Kali Metals offers potential shareholders with an investment opportunity that is currently second to none, highlighted by a lithium exploration portfolio in Western Australia that includes Kalamazoo's projects in the Pilbara (in JV with leading global producer, SQM), and Karora's Higginsville Project in the Eastern Yilgarn. Kali's WA projects are located in hard-rock lithium regions at the centre of this heightened interest and combine to create an unrivalled exploration portfolio for the Company.*

Kalamazoo shareholders are being provided with ongoing exposure to Kali's exploration projects via an in-specie distribution of shares in Kali. In addition, our shareholders have the right to subscribe for additional shares, should they wish to participate in Kali's IPO on a priority entitlement basis."
