1 DETAILS OF THE OFFER

1.1 Entitlement Offer

The Entitlement Offer is an offer of 249,085,901 New Shares at the Offer Price of \$0.011 per New Share to raise up to approximately \$2.74 million before issue costs.

All Eligible Shareholders are entitled to subscribe for 1 (one) New Share for every 6 (six) Existing Shares held at 5.00pm (WST) on 9 August 2023 (**Record Date**). New Shares will be issued on a fully paid basis and will rank equally with existing Shares on issue.

The number of New Shares to which you are entitled (your **Entitlement**) is shown on the accompanying Application Form.

Eligible Shareholders who wish to take up their Entitlement in full may also apply for additional New Shares in excess of their pro rata entitlement via a Shortfall Offer². To participate in the Shortfall Offer Shareholders must apply at the same time as they apply for their Entitlements. Applications under the Shortfall Offer will only be satisfied to the extent there is a shortfall under the Entitlement Offer and will be subject to the terms and conditions that are outlined in section 1.6. The Board reserves the right to allocate New Shares under the Shortfall Offer in their absolute discretion.

Certain terms and abbreviations in this Offer Document are defined in the glossary of terms in section 6.

1.2 No Minimum Subscription

There is no minimum subscription for the Entitlement Offer.

1.3 Entitlement to participate in the Entitlement Offer

Eligible Shareholders who are on the Company's Share Register at 5.00pm (WST) on the Record Date are eligible to participate in the Entitlement Offer.

An Application Form setting out your Entitlement to New Shares accompanies this Offer Document.

1.4 Acceptances

This Offer may be accepted in whole or in part prior to 5.00pm (WST) on 1 September 2023 subject to the rights of the Company to extend the Entitlement Offer Period.

Instructions for accepting your Entitlement are set out in section 3 and on the Application Form which accompanies this Offer Document.

1.5 No Trading of Entitlements

The Entitlement Offer is non-renounceable. This means that the Entitlements of Eligible Shareholders to subscribe for New Shares are not transferable and there will be no trading of Entitlements on ASX. Eligible Shareholders who choose not to take up their Entitlements will receive no benefit and their shareholding in the Company will be diluted as a result.

1.6 Shortfall Offer

ASX Listing Rule 7.11.4 and section 708AA(13)(a) of the Corporations Act (as modified by *ASIC Corporations (Non-Traditional Rights Issues) Instrument 2016/84*) permit the Company to make an additional offer of the New Shares that may be comprised in any Shortfall.

Accordingly, Eligible Shareholders are also able to participate in a further discretionary offer of New Shares, being the New Shares that have been initially offered to Eligible Shareholders under the Entitlement Offer (**Shortfall Offer**). It is a condition of participating in the Shortfall Offer that the New Shares being offered may only be issued to a successful applicant where an offer of the New Shares has first been made to, but not accepted by, another Eligible Shareholder under the Entitlement Offer.

In addition:

- (a) the Shortfall Offer is only made available to persons to whom offers were made under the Entitlement Offer (i.e. to Eligible Shareholders);

² Provided that the issue of those New Shares will not result in a breach of the Corporations Act, ASX Listing Rules or other applicable law.

- (b) there is no guarantee that any Application in the Shortfall Offer will be successful and the Directors reserve the right to allocate and satisfy Applications received under the Shortfall Offer at their sole discretion;
- (c) the Shortfall Offer has the same Closing Date as the Entitlement Offer; and
- (d) the issue price of New Shares under the Shortfall Offer is the same price as the New Shares offered under the Entitlement Offer.

If you wish to subscribe for New Shares in addition to your Entitlement, then, if you are an Australian Shareholder, you should make corresponding payment for your full Entitlement plus the additional New Shares. If you are an Overseas Shareholder, you should nominate the maximum number of New Shares you wish to subscribe for on the Application Form and make corresponding payment for your full Entitlement and the additional New Shares.

