

INVESTOR PRESENTATION – Q4 2023

Two Large North American Lithium Development Projects

Company Overview

Developing two large North American lithium projects

- ASX Code: **AZL**, OTCQB Code: **AZLAF**
- Combined resource of **6,120,800⁽²⁾ tons** of LCE⁽³⁾

Prairie Lithium Project

Saskatchewan, Canada

- Brine resource
- 350,000+ acres of sub surface mineral rights
- Located in Saskatchewan, Canada, one of the top ranked mining friendly jurisdictions in the world
- Large Indicated resource of 4.0MT LCE⁽³⁾ at 106mg/L Li⁽²⁾
- Large Inferred resource of 1.7MT of LCE⁽³⁾ at 102mg/L Li⁽²⁾

Big Sandy Project

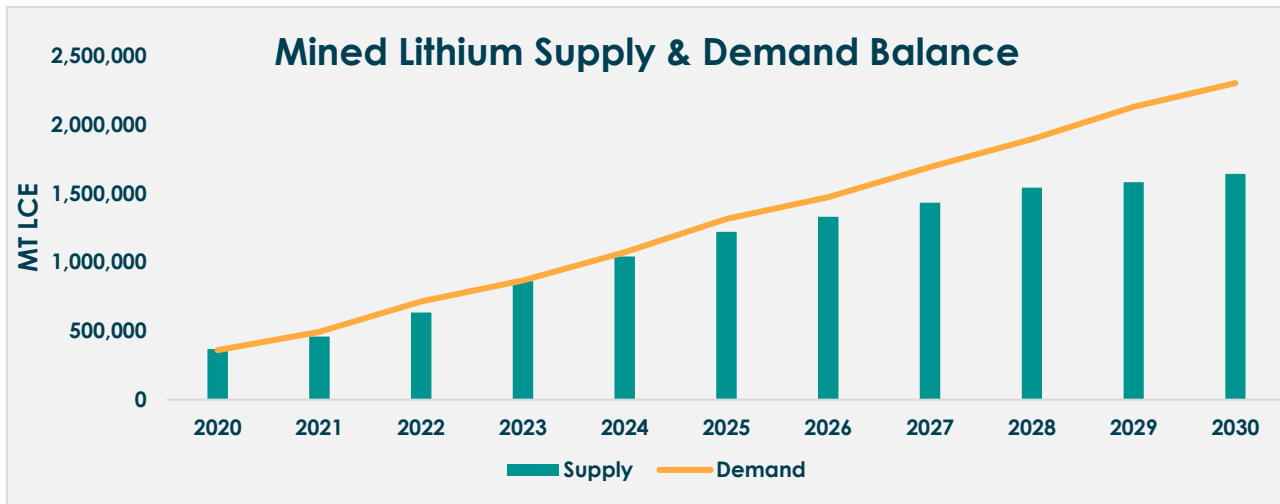

Arizona, USA

- Sedimentary resource
- Located just two hours north of Phoenix, Arizona, and our Lithium Research Centre (LRC)
- Expandable resource with 320,800 tons⁽¹⁾ of LCE⁽³⁾ from 4% of the landholding

Notes: (1) See AZL's maiden resource update in announcement "Big Sandy Lithium Project (Arizona, USA) Maiden Mineral Resource" – 26 September 2019. (2) Prairie Project Resource Upgraded 39% – Announcement by AZL (17/08/23). (3) Lithium Carbonate Equivalent (LCE).

