### 3 CHAIRMAN'S LETTER

Dear Shareholders

On behalf of Southern Hemisphere Mining Limited (**Company**), I am pleased to invite you to participate in a non-renounceable pro rata offer available to Eligible Shareholders on the basis of one (1) New Share for every four (4) Existing Shares held at an issue price of \$0.02 per New Share, together with a free attaching New Quoted Option (SUHO) exercisable at \$0.10 on or before 16 February 2024 for every New Share issued, to raise approximately \$2.36 million (**Offer**). Proceeds from the Entitlement Offer will be allocated towards:

1. Drilling and other work at the Company's flagship Llahuin Copper/Gold/Molybdenum Project to continue expanding the resource towards the scale necessary for a substantial long-life copper/gold mine;
2. Exploration work at the Lago Lithium Brine Project in the Atacama Region of Chile;
3. Advancing subsidiary company, Titan Battery Minerals Technology spin-out towards development of the Los Pumas Manganese deposit; and
4. For general working capital purposes, including repaying debt.

The demand and interest in emerging copper miners is increasing, including a substantial transaction announced recently with our neighbouring Copper project El Espino 8km West of Llahuin. This transaction was a US\$90m investment by Resource Capital Funds for a 23.68% interest in El Espino, with the owner and operator Pucobre the balance.

Our timing to be able to advance Llahuin's resource substantially is good, now that we understand the asset. Over 2 years of dedicated work by our team of ~8 including some targeted drilling went into the full re-logging, geochem sampling, reinterpretation and modelling.

The issue price represents a 13.04% discount to the Company's last traded price of \$0.023 on the ASX on 13 July 2023.

The Offer is subject to a minimum subscription of \$500,000. Directors, who collectively hold 73,949,999 Shares, intend to take up all or part of their Entitlement through set off against unpaid Directors' fees and underwriting for a total of \$311,327.

Any Shortfall Shares will be placed by the Board. Participating brokers in the Shortfall will be paid a fee of up to 6% of the amount raised.

The risks associated with the Offer are detailed in section 6 and include risks ordinarily associated with a junior exploration company, including the requirement to raise further capital if only the Minimum Amount is raised, exploration risks, general funding risks and share market and commodity risks.

On behalf of the board, I invite you to consider this unique investment opportunity as our Company continues to unlock the value of our large copper project, new lithium brine project, and Titan Battery Minerals Technology (Los Pumas Manganese).

Yours sincerely

Mark Stowell  
Chairman

## 6 RISK FACTORS

The New Securities offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below and together with information contained elsewhere in this Prospectus and to consult with your professional advisers before deciding whether to apply for the New Securities pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the New Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

### 6.1 Company specific risks

The business, assets and operations of the Company are subject to certain risk factors that have the potential to influence the future operating and financial performance of the Company. These risks can impact on the value of an investment in the securities of the Company. The Board aims to manage these risks by carefully planning its activities and implementing risk control measures. Some of the risks are, however, highly unpredictable and the extent to which they can be effectively managed is limited.

#### (a) Exploration Risks

The Company will continue exploration activities. There is a risk that these exploration activities do not identify a resource that is economically viable.

Exploration carries significant risks, and there is no certainty that the project will prove to be feasible.

#### (b) Funding Risks

The Company's quarterly overhead costs (excluding exploration activities to advance its projects) is currently approximately \$170,000. The Company currently has approximately \$611,000 cash on hand, which will be sufficient for 3.5 quarters, excluding any exploration or other activities.

Raising the Minimum Amount will only provide the Company with limited funds and will require further capital raising. There is a risk that the Company will not have sufficient funds to meaningfully advance the projects and may be required to raise further funds to do so, reduce its proposed exploration programs or sell (either in whole or part) some of its projects.

#### (c) Going Concern Risk

The Company's 2022 financial statements have been prepared on a going concern basis, which contemplates continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business. For the 6-month period ended 31 December 2022, the Company incurred net cash outflows from operating activities of \$1,317,280 (31 December 2021: \$1,302,529).