The Directors reserve their right to allot and issue New Shares under the Shortfall Offer at their discretion within three months of the Closing Date, having regard to the circumstances as at the close of the Entitlement Offer. Any scale back of applications for New Shares under the Shortfall Offer will be at the Company's discretion and its decision on the number of New Shares to be allocated to Eligible Shareholders will be final. No New Shares will be issued under the Shortfall Offer to a Shareholder which will result in them increasing their voting power in the Company above 20%. The Company and its advisers disclaim any duty or liability (including for negligence) in respect of the exercise of that discretion to the maximum extent permitted by law.

The practical effect of the Shortfall Offer is that an Eligible Shareholder can potentially increase its relevant interest in the Company, but no Eligible Shareholder can increase its relevant interest to more than 20% by way of application for additional New Shares under the Shortfall Offer.

It is an express term of the Entitlement Offer that applicants for additional New Shares under the Shortfall Offer will be bound to accept a lesser number of additional New Shares allocated to them than applied for, if so allocated.

Persons who are unsuccessful in their Application under the Shortfall Offer or whose Application is only part accepted will have their excess Application Monies (without interest) returned by electronic funds transfer or cheque within ten Business Days of the Closing Date, without interest. Please note it is not practical to refund amounts of less than \$2.00 and any refunds owing for this amount will be retained by the Company.

The Directors, reserve the right to allocate any New Shares remaining following completion of the Shortfall Offer within three months of the close of the Shortfall Offer. The allocation policy of the Directors with respect to any remaining Shares will be to allocate those Shares in a manner that is in the Company's best interests, having regard to the following factors:

- (o) the need to recognise the ongoing support of existing Shareholders of the Company, in particular long-term and cornerstone investors;
- (p) where the directors consider it is in the best interests of the Company to allocate any portion of the Shares to a particular applicant or to particular applicants in order to maximise total funds raised; and
- (q) ensuring an appropriate shareholder base for the Company.

The issue price of any remaining Shares will be at least \$0.011 per Share.

1.7 Brokerage, commission and stamp duty

No brokerage, commission or stamp duty is payable by applicants for New Shares under the Entitlement Offer. The Company may, subject to agreement and to the extent permitted by law, pay a fee of up to 6% of the proceeds placed by brokers or other financial intermediaries under the Entitlement Offer.

1.13 Issue Outside Eligible Jurisdictions

Recipients may not send or otherwise distribute this Offer Document or the Application Form to any person outside Australia, New Zealand, the United Kingdom, Singapore or Hong Kong (other than to Eligible Shareholders).

It is the responsibility of any Shareholder who submits an Application Form to obtain all necessary approvals for the allotment and issue of the New Shares under this Offer. The return of a completed Application Form will be taken by the Company to constitute a representation and warranty by the applicant to the Company that there has been no breach of such laws and that all relevant approvals have been obtained.

1.15 Rights issue exception is not available

No nominee has been appointed for excluded foreign Shareholders under section 615 of the Corporations Act and, as such, Eligible Shareholders will not be able to rely on the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder subscribes for New Shares under the Entitlement Offer, it must have regard to section 606 of the Corporations Act.

Eligible Shareholders who may be at risk of exceeding the 20% voting power threshold in section 606 of the Corporations Act as a result of application for New Shares under the Entitlement Offer should seek professional advice before completing and returning the Application Form.

Details of the effect of the Entitlement Offer on the control of the Company are set out in section 2.3.

1.16 CHESS

The Company participates in the Clearing House Electronic Sub-register System (**CHESS**). ASX Settlement, a wholly owned subsidiary of ASX, operates CHESS in accordance with the ASX Listing Rules and the ASX Settlement Operating Rules.

Under CHESS, applicants will not receive a certificate but will receive a statement of their holding of New Shares.

If you are broker sponsored, ASX Settlement will send you a CHESS statement.

The CHESS statement will set out the number of New Shares issued under the Entitlement Offer, provide details of your holder identification number and give the participation identification number of the sponsor.