Lithium Supply & Demand Dynamics Support Price Appreciation

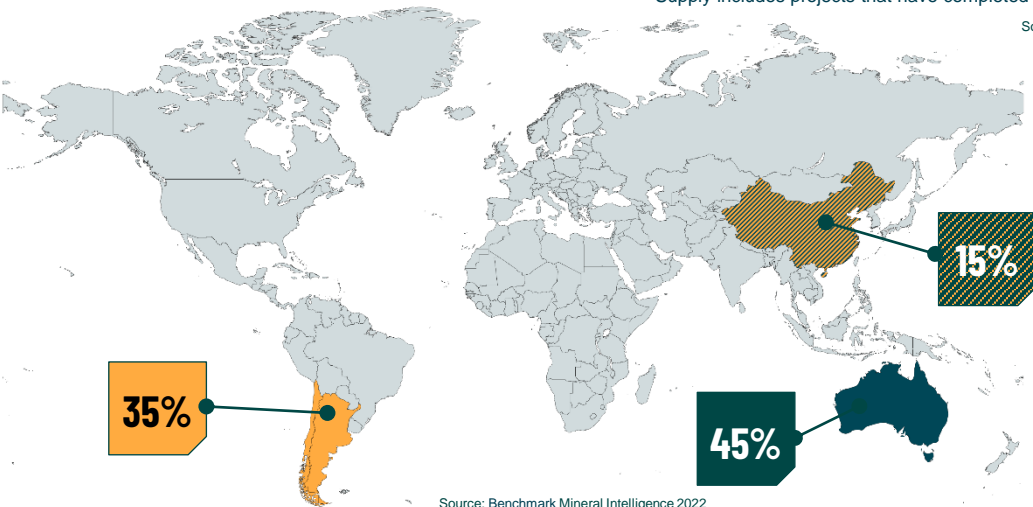

Lithium supply has struggled to keep pace with demand.

Current Lithium Supply

*Supply includes projects that have completed necessary public market requirements, government approvals and are fully funded

North America Lithium Industry

A growing future customer base

- GM, Ford and Stellantis have committed >\$50 billion to electrify their fleets
- A significant battery materials supply chain needs to be built in North America to support these commitments

References

1. Stellantis announcement (May 24, 2022)
2. Ford announcement (May 19, 2021)
3. GM electrification commitment (November 17, 2022)

STELLANTIS
SAMSUNG
Announced that they will form a joint venture to operate, starting in 2025, a gigafactory of about 40 GWh.

FREYR
KOCH
They have announced a joint venture (50% each) to start building a gigafactory in the USA (the final location has not yet been determined)

Prairie Lithium Project Overview

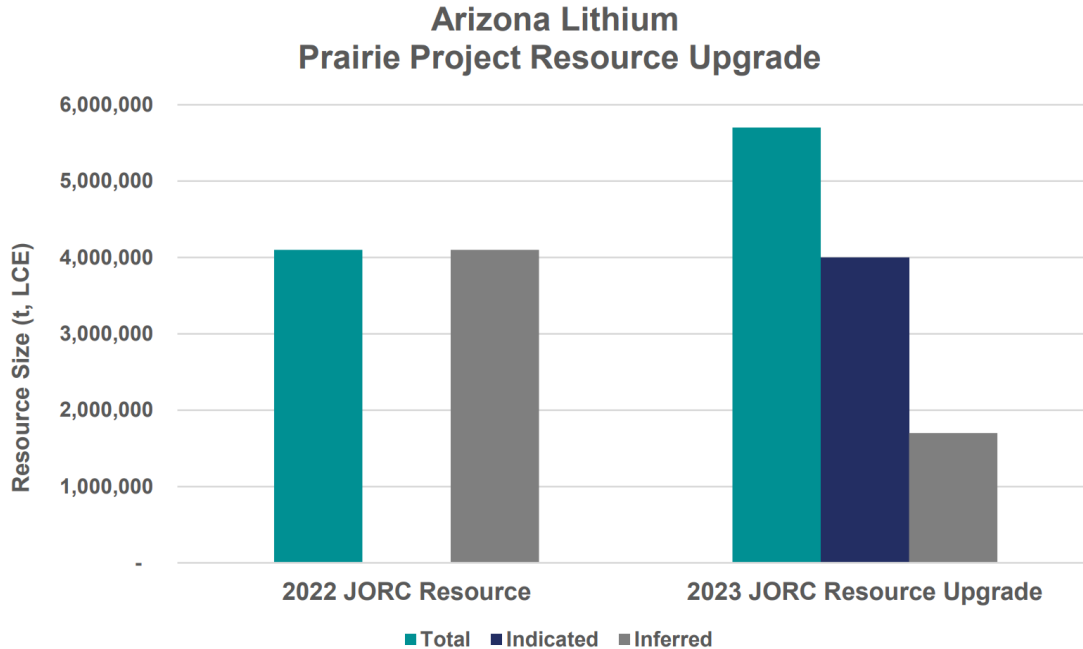

350,000+ acres of subsurface mineral permits

Key Points:

- **Mining friendly jurisdiction**
Saskatchewan, Canada is an existing oil and gas producing region with efficient permitting processes
- Large Total Resource of **5.7MT of LCE** including 4.0MT Indicated at 106mg/L Li and 1.7MT Inferred at 102mg/L Li⁽¹⁾
- **350,000+ acres** of nearly contiguous subsurface mineral permits in Saskatchewan
- **Modular process** that will shorten time to production, keep capital expenditure low and operate as a proof of concept for the DLE technology

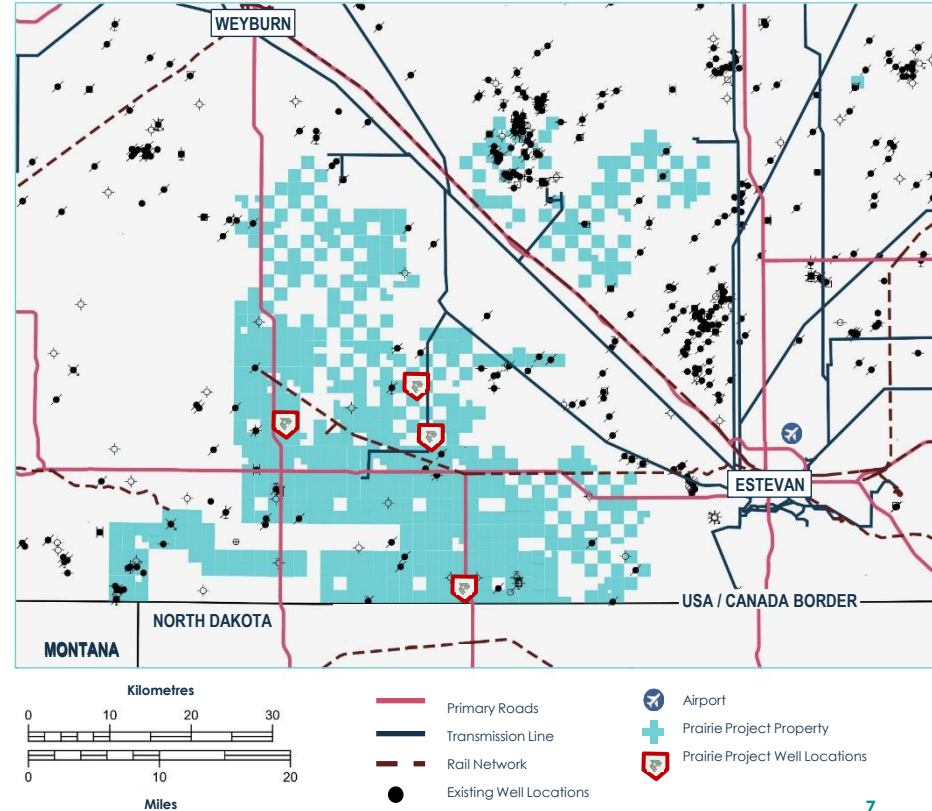

Prairie Project Resource Upgrade

- In August 2023 AZL increased its Prairie Project Resource to **5.7MT⁽¹⁾** representing a total increase of **39%**
- Highest grade Indicated lithium brine resource in Canada with the majority of the Indicated Resource at 127mg/L Li.
- Total resource represents approximately **8 years** of current worldwide market for LCE
- Large Indicated Resource enables AZL to complete a Pre Feasibility Study (PFS) by December 2023