For the financial year ended 30 June 2022, the Company incurred net cash outflows from operating activities of \$2,706,149 (30 June 2021: \$900,525).

Whilst the Directors believe that it is reasonably foreseeable that the Company and Group will continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the financial report after consideration of applicable factors, there is a risk that the factors may not eventuate.

(d) Regulation Risk

The Company's main projects are located in Chile, South America.

There is a risk that the necessary land acquisitions, permits, certificates, consents, authorisations and agreements required to implement future exploration and project development may not be obtained under conditions or within time frames that make such plans economic.

(e) Operating Risk

The operations of the Company may be affected by various factors outside its control. Funds raised under the Offer are primarily intended for targeted exploration activities.

The operations of the Company may be affected by failure to realise an economic opportunity for the Llahuin, Los Pumas and the Lago Lithium Brine Projects, and meet all the requirements to obtain the necessary mining licences including satisfying environment factors and water rights.

These risks and hazards could also result in damage to or destruction of property, plant and equipment, personal injury, environmental damage, business interruption, monetary losses and possible legal liability. The Company may become subject to liability for accidents, pollution or other hazards against which it cannot insure or against which it may elect not to insure because of premium costs or for other reasons, or in amounts which exceed policy limits.

No assurances can be given that the Company will achieve commercial viability through exploration success and exploitation of its projects and, until the Company is able to realise value from its projects, it is likely to incur ongoing operational losses.

(f) Sovereign Risk

The Company operates in Chile, which has a Moodys A2 Credit Rating. By comparison Australia is Aaa Credit Rating and Argentina a C Credit Rating.

(g) Government Policies and Legislation Risk

Any material adverse changes in government policies, legislation or shifts in political attitude in Chile, South America that affect mineral exploration activities, tax laws, royalty regulations, government subsidies and environmental issues may affect the viability of a project, projects or the Company.

No assurance can be given that amendments to current laws and regulations or new rules and regulations will not be enacted, or that existing rules and regulations will not be applied in a manner which could substantially limit or affect the Company's exploration, development, and operating activities.

(h) Commodity Price and Exchange Rate Risk

The Company's projects are prospective for copper, gold, molybdenum, manganese and lithium.

The market price of these commodities fluctuates and is affected by numerous factors beyond the control of the Company. These factors include current and expected future supply and demand, forward selling by producers, production cost levels in major metal producing centres as well as macroeconomic conditions such as inflation and interest rates. Fluctuations in commodity prices may impact on the commercial attractiveness or viability of the Company's projects.

Furthermore, the international prices of most commodities are denominated in United States dollars and the Company's cost base will be in Australian dollars. Consequently, changes in these exchange rates may impact on the expenditure of the Company and the Company's purchasing capacity. The exchange rate is affected by numerous factors beyond the control of the Company, including interest rates, inflation and the general economic outlook.

(i) Environmental Risk

The Company's activities are expected to have some impact on the environment, particularly if mine development occurs in the future. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

The Company will, in future, require additional approval from authorities before it can undertake mining activities that will impact the environment. Failure to obtain such approvals may prevent the Company from undertaking its desired activities. The Company is unable to predict the effect of additional environmental laws and regulations that may be adopted in the future, including whether any such laws and regulations would materially increase the Company's costs of doing business or affect its operations in any area.

## 6.2 Industry Risk

(a) Mining and Exploration Risk

The business of mineral exploration, development and production is subject to risk by its nature. The success of the business depends, inter alia, on successful exploration and/or acquisition of reserves, securing and maintaining title to concessions and tenements, successful design, construction, commissioning and operating of mining and processing facilities, successful development and production in accordance with forecasts and successful management of the operations. Exploration and mining are speculative undertakings which may be hampered by force majeure circumstances, land claims and unforeseen mining problems. Increased costs, lower output or high operating costs may all contribute to make a project less profitable than expected at the time of the development decision. There is no assurance that the Company's attempts to exploit its exploration activities will be successful.

