

QUARTERLY ACTIVITIES REPORT June 2023

Discovery Alaska Limited (ASX: DAF) ("the Company") is an Australian based mineral exploration company with an option to acquire a 100% interest in the Mia Adjacent, and a 100% interest in the Chulitna Project in Alaska, USA.

The Company provides the following update for the Quarter;

Exploration Activities

Mia Adjacent Lithium Project (Quebec, Canada) (option to acquire 100% interest)

The Company executed a formal Option Agreement with 1Minerals Corp. to acquire a 100% interest in the Mia Adjacent Lithium Project in Quebec Province, Canada.

The Project comprises 235 tenement claims covering 120km² (12,112 Ha), located in the James Bay Region of Quebec, and adjacent to Q2 Metals Corp Mia and Stellar Lithium Projects.

The Project area contains consistent geology with the Mia Lithium Project area, and regionally, is part of the Yasinski Group lithology, characterized by narrow 'greenstone' volcanic and related sedimentary rocks. The 'greenstone' units and the Vieux Comptoir Granite are known to host spodumene pegmatites within the James Bay region. According to the Quebec Ministry of Energy and Natural Resources (QMERN), the project area contains historically mapped Vieux Comptoir pegmatite dykes.

The majority of the spodumene-bearing LCT-style pegmatites in the James Bay region are hosted within greenstone-belt rock types.

The Vieux Comptoir Granitic Suite rocks are characterized by a usually pegmatitic texture, a granitic composition and the presence of biotite, muscovite, tourmaline and garnet, with local, hornblende, beryl or spodumene present.

According to data from the QMERN the project area contains historically mapped pegmatite outcrops similar to the nearby Mia Lithium Project, and further exploration has the potential to uncover a pegmatite trend. The project area remains to be assessed for the presence of lithium pegmatite.

The Company is developing an initial lithium exploration program in preparation to conduct preliminary site works at the Project. Due to current fire restrictions imposed within the Quebec area, the Company is restricted to desk-top works and non-field activities.
