

ASX Release
23 November 2023

ASX code: PIQ

Proteomics International

LABORATORIES LTD

AGM Chairman's Address and Investor Presentation

Proteomics International Laboratories Ltd (Proteomics International; ASX: PIQ) is pleased to release a copy of the Chairman's Address to be provided by Mr Neville Gardiner and the Investor Presentation to be provided by Dr Richard Lipscombe to shareholders at the Annual General Meeting to be held in Perth commencing at 9:30 am AWST today.

Authorised by Dr Richard Lipscombe (Managing Director) and Mr Neville Gardiner (Non-Executive Chairman) on behalf of the Board of PIQ.

ENDS

About Proteomics International Laboratories (PILL) (www.proteomicsinternational.com)

Proteomics International (Perth, Western Australia) is a wholly owned subsidiary and trading name of PILL (ASX: PIQ), a medical technology company at the forefront of predictive diagnostics and bio-analytical services. The Company specialises in the area of proteomics – the industrial scale study of the structure and function of proteins. Proteomics International's mission is to improve the quality of lives by the creation and application of innovative tools that enable the improved treatment of disease.

Chairman's Address

Good Morning Ladies and Gentlemen

My name is Neville Gardiner, and as Chair of the company it is my pleasure to welcome you to the 9th Annual General Meeting of shareholders of Proteomics International Laboratories.

It is now after 9:30 am, and as we have a quorum of shareholders present, I declare the meeting open.

The notice convening today's meeting was made available to shareholders on the 23rd of October 2023 and lodged with ASX on that date. Consequently, I will take the notice as read.

Firstly, let me introduce the members of your Board:

In the Auditorium today are Dr Richard Lipscombe, Managing Director and Mr Paul House. Dr Robyn Elliott and Mr Roger Moore have joined the meeting online from interstate and overseas.

Also present here today are Ms Karen Logan, Company Secretary and Ms Jessica Rowe, representing BDO, our independent auditor.

I would like to especially welcome and acknowledge the many Proteomics team members that are here with us.

Richard will speak in more detail to the company's achievements in his presentation later this morning however I would like to take the opportunity to note that FY23 was a pivotal year for the company with the signing of full form documentation with Sonic Healthcare USA to bring our PromarkerD test to the United States. This was followed in more recent weeks with the announcement by the US Centers for Medicare & Medicaid Services of the proposed reimbursement price for PromarkerD in the United States.

While we were disappointed that the Australian Therapeutic Goods Administration decided not to include PromarkerD in the Australian Register of Therapeutic Goods we remain committed to delivering value for all our stakeholders by focussing our efforts on commercialising PromarkerD in the most relevant markets and advancing the very exciting pipeline of other Promarker tests.

We expect 2024 will be a year of continuing transformation of our company as the commercialisation of PromarkerD gains further momentum. With this in mind your Board and Management are constantly evaluating the skills and experience we need in the company to deliver on the foundations now laid for future success.

On behalf of the Board, I would like to thank Richard and the entire Proteomics team for their continuing professionalism and dedication. Their hard work has the potential to fundamentally improve millions of lives. I would also like to thank all our shareholders for their continuing support.

I will now turn to the formalities of the meeting.

Proteomics International

LABORATORIES LTD

AGM Presentation

2023 – a pivotal year

23 November 2023

Dr. Richard Lipscombe

Managing Director

This Presentation is provided by Proteomics International Laboratories Ltd (Proteomics International, Proteomics, the Company, ASX: PIQ).

You should not rely upon anything in this presentation and/or any information obtained from the Company, its Directors or their associates in deciding whether or not to seek to purchase the shares of the Company. This is not an offer to subscribe for securities in the Company.

The Presentation may contain quantitative statements of anticipated future performance such as projections, forecasts, calculations, forward-looking statements or estimates all of which are based on certain assumptions (Forward Looking Statements). The Forward Looking Statements may involve subjective judgements and are based on a large number of assumptions and are subject to significant uncertainties and contingencies, many of which are outside the control of the Company and may not prove to be correct.