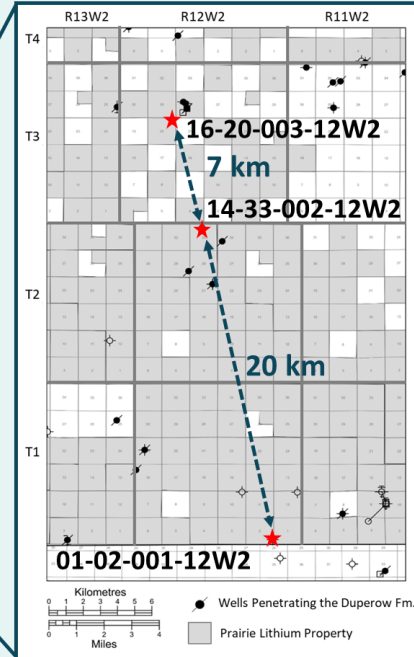

Prairie Project Resource

- The Prairie project is targeting the Duperow Formation in Saskatchewan, Canada which is consistently ranked at the top of global mining friendly jurisdictions
- To date, 800 wells have been drilled through the Duperow Formation
 - Well mapped and well understood geology
 - Well established drilling and production procedures
- The Duperow Formation characteristics are:
 - 2,400m depth
 - 140m thick
 - Laterally continuous across the basin
- Total resource of 5.7 million tonnes of Lithium Carbonate Equivalent⁽²⁾
- Excellent access to utilities and services including:
 - Drill rigs, service rigs, skilled labour, fresh water, electricity, natural gas, railroads, grid roads, highways

Contiguous Resource over 27km

- Three wells tested
- Large Indicated Resource (**4.0mm tonnes of LCE**)⁽²⁾
- Total Resource of **5.7mm tonnes of LCE**⁽²⁾
- Consistent grade over 27km
- **350,000+ acres** of sub surface mineral rights
- Resource upgraded in Q3, 2023

		← 27 km →

	Lower Wymark		98	
Saskatoon Member	53	68	48	

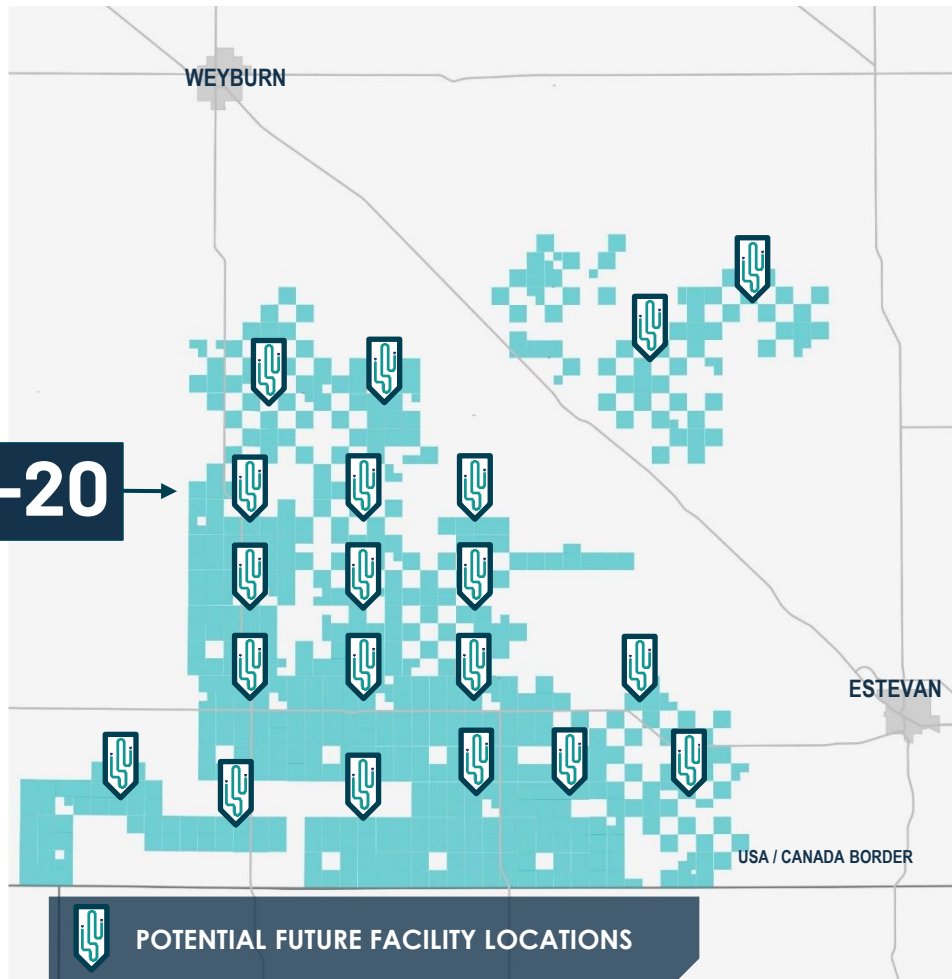

Lithium Concentration (mg/L)

Modular DLE Technology

DLE technology may be scaled up to a commercial level and deployed on the Prairie Project resource.

