Operations Overview

Key activities for Brightstar Resources Limited (**Brightstar** or the **Company**) (ASX: BTR) are outlined below.

Cork Tree Well Drilling Program

The Company received final assays from the 30 hole, 6,000m RC campaign completed at Cork Tree Well (CTW) in March 2023, with assay results feeding into a larger database including the previous RC drilling campaign completed in Q4, 2022 by Brightstar at CTW as shown in Figure 1.

The majority of the drill holes in the CTW RC program were designed to intersect the projected mineralised zone at the deepest point on each section, seeking to grow the MRE down dip and also increase the drill density in certain areas to generate Indicated JORC Resources.

Of the entire program, significant assays were received in 20 of the 30 holes drilled and assayed. The results indicate that the mineralised system is open both along strike to the north and at depth, and that further drill testing is required to continue to grow the mineralised footprint.

Post-quarter end in July, Brightstar commenced a ~2,000m RC drilling program at CTW targeting the emerging trend of high-grade plunging shoots within the mineralised system.

Assays released during the June Quarter are reported below, with best results including:

- **10m @ 4.54g/t Au from 192m (BTRRC184), including:**
 - **2m @ 17.23g/t Au from 194m¹**
- **2m @ 11.81g/t Au from 172m (BTRRC200);**
- **13m @ 1.83g/t Au from 143m (BTRRC223)**

Cork Tree Well Mineral Resource Upgrade

Mining consultants ABGM Pty Ltd were engaged to provide an independent JORC 2012 Mineral Resource Estimate for CTW, with a 20% increase in ounces to 303koz comprising a 65% upgrade in Indicated material, now comprising 157koz @ 1.6g/t Au. Importantly for mining studies underway, the Indicated category resources at CTW now account for over 51% of the resource ounces.

Along with other resources at Menzies and Laverton, the updated CTW mineral resource estimate is currently being used for economic assessment in the Scoping Study, with the view of identifying profitable material which would be processed at Brightstar's wholly owned Laverton processing facilities (currently on care & maintenance) located ~30km south of Laverton on well-maintained gravel and sealed roads. Furthermore, the model is being used for exploration planning purposes to target areas that are open down plunge and to ensure sufficient drill density in zones currently classified as Inferred mineralisation to continue to grow the Indicated component of the MRE.

Menzies & Laverton Drilling:

Brightstar commenced its inaugural RC drilling campaign at Menzies during the quarter, with drilling starting at the Lady Irene deposit located ~7km North West of Menzies approximately midway through June 2023. Drilling continued to quarter end at the Aspacia project, with a small program at the Lady Shenton-Lady Irene "Link Zone" testing shallow oxide mineralisation potential between the two resources with a combined +300koz JORC2012-compliant resource (Ref: Table 3).

Post quarter-end, high grades were confirmed in numerous holes at Aspacia⁴, including:

- **1m @ 39.58g/t Au** from 56m (MGPRC020)
- **1m @ 12.12g/t Au** from 113m (MGPRC014)
- **2m @ 5.35g/t Au** from 48m (MGPRC012);

Along with Lady Irene which was highlighted by **8m @ 4.09g/t** from 138m in MGPRC009 amongst other +0.5g/t Au intercepts as released to the ASX post-quarter end⁴.

After the safe completion of the Menzies drilling campaign in July, the RC drill rig and geological team then relocated to Cork Tree Well for a follow-up ~2,000m drilling program.

Assays remain outstanding for 18 holes of the 37 hole program at Menzies, and all 9 holes at Cork Tree Well. These will be released to the market once received and assessed by Brightstar's geology team.

Scoping Study:

During the quarter, Brightstar engaged GR Engineering Services Pty Ltd (GRES) and ABGM Pty Ltd (ABGM) to complete studies into the refurbishment and expansion of the Laverton Processing Plant, along with mining optimisations and schedules associated with the extraction of mineral resources across the Brightstar resource base at Menzies and Laverton. Both key consultants have recent and relevant experience in these studies, with GRES currently constructing the Bellevue Gold (ASX:BGL) 1Mtpa processing facility, whilst ABGM's expertise lies in mine design, scheduling and economic evaluation including complex operations such as Hot Chili Ltd's Costa Fuego project (ASX:HCH).

It is envisaged that this study will deliver indicative capital and operating costs for future operations, identify suitable processing solutions for mineral resources including owner-processing at Brightstar or potential 3rd party options, and support on-going discussions for non-dilutive financing options for a potentially low capital production re-start scenario which will deliver a pathway to production allowing Brightstar to become a gold producer.

