Disclaimer

These presentation materials have been prepared by the Company ("Tombador Iron Limited").

These Presentation Materials contain descriptive materials and other data relating to future events. These Presentation Materials are being delivered to certain parties with the understanding that they do not purport to be comprehensive or contain all information or describe all risks that parties may require in investigating the Company or describe all risks attaching to any investment and that all parties will conduct their own independent investigation of those matters which they deem appropriate without reliance upon the Company or any materials set out in these Presentation Materials.

The Company has not independently verified all of the information contained herein and neither makes any representations or warranties as to the Company's future performance or the accuracy or completeness of any information contained in these Presentation Materials (together with any amendments or supplements and any other information that may be furnished by the Company).

These Presentation Materials contain certain forward-looking statements, estimates or projections that relate to future events or the Company's future financial performance. In some cases, forward-looking statements can be identified by terms such as "may", "will", "should", "plan", "intend", "believe", "potential" or other comparable terminology. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's results, financial performance or achievements to differ materially from any results, financial performance or achievements expressed or implied by any forward-looking statement. Parties should not rely on any forward-looking statement in these Presentation Materials.

Except as otherwise indicated, these Presentation Materials speak as of the date hereof. The delivery of these Presentation Materials does not create an implication that there has been no change in the Company's affairs after the date of this document. The Company does not give any undertaking to update these Presentation Materials or any other information supplied or to correct any inaccuracies which may become apparent.

Compliance Statement

The information in this document that relates to Mineral Resource Estimates has been extracted from the Company's announcement "Mineral Resource Update" (announced 24 December 2021). The Company confirms that it is not aware of any new information or data that materially affects the information included in the "Mineral Resource Update" announcement and that all material assumptions and technical parameters underpinning the Mineral Resource estimates in that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the "Mineral Resource Update" announcement.

The information in this document that relates to Ore Reserve Estimates has been extracted from the Company's announcement "Tombador Project Pre-Feasibility Study Demonstrates Strong Financial Returns from its Maiden Ore Reserves" (announced 1 March 2022) ("**Announcement**"). The Company confirms that it is not aware of any new information or data that materially affects the information included in the Announcement and that all material assumptions and technical parameters underpinning the Ore Reserve estimates in that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market Announcement.

