

## Early Exploration Agreement Executed with Whitesand First Nation – Maiden Drill Program Commenced

**Signing of key agreement cements strong relationship with First Nations Group  
and enables drilling to commence at the Falcon Lake Lithium Project**

Battery Age Minerals Ltd (ASX: **BM8**; “**Battery Age**” or “**the Company**”) is pleased to announce that, following continued positive discussions and consultation with Whitesand First Nation, it has executed an Early Exploration Agreement (“**EEA**”), enabling the Company to commence drilling activities at its Falcon Lake Lithium Project in Ontario, Canada.

Battery Age is grateful for the support and endorsement of Whitesand First Nation and is committed to continuing to work closely with Whitesand throughout all stages of the project.

The Company believes that, by working collaboratively with Indigenous communities, it can create long-lasting and mutually beneficial partnerships that generate significant economic opportunities and contribute to the sustainable development of local communities.

Battery Age Chief Executive Officer Gerard O’Donovan commented: *“We welcome the finalisation of our Early Exploration Agreement with Whitesand and the formalisation of a strong partnership. We appreciate the support of Chief Gustafson and the Whitesand Council and extended community. The Company is extremely pleased that it took the time to cement a strong partnership with our First Nations partners, putting in place a strong and sustainable framework for advancing the Project in close collaboration with Whitesand First Nation.”*

*“We now look forward to turning our full focus to drilling at Falcon Lake and rapidly unlocking the potential of this project for all of our key stakeholders.”*

With equipment already on site in anticipation of the finalisation of this pivotal agreement, the Company has immediately commenced its drilling activities at the Falcon Lake Lithium Project and will provide updates to shareholders as the program progresses.

The agreement is for an indefinite term and may be terminated by either party giving three months’ written notice. The agreement is material to the extent that it demonstrates the continued support of Whitesand First Nation for access to tenure for exploration purposes, while providing confidence to the Whitesand First Nation regarding commercial, social benefit and cultural matters. There are no material conditions precedent to the Agreement.
