

Steelpoortdrift Vanadium Project

Corporate Presentation

November 2023

ASX:VR8
www.vr8.global

This presentation does not constitute investment advice. This presentation has been prepared by Vanadium Resources Limited ("the Company" or ASX:VR8) to provide summary information about the Company and its activities as at the date of this presentation (November 2023). Neither this presentation nor the information contained in it constitutes a disclosure document or an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares in any jurisdiction. The presentation does not take into account any person's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. This presentation does not purport to contain all of the information that a prospective investor may require to make an evaluation of the Company or its business activities. Nothing in this document is, or is intended to be, a recommendation to invest in the Company.

The Company confirms that it is not aware of any information or data that materially affects the information included in this presentation, and that all material assumptions and technical parameters underpinning the announcements on which this presentation relies continue to apply. The information contained in this presentation is a professional opinion only and is given in good faith.

Certain information in this presentation has been derived from third parties and though Vanadium Resources has no reason to believe that it is not accurate, reliable or complete, it has not been independently audited or verified by Vanadium Resources.

Any forward-looking statements included in this presentation involve subjective judgement and analysis and are subject to uncertainties, risks and contingencies, many of which are outside the control of, and maybe unknown to, Vanadium Resources. In particular, these statements speak only to the date of this presentation, they assume the success of Vanadium Resources' strategies, and they are subject to significant regulatory, business, competitive and economic uncertainties and risks. Actual future events may vary materially from the forward-looking statements and the assumptions on which these assumptions are based. Recipients of this presentation are cautioned not to place undue reliance on such forward-looking statements.

Vanadium Resources makes no representation or warranty as to the accuracy, reliability or completeness of information in this document and does not take responsibility for updating any information or correcting any errors or omissions which may become apparent after this presentation is released.

To the extent permitted by law, Vanadium Resources and its officers, employees, related bodies corporate and agents disclaim all liability, direct, indirect or consequential (and whether or not arising out of the negligence, default or lack of care of Vanadium Resources and/or any of its agents) for any loss or damage suffered by a recipient or other persons arising out of, or in connection with, any use or reliance on this presentation or information. All amounts in A\$ unless stated otherwise.

All financial outcomes as reported in this announcement are done so on a 100% project basis. VR8 currently holds 73.95% ownership in the Steelpoortdrift project.

Competent Person Statement, Previously Reported Information & Cautionary Statement

The information in the referenced in this presentation that relates to Exploration Results, including the Mineral Resources contained within the Production Target (and forecast financial information derived from the production targets) at the Steelpoortdrift project has previously been released to the ASX. Refer to ASX announcements released on 21 May 2018 titled "Exploration on High Grade Pipes Commences At SPD Vanadium Project", 23 September 2020 titled "Scoping Study Confirms Viability of V2O5 Production", 4 October 2022 titled "DFS Delivers A\$1.9BN NPV Confirming World Class Steelpoortdrift Vanadium Project" and 4 October 2022 titled VR8 updates Mineral Resources and Ore Reserve. The Company confirms that it is not aware of any information or data that materially affects the information included in the market announcement, and that all material assumptions and technical parameters underpinning the announcement continue to apply. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements referred to above.

Mineral Resources

The Company confirms it is not aware of any new information or data that materially affects the information included in the 4 October 2022 (VR8 updated mineral resource and ore reserve for the Steelpoortdrift Vanadium Project) Vanadium Resource estimate and all material assumptions and technical parameters underpinning the estimate continue to apply and have not materially changed when referring to its resource announcement made on 04 October 2022. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Ore Reserves

The Company confirms that it is not aware of any new information or data that materially affects the information included in the Ore Reserves Statement and that all material assumptions and technical parameters underpinning the estimates in the Ore Reserves Statement continue to apply and have not materially changed. The Information that has been presented in this report has been extracted from the announcement dated 4 October 2022 (VR8 updated mineral resource and ore reserve for the Steelpoortdrift Vanadium Project). The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Cautionary Statement LR 5.16.4

There is a low level of geological confidence associated with the inferred mineral resources and there is no certainty that further exploration work will result in the determination of indicated mineral resources or that production target itself will be realised.

Emerging Vanadium Producer

One of the world's largest and highest-grade vanadium deposits

DFS indicates strong financial outcomes with post-tax NPV_{7.5%} of US\$1.2Bn (US\$1.05Bn att. 86.5%)¹, 42% IRR

Ore body easy to mine, low strip ratio & low operating cost

Using conventional / proven concentrate & Salt Roast Leach (SRL) processes to produce an average of 10.7kt to 21.0kt V₂O₅ flake per annum

Mining licence granted

Established major mining & smelting jurisdiction

Located in a major industrial region with established infrastructure – existing operating plants, power and water, proven road & rail options to port

Experienced management team & commenced recruitment process for key technical & commercial roles

¹ ASX Announcement titled "VR8 Increases Project Interest in Steelpoortdrift to 86.49%", 15 November 2023.

