

Flowback Update – Presidio 52#1 Well

Helios Energy Ltd (ASX Code: HE8) (**Helios** or **Company**) is pleased to update the progress of flowback testing of the Presidio 52#1 well.

As anticipated, oil production is increasing as the frack water is unloaded assisted by the recent installation of gas lift valves in the tubing and a gas compressor at the well site. The oil cut is currently greater than 10% with the well producing over 100 BOPD and with a gas rate of 1.2 MMCFPD. The well is continuing to unload frack water at a rate of approximately 750 barrels per day.

It is anticipated the oil production rate will increase further as additional frack water is unloaded.

We will keep the market informed as the well stabilizes.