If you are registered on the issuer sponsored sub register, your statement will be dispatched by the Company's share registrar and will contain the number of New Shares issued to you under the Entitlement Offer and your security holder reference number.

A CHESS statement or issuer sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their shareholding changes. Shareholders may request a statement at any other time, however, a charge may be made for additional statements.

1.17 Notice to nominees and custodians

Nominees and custodians that hold Existing Shares should note that the Entitlement Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of securities. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Entitlement Offer is compatible with applicable foreign laws.

1.18 Withdrawal

The Directors may at any time decide to withdraw this Offer Document and the Offer, in which case, all Application Monies will be returned without interest in accordance with the Corporations Act.

1.19 Cleansing Statement

The Company lodged a Cleansing Statement with ASX on 4 August 2023 as permitted by *ASIC Corporations (Non-Traditional Rights Issues) Instrument 2016/84*. The Cleansing Statement may be reviewed on the websites of the Company and ASX.

1.20 Enquiries

Any queries regarding the Entitlement Offer should be directed to Ian Cunningham, Company Secretary, at ianc@polarx.com.au.

You can also contact your stockbroker or professional adviser with any queries in relation to the Entitlement Offer.

This Offer Document is not financial product advice and has been prepared without taking into account your investment objectives, financial circumstances or particular needs. 2. PURPOSE AND EFFECT OF THE ENTITLEMENT OFFER

2.1 Purpose of the Entitlement Offer

The Entitlement Offer forms part of a broader capital raising by the Company of up to approximately \$4.29 million. Under the Placement, the Company has raised approximately \$1.55 million. The Entitlement Offer will raise up to a further approximately \$2.74 million (before costs).

The Directors intend to apply the proceeds from the Placement and the Entitlement Offer for the following purposes in accordance with the table set out below:

	Estimated Amount (\$000) ¹
Alaska Range Project drilling program, metallurgical studies and other exploration	2,161
Humboldt Range drilling program, induced polarisation survey and other exploration	1,358
Working capital ²	612
Estimated costs of Issue (including ASX fees)	156
TOTAL	4,287

Note:

1. The estimated amounts are based on funds raised under the Placement and the Entitlement Offer.
2. Funds allocated to working capital may be used to undertake additional exploration and development expenditure, subject to (i) the amount of funds raised under the Entitlement Offer; and (ii) review of ongoing results at the Caribou Dome and Humboldt Range projects.

In the event that circumstances change or other opportunities arise, the Directors reserve the right to vary the proposed use of funds to maximise benefits to Shareholders.

2.2 Effect of the Entitlement Offer on the Company's Financial Position

The effect of the Entitlement Offer will be that:

- (a) cash reserves will initially increase by approximately \$2.64 million (after payment of costs of the Entitlement Offer); and
- (b) the number of Shares on issue will increase by up to approximately 249,085,901 from 1,494,515,408 to 1,743,601,309¹.

Note:

1. This includes Shares issued under the Placement.

2.3 Effect of the Entitlement Offer on Control

The Entitlement Offer is structured as a pro rata issue and if all Eligible Shareholders take up their Entitlements, the Entitlement Offer will have no effect on the control of the Company.

If Shareholders do not take up their entitlements (whether because they are Ineligible Shareholders or otherwise), their interest in the Company will be diluted. The interests of Shareholders that only take up part of their Entitlement will also be diluted but to a lesser extent. The proportional interests of Ineligible Shareholders will be diluted because such Shareholders are not entitled to participate in the Entitlement Offer.

Based on the information in section 1.9, no person would increase their voting power above 20% as a result of acceptance of an Entitlement and in respect of the Shortfall Offer, the Company will only issue Shares to an applicant where the Directors are satisfied, in their discretion, that the issue of the Shares will not result in a person's voting power increasing above 20%.