Listed as a Critical Mineral in Australia, the US, UK and European Union, Vanadium demand is expected to grow significantly from its energy storage capabilities

Vanadium Redox Flow Batteries (VRFBs)

- VRFBs forecast to represent up to 20% of total battery capacity¹
- Significant advantages available over counterparts, particularly in the storage and grid-relief capacities with further development upside

Easily scalable – additional capacity easy to build in by adding more storage tanks

Sustainable – vanadium can be fully reused or recycled at end of battery lifespan

20+ year lifespan – zero degradation over time with battery life twice that of lithium

Reliable – no performance loss in harsh conditions and 100% depth of discharge available

Safety – non-flammable, non-toxic, water based battery that is safer than alternatives

Efficient – lower emissions and lower associated energy costs than alternative technologies

Dalian Flow Battery Energy Storage Peak-shaving Power Station

A world-leading Vanadium Redox Flow Battery facility was recently switched on in China, with Stage 1 providing a capacity of 100MW / 400MWh. Stage 2 will double this capacity

¹ Eurometaux (2022), Metals for Clean Energy

² SP Angel (2018), Commodity Research Note: Vanadium

Steel & Alloys

- Over 90% of the current demand for vanadium arises from its use to strengthen steel and alloys
- The performance benefit in strengthening steel has seen demand grow and imminent construction regulation changes in China to mandate higher quality Rebar is expected to drive further growth
- Development of strong, lightweight alloys has seen vanadium incorporated to a large range of products including jet engines, 3D printing and tools
 - Boeing's fleet of 787s and A350s include up to 100 tons of light weight vanadium alloys²

Global Demand & Pricing Dynamics

Annual demand for VRFBs is expected to equate to between **50kt and 100kt of V_2O_5** by 2033.

Demand for VRFBs in 2022 was ~9kt of V_2O_5 , largely for new installations in China.

Source: Project Blue 2023

Vanadium demand for steel will grow strongly and **may double by 2050.**²

This will be driven by China and India, and an increased production of micro-alloyed steel.

Source: Vanitec & TTP Squared Inc

V_2O_5 Demand by Sector & Production Capacity

Source: Project Blue 2023

¹ Project Blue 2022 – based on contained vanadium, converted to V_2O_5 based on vanadium content of 56.016% in Vanadium Pentoxide

¹ Project Blue 2022 - based on contained vanadium, converted to V_2O_5 based on vanadium content of 56.016% in Vanadium Pentoxide

² Terry Perles 2022, Vanadium is a key steel additive for sustainable, decarbonised construction: Vanitec (referencing International Energy Agency)

International Cost Curve

Cash cost of US\$3.24/lb V_2O_5 places the Project within the lowest quartile of the international cost curve for vanadium pentoxide

Well placed to remain cashflow positive throughout all price cycles

Low cost and resilient cashflow will assist with securing offtake and debt financing

Location – in the Bushveld Complex

This world-renowned mining location is host to several mining operations, multiple major mining companies are active in the area, and is in close proximity to existing infrastructure.