No representation or warranty is made that any Forward Looking Statements will be achieved, or occur, or that the assumptions upon which they are based are reasonable or the calculations from which they have been derived are correct. Actual future events may vary significantly from the Forward Looking Statements. Each Recipient should undertake their own independent review of the Forward Looking Statements, including the assumptions on which they are based and the financial calculations from which they are derived.

A medical technology company at the forefront of precision medicine and predictive diagnostics

Three key focus tests driven by a proprietary platform technology:

PromarkerD

Diabetic Kidney Disease

COMMERCIALISATION

- Proven predictive test for early detection of diabetic kidney disease (DKD)
- Being commercialised & launched in the US by Sonic Healthcare USA
- US\$390 indicative test price & PIQ receives royalty for each test sold

PromarkerEndo

Endometriosis

DEVELOPMENT

- Test in development to diagnose Endometriosis
- Affects 1 in 9 women and costs Australia alone over AU\$10Bn a year
- Prototype test identified up to 90% of patients with the disease

PromarkerEso

Esophageal Cancer

DEVELOPMENT

- Test in development to diagnose Esophageal Cancer
- 1 in 20 cancer deaths worldwide due to oesophageal cancer
- Prototype test identified up to 90% of patients with the disease

Corporate Snapshot (22/11/23)

ASX code	PIQ
Market Capitalisation	A\$116m
Cash (30 Sept 23 + \$1.85m R&D tax incentive received Q4 CY23)	\$4.9m

Share Price	A\$0.95
Shares on issue (+1.4m options)	122m

Revenue & other income – FY23	A\$3.3m
Average Quarterly cash burn – FY23	A\$1.55m

Financial and Corporate

- Top 40 Shareholders hold 49%
- Directors are highly aligned with shareholders holding 18%
- Multiple institutional & family office shareholders on the register
- State-of-the-art laboratories
 - Accredited (ISO 17025 and ISO 13485) cutting-edge facility
 - Specialist proteomics technology platform
 - Analytical services – pharmacokinetic (PK) testing & biosimilars
 - Headquartered on QEII Medical Campus, Perth, WA
- Revenue generating
 - Bioanalytical service business helps offset cash burn
 - Current revenue does not include any major sales of PromarkerD

Board of Directors

Neville Gardiner BBus (Accounting and Business Law) (Curtin), Non-Executive Chair

Seasoned finance professional with over 30 years' experience providing corporate advice to Boards of public and private companies. He was Co-Founder and MD of Torridon Partners, an independent corporate advisory firm, which was acquired by Deloitte in 2016, where he became Partner in their M&A Advisory team.

Dr Richard Lipscombe PhD (London), MA (Oxon), Co-Founder & Managing Director

Led the Company from foundation through listing in 2015 to today. 30 years biotechnology experience in R&D and product commercialisation in academic and commercial entities. Technical expertise in chemistry, immunology, biomarker discovery & clinical proteomics.

Roger Moore R (Denmark), BPharm (U.Syd), Non-Executive Director

International pharmaceutical industry experience spanning 40 years, including almost 30 years as President of Novo Nordisk Japan. From 2000, he was appointed Novo Nordisk's Senior Vice President, Japan & Oceania Region. He has also served as a member of the Senior Management Board, Novo Nordisk A/S.

Paul House GAICD, BCommerce (UWA), Non-Executive Director

Over 25 years with multi-national corporations, CEO of Imdex (ASX:IMD), prior role as MD of SGS India for 8 years. Previously held CFO and COO roles, and was Senior Manager at a leading global management consultancy firm.

Dr Robyn Elliott PhD Inorganic Chemistry (Monash), BSc(Hons) Chemistry (Monash), Non-Executive Director

Proven track record in product development, clinical trials, regulatory affairs, audits, quality management, project management and operational strategy. Dr Elliott is Executive Director, Strategic Fractionation Program Delivery at CSL Behring, a subsidiary of CSL Limited. She is also a non-executive director of PolyNovo Limited (ASX:PNV).