2.4 Effect on Capital Structure

A table of changes in the capital structure of the Company as a consequence of the Entitlement Offer is set out below:

Shares	Number
Existing Shares as at the date of this Offer Document	1,494,515,408
New Shares issued pursuant to the Entitlement Offer	249,085,901
Total issued Shares	1,743,601,309¹

Note:

1. This includes Shares issued under the Placement.

3.2 To subscribe for all or part of your Entitlement and/or apply for additional New Shares in the Shortfall Offer

Australian Shareholders

If you wish to take up **all** or part of your Entitlement you need to make payment by BPAY®. Your payment by BPAY® should be for the full amount you wish to apply for under the Offer, including under the Shortfall Offer (being the Offer Price multiplied by the number of New Shares you wish to subscribe for (being all or part of your Entitlement) plus the value of any New Shares you wish to subscribe for under the Shortfall Offer).

You can only apply for Shares under the Shortfall Offer if you apply for all of your Entitlements under the Entitlement Offer.

It is your responsibility to ensure that your BPAY® payment is received by the Company by no later than 5.00pm (WST) on 1 September 2023. You should be aware that your financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment.

Cash will not be accepted and no receipts will be issued.

To pay via BPAY® you will need to:

When making payment via BPAY®, please ensure that you enter the correct Biller Code and Reference Number information that is shown on your personalised Application Form. The Reference Number is used to identify your holding. If you have multiple holdings, you will have multiple Reference Numbers. You must use the Reference Number shown on each personalised Application Form when paying for any New Shares that you wish to apply for in respect of that holding. If you enter your BPAY® details incorrectly, the Company will not be able to issue you your New Shares under the Entitlement Offer.

Amounts received by the Company in excess of the Offer Price multiplied by your Entitlements (**Excess Amount**) may be treated as an Application to apply for as many additional New Shares as your Excess Amount will pay for in full under the Shortfall Offer.

Overseas Shareholders in the United Kingdom, Singapore, Hong Kong or New Zealand

If you are a Shareholder in the United Kingdom, Singapore, Hong Kong or New Zealand, and you are unable to pay by BPAY®, please contact Ian Cunningham, Company Secretary (ianc@polarx.com.au) and the relevant account details and reference numbers for an EFT payment will be e-mailed to you.

3.3 To allow your Entitlement to lapse

If you are a Shareholder and do not wish to accept all (or part) of your Entitlement, you are not obliged to do anything. You will receive no benefit or New Shares and your Entitlement may be dealt with in accordance with section 1.6.

If you wish to receive a benefit, you must take action to accept your Entitlement in accordance with the instructions above and on the accompanying Application Form.

The number of Existing Shares you hold as at the Record Date and the rights attached to those Existing Shares will not be affected if you choose not to accept any of your Entitlement.

3.4 Application Form is binding

A completed and lodged Application Form, or electronic payment, constitutes a binding offer to acquire New Shares on the terms and conditions set out in this Offer Document and, once lodged, cannot be withdrawn. If the Application Form is not completed correctly, it may still be treated as a valid application for New Shares. The Directors' decision whether to treat an acceptance as valid and how to construe, amend or complete the Application Form is final.

By completing and returning your Application Form and/or the requisite Application Monies, you will be deemed to have represented that you are an Eligible Shareholder. In addition, you will also be deemed to have represented and warranted on behalf of yourself or each person on whose account you are acting that the law in your place of residence and/or where you have been given the Offer Document and Application Form, does not prohibit you from being given the Offer Document and Application Form and that you:

- (a) agree to be bound by the terms of the Entitlement Offer;
- (b) declare that all details and statements in the Application Form are complete and accurate;
- (c) declare that you are over 18 years of age and have full legal capacity and power to perform all your rights and obligations under the Application Form;
- (d) authorise the Company and its respective officers or agents, to do anything on your behalf necessary for the New Shares to be issued to you, including to act on instructions of the Share Registry using the contact details set out in the Application Form;
- (e) declare that you are an Eligible Shareholder resident in Australia, the United Kingdom, Singapore, Hong Kong or New Zealand and you are not in the United States or a US Person, or acting for the account or benefit of a US Person;

4. RISK FACTORS

4.1 Overview

An investment in the Company is not risk free and investors should consider the risk factors described below, together with information contained elsewhere in this Offer Document, before deciding whether to apply for New Shares. Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for New Shares.