Other Mines in the Bushveld Complex

Vametco – Vanadium Mine
Mokopane – Vanadium Project

Rhovan – Vanadium Mine
Lion Smelter – Ferrochrome

Twefontein – Ferrochrome Mine

Twickenham – PGE Mine

Modikwa – PGE Mine

Marikana – PGE Mine

Regional Infrastructure in the Bushveld Complex

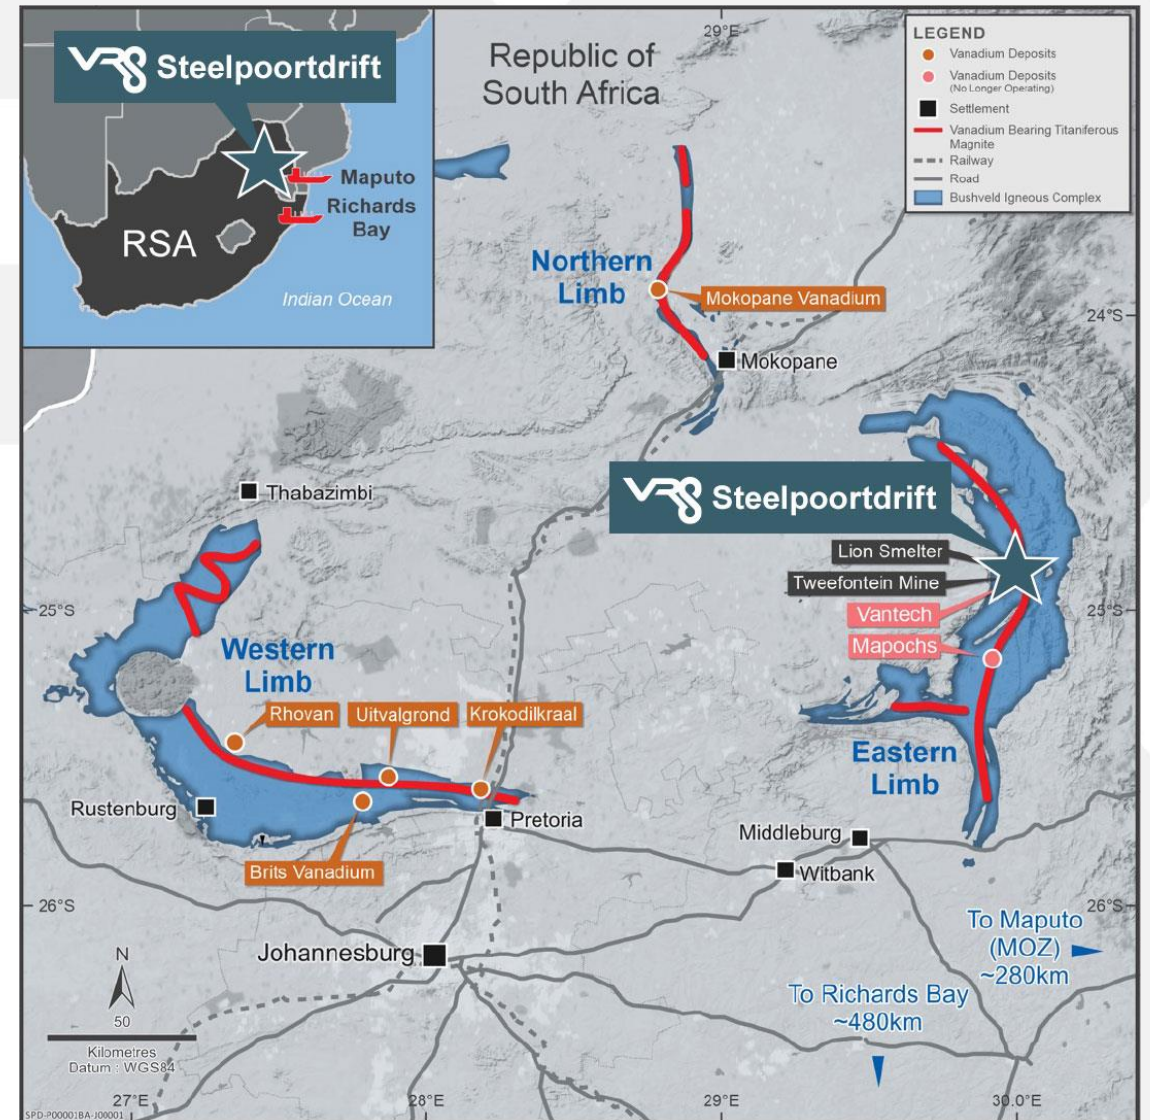

Eskom Substation
12km away

De Hoop Dam
15km away

Rail Siding
30km away

Mine Site - View of the North of Mining Area