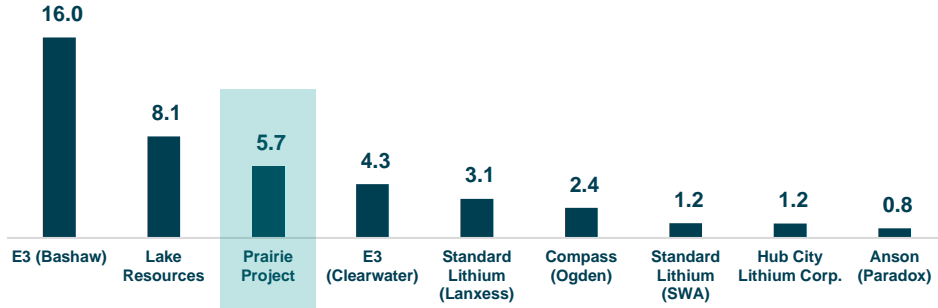

X 10-20 →

How Does The Brine Resource Compare?

Resource Size (mmMt LCE)

- Highest quality indicated lithium resource discovered in Canada to date
- Prairie has a competitive North American grade with the bulk of the indicated resource at 127 mg/L⁽⁴⁾
- The largest contiguous high grade (>100 mg/L Li) North American resource of 5.7 MT LCE

Grade (mg/L Li)

Big Sandy Project Overview

Key Points:

- First drilling program completed in 2019
- Total Inferred and Indicated Resource **320,800 tons⁽¹⁾** of LCE from 4% of the landholding
- Production of high-quality battery grade Lithium Carbonate of **99.8%⁽²⁾ purity (Battery Grade >99.5% purity)** from Big Sandy Ore
- The Big Sandy Lithium Project is located in northwest Arizona, approximately 225 kilometres north of Phoenix, and approximately 90 kilometres southeast of the regional center of Kingman