Promarker™ is a platform technology that can identify unique protein biomarkers ‘fingerprints’

The platform identifies and links the unique protein biomarkers to specific diseases, enabling Proteomics International to create novel diagnostic tests

Promarker **D**

PROACTIVELY CHANGING RENAL HEALTHCARE

A simple blood test for predicting diabetic kidney disease

Problem and Solution – Diabetic Kidney Disease

The Problem

- **537 million adults** with diabetes globally
- **1-in-3** with diabetes have chronic kidney disease
- **Kidney disease is a silent killer** - kidney function can **fall below 15-20% with no symptoms**
- Damage to kidneys is **irreversible**, therefore **early detection** is paramount
- Diabetic kidney disease leads to renal failure which requires **dialysis (US\$72,000 p.a.) or kidney transplant**
- Total cost of diabetic kidney disease = **US\$130 Bn** per year in USA alone

Roadblock

Current standard-of-care diagnostics

- Existing tests (known as eGFR and ACR) can only detect chronic kidney disease once it is already present
- Current standard-of-care tests cannot **predict** the onset of diabetic kidney disease
- **If unchecked, patients ultimately require dialysis and/or a kidney transplant**

Diseased Kidney

Solution

Promarker **D**

- PromarkerD can **predict** the onset of disease **before** clinical symptoms appear (up to four years prior)
- **Doctors can then prescribe an early therapeutic treatment to slow or stop the onset of disease**
- Kidneys remain healthier for longer, **saving healthcare systems billions of dollars and improving quality of life** for patients

Healthy Kidney

PromarkerD: World Class Advisory Board

Proteomics International is supported by an international, highly acclaimed advisory board

Professor Tim Davis MedSc, MB, W.Aust., DPhil Oxf., FRACP, MRCP (UK) – *Australia*

Consultant physician and endocrinologist, Fremantle Hospital, Professor of Medicine, University of Western Australia; WA Health Department's Diabetes & Endocrinology Clinical Network Co-lead

Dr Ele Ferrannini MD – *Italy*

Professor of medicine, The University of Pisa
Adjunct Clinical Professor of Medicine, University of Texas Health Science Center: Senior research associate, National Research Council's Institute of Clinical Physiology

Ms Davida F. Kruger MSN, APN-BC, BC-ADM
– *United States*

Certified Nurse Practitioner, Henry Ford Health
Past Chair of the American Diabetes Association's (ADA) Research Foundation; ADA Educator of the Year (2017)

Dr Joshua Neumiller PharmD, CDCES, FASCP, FADCES
– *United States*

Professor of Pharmacotherapy, Washington State University
Recipient of Albert B. Prescott Pharmacy Leadership Award (2016)
ADCES Diabetes Care & Education Specialist of the Year (2021)

Associate Professor Michael Shanik MD, FACP, FACE
– *United States*

Managing partner at Endocrine Associates of Long Island, PC
Clinical Associate Professor, Stony Brook University Hospital, New York

Dr Neil Skolnik MD – *United States*

Professor of Family and Community Medicine, Sidney Kimmel Medical College, Thomas Jefferson University
Associate Director, Family Medicine Residency Program
Jefferson Health

Professor Merlin Thomas MBChB, PhD, FRACP, FAAHMS – *Australia*

Nephrologist, scientist and program leader, the Department of Diabetes, Monash University
Founder and Chief Scientific Officer, RAGE Biotech Ltd

Dr Alexander Turchin MD, MS – *United States*

Director of quality for the division of endocrinology, Brigham and Women's Hospital, Boston
Associate Professor of Medicine, Harvard Medical School
Fellow of the American College of Medical Informatics

Ms Hope Warshaw MMSc, RD, CDCES, BC-ADM, FADCES – *United States*

Registered Dietician, Certified Diabetes Care and Education Specialist
President of the ADCES 2016 & Chair of the Academy's Foundation 2022-2023

PromarkerD – Simple Integration & Use

Sample is drawn at clinic or pathology laboratory

Laboratory uses a standard technology platform
Advanced rapid immunoassay measures three plasma proteins -

combined with three simple clinical factors (age, cholesterol, eGFR)