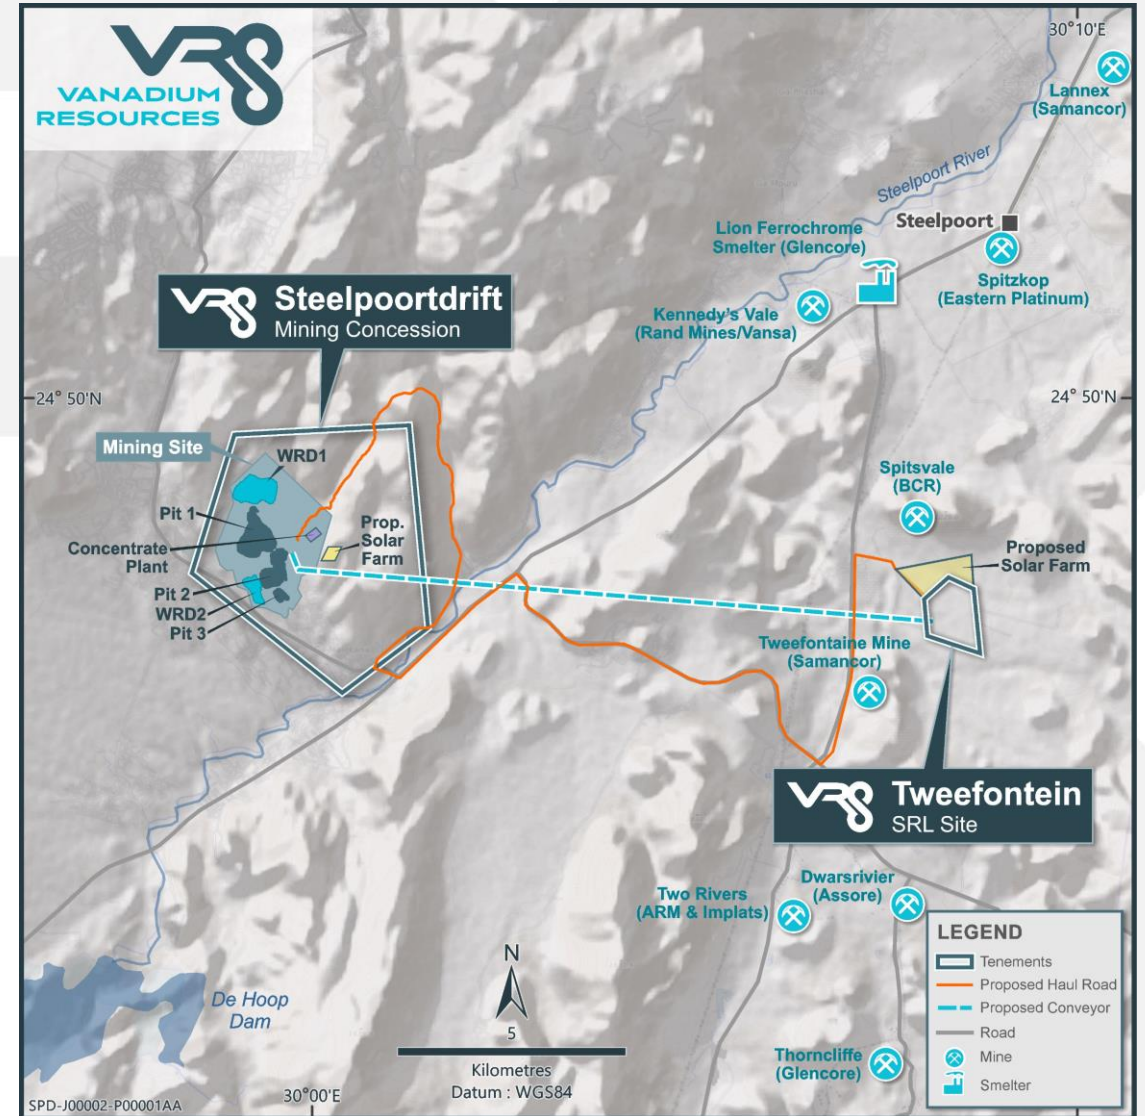

The mine site, concentrator and SRL sites are located within a substantial mining and smelting district, with well established infrastructure (including water, power, sealed roads, rail, etc.)

VR8 Offices and Warehouses in Steelpoort Industrial Park

VR8 administration offices, core shed, main laboratory and SRL site are located within the Steelpoort Industrial Park