The actual quality and characteristics of ore deposits cannot be known until mining takes place and will almost always differ from the assumptions used to develop reserves. Further, reserves are valued based on future costs and future prices and, consequently, the actual reserves and resources may differ from those estimated, which may result in either a positive or negative effect.

No assurance can be given that commercial tonnages, grades or recovery will be achieved or realised. Commodity price fluctuations, increased production costs, or reduced recovery rates, may render possible reserves containing relatively lower grades uneconomic and may result in a restatement of such reserves. Moreover, short-term operating factors relating to possible reserves, such as sequential development of ore bodies and processing of new or different ore types or grades, may cause mining operations to be unprofitable in any particular accounting period.

There is a risk that unforeseen geological and geotechnical difficulties may be encountered if and when developing and mining reserves. In this event, a loss of revenue may be caused by lower than expected production and/or higher than anticipated operation and maintenance costs, and/or on-going unplanned capital expenditure in order to meet production targets.

(b) Title

The Company's mining exploration activities are dependent on the grant, or as the case may be, the maintenance of appropriate licences, which may be withdrawn or made subject to limitations. The granting of licence, maintaining of licence or obtaining renewals, often depends on the Company being successful in obtaining required statutory approvals for its proposed activities and that the licences, concessions, tenements, leases, permits or consents it holds will be renewed as and when required. There is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will not be imposed in connection therewith.

(c) Results of Studies

Subject to the results of future exploration and testing programs, the Company may progressively undertake a number of studies in respect to the Company's current or new projects. These studies may include pre-feasibility and bankable feasibility studies.

These studies will be completed within certain parameters designed to determine the economic feasibility of the Company's current or new projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Company's current or new projects or the results of other studies undertaken by the Company (e.g. the results of a feasibility study may materially differ to the results of a scoping study).

Further, even if a study determines the economics of the Company's current or new projects, there can be no guarantee that the current or new projects will be successfully brought into production as assumed or within the estimated parameters in the feasibility study once production commences including but not limited to operation costs, mineral recoveries and commodity prices.

In addition, the ability of the Company to complete a study may be dependent on the Company's ability to raise further funds to complete the study if required.

(d) Metallurgy

Metal or mineral recoveries are dependent upon the metallurgical process, and by its nature processing contains elements of significant risk such as:

- (i) identifying a metallurgical process through test work to produce a saleable metal or concentrate;
- (ii) developing an economic process route to produce a metal or concentrate; and
- (iii) changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project.

No assurance can be given that any particular level of recovery from mineral resources or reserves will in fact be realised or that a mineral resource will ever qualify as commercially viable which can be legally and economically exploited.

(e) Economic and Government Risks

The future viability of the Company is also dependent on a number of other factors affecting the performance of all industries, not just the exploration and mining industries. These factors include, but are not limited to:

- (i) Changes in government policies, taxation and other laws.
- (ii) The strength of the equity and share markets in Australia and throughout the world, and in particular investor sentiment towards the commodities (resources) sector.
- (iii) Movement in, or outlook on, interest rates and inflation rates.
- (iv) Natural disasters.

Industry profitability can be affected by changes in government within Chile, South America and other jurisdictions, which are outside the control of the Company. The Company's activities are subject to extensive laws and regulations controlling not only the exploration for and mining of minerals, but also the possible effects of such activities upon the environment. Permits from regulatory authorities are required for many aspects of mine operation and reclamation. There is no assurance that permits will be obtained when sought or that unfavourable conditions will not be imposed. Future legislation and regulations could cause additional expense, capital expenditures, restrictions and delays in development of the Company's tenements, the extent of which cannot be predicted.

(f) Reliance on Key Personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their involvement with the Company.

(g) Insurance

Insurance of all risks associated with exploration or project development is not always available and, where it is available, the cost may be high. The Company will have insurance in place considered appropriate for the Company's needs.