The Company's principal activity is mineral exploration and development and companies in this industry are subject to many and varied kinds of risks. While risk management cannot eliminate the impact of all potential risks, the Company strives to manage such risks to the extent possible and practical. Following are the risk factors which the Company believes are most important in the context of the Company's business.

The following list is not intended to be an exhaustive list of the risk factors relating to an investment in the Company and other risk factors may apply.

Before deciding to invest in the Company, potential investors should:

- (a) read the entire Offer Document;
- (b) consider the assumptions underlying any forward looking statements;
- (c) review these factors in light of their personal circumstances; and
- (d) seek professional advice from their accountant, stockbroker, lawyer or other professional adviser before deciding whether to invest.

4.2 General Risks

A summary of the major general risks are described below:

(a) **Uninsured risks**

The Company, as a participant in mining and exploration activities, may become subject to liability for hazards that cannot be insured against or against which it may elect not to be so insured because of high premium costs. Furthermore, the Company may incur a liability to third parties (in excess of any insurance coverage) arising from negative environmental impacts or any other damage or injury.

(b) **Unforeseen expenses**

The Company is not aware of any expenses that may need to be incurred that have not been taken into account. However, if such unforeseen expenses were subsequently incurred, the expenditure proposals of the Company may be adversely affected.

(c) **Contractual Risk**

Some of the Company's mineral properties are subject to option or lease agreements between the Company (or its respective subsidiaries), as the case may be, and the owners of such mineral properties or an interest in such mineral properties. The Company will be reliant on the owners of such mineral properties or interests therein complying with their

contractual obligations under the option agreements to maintain the Company's interest in such mineral properties in full force and effect.

(d) **Access to Financing**

The Company is at the exploration stage with no revenue being generated from the exploration activities on its respective mineral properties. The Company may therefore have to raise the capital necessary to undertake or complete future exploration work, including drilling programs. There can be no assurance that debt or equity financing will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to the Company. Moreover, future activities may require the Company to alter its capitalization significantly. An inability to access sufficient capital for operations could have a material adverse effect on the Company's financial condition, results of operations or prospects. In particular, failure to obtain such financing on a timely basis could cause the Company to forfeit its interest in its mineral properties, miss certain acquisition opportunities, or reduce or terminate its operations.

(e) **Working Capital**

In the event that the Company receives applications equal to Full Subscription, the Company will have sufficient funds to adequately meet the Company's targeted exploration commitments and short-term working capital requirements. In the event the Company does not achieve Full Subscription, it will scale back the application of the funds raised accordingly. Regardless of whether the Company achieves Full Subscriptions, the Company may need to seek further funding within the next 12 months or reduce its intended activities.

4.3 Mining Industry risks

(a) **Exploration and Development Risks**

Few mineral properties which are explored are ultimately developed into producing mines. There can be no guarantee that the estimates of quantities and qualities of minerals disclosed will be economically recoverable. Mineral exploration is speculative in nature and there can be no assurance that any minerals discovered will result in the definition of a mineral resource.

In addition, substantial expenditures are required to establish mineral reserves and mineral resources through drilling, to develop metallurgical processes to extract the metal from the ore and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralised deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis. The economics of developing gold and other mineral properties is affected by many factors, including the cost of operations, variations in the grade of minerals mined, fluctuations in metal markets, costs of processing equipment and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals and environmental protection. The long-term success of the Company depends on its ability to explore, develop and commercially produce minerals from its mineral properties and to locate and acquire additional properties worthy of exploration and development for minerals.

Operations are subject to all of the hazards and risks normally encountered in the exploration and development of minerals. Although precautions to minimise risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company.

Changes to legislation and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at any future producing properties or require abandonment or delays in the development of new mining properties.