Resources & Ore Reserves

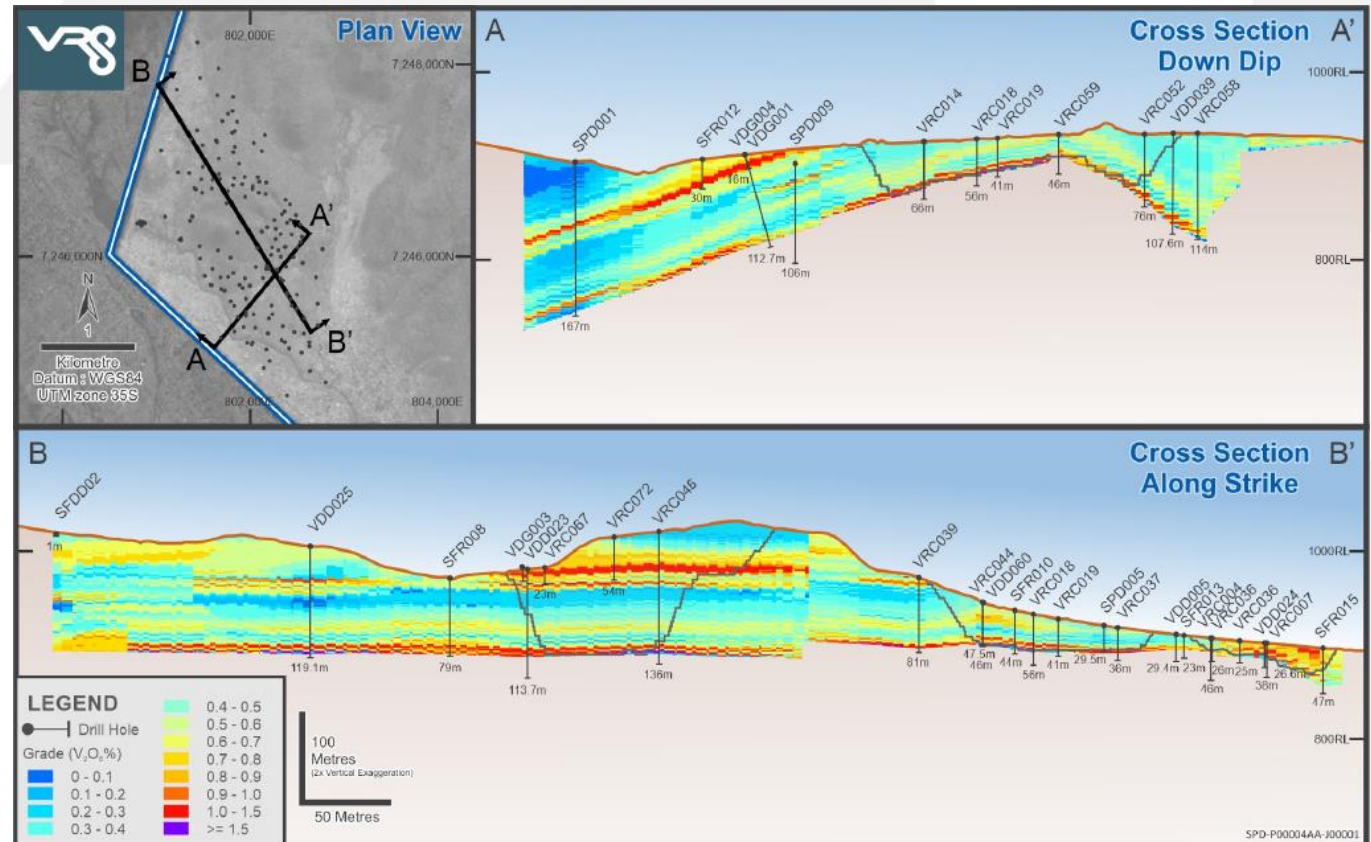

- Global Mineral Resource of 680Mt at 0.70% V₂O₅
- Total Ore Reserve of 77Mt at 0.72% V₂O₅
- Mineralisation outcrops at surface and dips shallowly (~10°) – less waste to mine, low strip ratios (0.88x waste : ore) and cheaper mining cost
- Orebody able to achieve a high-grade concentrate of greater than 2% V₂O₅

Mineral Resource^{1&2}

Mineral Resource Category	Tonnage (Mt)	V ₂ O ₅ (%)	Fe ₂ O (%)	Contained V ₂ O ₅ (Mt)
Measured	145.5	0.72	22.47	1.05
Indicated	327.3	0.70	22.80	2.29
Inferred	207.4	0.68	22.90	1.40
Total / Average	680.1	0.70	22.76	4.74