Big Sandy Project Resource

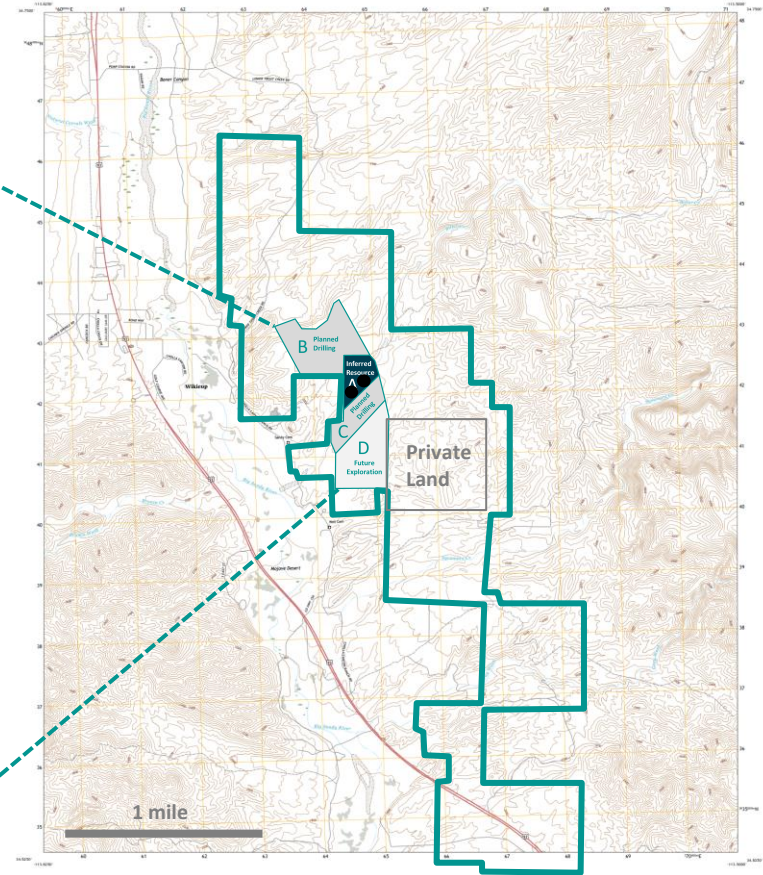

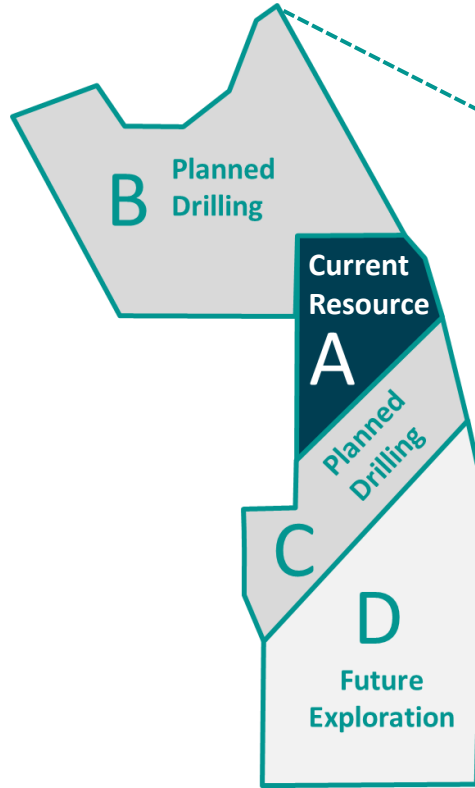

Exploration upside

Expandable Resource

Inferred and Indicated Resource of **320,800 tons⁽¹⁾** of LCE from 4% of the landholding at Big Sandy

Two hours north of Phoenix with direct access from highway 93

Future development plans include drilling to the north and south of the current Indicated and Inferred Resource

Notes: (1) See AZL's maiden resource update in announcement "Big Sandy Lithium Project (Arizona, USA) Maiden Mineral Resource" – 26 September 2019.

Advantage

Why Big Sandy's sedimentary lithium works

- The lithium mineralisation is interpreted to exist within an upper and lower clay zone, separated by a distinct marker horizon of altered tuff⁽¹⁾
- Lithium mineralisation extends to a maximum of approximately 110 metres below surface⁽¹⁾

Research and Development

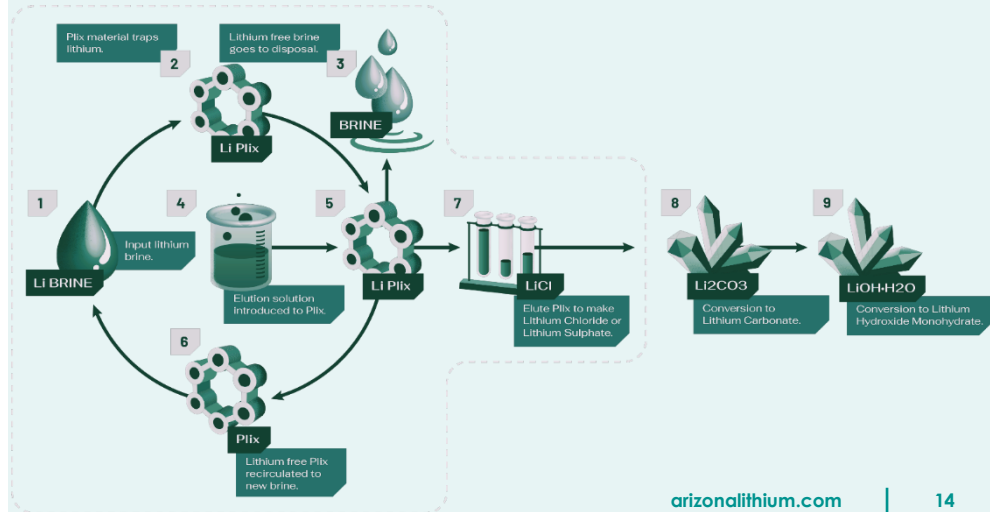

Lithium Research Centre (LRC)

- AZL has developed a world class LRC on a 9,700m² property approximately 15km from Phoenix airport
- The facility includes a 1,900m² building for R&D and a 3,000m² secure lot for the fabrication and storage of processing equipment
- The LRC will function as a technology incubator focused on the extraction of lithium and produce battery grade lithium chemicals for current and future battery chemicals

Direct Lithium Extraction (DLE) Technology

- Lithium extraction technology that selectively removes lithium from brine
- Opportunity to produce battery grade lithium out of the lithium chloride or sulphate solution produced
- Has been tested successfully on the Big Sandy ore

Board of Directors

Paul Lloyd
Managing Director

Paul Lloyd is a Chartered Accountant with over thirty-five years' commercial experience. Mr. Lloyd was one of the vendors of the Big Sandy Lithium project and has been the Managing Director since September 2018. Mr. Lloyd has been responsible for a significant number of IPOs, RTOs, project acquisitions and capital raisings for ASX listed public companies.