CE Mark registered

Manufactured to ISO 13485 standard in Europe

Cloud based algorithm, the “PromarkerD Hub” calculates the patient’s kidney disease risk score

Employs a traffic light system for optimal performance, classifies patients as:

- low risk
- moderate risk
- high risk

Clinician delivers results to patient

Depending on results, intervention may include:

- change of lifestyle; and/or
- therapeutic drugs
 - SGLT2-inhibitor
 - GLP-1 agonist

PromarkerD – Results & Intervention

How PromarkerD results are delivered

Prognostic **16%** indicates a **moderate** risk of decline in kidney function*

Risk Score	Intervention	Testing Regimen
Low Risk	<ul style="list-style-type: none"> Standard diabetes management 	Test Annually
Moderate Risk	<ul style="list-style-type: none"> More frequent monitoring Optimisation of lifestyle Review of glycemic targets and management Review non-glycemic risk factors Avoidance of potentially nephrotoxic drugs 	Test every 6 months
High Risk	<ul style="list-style-type: none"> Very close monitoring Intensive management strategies based on those for 'Moderate risk' above Utilisation of therapeutic drugs 	Test every 3 months

*as defined by incident diabetic kidney disease (eGFR <60ml/min/1.73m²) in the next four years. Note: if eGFR level at the time of the test is already <60ml/min/1.73m², then the risk of a further decline in kidney function is defined as an eGFR decline >30% in the next four years

PromarkerD in the Clinic

ASX: PIQ

Peer Reviewed

PromarkerD tested on **over 5,000 patients** in 4-year clinical studies

10+ Peer Reviewed Publications

World leading results: 

- Global clinical study 3,568 participants from completed CANVAS clinical trial
- PromarkerD predicted 'incident DKD' high-risk patients **13.5 times more likely** than low-risk to develop DKD ($P = 1.3 \times 10^{-104}$)

[J. Clin. Med. (2020)]

- PromarkerD **high-risk patients show greatest benefit** from early use of SGLT2-inhibitor

[J. Clin. Med. (2023)]

Physician Support

Survey of 400 Endocrinologists & Primary Care Physicians (US based)

- **96% of physicians** were likely to use PromarkerD test scores for clinical decision making
- PromarkerD consistently ranked as **one of the top 2 factors** driving physician decision-making:
 - monitoring frequency
 - use of anti-inflammatories
 - prescribing SGLT2s
 - ACE inhibitor dosing

[PLOS One (2022)]

Outperforms Standard of Care

- 857 community based patients tested for existing DKD at baseline: 497 had normal kidney function
- 9% of patients developed DKD within 4 years:
 - PromarkerD accurately predicted 84% (N=38)
 - All were missed by Standard of care tests [ASN (2021)]

PromarkerD compared to standard of care tests (eGFR and ACR) for predicting DKD

PromarkerD

The Need

There is a significant and growing need for intervention for diabetic kidney disease (DKD) across the globe

Economic Cost

- Kidney Research UK have declared a public health emergency - by 2033 kidney disease risks costing the UK Economy £13.9 billion annually
- Kidney Health Australia found the annual cost of Chronic Kidney Disease in Australia was A\$9.9 billion in 2021 – investment in early detection could yield a net benefit of \$10.2 billion over 20 years

The Treatments

Patients identified as high-risk of DKD by PromarkerD now have multiple preventative treatment options:

Better management of diabetes

- Adherence to medications
- Focus on diet & exercise

New renal protective therapies

- Three **SLGT2-inhibitors** (empagliflozin, canagliflozin, dapagliflozin) have now been approved for treatment of DKD
- **GLP-1 agonist semaglutide (Ozempic)** trial for DKD shows treatment is renal protective

The Utility

Complementary diagnostic

Early diagnosis of DKD using PromarkerD can help inform doctors' treatment decisions to improve clinical outcomes for patients:

- High-risk patients for kidney decline can be prescribed renal-protective medications such as SLGT2i or GLP-1ag
- Low-risk patients can avoid aggressive treatment options
- Monitor response and change dosage or drug type if required

