

## BM8 Expands Land Holding with Staking of Claims at the Jesse Lake Project in Ontario, Canada

Battery Age Minerals Ltd (ASX: BM8, “Battery Age” or the “Company”) is pleased to announce the staking of 54 single cell mining claims, covering an area of approximately 1,350 hectares, at the Jesse Lake Project located in Ontario, Canada. The project area is strategically situated south of the Forgan Lake Lithium Occurrence and is in close proximity to the Georgia Lake pegmatite field.

This ground was staked for nominal application costs (\$2800) and is considered by the Company to be a Greenfield exploration opportunity.

Battery Age remains committed to its strategic growth plans in the Ontario region, capitalizing on the strong support for critical minerals within the supply chain. The company continues to actively pursue opportunities to enhance its mineral resource portfolio and contribute to the sustainable development of the battery minerals sector.

Commenting on the recent staking, Chief Executive Officer, Gerard O'Donovan stated, *"The staking of additional LCT prospective ground expands our footprint in Ontario, where Battery Age is focused on becoming a key contributor to the heavily supported critical minerals supply chain. We are excited about exploring the property and uncovering its potential later in the summer."*

*Release authorised by the Chairman of Battery Age Minerals Ltd.*