Barnaby Egerton-Warburton
Non-Executive Chairman

Barnaby has over 25 years of trading, investment banking, international investment and market experience with positions at JP Morgan, BNP Equities (New York) and Prudential Securities (New York). He is an experienced Investment Banker and corporate advisor, having held managing director and non-executive director positions in the investment banking, oil & gas and resource sectors. He holds a degree in economics, is a graduate of the Australian Institute of Company Directors, and a member of the American Association of Petroleum Geologists.

Zach Maurer
Executive Director

Zach entered the energy sector in 2009 and worked his way from a roughneck into consulting roles. During his consulting career, he managed environmental and hydrogeologic projects in Canada and the United States. In 2019, he founded and incorporated Prairie Lithium. As CEO of Prairie Lithium, he led multiple rounds of private equity funding while advancing DLE technology and brine resource exploration. In 2023, he led Prairie Lithium through the successful acquisition by Arizona Lithium. He holds a B.Sc. in Geology from the University of Regina and a Diploma in Exploration Information Technology from the South Alberta Institute of Technology (SAIT).

Matthew Blumberg
Executive Director

Matthew is currently based in New York and is a Director at Private Equity firm ALJ, focusing on Strategy, Mergers & Acquisitions. Matthew has previously worked in investment roles in New York and Sydney. He holds a Master of Business Administration (MBA) from Yale University and a double degree in Engineering (First Class Honours) and Commerce from The University of Western Australia.

An Experienced Management Team

With a proven track record

Wendy Alaniz
Chief Financial Officer (USA)

Wendy is a Certified Public Accountant with over 20 years' experience leading accounting and finance teams at public companies, predominantly Nestlé, with extensive experience in manufacturing, cost accounting, internal controls and audit. She holds a Master of Business Administration (MBA) and a Bachelor of Science (BSc) from California State University San Bernardino, where she also spent 3 years as Adjunct Faculty, Department of Accounting and Finance, College of Business & Public Administration. In addition, she is a Certified Internal Auditor (CIA) and Certified Fraud Examiner (CFE).

Brett Rabe
Chief Technical Officer

Brett worked for Lithium Americas Corp as VP of Engineering and Project Manager for the Thacker Pass Project in Nevada. Brett has been involved in the design, development, and management of lithium projects for 10 years dating back to the geothermal brine project developed by Simbol Materials, Inc where he was Sr. Process Engineer and Plant Manager. Brett also has EPC/CM experience (3 years) with Jacobs Engineering where he held process engineering and project management roles for mineral processing, infrastructure, and US Government projects. Brett's other roles include various plant manager and process engineering roles with Elementis Global, Potash Corp, Chemical Products Corp, and Barrick Gold Corp. Brett completed a Master's Degree in Metallurgical Engineering (Hydrometallurgy) from the University of Nevada-Reno in 2000 and a Bachelor's Degree in Metallurgical Engineering in 1994.

Chelsey Hillier
Senior Vice President of Exploration

Chelsey holds a Bachelor of Science Geology Honours from the University of Regina. Before joining the Prairie Project in 2021 Chelsey worked in technical and management roles with Nexen and CNOOC Intl for 14 years. Chelsey manages the Technical Reporting, Subsurface Development and Reservoir Characterization Teams; and she plays an integral part in the researching, planning and execution of projects.

Greg Smith
Geological Consultant

Greg commenced his career in 1975 and has worked over a wide cross section of minerals and countries including in North America, Australia, Asia and throughout Africa. He was the exploration manager for Moto Gold Mines Ltd, responsible for the discovery of 22.5 million ounces of gold in the Democratic Republic of Congo (Kibali Mine). Recently he planned and supervised the drill-out of the maiden resource on the Big Sandy Lithium Project. He is a Member of the Australasian Institute of Mining and Metallurgy.