TOMBADOR IRON

Investment

Highlights

Brazil and Asia markets:
sales growth opportunity

Brazil's highest quality lump producer

100% ownership in a mining friendly jurisdiction

Proven track record:
construction, production, quality, dividend

Simple Mining Operations

Production Performance

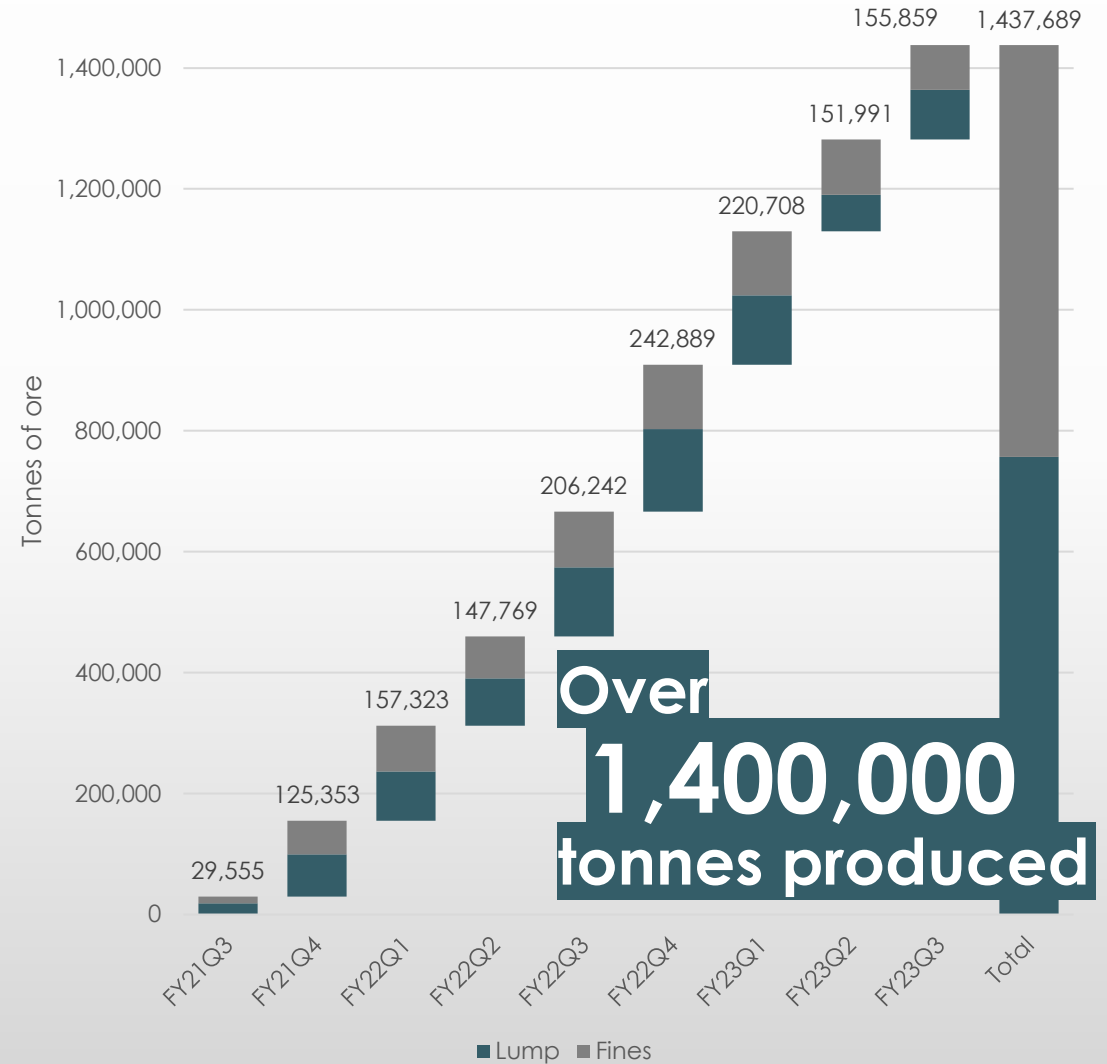

- With a substantial amount of product on stockpile production was managed to ~150,000 tonnes in the March 2023 Quarter.
- The Company has previously proved production capacity of 100,000 tonnes/month.
- Company's strategy is to align production to sales which **realise positive margins for its valuable resource**.
- The March 2023 Quarter was the first quarter where sales exceeded production as the Company entered new sales agreements and moved product in the favourable market

Crushing of Lump (background) and Sinter Fines (foreground)

May 23

Production to 31 March 2023

Premium Grade Products

Tombador lump ore remains the **highest grade lump** ore produced in Brazil.

Excellent Chemistry

No seasonality

Good physical properties – low degradation

Low levels of deleterious minor & trace element

Premium Specs	Lump	Sinter Fines
Iron	65%	65%
Silica	2.75%	3.0%
Alumina	0.5%	0.6%
Phosphorus	0.08%	0.1%
Sulphur	<0.01%	<0.01%
Moisture	<1.0%	<3.0%
<6.35 mm	8%	85%