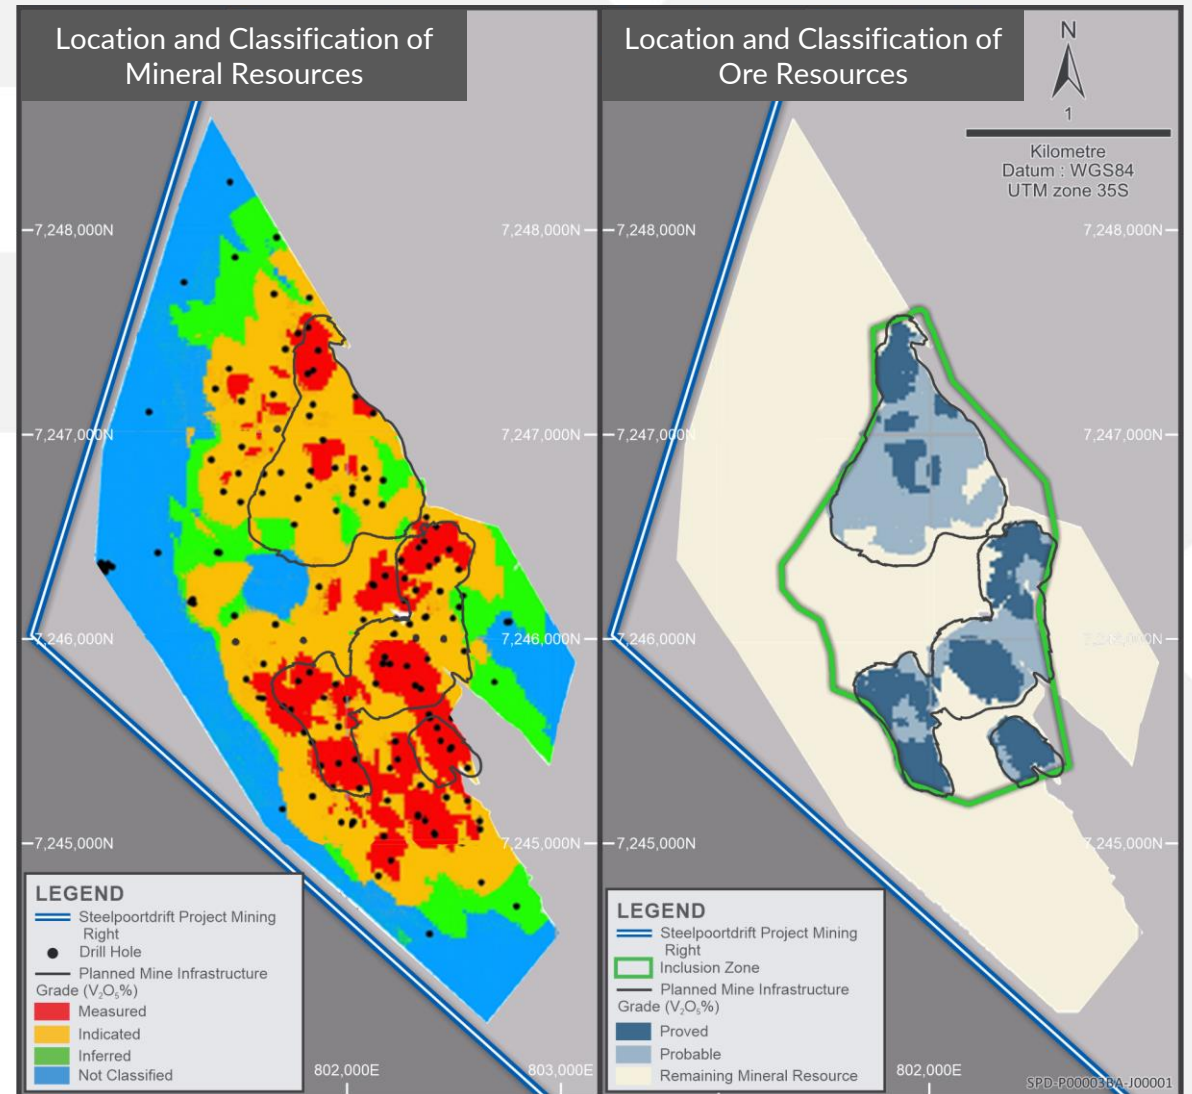

Ore Reserve¹

Ore Reserve Category	Tonnage (Mt)	V ₂ O ₅ (%)	Contained V ₂ O ₅ (Mt)	Tonnage by Category (%)
Proved	30.2	0.70	0.21	39.3%
Probable	46.6	0.72	0.34	60.7%
Total / Average	76.8	0.72	0.55	100.0%

Location of Mineral Resources & Ore Reserves

- The final pit design and Ore Reserves based on LOM of 25 years (designed to match Mining Right term)
- Final pit design was based on Pit 17, which highlights potential for a larger ultimate pit design
- Ore Reserves represent 12% of Mineral Resources and highlight the substantial scale of the project
- Based on a ROM ore production rate of 3.5Mtpa, the project would have a mine of over 180 years
- Potential opportunity to increase Resources and Reserves with infill drilling within “Not Classified” zones

Steelpoortdrift Concentrator Plant

Dewatering

Regrind Magnetic Separation Areas

Dewatering

Concentrator flow sheet based on proven technology

Wet Magnetic Separation

Two-stage Crushing Circuit

Concentrate Product @ 2.08-2.16% V_2O_5

Ball Milling

SRL flow sheet based on proven technology

SRL Plant comprises kiln roasting, desulfurization, ammonium metavanadate (AMV) precipitation, flash drying and V₂O₅ flake production

Concentrate feed rate of 790ktpa with a grade of >2.00% V₂O₅ to produce ~13.2ktpa of vanadium flake of >98% V₂O₅

