SULTAN APPOINTS EXPLORATION MANAGER TO ADVANCE CANADIAN LITHIUM PROJECTS

Sultan Resources Ltd (ASX:SLZ or **Company**) is pleased to advise that it has appointed Mr. Craig Hall to the role of full time Exploration Manager. Craig's appointment follows the Company's acquisition of two highly prospective lithium projects in Ontario, Canada, including the successful capital raise of \$1.5m from sophisticated and professional investors.

Craig is an experienced geologist with over 30 years of minerals industry experience in exploration, development and production roles in a range of commodities, principally in gold, copper and lithium. He has held a variety of senior positions with mid-tier and junior sector resource companies within Australia and overseas, and also consulted to the industry a wide-ranging basis.

Craig led exploration at then Galaxy Resources Ltd's Mt Cattlin operation in Ravensthorpe, WA from 2015 through to Galaxy's (ASX:GXY), now Allkem Ltd (ASX:AKE), takeover of General Mining Corporation Ltd (ASX:GMM) in late 2016, and successfully discovered spodumene repetitions to the main pit zone at Mt Cattlin, and added extensional volumes to the known resource. More recently he has been involved in the acquisition of lithium-prospective tenements in the Murchison of WA for another company, and the delineation of targets and successful drilling of lithium-bearing pegmatites.

Craig also brings considerable expertise in precious and base metals experience which complements the Company's Kulin Hill Ni-Co and Lake Grace gold projects, with time spent managing exploration in the south-west terrane of WA with Ausgold Ltd (ASX:AUC) during the successful initial expansion of the project in 2011-2012 when the Company was nominated for the 2011 WA Explorer of the Year award.

Sultan's Chairman, Mr. Jeremy King, commented:

"Craig's appointment represents the next step in our strategic plan for the Company. We have recently appointed APEX to manage the exploration on the Kember and Ruddy Projects in Canada and with Craig's appointment, we now have a highly experienced in-house geologist which strengthens our team as we move towards advancing our exploration programs in Australia and Canada."

About Sultan Resources

Sultan Resources is an Australian focused exploration company with a portfolio of quality assets in emerging discovery terranes currently targeted by successful explorers such as Newcrest Mining, Alkane Resources, Gold Road Resources, and Sandfire Resources. Sultan's tenement portfolio includes prospective targets for porphyry Au-Cu, structurally-hosted gold, Nickel, Cobalt and base metals and include tenements located in the highly prospective east Lachlan Fold Belt of Central NSW as well as projects located within the southern terrane region of the Yilgarn Craton in south and south eastern Western Australia, and more recently lithium prospective tenements in NW Ontario in Canada. Sultan's board and management strategy is for a methodical approach to exploration across the prospects in order to discover gold and base metals that may be delineated via modern exploration techniques and exploited for the benefit of the company and its shareholders.
