

Clarification - ASX Listing Fees

K-TIG Limited (ASX: KTG) ("K-TIG" or the "Company"), refers to the market announcement today from ASX regarding suspension from Official Quotation and wishes to clarify that the Company has in fact paid its annual listing fees before the due deadline.

The securities of the Company remain in suspension following the announcement that it has entered into an agreement to acquire Graham Engineering Limited.

--ENDS--

This announcement was authorised for issue by the Chairman of K-TIG Limited.

About K-TIG Limited

K-TIG is a transformative, industry disrupting welding technology that seeks to change the economics of fabrication. K-TIG's high speed precision technology welds up to 100 times faster than traditional TIG welding, achieving full penetration in a single pass in materials up to 16mm in thickness and typically operates at twice the speed of plasma welding. K-TIG works across a wide range of applications and is particularly well suited to corrosion resistant materials such as stainless steel, nickel alloys, titanium alloys and most exotic materials. It easily handles longitudinal and circumferential welds on pipes, spooling, vessels, tanks and other materials in a single pass. Originally developed by the CSIRO, K-TIG owns all rights, title and interest in and to the proprietary and patented technology and has been awarded Australian Industrial Product of the Year and the DTC Defence Industry Award.
