

ASX ANNOUNCEMENT AND MEDIA RELEASE

26 October 2023

ALTECH – SHAREHOLDER REGISTRATION FOR VIRTUAL AGM

Altech Batteries Limited (Altech/the Company) (ASX: ATC and FRA: A3Y) takes this opportunity to remind shareholders that its Annual General Meeting (AGM) will be held on 27 October 2023 at 2.00pm AWST. The AGM will be held virtually, as well as Altech's office at Suite 8, 295 Rokeby Road, Subiaco, Australia.

Shareholders that wish to attend virtually are urged to register to attend in advance of the meeting. Shareholders should follow the instructions below provided by the Company's share registrar Automic Pty Ltd.

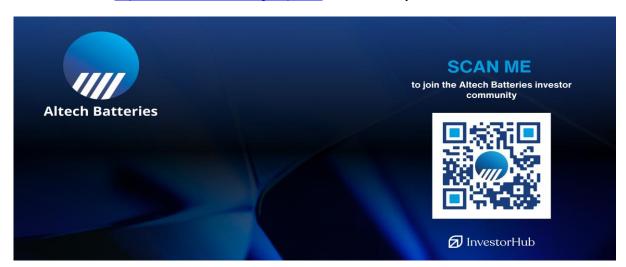

To access the Meeting online (Registration will open 30 minutes prior to the meeting):

- 1. Open your internet browser and go to investor.automic.com.au
- 2. Login with your username and password or click "register" if you haven't already created an account. Shareholders are encouraged to create an account prior to the start of the AGM to ensure there is no delay in attending the AGM online.
- 3. After logging in, a banner will be displayed at the top once the AGM is open for registration. Click on "View" when this appears.
- 4. Click on "Register" and follow the steps.
- 5. Click on the URL to join the webcast where you can view, vote and ask questions at the AGM.
- 6. Once the Chair of the AGM has declared the poll open for voting click on "Refresh" to be taken to the voting screen.
- 7. Select your voting direction and click "confirm" to submit your vote. Note that you cannot amend your vote after it has been submitted.

In addition, the Voting Guide provided by Automic Pty Ltd can be found attached to this announcement.

About Altech Batteries Ltd (ASX:ATC) (FRA:A3Y)

CERENERGY® Batteries Project

Altech Batteries Ltd is a specialty battery technology company that has a joint venture agreement with world leading German battery institute Fraunhofer IKTS ("Fraunhofer") to commercialise the revolutionary CERENERGY® Sodium Chloride Solid State (SCSS) Battery. CERENERGY® batteries are the game-changing alternative to lithium-ion batteries. CERENERGY® batteries are fire and explosion-proof; have a life span of more than 15 years and operate in extreme cold and desert climates. The battery technology uses table salt and is lithium-free; cobalt-free; graphite-free; and copper-free, eliminating exposure to critical metal price rises and supply chain concerns.

The joint venture is commercialising its CERENERGY® battery, with plans to construct a 100MWh production facility on Altech's land in Saxony, Germany. The facility intends to produce CERENERGY® battery modules to provide grid storage solutions to the market.

Silumina Anodes™ Battery Materials Project

Altech Batteries has licenced its proprietary high purity alumina coating technology to 75% owned subsidiary Altech Industries Germany GmbH (AIG), which has commenced a definitive feasibility study for the development of a 10,000tpa silicon/graphite alumina coating plant in the state of Saxony, Germany to supply its Silumina AnodesTM product to the burgeoning European electric vehicle market.

This Company recently announced its game changing technology of incorporating high-capacity silicon into lithium-ion batteries. Through in house R&D, the Company has cracked the "silicon code" and successfully achieved a 30% higher energy battery with improved cyclability or battery life. Higher density batteries result in smaller, lighter batteries and substantially less greenhouse gases, and is the future for the EV market. The Company's proprietary silicon graphite product is registered as Silumina Anodes™.

The Company is in the race to get its patented technology to market, and recently announced the results of a preliminary feasibility study (PFS) for the construction of a 10,000tpa Silumina Anodes™ material plant at AIG's 14-hectare industrial site within the Schwarze Pumpe Industrial Park in Saxony, Germany. The European graphite and silicon feedstock supply partners for this plant will be SGL Carbon and Ferroglobe. The project has also received green accreditation from the independent Norwegian Centre of International Climate and Environmental Research (CICERO). To support the development, AIG has commenced construction of a pilot plant adjacent to the proposed project site to allow the qualification process for its Silumina Anodes™ product. AIG has executed NDAs with two German automakers as well as a European based battery company.

