DRILLING COMMENCES AT PAYNES FIND GOLD PROJECT

Oakajee Corporation Ltd (“Oakajee”, “OKJ” or “the Company”) is pleased to advise that Aircore drilling has commenced at its Paynes Find Gold project in Western Australia.

The Company expects to drill 25 holes for a total of 1,320 meters.

Figure 1: Paynes Find south proposed AC drill lines.

Background

A review of gold exploration was undertaken, focusing on the southern part of the Paynes Find project. It was initially noted targets in E59/2092 have not been effectively tested by historic soil geochemistry due to large areas of sheet wash cover. Previous drilling by OKJ along the northern tenement boundary intersected anomalous gold to 0.88g/t (ASX Quarterly Report 28th July 2020) however the drilling did not test the sheet wash covered areas. These targets will be tested with results reported to ASX once received.