(b) **Permits and licenses**

The activities of the Company will be subject to government approvals, various laws governing prospecting, development, land resumptions, production taxes, labour standards and occupational health, mine safety, toxic substances and other matters, including issues affecting local native populations. Amendments to current laws and regulations governing operations and activities of exploration and mining, or more stringent implementation thereof, could have a material adverse impact on the business, operations and financial performance of the Company. Further, the mining licenses and permits issued in respect of the Company's mineral properties may be subject to conditions which, if not satisfied, may lead to the revocation of such licenses. In the event of revocation, the value of the Company's investments in its mineral properties may decline.

(c) **Title risks**

The acquisition of title to resource properties or interests therein is a very detailed and time-consuming process. The Company's mineral properties may be subject to prior unregistered agreements or transfers and title may be affected by undetected defects.

(d) **Competition**

The mining industry is highly competitive. The Company's competitors for the acquisition, exploration, production and development of mineral properties, and for capital to finance such activities, will include companies that have greater financial and personnel resources available to them.

(e) **Volatility of metal prices**

The market price of any precious or base metal is volatile and is affected by numerous factors that will be beyond the Company's control. These include international supply and demand, the level of consumer product demand, international economic trends, currency exchange rate fluctuations, interest rates, the rate of inflation, global or regional political events and international events as well as a range of other market forces. Sustained downward movements in metal market prices could render less economic, or uneconomic, some or all of the precious or base metal extraction and/or exploration activities to be undertaken by the Company.

(f) **Environmental risks**

All phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and state and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with environmental legislation can require significant expenditures and a breach may result in the imposition of fines and penalties.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

(g) **Mineral Resource estimates**

Until a deposit is actually mined and processed, the quantity of mineral resources and grades must be considered as estimates only. In addition, the quantity of mineral resources may vary depending on, among other things, base metal prices. In addition, there can be no assurance that metal recoveries in small scale laboratory tests will be duplicated in a larger scale test under on-site conditions or during production.

Mineral resources that are not mineral reserves do not have demonstrated economic viability and there is no assurance that they will ever be mined or processed profitably. Due to the uncertainty which may attach to mineral resources, there is no assurance that

inferred mineral resources will be upgraded to proven and probable mineral reserves as a result of continued exploration.

Fluctuations in copper or other base metal prices and precious metal prices, results of drilling, metallurgical testing and production and the evaluation of studies, reports and plans subsequent to the date of any estimate may require revision of such estimate. Any material reductions in estimates of mineral resources could have a material adverse effect on the Company's results of operations and financial condition.

4.4 General investment risks

(a) Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's development and production activities, as well as on its ability to fund those activities. COVID-19 has negatively affected global economies and is likely to continue to negatively affect global economies for an undetermined period of time.

For example, the Company's ability to undertake mining and exploration activities is dependent upon its ability to source and acquire appropriate mining equipment and personnel. Equipment and personnel are not always readily available and the market for mining equipment and personnel experiences fluctuations in supply and demand. If the Company is unable to source appropriate equipment and personnel economically or at all then this would have a material adverse effect on the Company's financial or trading position.

(b) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors. The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company. COVID-19 has increased global share market volatility and is likely to continue to negatively affect global share-markets for an undetermined period of time.

(c) Additional requirements for capital

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing. Any additional equity financing may dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations. There is, however, no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(d) Dividends

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. The Company can give no assurance in relation to the payment of dividends or franking credits attaching to dividends.

(e) Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(f) Sovereign Risk (General)

The Company's key operations are located in Alaska and Nevada, the United States of America (USA). Possible sovereign risks associated with operating in the USA include, without limitation, changes in the terms of legislation, changes to royalty arrangements, changes to taxation rates and concessions and changes in the ability to enforce legal rights.

Any of these factors may, in the future, adversely affect the financial performance of the Company and the market price of its shares.