Actions taken **BEFORE** the onset of DKD

PromarkerD - Patented in all Major Markets

Diabetic Kidney Disease is becoming one of the largest burdens on healthcare systems globally

Patent family & Trademark covers 72% of world's diabetics¹

Country	Patent/Application No	Patent Status	No. Diabetics ¹
Australia	2011305050	Granted	1,491,800
Brazil	BR112013006740	Granted	15,733,600
Canada	2811654	Granted	2,974,000
China	ZL201180053583.9	Granted	140,869,600
Europe ^{2,3}	3151012	Granted	61,425,100
Hong Kong	18115912.3	Granted	686,000
India	3012/DELNP/2013	Granted	74,194,700
Indonesia	W00 2013 01585	Granted	19,465,100
Japan	2013-528474	Granted	11,005,000
Russia	2596486	Granted	7,392,100
Singapore	188527	Granted	711,800
USA^{2,4}	US 9,146,243	Granted	32,215,300
			~368 million Total

Market assumptions

- Test is performed **once per year per patient** on average
- Standard industry **royalty rates range from 5-15%**

1. International Diabetes Federation (IDF) Atlas 10th Edition 2021 [Age group 20-79 years]
 2. Australia, Europe, HK, USA patent family also covers testing for any form of kidney disease (Extra efficacy studies required)
 3. Covers France, Germany, Italy, Spain, Turkey and the United Kingdom
 4. USA patent further extended to cover method for identifying drugs for abnormal kidney function using one of the PromarkerD biomarkers (CD5L)

United States: Commercialisation in Progress

Sonic Healthcare USA has the exclusive licence to commercialise PromarkerD in the world's largest healthcare market

Over 7,000 Employees
Over 300 Sales reps
Over 400 pathologists
Services over 20 million patients

Marketing, Sample collection, Reporting

**PromarkerD Diabetic
Kidney Disease Risk
Assessment**

Early detection can significantly help prevent serious kidney damage.