The business of the Company is subject to a number of risks and hazards generally, including adverse environmental conditions, industrial accidents, labour disputes, unusual or unexpected geological conditions, ground or slope failures, cave-ins, changes in the regulatory environment and natural phenomena such as extreme weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties, buildings, personal injury or death, environmental damage to properties of the Company or others, delays in mining, monetary losses and possible legal liability.

Although the Company seeks to maintain insurance to protect against certain risks in such amounts as it considers to be reasonable, insurance will not always be available or cover all the potential risks associated with its operations and insurance coverage may not continue to be available or may not be adequate to cover any resulting liability.

It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks because of high premiums or other reasons. Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration, development or production is not generally available to the Company or to other companies in the mining industry on acceptable terms. Losses from these events may cause the Company to incur significant costs that could have a material adverse effect upon its financial performance and results of operations.

### 6.3 General Risk

(a) Securities investments

There are risks associated with any securities investment. The prices at which the Company's securities trade may fluctuate in response to a number of factors. Furthermore, the stock market, and in particular the market for mining and exploration companies, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. There can be no guarantee that trading prices will be sustained. These factors may materially affect the market price of the Company's securities regardless of the Company's operational performance.

(b) Share Market Conditions

Share market conditions may affect the price of the Company's securities regardless of the Company's operating performance. Share market conditions are affected by many factors including but not limited to the following:

- (i) General economic outlook.
- (ii) Interest rate and inflation rates.
- (iii) Currency fluctuations.
- (iv) Mineral price fluctuations.

- (v) Changes in investor sentiment toward particular market sectors and the domicile of projects.
- (vi) The demand for, and supply of, capital.
- (vii) Terrorism or other hostilities.
- (viii) Other factors beyond the control of the Company.

The market price of the Company's securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company, or any return on an investment in the Company.

(c) **Economic Risk**

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that general economic climate include the level of direct and indirect competition against the Company, industrial disruption, the rate of growth of gross domestic product in Chile, South America, interest rates, exchange rates and the rate of inflation.

(d) **Competition Risk**

The Company will compete with other companies, including other mineral exploration and mining companies. Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce minerals, but also carry out refining operations and produce other products on a worldwide basis. There can be no assurance that the Company can compete effectively with these companies.

#### **6.4 Investment Speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors and others not specifically referred to above, may, in the future, materially affect the financial performance of the Company and the value of the Securities offered under the Prospectus.

The Securities offered pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Securities.

## **7 ACTIONS REQUIRED BY ELIGIBLE SHAREHOLDERS**

### **7.1 What you may do**

As an Eligible Shareholder, you may:

- (a) subscribe for all or part of your Entitlement (see section 7.2);
- (b) allow all or part of your Entitlement to lapse (see section 7.3).

### **7.2 Subscribe for all or part of your Entitlement**

Applicants should read this Prospectus in its entirety in order to make an informed decision on the prospects of the Company and the rights attaching to the New Securities offered by this Prospectus before deciding to apply for New Securities. If you do not understand this Prospectus you should consult your stockbroker, accountant or other professional adviser in order to satisfy yourself as to the contents of this Prospectus.

If you wish to subscribe for all or part of your Entitlement, complete the accompanying Entitlement and Acceptance Form in accordance with the instructions set out on that form. The Entitlement and Acceptance Form sets out the number of New Securities you are entitled to subscribe for.

### **7.3 Allow all or part of your Entitlement to lapse**

If you are an Eligible Shareholder and do not wish to accept all or part of your Entitlement, you are not obliged to do anything.

If you take no action, your Entitlement will lapse. You will receive no benefit or New Securities and your Entitlement will become Shortfall Securities.

The number of Existing Shares you hold as at the Record Date and the rights attached to those Existing Shares will not be affected if you choose not to accept any of your Entitlement.

### **7.4 Payment methods**

#### ***BPAY***

You can make a payment via BPAY if you are the holder of an account with an Australian financial institution that supports BPAY transactions. To BPAY this payment via internet or telephone banking use your reference number on your Entitlement and Acceptance Form.