The path forward

Exciting upcoming milestones for the company

Timeline

News Flow

Q2 2023

Results of latest well re-entry at Prairie Project **(Complete)**

Q2 2023

Commence work on Prairie **Direct Lithium Extraction (DLE) Technology** at the LRC **(Complete)**

Q3 2023

Upgrade the Prairie Project resource – both size and quality **(Complete)**

Q4 2023

Construct **DLE Pilot Plant** at Prairie Project to confirm exceptional third party DLE results

Q4 2023

Completion of **Preliminary Feasibility Study (PFS)** on the Prairie Project

H1 2024

Commence **construction of commercial plant** at Prairie project via **drilling of production wells**

H1 2024

Completion of **Definitive Feasibility Study (DFS)** on the Prairie Project

H1 2024

Completion of **Definitive Feasibility Study (DFS)** on the Big Sandy Project (pending upcoming drilling approvals)

H2 2024

Commence **production of Lithium** products for potential offtakers and/or strategic investors

Disclaimer

DISCLAIMER AND FORWARD LOOKING STATEMENTS

This presentation has been authorised for release by the Board of Arizona Lithium Limited. It is not a prospectus nor an offer of securities for subscription or sale in any jurisdiction nor a securities recommendation. The information in this presentation is an overview and does not contain all information necessary for investment decisions. In making investment decisions, investors should rely on their own examination of Arizona Lithium Limited (Company) and consult with their own legal, tax, business and/or financial advisers in connection with any acquisition of securities or interest in the Big Sandy and Lordsburg Lithium Projects. The information contained in this presentation has been prepared in good faith by the Company. However, no representation or warranty, express or implied, is made as to the completeness or adequacy of any statements, estimates, opinions or other

Information contained in this presentation. To the maximum extent permitted by law, the Company, its directors, officers, employees and agents disclaim liability for any loss or damage which may be suffered by any person through the use of, or reliance on, anything contained in or omitted from this presentation. Certain information in this presentation refers to the intentions of the Company, but these are not intended to be forecasts, forward looking statements, or statements about future matters for the purposes of the Corporations Act 2001 (Cth) or any other applicable law. The occurrence of events in the future are subject to risks, uncertainties and other factors that may the Company's actual results, performance or achievements to differ from those referred to in this presentation to occur as contemplated. The presentation contains only a synopsis of more detailed information available in relation to the matters described in this document and accordingly no reliance may be placed for any purpose whatsoever on the sufficiency or completeness of such information and to do so could potentially expose you to a significant risk of losing any of the property invested by you or incurring by you of additional liability. Recipients of this presentation should conduct their own investigation, evaluation and analysis of the business, data and property described in this presentation. In particular, any estimates or projections or opinions contained herein necessarily involve significant elements of subjective judgment, analysis and assumptions and you should satisfy yourself in relation to such matters.

COMPETENT PERSON STATEMENT

The information in this report regarding exploration results, exploration targets and the mineral resources is based on and fairly represents information compiled by Mr Gregory Smith, a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Smith has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from The original market announcements and that the material assumptions and technical parameters underpinning the Resource estimate continue to apply.

COMPETENT PERSONS STATEMENT FOR PRAIRIE AND REGISTERED OVERSEAS PROFESSIONAL ORGANISATION (ROPO) AND JORC TABLES

Gordon MacMillan P.Geo., Principal Hydrogeologist of Fluid Domains, who is an independent consulting geologist of a number of brine mineral exploration companies and oil and gas development companies, reviewed and approves the technical information provided in the AZL Prairie acquisition release (21/12/2022) and JORC Code. Mr. MacMillan is a member of the Association of Professional Engineers and Geoscientists of Alberta (APEGA), which is ROPO accepted for the purpose of reporting in accordance with the ASX listing rules. Mr. MacMillan has been practising as a professional in hydrogeology since 2000 and has 22 years of experience in mining, water supply, water injection, and the construction and calibration of numerical models of subsurface flow and solute migration. Mr. MacMillan is also a Qualified Person as defined by NI 43-101 rules for mineral deposit disclosure.