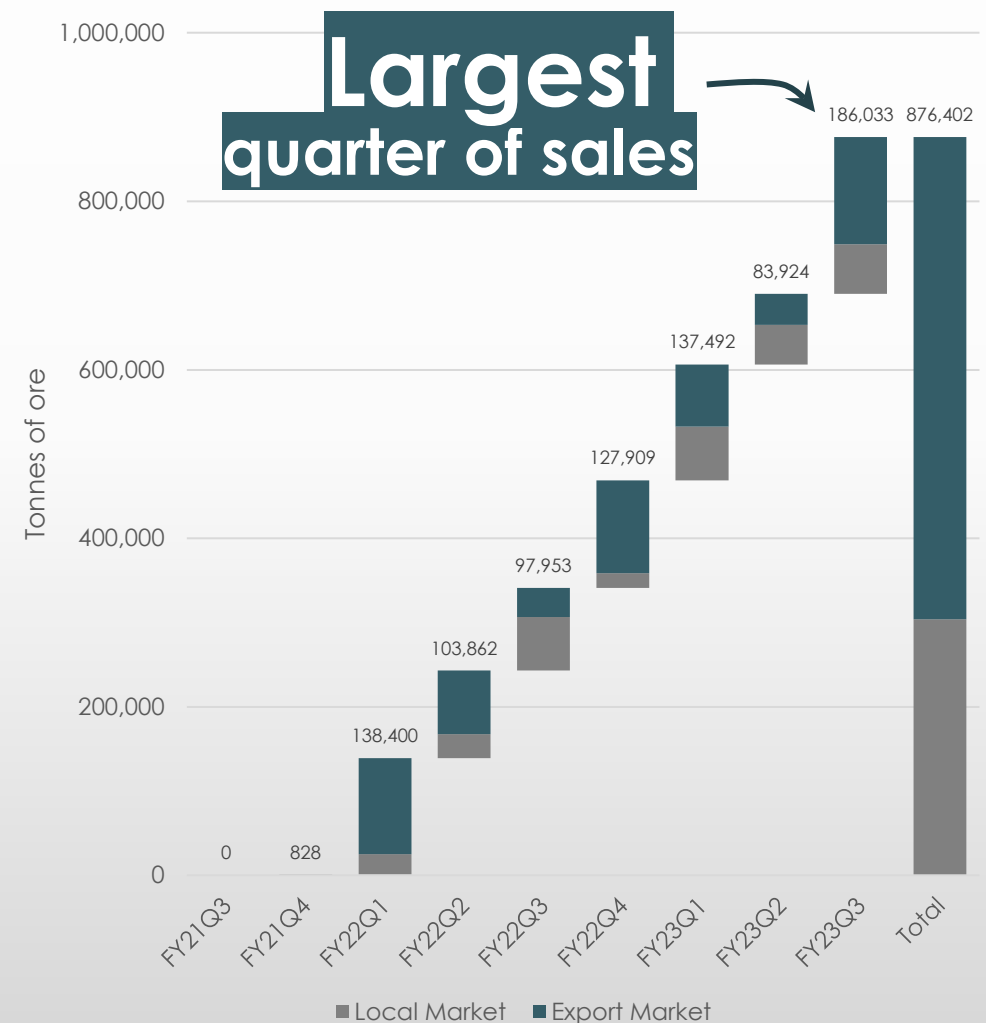

Premium Sinter Fines

Sales Performance

- The Company sold a total of **186,000** wet metric tonnes (wmt) of high-grade iron ore during the March 2023 Quarter.
- This is the **highest sales volume in a quarter** since production commenced and included
 - 58,800 wmt sold to the domestic Brazil market,
 - 127,200 wmt exported into Asia and Europe.
- **~870,000** wmt total project sales to 31 March 2023.
- Late in the December 2022 Quarter iron ore prices increased and ocean freight prices reduced, presenting better sales opportunities for the seaborne market in the March 2023 quarter.
- Tombador secured contracts for two ~45,000 wmt shipments to Asia, delivered in the March 2023 Quarter.
- Tombador will continue to focus on market development in Brazil and on the European & Asian export markets to optimise operational margins.

Sales to 31 March 2023

Sales – Asian Market

- **New logistics** via Enseada Port located in Maragogipe, state of Bahia
- Supramax and/or Ultramax vessels
- **Up to 50,000 tonnes vessels**
- **Lower ocean freight rates:** access to the Asian market

Sales – Asian Market

- **Two shipments sold to Asia** via our export market partner Trafigura
- **~45,000 tonnes per Vessel** was loaded at Enseada Port
- **3rd Vessel** was loaded for Europe at TMIB Port

Premium Lump

Premium Sinter Fines

Discharge of trucks at Enseada

Premium Lump Stockpile at Enseada

Sales - Domestic

- **Executed contract** with a major tier 1 steel mill in Brazil on 23 February 2023
- **Goal is to extend Brazilian market footprint**, focusing on developing more long-term agreements with the top tier steel companies in the Brazil domestic market
- **Progress through the steel mills' procurement processes continues**, as the Company builds its reputation as a reliable supplier
- **Regular customers:** Volumes for lumps and sinter fines for this quarter are forecast to match or exceed the previous quarter
- **Tombador will continue to focus on growing sales** to meet production capacity and to move inventory

Typical Procurement Steps

ESG - Environmental and Social Responsibility

- Tombador has only **dry processing** with **no tailings dam** with a very small mining footprint
- **High grade iron ore** is a key to **lowering energy** consumption and pollution in steel production
- Lump is the “*greenest*” iron ore product on the market – going virtually **directly from the mine to the blast furnace** with no additional processing
- Keeping people **safe at work** with safety training and awareness campaigns
- **Consistent maintenance** and **dust suppression** on all unpaved roads in the areas close to the mine
- Tombador is recognised by the **Superintendency for the Development of the Northeast** (“Sudene”) as contributing to jobs and income in Sento Se Brazil. Tombador has been granted a **75% reduction in IRPJ Income Tax** through Sudene
- Partnering with **local schools and community**

TOMBADOR IRON

A mina do Tombador, localizada no município de Sento Sé -BA, produz granulados de hematita com alto teor de ferro. O processo é muito simples, apenas britagem e classificação a seco. Não utiliza nenhum produto químico. Toda hematita é aproveitada não gerando rejeito, portanto não havendo barragem de rejeitos.

O empreendimento encontra-se em operação desde maio de 2021 e realiza diversos programas de controle ambiental e de segurança.

Dentre esses programas podemos destacar:

- Programa de monitoramento da fauna e da flora;
- Programa de monitoramento de recursos hídricos;
- Programa de gerenciamento de resíduos sólidos;
- Programa de monitoramento da qualidade do ar;
- Programa de comunicação social e educação ambiental;
- Programa de sinalização e controle de tráfego;

Dentre outros.

Afinal, qual a importância da mineração de ferro?

O ferro é utilizado principalmente na produção do aço, que é a matéria prima para fabricação de eletrodomésticos, automóveis, ferramentas, máquinas, estrutura de casas, escolas e outras infinitudes de aplicações.