#### ***EFT***

If you are paying by EFT, refer to your personalised instructions on your Entitlement and Acceptance Form.

Shareholders who wish to pay by BPAY or EFT must ensure that payment is received by no later than 7.00pm AEST on the Closing Date.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. It is your responsibility to ensure that funds submitted through BPAY or EFT are received by 7.00pm AEST on the Closing Date.

If you have more than one shareholding and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those shareholdings only use the Customer Reference Number specific to that shareholding as set out in the applicable Entitlement and Acceptance Form. Do not use the same Customer Reference Number for more than one of your shareholdings. This can result in your application monies being applied to your Entitlement in respect of only one of your shareholdings (with the result that any application in respect of your remaining shareholdings will not be recognised as valid).

The Company shall not be responsible for any postal or delivery delays or delay in the receipt of the BPAY or EFT payment.

#### **7.5 Entitlement and Acceptance Form is binding**

Making a payment in respect of an Application by BPAY constitutes a binding offer to acquire New Securities on the terms and conditions set out in this Prospectus and, once made, cannot be withdrawn.

By making a payment in respect of an Application by BPAY or EFT, you will be deemed to have represented that you are an Eligible Shareholder. In addition, you will also be deemed to have represented and warranted on behalf of yourself or each person on whose account you are acting that the law in your place of residence and/or where you have been given the Prospectus, does not prohibit you from being given the Prospectus and that you:

- (a) agree to be bound by the terms of the Offer;
- (b) declare that all details and statements in the Entitlement and Acceptance Form are complete and accurate;
- (c) declare that you are over 18 years of age and have full legal capacity and power to perform all your rights and obligations under the Entitlement and Acceptance Form;
- (d) authorise the Company and its respective officers or agents, to do anything on your behalf necessary for the New Securities to be issued to you, including to act on instructions of the Company's share registry upon using the contact details set out in the Entitlement and Acceptance Form;
- (e) declare that you are the current registered holder of Shares and are an Australian or New Zealand resident, and either:
  - (i) you are not in the United States or a US Person, or acting for the account or benefit of a US Person, or
  - (ii) your circumstances are such that the Offer cannot lawfully be made to you;
- (f) acknowledge that the information contained in, or accompanying, the Prospectus is not investment or financial product advice or a recommendation that New Securities are suitable for you given your investment objectives, financial situation or particular needs; and
- (g) acknowledge that the New Securities have not, and will not be, registered under the securities laws in any other jurisdictions outside Australia or New Zealand and accordingly, the New Securities may not be offered, sold or otherwise transferred except in accordance with an available exemption from, or in a transaction not subject to, the registration requirements of applicable securities laws in particular the US Securities Act.

The Entitlement and Acceptance Form does not need to be signed to be a valid application. An Application will be deemed to have been accepted by the Company upon the issue of the New Securities.

If the payment of the application monies is for the wrong amount, it may still be treated as a valid application for New Securities. The Directors' decision whether to treat an acceptance as valid is final. However, an Applicant will not be treated as having applied for more Shares than is indicated by the amount of the application monies received by the Company.

Fractional entitlements will be rounded down to the nearest whole number.

The Offer is only open to Eligible Shareholders, being holders of Shares with a registered address in Australia or New Zealand. #### **8.4 Underwriting**

This Offer is not underwritten.

- (b) have a registered address in Australia or New Zealand.

#### **8.6 Shortfall**

Any New Securities not applied for under the Offer will become Shortfall Securities. The Directors reserve the right, to issue any Shortfall Securities at their discretion within 3 months after the Closing Date (**Shortfall Offer**).

The Shortfall Offer is, to the extent it is made in Australia, made under this Prospectus. To the extent the Shortfall Offer is made outside Australia, the Shortfall Offer is made without disclosure, a prospectus, lodgement, filing or registration, or other requirements of any applicable securities law, and only in circumstances where it is lawful to do so (such as to institutional or sophisticated investors).