HPA Production Project

Altech is also further aiming to become a supplier of 99.99% (4N) high purity alumina (Al_2O_3) through the construction and operation of a 4,500tpa high purity alumina (HPA) processing plant at Johor, Malaysia, and has finalised Stage 1 and Stage 2 construction of its HPA plant in Johor, Malaysia. Feedstock for the plant will be sourced from the Company's 100%-owned near surface kaolin deposit at Meckering, Western Australia and shipped to Malaysia. The HPA project is significantly de-risked with a bankable feasibility study completed, senior lender project finance from German government owned KfW IPEX-Bank approved, and a German EPC contractor appointed — with initial construction works at the site completed. In addition to the senior debt, conservative (bank case) cash flow modelling of the HPA plant shows a pre-tax net present value of USD 505.6million at a discount rate of 7.5%. The project generates annual average net free cash of ~USD76million at full production. Altech is in the final stages of project finance with a potential raising of US\$100m of secondary debt via the listed green bond market. In addition, US\$100m of project equity is being sought through potential project joint venture partners.

Virtual Meeting Registration and Voting

REGISTRATION

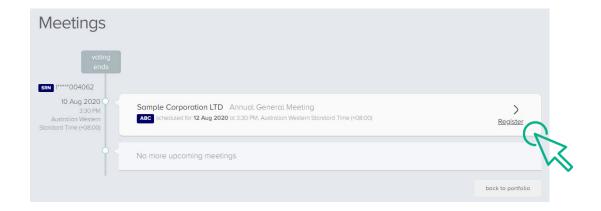

- Go to: https://investor.automic.com.au/#/home.
- Log in using your existing username and password or click on "register" and follow the on-screen prompts to create your login credentials.

• Once logged in you will see that the meeting is open for registration. Click on "view".

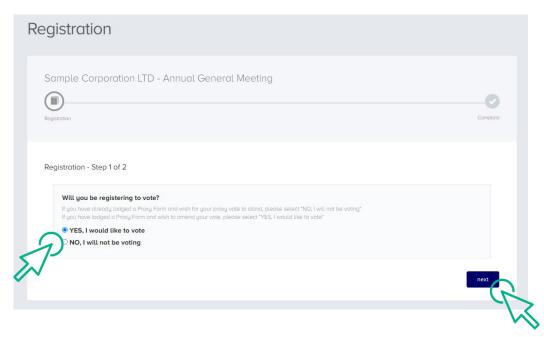

• Click on "register" to register your attendance for the meeting.

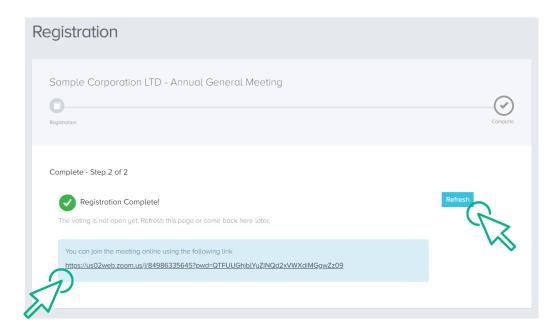

REGISTRATION

• Select "yes, I would like to vote" and then click "next".

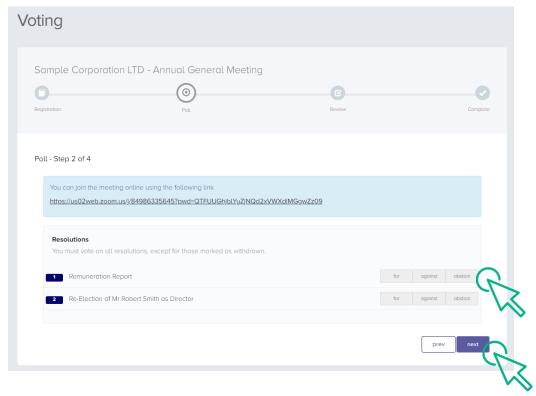

- You will be placed on a holding page until voting opens for the meeting.
 From here you can access the meeting video/audio by selecting the meeting URL.
- Once the Chair of the Meeting declares voting open, you should select "refresh".

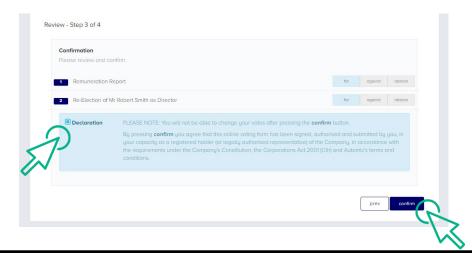

VOTING

- The next screen will display the resolutions to be put to the meeting.
- The Chair of the meeting will provide instructions on when to mark your vote.
- You record your vote by selecting either "for", "against" or "abstain" next to the appropriate resolution.
- Once voting has been declared closed you must select "next" to submit your vote.

- On the next screen, check your vote is correct and select the box next to "declaration" you cannot confirm your vote unless you select this box.
- Select "confirm" to confirm your vote you CANNOT amend your vote after pressing the "confirm" button.

VOTING COMPLETE

Your vote is now lodged and is final.