Evaporation and crystallisation to recover Na₂SO₄ crystals for recirculation to the kiln has also been included

Strong progress toward securing binding offtake, strategic investment and project financing

Offtake Agreements & Strategic Investment

- Secured A\$5.9M strategic equity at 40% premium with Matrix Resources and entered an MOU for 20% offtake and 20% sales agency, 3 May 2023
- Both VR8 and Matrix have reaffirmed their commitment to enter into agency and offtake agreements to achieve the outcomes envisioned in the MOU, with terms that will support project financing
- Strong interest received for the remaining product from North American and European groups. VR8 has entered into negotiations with a view to securing an agency and/or offtake agreement and strategic equity investment
- The rationale for the process is to optimise value to VR8 by securing offtake and strategic investment terms that will support project financing for the Steelpoortdrift and Tweefontein operations

Project Financing

- Several potential funding pathways available to finance the Project having received a number of non-binding indicative term sheets from debt financiers
- The Project has the potential to support ~65% debt gearing of the total funding requirement
- Discussions with potential debt financiers have continued as VR8 aims to obtain credit approved term sheets and ensure that the Project is ready for a due diligence process

Hand specimen of vanadiferous titanomagnetite from the Project¹

¹ Refer ASX Announcement dated 21 May 2018 "Exploration On High Grade Pipes Commences At SPD Vanadium Project"

Key Catalysts to FID

- Secure long-term offtake(s)
- Secure project funding from combination of:
 - i. Debt ~65% PF debt
 - ii. Equity ~35% from offtakers, strategic equity & ECMs

Build Phase 1

- Flake Production of avg 10.7ktpa V_2O_5
- ROM Ore avg. of 1.6Mtpa at 0.83% V_2O_5
- Concentrate avg. of 724ktpa at >2.0% V_2O_5
- Capex US\$211M (pre-production)

Build Phase 2 (4 years after Phase 1)

- Flake Production of avg 21.0ktpa V_2O_5
- ROM Ore avg. of 3.5Mtpa at 0.70% V_2O_5
- Concentrate avg. of 1,247ktpa at >2.0% V_2O_5
- Capex US\$188M

Valuation Upside Options

Optimise Resource & Production

- Ropeway conveyor from Mine to SRL plant
- Delineation drilling and re-optimisation based on unconstrained Mineral Resource
- Increase production rate >3.5Mtpa ROM (given 180yr mine life)

Additional Revenue Streams

- Residual vanadium recovery plant and potential additional products (V_2O_3 , FerroVanadium, TiO_2 , Ilmenite)
- Titanium (TiO_2) in SRL tailings recovery

Explore VRFB Potential

- Investigate larger VRFB size (currently 1MW) to meet 100% of power requirements for site operations
- Vertical integration opportunities including vanadium electrolyte, battery manufacture and energy generation

Investment Highlights

- ✓ Strong financials with attributable NPV of US\$1.05bn, IRR of 42% and payback period of 27 months
- ✓ Competitive capex (US\$211m) and lowest quartile opex (Cash cost US\$3.24/lb)
- ✓ Long life project with excellent production profile – 25 years at an average of 19.4ktpa
- ✓ Established mining jurisdiction with significant infrastructure and expertise nearby
- ✓ Debt advisors appointed, positive engagement and discussions advancing with banks and other financial institutions
- ✓ Securing offtake and strategic equity – secured strategic equity & Offtake MOU from Matrix Resources
- ➔ Building a strong project development and execution team
- ➔ Significant upside potential with a range of opportunities and initiatives identified to increase value
- ➔ Securing debt financing
- ➔ Targeting first concentrate and flake production in H2 CY2026

Shaping a sustainable tomorrow
by unlocking vanadium's potential across energy storage,
infrastructure and beyond

Appendix

November 2023

JURIE WESSELS
Executive Chairman

Jurie Wessels has 26 years' experience in the exploration industry and co-founded a number of exploration and mining companies, including Bauba Resources Ltd (BAU.J), which owns three operating chrome mines, GoldStone Resources Ltd (GRL.L), which company is mining the Homase-Akrokerry Gold Mine in Ghana acquired and developed by GoldStone when Jurie was CEO, Arcadia Minerals Ltd (AM7.ASX), which company owns an advanced Tantalum project, the Bitterwasser Lithium Clay and Brine Projects and tier 1 exploration assets, and Vanadium Resources Ltd. Jurie has significant experience in the sourcing and assessment of exploration and exploitation projects and in the governance, funding and management of resource companies. He explored for various minerals in Africa, South America, the Indian sub-continent and Europe, and explored and developed several mining projects to successful conclusion.