It is possible that there may be no Shortfall Securities available for issue.

Shortfall Securities will be issued at the discretion of the Directors, taking the following allocation policy into account:

- (a) where the Directors consider it is in the best interest of the Company to allocate any portion of the Shortfall Securities to a particular applicant or to particular applicants in order to maximise the total funds raised from the Offer, the Directors may do so;
- (b) the Directors will generally endeavour to allocate the Shortfall Securities in a manner which is fair to applicants;
- (c) the Directors will not allocate or issue Shortfall Securities, where it is aware that to do so would result in a breach of the Corporation Act 2001 (Cth), the ASX Listing Rules or any other relevant legislation or law;
- (d) applications for Shortfall Securities may be scaled back at the Directors' discretion; and
- (e) the Directors may reject any application for Shortfall Securities or allocate fewer Shortfall Securities than applied for by applicants, in which case any excess application money will be refunded without interest.

#### **8.7 New Zealand Shareholders**

The Offer contained in this Prospectus to Eligible Shareholders with registered addresses in New Zealand is made in reliance on the Securities Act (Overseas Companies) Exemption Notice 2013 (New Zealand). Members of the public in New Zealand who are not existing Shareholders on the Record Date are not entitled to apply for any New Securities. This Prospectus has not been registered, filed or approved by any New Zealand regulatory authority. This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

## **8.8 Treatment of Ineligible Shareholders**

Given the cost of complying with applicable regulations outside Australia and New Zealand, the Company has decided that it would be unreasonable to extend the Offer to Ineligible Shareholders. The Prospectus will not be sent to those Shareholders.

This Prospectus does not constitute an offer of securities in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offer. No action has been taken to register or qualify the New Securities or the Offer or otherwise to permit an offering of the New Securities in any jurisdiction other than as set out in this section.

This document is not for publication or distribution, directly or indirectly, in or into the United States of America (including its territories and possessions, any state of the US and the District of Columbia). This document is not an offer of securities for sale into the United States or to, or for the account or benefit of, US Persons. The securities referred to herein have not been and will not be registered under the US Securities Act and may not be offered or sold in the United States or to, or for the account or benefit of, US Persons. No public offering of securities is being made in the United States or elsewhere where it would be unlawful to do so.

Recipients may not send or otherwise distribute this Prospectus or the Entitlement and Acceptance Form to any person outside Australia or New Zealand (other than to Eligible Shareholders).

## **8.9 Beneficial holders, nominees, trustees and custodians**

Nominees and custodians that hold Shares should note that the Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of securities. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Offer is compatible with applicable foreign laws.

## **8.10 Set off**

Eligible Shareholders who are creditors of the Company may elect to pay for their Entitlement by way of set off against the debt owed by the Company to them. Eligible Shareholders wishing to do so must contact the Company Secretary to confirm the details of their debt and return a completed Entitlement and Acceptance Form together with details of the amount owed and which is to be set off against their Entitlement. The Eligible Shareholder is deemed, to the extent of the set-off, to have released the Company from the amount the subject of set off.

Eligible Shareholders should contact the Company Secretary if they have any queries in relation to set off.

## **8.11 Allotment and application money**

New Securities will be issued only after all application money has been received and ASX has granted permission for the New Securities to be quoted. It is expected that New Securities will be issued on 10 August 2023 and normal trading of the New Securities on ASX is expected to commence on 11 August 2023.

All application monies will be deposited into a bank account separate to the Company and held in trust for Applicants until the New Securities are issued or application monies returned. Any interest that accrues will be retained by the Company and will not be paid to Applicants.

#### 8.12 Quotation

The Company will apply to ASX within 7 days after the date of this Prospectus for quotation of the New Securities offered by this Prospectus on ASX. If ASX does not grant permission for the quotation of the New Securities within 3 months after the date of this Prospectus, or such longer period as modified by ASIC, none of the New Securities offered by this Prospectus will be allotted or issued. In these circumstances, all Applications will be dealt with in accordance with the Corporations Act including the return of all application monies without interest.