CLIA Certified Laboratories

Sonic is the third Largest laboratory medicine company in the US

Test listed on Sonic website & commercial launch expected in Q1 CY24

Sonic has labs spanning from Hawaii to Boston

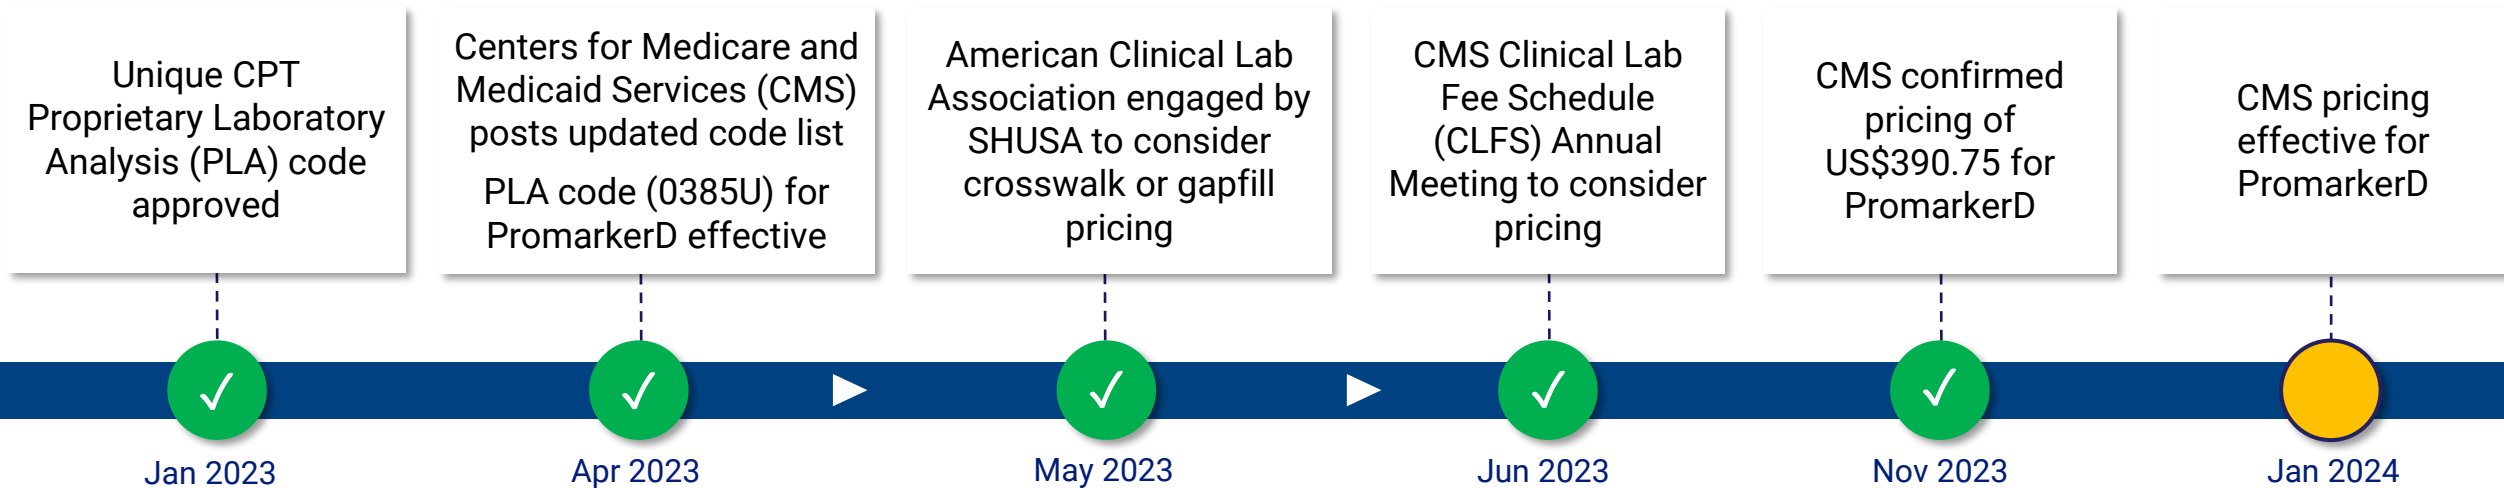

Reimbursement in the US

Proteomics International has been working with its partner Sonic Healthcare USA to achieve reimbursement in the US

US Reimbursement Timeline

Target Markets: PromarkerD

Proteomics International is showcasing PromarkerD with KoL's at major conferences globally

United Kingdom
4.8m T2 diabetics

- **Distribution Licence with Apacor Ltd** for PromarkerD
- Test registered with Medicines & Healthcare products Regulatory Agency
- *National Institute for Health & Care Excellence (NICE) Medtech Innovation Briefing "NICE Advice" published*

Next Steps

- Engagement with the NHS Supply Chain Tender
- PromarkerD inclusion in the NICE guidelines
- MIB guide healthcare industry, enabling positive engagement with private healthcare providers

Puerto Rico & Dom Republic
1.3m T2 diabetics

- **Licence with Omics Global Solutions** for immunoassay (Innovatio ND2) in Puerto Rico & Dominican Republic
- Test registered with Ministry of Health
- *First sales commenced*

Next Steps

- Securing public reimbursement (Puerto Rico linked to CMS pricing)
- Expanding uptake of the test through engagement with primary care physicians
- *Exploring additional sales to neighbouring territories*

Germany, France, Spain
15.1m T2 diabetics

- PromarkerD is CE Mark registered in Europe
- Germany, France and Spain are initial target markets
- Options to commercialise PromarkerD via:
 - Distributor Model; and/or
 - Licensing Model

Next Steps

- Actively targeting potential partners in key jurisdictions

Rest of World
316m+ T2 diabetics

- Detailed market assessments completed; discussions ongoing

Next Steps

- Actively targeting potential partners in key jurisdictions

Pipeline of Precision Diagnostics

Platform technology drives deep pipeline of novel diagnostic tests

Further global potential in new markets

- Promarker™ platform develops novel intellectual property
- Targeting new diagnostic tests in areas of significant unmet need
- Enormous markets and revenue potential

