

## Appointment of Dr Casey Blundell as CEO

Rubix Resources Limited (ASX: RB6, “**Rubix**” or the “**Company**”) is pleased to announce the appointment of Dr Casey Blundell as Chief Executive Officer, effective immediately.

Dr Blundell joined Rubix Resources in June 2022 as Senior Geologist and Exploration Manager, and steps into the role of CEO to lead the Company through its next chapter of exploration and development. Her appointment to CEO comes as Rubix is poised for growth following the recent acquisition of its Ceiling Lithium Project in James Bay, Quebec.

Dr Blundell’s prior training and work experience is principally within complexly deformed geologic terranes in various locations. She brings with her a broad and complementary skillset that is well suited to both project development and generation from regional to project scale.

A Member of the Australian Institute of Geoscientists (MAIG), Dr Blundell brings to the Company almost a decade of continuous technical training and employment. With a PhD in Structural Geology and Structural Geophysics, she was the recipient of the prestigious AusIMM Education Endowment Fund (EEF) Scholarship.

Dr Blundell has a particular interest in critical minerals systems and is a proponent of applying an integrative, scientific approach to minerals exploration, and in utilising both emerging scientific research and the experience of leading industry experts to add material value to projects.

In addition to the AIG, she maintains active membership with the AusIMM, Australian Society of Exploration Geophysicists (ASEG) and the Society of Economic Geologists (SEG).

As part of the role as CEO of Rubix, Dr Blundell will drive the employees and consultants to effectively manage the Company and specifically implement exploration work programs at the Company’s projects.

Rubix Resources Executive Chairman Eddie King said: “We’re extremely pleased to announce Casey as CEO of Rubix, especially given the extensive understanding of the Company and its projects she has already developed. Her technical expertise is well suited to our stage of development as we further exploration at Ceiling Lithium and our Australian projects.”

The key terms of Dr Blundell’s appointment are outlined in Appendix A.

**Authorised for released by the board of Rubix Resources Limited.**