A decision by ASX to grant official quotation of the New Securities is not to be taken in any way as an indication of ASX's view as to the merits of the Company or of the New Securities.

Quotation, if granted, of the New Securities offered by this Prospectus will commence as soon as practicable after statements of holdings of the New Securities are dispatched.

#### 8.13 Market prices of existing Shares and Quoted Options on ASX

The highest and lowest market sale price of the existing Shares and existing Quoted Options, which are on the same terms and conditions as the New Securities offered under this Prospectus, during the 3 months immediately preceding the lodgement of this Prospectus with the ASIC, and the last market sale price on the date before the lodgement date of this Prospectus, are set out below.

#### 8.14 CHES

The Company participates in the Clearing House Electronic Sub register System (CHES). CHES is operated by ASX Settlement Pty Ltd (ASPL), a wholly owned subsidiary of ASX.

Under CHES, the Company does not issue certificates to investors. Instead, security holders will receive a statement of their holdings in the Company, including New Securities issued under this Prospectus. If an investor is broker sponsored, ASPL will send a CHES statement.

The CHES statement will set out the number of New Securities issued under this Prospectus, provide details of your holder identification number and give the participation identification number of the sponsor.

If you are registered on the issuer sponsored sub register, your statement will be dispatched by the Company's share registrar and will contain the number of New Securities issued to you under this Prospectus and your security holder reference number.

A CHESS statement or issuer sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their shareholding changes. Shareholders may request a statement at any other time, however, a charge may be made for additional statements.

#### **8.15 Taxation and duty implications**

The Directors do not consider that it is appropriate to give Eligible Shareholders advice regarding the taxation consequences of the Company conducting the Offer or Eligible Shareholders applying for New Securities under this Prospectus, as it is not possible to provide a comprehensive summary of the possible taxation positions of Eligible Shareholders. The Company, its advisers and officers, do not accept any responsibility or liability for any taxation consequences to Shareholders in the Offer. Eligible Shareholders should, therefore, consult their own professional tax adviser in connection with the taxation implications of the Offer.

No brokerage or stamp duty is payable by Applicants in respect of Applications for New Securities under this Prospectus.

#### **8.16 Privacy**

By paying the Application Price, each Applicant agrees that the Company may use the information provided by an Applicant on the Entitlement and Acceptance Form for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to the Share Registry, the Company's related bodies corporate, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and regulatory authorities.

The Corporations Act requires the Company to include information about the Shareholders (including name, address and details of the Shares held) in its public register. The information contained in the Company's public register must remain there even if that person ceases to be a Shareholder. Information contained in the Company's register is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its security holders) and compliance by the Company with legal and regulatory requirements.

An Applicant has the right to gain access to the information that the Company holds about that person subject to certain exceptions under law. A fee may be charged for access. Such requests must be made in writing to the Company's registered office.

(c) Payment of Dividend

Subject to the Corporations Act, the Constitution and the rights of any persons entitled to shares with special rights to dividend, the Directors may determine that a dividend is payable, fix the amount and the time for payment of the dividend and authorise the payment or crediting of the dividend by the Company to, or at the direction of, each Shareholder entitled to that dividend. No dividend shall carry interest as against the Company.

(d) Winding up

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders. The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

Subject to restrictions on the issue or grant of securities contained in the Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing Share or class of Shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(g) Variation of rights

Under Section 2468 of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(h) Changes to Constitution

The Constitution can only be amended by a special resolution passed by at least three quarters of the members present and voting at a general meeting of the Company. At least 28 days' written notice specifying the intention to propose the resolution as a special resolution must be given.

(i) Meetings and Notices

Each Shareholder will be entitled to receive notice of, and to attend and vote at, general meetings of the Company and to receive notices, accounts and other documents required to be furnished to Shareholders under the Constitution, the Corporations and the Listing Rules.