DIAGNOSTICS RESEARCH AND DEVELOPMENT – THE PROMARKER™ PIPELINE

Dx Pipeline: Endometriosis

Potential world-first blood test in late-stage development

Impact of Endometriosis

- Endometriosis is a common and painful disease where uterus tissue grows into other organs
- Currently **diagnosis takes an average of 7.5 years** and requires invasive surgery (laparoscopy)
- **Affects 1 in 9 women** and **costs Australia over AU\$10 billion a year** – global opportunity significantly higher

Promarker™ for Endometriosis

- Prototype test identified up to **90%** of patients with the disease (World Endometriosis Conference, May '23)
- Collaboration with Royal Women's Hospital & University of Melbourne analysed 901 patients
- Biomarkers identified via the Promarker™ platform offer a **potential world-first blood test for endometriosis**
- **Next steps:** Accessing additional samples to confirm clinical performance – Pivotal results anticipated mid CY24

Dx Pipeline: Oesophageal Cancer

Potential world-first blood test in late-stage development

Impact of Oesophageal Cancer

- **1 in 20 cancer deaths worldwide** due to oesophageal cancer
- **5 year survival rate < 20%**
- Currently diagnosis requires a specialist endoscopy procedure; **treating the disease cost \$2.9bn in USA in 2018**
- Test targets oesophageal adenocarcinoma and Barrett's oesophagus (pre-malignant) which affects 1-2% of adults and can **arise from chronic acid reflux**

Promarker™ for Oesophageal Cancer and Barrett's esophagus

- **Prototype test identified 90%** of people with & without the disease
(World Congress Esophageal Diseases, Sept '23)
- Collaboration with QIMR Berghofer Medical Research Institute **analysed 302 samples**
- Results indicate a **potential world-first blood test to screen for oesophageal cancer**
- **Next steps:** PIQ has accessed samples from Victoria Biobank to confirm clinical performance – Pivotal results anticipated mid CY24

Dx Pipeline: Oxidative Stress

Potential world-first blood test in late-stage development

What is Oxidative Stress?

- Oxidative stress occurs when the body's antioxidant defences are overwhelmed by an excess of toxic oxidants
- Oxidative stress is implicated in over 70 health conditions with **levels often reflective of a person's health condition**

OxiDx – blood test to monitor oxidative stress

- OxiDx P/L was spun out of PIQ and the University of Western Australia in Aug 2022

World first test:

- **Accurate** - highly sensitive
- **Simple to use** – finger prick sample
- **Cost effective** – for mass market use
- **Peer reviewed** – multiple journal publications
- **Patented** – USA, Australia and Japan granted, others pending

OxiDx

Broad applications of OxiDx technology:

- **Athletic monitoring tool for competition preparedness:**
 - **Professional Sports** – performance, recovery and injury risk management – *55% of sports injuries are muscle related*
 - **Thoroughbred Racing Industry** – injury risk management and race-preparedness - *85% of Thoroughbreds suffer injury in their first 2-3 yrs*
- **Monitoring tool for health and wellbeing:**
 - **Precision Medicine** – tool for self-assessment
 - **Primary Industries** – monitor health in live export & stock production
- **Complementary diagnostic (CDx)**
 - **Clinical Trials** – Utilised to track treatment efficacy and personalised dosing in a range of indications

