

Exploration activities update – Quebec fire situation

Further to its ASX announcement of 6 June 2023, **Cosmos Exploration Limited** (ASX: **C1X**) (“**Cosmos**” or “**the Company**”) provides the following update on activities at its Corvette Far East and Lasselle Lithium Projects in the James Bay region of Quebec, Canada.

The wildfire situation continues to impact Quebec and the Province of Quebec’s instruction that all exploration companies cease exploration remains in place.

As previously advised, the Cosmos exploration field team has been demobilised until the situation improves and the Company’s maiden exploration program, which was due to begin in early June, remains on hold.

The Company continues to monitor the situation closely, remains in regular contact with its contractors and is on standby to commence exploration activities as soon as the situation returns to normal.

Cosmos remains active with exploration continuing across its other Australian projects and looks forward to commencing exploration in Quebec when it is safe to do so.

This announcement has been authorised by the Board of Cosmos Exploration Limited.
