

Blackstone Minerals Launches InvestorHub

Blackstone Minerals Limited (“Blackstone” or the “Company”) is pleased to announce the formal launch of our InvestorHub. The InvestorHub is a dedicated platform for investors to learn more about Blackstone and our latest activities.

At Blackstone, we are committed to being transparent with our investors. In line with that commitment, we will be regularly uploading new content to the hub, including videos accompanying selected ASX announcements, educational material, webinars and interviews.

Investors are encouraged to post questions and feedback through the Q&A function accompanying each piece of content, and engage directly with the Blackstone team.

How to join the Blackstone Minerals InvestorHub

1. Head to our [Investor Hub](#) or scan the QR code with your smart device
2. Follow the prompts to sign up for an Investor Hub Account
3. Complete your account profile and link your shareholdings if you are a current shareholder.

Investors with complete accounts on the InvestorHub may be invited to exclusive company events and corporate opportunities. Blackstone appreciates the support of our shareholders and looks forward to updating investors on the progress of our projects via the InvestorHub.

Blackstone Minerals’ Managing Director, Scott Williamson, commented:

“I am excited to announce the launch of our InvestorHub. This innovative and interactive platform will enable us to establish greater communication channels with our valued shareholders, ensuring they are kept up to date and informed on all our latest news and progress. Blackstone is committed to transparency, and we want our shareholders to feel engaged every step of the way.”

Authorised by the Managing Director on behalf of the Board.

About Blackstone

Blackstone Minerals Ltd (ASX: BSX / OTCQX: BLSTF / FRA: B9S) is focused on building an integrated battery metals processing business in Vietnam that produces Nickel:Cobalt:Manganese precursor products for Asia's growing lithium-ion battery industry.

Blackstone will produce the lowest emission precursor as verified by Minviro and the Nickel Institute (refer ASX announcement 15 September 2022).

The existing business has a modern nickel mine built to Australian standards, which successfully operated as a mechanised underground nickel mine from 2013 to 2016. This will be complemented by a larger concentrator, refinery and precursor facility to support integrated production in-country.

To unlock the flowsheet, the Company is focused on a partnership model and is collaborating with groups who are committed to sustainable mining, minimising the carbon footprint and implementing a vertically integrated supply chain.

The Company's development strategy is underpinned by the ability to secure nickel concentrate and Ta Khoa is emerging as a nickel sulphide district with several exploration targets yet to be tested.