(g) **Insurance risks**

The Company maintains insurance for certain activities within ranges of coverage that it believes to be consistent with industry practice and having regard to the nature of activities being conducted. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

(h) **Market risk and interest rate volatility**

From time to time, the Company may borrow money and accordingly will be subject to interest rates which may be fixed or floating. A change in interest rates would be expected to result in a change in the interest rate to the Company and, hence, may affect its profit.

(i) **Share market**

There are general risks associated with an investment and the share market. The price of the Company's securities on the ASX may rise and fall depending on a range of factors beyond the Company's control and which are unrelated to the Company's financial performance. These factors may include movements on international stock markets, interest rates and exchange rates, together with domestic and international economic conditions, inflation rates, investor perceptions, changes in government policy, commodity supply and demand, government taxation and royalties, war, global hostilities and acts of terrorism.

(j) **Liquidity risk**

There is no guarantee that there will be an ongoing liquid market for the Company's securities. Accordingly, there is a risk that, should the market for the Company's securities become illiquid, Shareholders will be unable to realise their investment in the Company.

(k) **Investment speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above may, in the future, materially affect the financial performance of the Company and the value of the Company's securities.

(l) **Acquisitions**

The Company regularly identifies and assesses potential opportunities for acquisitions and growth initiatives where it considers the opportunities may create shareholder value and it will continue to do so. While the Company intends to undertake appropriate due diligence to properly assess such opportunities and initiatives, benefits expected from investments, acquisitions or growth opportunities may take longer than expected to be achieved, or not be achieved at all, which may have a material impact on the value of the Company. In the ordinary course of business, the Company similarly evaluates various strategic options to maximise value creation for shareholders, including in relation to its existing businesses and assets. At this stage, any previously undisclosed potential strategic initiatives being considered by the Company are not sufficiently advanced or certain to warrant disclosure.

(m) **Cyber Security and IT**

The Company relies on IT infrastructure and systems and the efficient and uninterrupted operation of core technologies. The Company's core technologies and other systems and operations could be exposed to damage or interruption from system failures, computer viruses, cyber-attacks, power or telecommunication provider's failure or human error. These events may cause one or more of the Company's core systems to become unavailable. Any interruptions to these operations would impact the Company's ability to operate and could result in business interruption and loss of revenue and could therefore adversely affect the Company's operating and financial performance.

(n) **Climate risk**

There are a number of climate-related factors that may affect the Company's operations and proposed activities. As at the date of this Offer Document, the climate change risks most attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability; and
- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidences of extreme weather events and longer-term physical risks such as shifting climate patterns.

While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences.

4.5 Other risks

Other risk factors include those normally found in conducting business, including litigation through breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel and other matters that may interfere with the Company's business or trade.

5.2 Entitlement Offer Document

Neither this Offer Document nor the Application Form are required to be lodged or registered with ASIC. This Offer Document is not a prospectus under the Corporations Act and no prospectus for the Entitlement Offer will be prepared. These documents do not contain, or purport to contain, all of the information that a prospective investor may require in evaluating an investment in the Company. They do not contain all the information which would be required to be disclosed in a prospectus.

As a result, it is important for Eligible Shareholders to carefully read and understand the information on the Company and the Entitlement Offer made publicly available, prior to accepting all or part of their Entitlement. In particular, please refer to this Offer Document and other announcements made available at www.asx.com.au or on the Company's website: www.polarx.com.au.

Pursuant to the conditions imposed on the Company by section 708AA of the Corporations Act, the Company provided ASX with a notice that complied with the requirements of section 708AA(7) on 4 August 2023. In addition to certain minor and technical matters that notice was required to:

- (a) set out any information that had been excluded from a continuous disclosure notice in accordance with the Listing Rules and that investors and their professional advisers would

reasonably require, and would reasonably expect to find in a disclosure document, for the purpose of making an informed assessment of:

- (b) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; or
- (c) the rights and liabilities attaching to the New Shares; and
- (d) state the potential effect of the issue of the New Shares on the control of the Company and the consequences of that effect.
