

## ASX RELEASE

Dragon Mountain Gold Limited,  
ACN: 111 005 282  
182 Claisebrook Road, Perth WA 6000

28 April 2023

### **QUARTERLY REPORT 31 March 2023**

Dragon Mountain Gold Limited ("DMG" or "the Company") is pleased to provide this Quarterly Activity Report for the quarter ending 31 March 2023.

#### **Exploration Activities**

The Company has continued its exploration of the Avalon and Cawse Projects, utilising the latest exploration techniques and mineralisation models, whilst taking advantage of substantial historic datasets.

The Company continued working with Galt Mining Solutions on the analysis of a field reconnaissance trip that was conducted in November 2022.

The follow-up reconnaissance mapping located minor exposures of the transported channel horizons below a thick (~2-5m) recent alluvial sand cover, which also displayed low-level concentrations of Li/REE's. Where historic water bore drilling occurred, no drill material existed on the surface that could be sampled to obtain deeper in-situ information on the channel clay horizons and their potential for higher concentrations of Li/REE's.

To adequately assess whether these clay horizons contain higher Li/REE concentrations, a proposed Phase 1 design of 12 RC holes is planned for 960 metres of drilling to provide data to allow a decision on further evaluation of this commodity on the Avalon Project tenure. The drilling program will test directly for buried hard rock Li/REE's (intrusion/dykes) as the preliminary surface assay data shows an increase in Li related element concentrates in Felsic rocks (Sn-W-Ta-Hf) in this area providing initial support to the desktop conclusions of younger granitic intrusions existing to the south of DMG tenements indicating potential to be Lithium bearing.

In addition, to further explore the Bulong gold prospectivity, 4 RC drill holes are planned to a nominal depth of 180m down hole for 720 metres of drilling to obtain a complete cross-section of coverage from the western felsic and mafic rocks to the eastern Bulong Complex ultramafic rocks with the interpreted shear contact being the primary target.

The Company is currently assessing the proposed drill program and will advise progress when further information is available.

#### **Corporate Activity**

At the end of the quarter, the Company's cash position was \$797,000.

**Competent Person**

The information regarding exploration commentary with DMG's Avalon project is based on, and fairly represents, information and supporting documentation reviewed and compiled by Mr Brett Innes, consultant, Galt Mining Solutions. Mr Innes is a member of the Australian Institute of Geoscientists (AIG) and has sufficient experience which is relevant to the style of mineralisation under consideration and to the activity which has been undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Innes consents to the inclusion in this release of the matters based on the information in the form and context in which they appear.
