may not be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement IFRS financial measures by providing further understanding of Almonty's results of operations from management's perspective. Almonty's definitions of non-GAAP measures used in this press release may not be the same as the definitions for such measures used by other companies in their reporting. Non-GAAP measures have limitations as analytical tools and should not be considered in isolation nor as a substitute for analysis of Almonty's financial information reported under IFRS. Almonty uses non-GAAP financial measures, including "EBITDA", to provide investors with supplemental measures of its operating performance and to eliminate items that have less bearing on operating performance or operating conditions, and thus highlight trends in its core business that may not otherwise be apparent when relying solely on IFRS financial measures. Almonty defines "EBITDA from mining operations" as gross revenue less mine production costs.

Almonty believes that securities analysts, investors and other interested parties frequently use non-GAAP financial measures in the evaluation of issuers. Almonty's management also uses non-GAAP financial measures in order to facilitate operating performance comparisons from period to period.