(j) Dividend Policy

The Company does not intend to declare or pay any dividends in the foreseeable future. Any future determination as to payment of dividends by the Company will be at the sole discretion of the Directors and will depend on the availability of distributable earnings and operating results and financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

## 9.2 Rights and liability attaching to Quoted Options

Quoted Options offered under this Prospectus are subject to the following terms:

- (a) Each Quoted Option entitles the holder to, upon exercise, be issued one Share.
- (b) The exercise price of the Quoted Options is \$0.10 each.
- (c) The expiry date is 16 February 2024.
- (d) The Quoted Options may be exercised at any time prior to the expiry date, in whole or in part, upon payment of the exercise price per Quoted Option.
- (e) The Company currently intends to apply for quotation of the Options on the official list of the ASX. Quotation of the Options is not guaranteed or automatic but will depend on ASX exercising its discretion under the Listing Rules.
- (f) The Quoted Options are freely transferable subject to any restriction or escrow arrangements imposed by the Corporations Act and the ASX Listing Rules.
- (g) The holder of a Quoted Option may not exercise less than 5,000 Quoted Options at any one time unless the holder has less than 5,000 Quoted Options in which event the Holder must exercise all of the Quoted Options together.
- (h) The Company will provide to each Quoted Option holder a notice that is to be completed when exercising the Quoted Options (Notice of Exercise). Quoted Options may be exercised by the Quoted Option holder in whole or in part by completing the Notice of Exercise and forwarding the same to the Share Registry to be received prior to the expiry date. The Notice of Exercise must state the number of Quoted Options exercised, the consequent number of Shares to be issued and the identity of the proposed subscribers. The Notice of Exercise by an Quoted Option holder must be accompanied by payment in full for the relevant number of Shares being subscribed, being an amount of the exercise price per Share.
- (i) All Shares issued upon the exercise of the Quoted Options will rank equally in all respects with the Company's then issued Shares. The Company must apply to the ASX in accordance with the Listing Rules for all Shares pursuant to the exercise of the Quoted Options to be admitted to quotation.

- (j) There are no participating rights or entitlements inherent in the Quoted Options and the holders will not be entitled to participate in new issues or pro-rata issues of capital to Shareholders during the term of the Quoted Options. Thereby, the Quoted Option holder has no rights to a change in:
  - (i) the exercise price of the Quoted Option; or
  - (ii) period of exercise of the Quoted Option; or
  - (iii) except in the event of a Bonus Issue (defined below), a change to the number of underlying securities over which the Quoted Option can be exercised.
- (k) The Company will ensure, for the purposes of determining entitlements to any issue, that Quoted Option holder will be notified of a proposed issue after the issue is announced. This will give Quoted Option holders the opportunity to exercise their Quoted Options prior to the date for determining entitlements to participate in such issues.
- (l) If from time to time on or prior to the Expiry Date the Company makes a bonus issue of securities to holders of Shares in the Company (Bonus Issue), then upon exercise of his or her Quoted Options a holder will be entitled to have issued to him or her (in addition to the Shares which he or she is otherwise entitled to have issued to him or her upon such exercise) the number of securities which would have been issued to him or her under that Bonus Issue if the Quoted Options had been exercised before the record date for the Bonus Issue.
- (m) In the event of any reconstruction (including consolidation, subdivisions, reduction or return) of the authorised or issued capital of the Company, all rights of the Quoted Option holder shall be reconstructed (as appropriate) in accordance with the ASX Listing Rules.

## 10 ADDITIONAL INFORMATION

### 10.1 Continuous disclosure obligations

The Company is a 'disclosing entity' (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities. The New Securities which will be issued pursuant to this Prospectus are in the same class of Shares and Quoted Options that have been quoted on the Official List during the 12 months prior to the issue of this Prospectus.

This Prospectus is a "transaction specific prospectus" to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities in a class which has been continuously quoted by ASX in the three months prior to the date of the prospectus. In general terms "transaction specific prospectuses" are only required to contain information in relation to the effect of the issue of New Securities on the Company and the rights attaching to the New Securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to the ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.