Timeline & Milestones

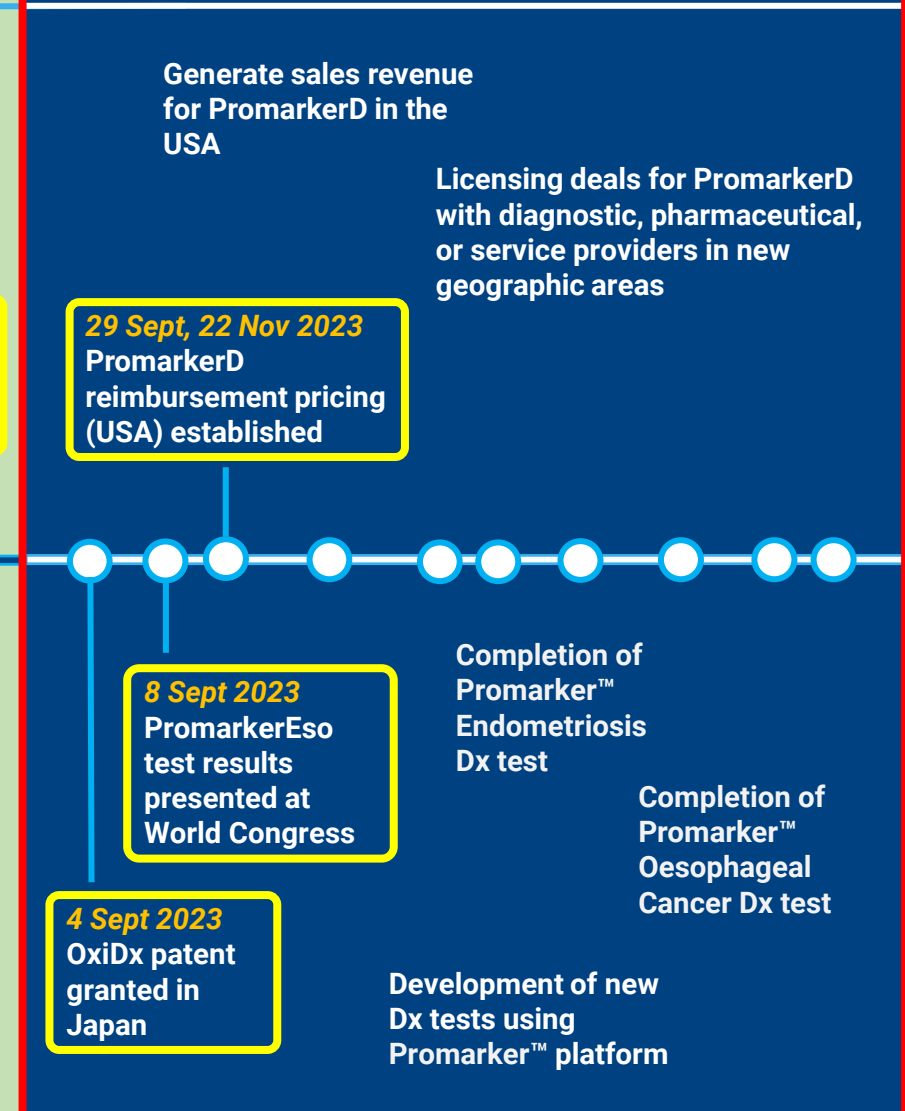

ASX: PIQ

FY23 Announcements & Achievements

FY24 Targets & Milestones

Value Inflection Points

Exceptional Global Opportunity

- Disruptive, cutting-edge technology & proven in-house diagnostics platform
- PromarkerD test de-risked, patented, revenue ready
- Test rolling-out in easy-to-use, scalable, low cost format with high margins
- Whole of market appeal: pharma, clinical pathology labs, diagnostic platform developers, diabetes service providers, physicians and patients
- Deep pipeline of potential globally significant tests in development
- Vibrant corporate activity in the precision medicine, diagnostics and CRO (clinical trials) sectors

Share Price Catalysts throughout FY24

Milestone	Qtr	Dec	Mar	Jun	Impact
PromarkerD					
First Sales in USA					Initiate pathway to significant revenues
CMS Reimbursement Pricing Set					Supports broad adoption of test
Regulatory Submissions, Approvals & Reimbursement RoW					Build user confidence in product & assist in global roll-out
Licensing Deals in RoW					Drive global uptake and future revenue
Promarker™					
Endometriosis Dx – updates					New first-in-class diagnostic test
Oesophageal Cancer Dx - updates					New first-in-class diagnostic test
Diagnostics Pipeline - updates					New IP (validation & proof of concept results)
Analytical Services					
New Contracts					Engages potential future partners & enhances revenue profile
