Wolf Pack Tops Brookside Production Rankings 2,034 BOE Per Day IP24 Highest Rate Recorded to Date

Perth, Western Australia – Brookside Energy Limited (ASX: BRK) (OTC Pink: RDFEF) (Brookside or the **Company**) is pleased to provide shareholders and investors with an update on operations from Brookside's first Phase Two development well in the SWISH Area of Interest (**AOI**) in the world-class Anadarko Basin, the Wolf Pack 36-25-1S-4W SXH 2 Well (**Wolf Pack Well**) (Figure 1).

The Wolf Pack Well reached a peak rate (IP24) of 2,034 BOE per day (88% liquids, 12% gas), resulting in Brookside's highest IP24 rate to date. The well has continued its superior performance generating an IP30 rate of 1,869 BOE per day (88% liquids, 12% gas), a record rate for a Brookside operated well. The IP30 rate covered a combination of production rate growth followed by steady production.

Since the date of first production the well has produced in excess of 140,000 BOE, made of up 101,362 barrels of oil, ~21,500 barrels of NGL's and ~111,500 Mcf of gas. At current pricing these gross volumes deliver in excess of US\$7.9 million in revenue.

Brookside has an 83.93% Working Interest in the Wolf Pack Well.

Commenting on this announcement, Managing Director, David Prentice said:

"This is clearly a wonderful outcome for the Company and the rates and volumes produced to date speak for themselves.

"Once again, our SWISH AOI acreage has demonstrated its standing amongst the best rock in the Anadarko Basin, capable of delivering the very high rates of return and fast pay backs that make this the most highly sought after area in the basin.

"These results provide us with another important data point in terms of next steps for the monetization of our recently announced 11.9 million BOE 2P Reserve^{1.} and the twenty odd well inventory of high-quality, low risk proved undeveloped locations."

 Brookside confirms that it is not aware of any new information or data that materially affects the information included in the market announcement dated 26 April 2023 "SWISH AOI Independent Reserves Certification" and that all the material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

Note

- 1) The volumes stated in Figure 1 above for wells operated by companies other than Brookside are actual volumes produced, drawn from publicly available information reported by each of those entities.
- 2) In respect of the wells operated by Brookside (Jewell, Rangers, Flames and Wolf Pack), please refer to the Company's relevant ASX releases for further information in respect of the flow rates. The Company confirms that it is not aware of any new information or data that materially affects the information included in that release and that all the material assumptions and technical parameters underpinning the estimates in that release continue to apply and have not materially changed.

About the Wolf Pack Well

The Wolf Pack Well is a Black Mesa Energy, LLC (a controlled subsidiary of Brookside) operated well that was drilled by Latshaw Rig 12 in Stephens County, Oklahoma. The well was drilled as a mid-length horizontal well targeting the Sycamore Formation at an average depth of ~9,750 feet. The well was drilled to a total measured depth of ~17,260 feet, with ~7,500 feet of lateral section drilled in the Sycamore that was cased with production tubing, perforated, and treated to allow production of oil and rich gas.

ABOUT BROOKSIDE ENERGY LIMITED

Brookside is an Australian public company listed on the Australian (ASX: BRK), and USA (OTC Pink: RDFEF) stock exchanges. The Company was founded in 2015, to focus on the mid-continent region of the US, where our deep and valued relationships enable us to work with local communities to ensure sustainable growth and value creation through the safe and efficient development of energy assets. Focused on exploitation not exploration, the Company generates shareholder value through a disciplined portfolio approach to the acquisition and development of oil and gas assets and the leasing and development of acreage opportunities. The Company's US subsidiary and manager of operations, Black Mesa, is an experienced mid-continent operator, which identifies opportunities and executes development for Brookside. Our business model effectively assigns risk and provides commercial incentives to maximize value for both parties.

ABOUT BLACK MESA ENERGY, LLC

Black Mesa Energy, a Brookside Energy controlled subsidiary, is a Tulsa-based oil & gas exploration and production company focused on profitable development of petroleum properties located in the Mid-Continent oil province of the United States. Our lean and highly specialized technical and operations team is committed to providing attractive returns for our investors and shareholders by generating and drilling high quality oil and gas prospects. The founders of Black Mesa have worked together for over 30 years at companies they previously founded, including Medallion Petroleum, InterCoast Energy and Brighton Energy. Over the course of their careers, the Black Mesa team has drilled hundreds of horizontal wells and thousands of vertical wells in numerous mid-continent oil and gas basins. In addition to the financial backing from the Black Mesa shareholders, Black Mesa partners with outside investors on larger-scale projects by offering non-operated direct working interest participation.
