About Rincon

Rincon has a 100% interest in three exploration assets in Western Australia that are highly prospective for copper, gold, REE's and other critical metals for the energy transition; these are the South Telfer Project, West Arunta Project and Laverton Project.

Each asset has previously been subject to historical exploration which identified prospective mineral systems that warrant further exploration. The Company's aim is to create value for its shareholders by advancing its assets by applying technically sound methodical and systematic exploration work programs to test, discover, and delineate economic resources.