JOHN CIGANEK
Managing Director &
Chief Executive Officer

John Ciganek is a qualified Mining Engineer, holds a Master of Business Administration and has more than 30 years of mining and finance experience. His experience spans working in mining operations, project development, project finance, offtake agreements, M&A and the equity capital markets. Through his career to date, John has been involved with successfully raising debt and equity funding in excess of ~A\$5 Bn for various clients. Mr Ciganek's previous roles are Principal / Director of Euclase Capital, Executive Director of BurnVoor Corporate Finance, General Manger Corporate Development at PMI Gold, Senior Banks Engineer and Risk Executive at Commonwealth Bank, and Senior Mining Engineering positions with Hargraves Resources, Reynolds Yilgarn Gold and Comalco / Rio Tinto (CRA). John is a Non-Executive Director of Calidus Resources Limited (CAI.ASX) and Ookami Limited (OOK.ASX).

MICHAEL DAVY
Non-Executive Director

Michael Davy is an Australian executive and Accountant with over 18 years' experience across a range of industries. Michael previously held a senior management role in Australia for Songa Offshore (listed Norwegian Oil and Gas drilling company), where he assisted with the start-up of the Australian operations and managed the finance team for a two rig operation with multi-hundred million dollar revenues. Prior to that he worked in Australia and London for other large organisations overseeing various finance functions. Michael is currently a director and owner of a number of successful private businesses all under his personal management. During the past five years Michael has held directorships in several ASX listed companies and is currently the Non-Executive Chairman of Raiden Resources Limited (ASX:RDN) and Haranga Resources Ltd (ASX:HAR) and is a non-executive director of Arcadia Minerals Ltd (ASX:AM7).

ALEX OEHMEN
General Manager
Operations

Alex Oehmen has over 40 years' industry experience across the resources, mineral processing and engineering sectors, with a demonstrated track record in the management of vanadium and steel making operations within the Bushveld region of South Africa. Alex holds a Bachelor of Engineering (Metallurgical) and Master of Business Leadership. Most recently, Alex was Operations Manager at Bushveld Minerals Ltd for their Vanchem operations and General Manager Operations at Vanchem Vanadium Products (Pty) Ltd prior to its acquisition by Bushveld, whose operations are within the same geological and mineralogical terrain as the Steelpoortdrift Project. Alex was responsible for operations and production of various vanadium products including vanadium pentoxide flake, ferrovandium and various vanadium chemicals. He also held roles in the marketing of vanadium products to domestic and international markets.

TIM FEATHER
Chief Financial Officer

Tim Feather has over 25 years of experience in corporate finance. Following a law degree at the University of Nottingham, he qualified as a chartered accountant with Deloitte in the UK. In 1995 he moved into corporate finance in the City of London by joining Brown Shipley before leaving to co-found Westhouse Securities, where he was head of corporate finance and specialised in advising and fundraising for mining and oil and gas companies. He joined WH Ireland in 2012 and continued to focus on the resource sector. In 2019, he joined the Sumner Group, a privately held group with interests in mining, healthcare and defence, where he was Business Development Director. He is a non-executive director of Orcadian Energy plc, a North Sea oil development company

Key Project Workstreams

Environmental Authorisation & Water Use Licence Applications

Environmental authorisations and water use licence applications for each site are progressing well with approval expected H1 CY2024

Social And Labour Plan & Community Engagement

Social and Labour Plan amendments submitted to regulators for review after receiving clear community encouragement and support

Front-End Engineering Design Underway

Commenced work on the Front-End Engineering Design (FEED) with a focus on locking down detailed designs, schedule optimisation and development of Project Execution and Operational Readiness plans

Engineering – Tendering & Awarding Contracts

As designs are completed, tenders will be drawn up for each specific piece of plant/equipment and will be issued to pre-identified suppliers, with an aim to award tenders and finalise contracts in early H2 CY2024

Contractor Delivery and Project Management

Project delivery model expected to lean on multiple Engineering, Procurement and Construction (EPC) contracts over core elements of the operation, with oversight by experienced project managers to mitigate interface risks

Expanding Project Management Team

VR8's engineering and support team to be expanded to include a Project Engineer, Project Management and Execution Manager, Contracts Manager, and HR Manager

Power Solutions, Rope Conveyor and Site Access

VR8 continues to progress work with Kadoma to provide solutions for the provision of power to both operations, has initiated studies on a rope conveyor between the operations and is building alternate site access roads

Updated Project Implementation Plan

Updated project implementation plan includes a revised target for FID of H2 CY2024 with first production in H1 CY2026 – management are confident the delay will allow for a more robust and efficient project which maximises the deposit's value