The Scoping Study will be used to guide resource definition exploration efforts into the key deposits scheduled for early mining and cashflow generation, resulting in greater confidence and information on the first mines Brightstar will develop and operate across the portfolio which will manifest as a low-risk mining operation in the crucial early stages of the LOM.

Corporate Overview

The Company entered a binding Scheme Implementation Deed (**SID**) with Kingwest Resources Limited (**Kingwest**) announced on 23 December 2022, under which Brightstar would acquire 100% of the issued capital of Kingwest by way of a court-approved Scheme of Arrangement which subsequently was approved by shareholders and implemented during the quarter on 26 May 2023.

As a result, the Board of Directors and key management personnel was refreshed with Mr Gregory Bittar appointed as Non-Executive Chairman, Mr Josh Hunt stepping down as Chairman and continuing as Non-Executive Director, and Mr Jonathan Downes being appointed as Non-Executive Director. Mr Dean Vallve was appointed Chief Operating Officer of Brightstar, along with Ben Smith who was appointed as Joint Company Secretary.

During the quarter, the Company's business address was changed to Level 2, 36 Rowland Street Subiaco.

ABOUT BRIGHTSTAR RESOURCES

Brightstar Resources Limited is a Perth-based gold exploration and development company listed on the Australian Securities Exchange (**ASX: BTR**).

In May 2023, Brightstar completed a merger with Kingwest Resources Limited via a Scheme of Arrangement which saw the strategic consolidation of Brightstar's Laverton Gold Project and Kingwest's Menzies Gold Project. Hosted in the prolific eastern goldfields of Western Australia and ideally located proximal to significant regional infrastructure, Brightstar has a significant **JORC Mineral Resource of 21Mt @ 1.5g/t Au for 1,016,000 ounces Au**.

Importantly, Brightstar owns the Brightstar processing plant (currently on care and maintenance), a 60-man accommodation camp and non-processing infrastructure, located 30km SE of Laverton and within 60km of the Company's 460,000oz Au JORC Resource within the Laverton Gold Project.

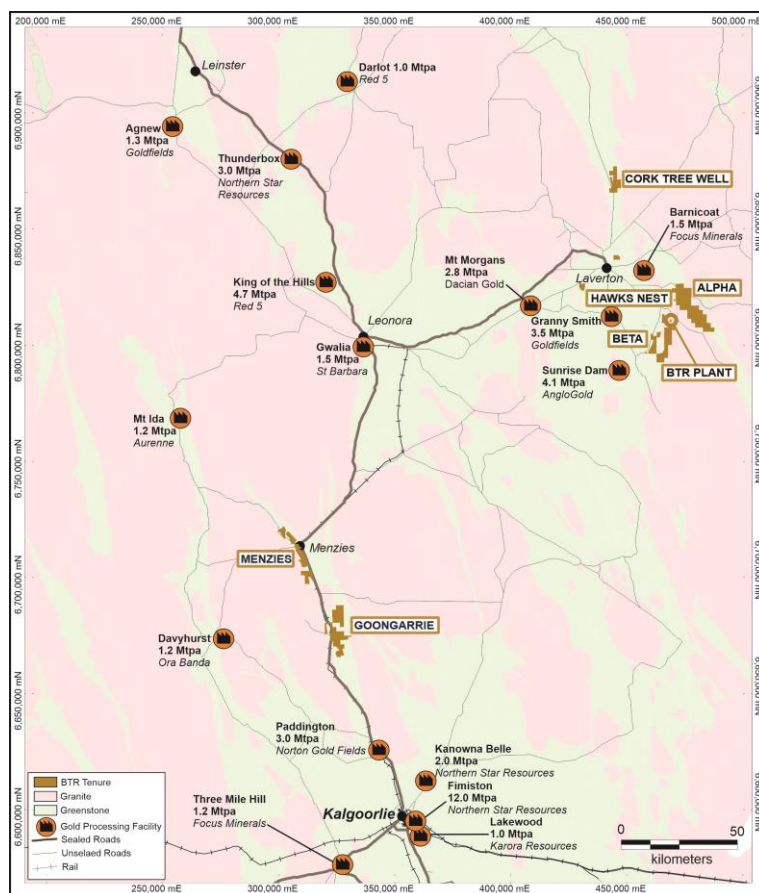

Figure 4 - Laverton & Menzies Gold Project Location

The Menzies Gold Project includes the high-grade gold field which has historically produced 787,200oz at 18.9g/t Au between 1895-1995.

In 2023, Brightstar will be commencing mining operations at the Menzies Gold Project via a Profit Share Joint Venture with BML Ventures Pty Ltd. Brightstar aims to grow its mineral resource inventory with the view to becoming a substantial future ASX gold developer and producer.
