About Finder Energy: Finder is an oil and gas exploration company based in Perth, Western Australia with an extensive, high quality portfolio of oil and gas assets in the UK North Sea and North West Shelf.

Finder is currently focussed on executing value-accretive farmout deals on its entire portfolio, including 4 permits in the prolific UK North Sea, the drill-ready Gem prospect in the Vulcan Sub-basin and the WA-547-P permit which is on trend with the Dorado oil field.

Important Notice and Disclaimer

This presentation has been prepared by Finder Energy Holdings Limited (ACN 656 811 719) (Finder or Company) to provide summary information about Finder and its associated entities and their activities current as at the date of this presentation. The information contained in this presentation, whether communicated in writing or orally, is for information purposes only. It is intended only for those persons to whom it is delivered personally by or on behalf of Finder. The information contained in this presentation is of general background and does not purport to be complete. The information contained in this presentation does not constitute investment or financial product advice (nor taxation or legal advice) and is not intended to be used as the basis for making an investment decision. In providing this presentation, Finder has not considered the objectives, financial position or needs of any particular recipients. This presentation should be read solely in conjunction with the oral briefing provided by Finder and all other documents provided by Finder.

The information in this presentation is strictly confidential and is intended for the exclusive benefit of the institution to which it is presented. It may not be reproduced, disseminated, quoted or referred to, in whole or in part, without the express consent of Finder. You agree to keep this information confidential, not to disclose any of the information contained in this presentation to any other person and not to copy, use, publish, record or reproduce the information in this presentation without the prior written consent of Finder, which may be withheld in its absolute discretion.

This presentation is being provided to you on the basis that you are, and by using this document you represent and warrant that:

- if you are in Australia, you are a person to whom an offer of securities may be made without a disclosure document (as defined in the *Corporations Act 2001* (Cth) (Corporations Act)) on the basis that you are exempt from the disclosure requirements of Part 6D.2 in accordance with Section 708(8) or 708(11) of the Corporations Act;
- if you are outside Australia, you are a person to whom an offer and issue of securities can be made outside Australia without registration, lodgement or approval of a formal disclosure document or other filing in accordance with the laws of that foreign jurisdiction and, in either case; and
- you are not in the United States and you are not a U.S. Person (as defined in Regulation S under the Securities Act of 1933, as amended) (US Person) and you are not acting for the account or benefit of any US Person.

If you are not such a person, you are not entitled to attend this presentation, and must promptly return all materials received from Finder (including this presentation) without retaining any copies.

No representation or warranty, express or implied, is made as to the accuracy, reliability, completeness or fairness of the information, opinions and conclusions contained in this presentation. Neither Finder, its related bodies corporate, shareholders or affiliates, nor any of their respective officers, directors, employees, affiliates, agents or advisers (each a **Limited Party**) guarantees or makes any representations or warranties, express or implied, as to or takes responsibility for, the accuracy, reliability, completeness or fairness of the information, opinions and conclusions contained in this presentation. Finder does not represent or warrant that this presentation is complete or that it contains all material information about Finder or which a prospective investor or purchaser may require in evaluating a possible investment in Finder or acquisition of shares. To the maximum extent permitted by law, each Limited Party expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of information contained in this presentation including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions or matters, express or implied, contained in, arising out of or derived from, or for omissions from, this presentation including, without limitation, any financial information, any estimates or projections and any other financial information derived there from.

This presentation contains certain forward looking statements and comments about future events, including Finder' expectations about the performance of its businesses and certain strategic transactions. Forward looking statements can generally be identified by the use of forward looking words such as, "expect", "anticipate", "likely", "intend", "should", "could", "may", "predict", "plan", "propose", "will", "believe", "forecast", "estimate", "target" and other similar expressions within the meaning of securities laws of applicable jurisdictions. Indications of, and guidance or outlook on, future earnings or financial position or performance are also forward looking statements. Forward looking statements involve inherent risks and uncertainties, both general and specific, and there is a risk that such predictions, forecasts, projections and other forward looking statements will not be achieved. A number of important factors could cause Finder' actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward looking statements, and many of these factors are beyond Finder' control. Forward looking statements are provided as a general guide only, and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainty and other factors, many of which are outside the control of Finder. As such, undue reliance should not be placed on any forward looking statement. Past performance is not necessarily a guide to future performance and no representation or warranty is made by any person as to the likelihood of achievement or reasonableness of any forward looking statements, forecast financial information or other forecast. Nothing contained in this presentation not any information made available to you is, or shall be relied upon as, a promise, representation, warranty or guarantee as to the past, present or the future performance of Finder.

No responsibility or liability is assumed by Finder for updating any information in this presentation or to inform any recipient of any new or more accurate information or any errors of which Finder or its advisers may become aware.

Review and outlook

- **Deals**
 - 3 early stage farmouts with Dana Petroleum
 - AC/P 61 increase to 100% ownership
 - Active high impact well farmouts ongoing
- P2530 prospectivity announced
 - Wagtail discovery 2C resources
 - String of Fulmar ILX prospects, including low-risk Marsh and Bancroft prospects
- **Cash and capital management**
 - \$1.3m net spend FY23
 - \$9.4m closing cash FY23
- **Portfolio management**
 - AC/P 61 extension
 - UK 33rd round applications

FY 2023 FY 2024

- P2610 Boaz material gas/condensate prospect
 - UK 33rd round priority 1st tranche award
 - Strategic partnership with Equinor
- **Prospectivity generation**
 - P2528 Whitsun (Buzzard analogue) resource announcement
 - P2610 Boaz resource announcement
- Farmouts & new ventures
 - UK 33rd round 2nd tranche awards
 - Strategic low cost/high impact opportunities
 - Farmout processes for high impact wells across portfolio
- **Portfolio management**
 - WA-547-P extension
 - P2530 two-year extension
 - P2502 and P2524 expiry

Highlights

- High quality exploration portfolio in two of the world's recognized oil and gas 'super basins'
- Proven track record achieving high value farmouts and finding oil and gas
- Disciplined cash and capital management to maximise shareholder leverage in success
- Actively pursuing multiple farmouts to fund wells and new opportunities to grow the business
- Strong cash position/low EV provides material leverage to success

Finder Energy Board and Management

Bronwyn Barnes

Independent Chairman

Extensive career in the resources sector, worked with companies including Western Mining Corporation and BHP to emerging juniors in directorship, executive leadership, and operational roles in Australia and internationally.

Currently holds Chair and Director positions with various ASX and public companies

Aaron Bond

Exploration Manager

Petroleum Geoscientist with over 19 years' experience, including Majors. A proven explorer instrumental in the discovery of Phoenix South, Roc, Kitan and offshore Angola oil fields. Involved in significant value-accretive farmouts to majors and independents

Damon Neaves

CEO/MD

20 years in leadership roles as an oil and gas executive. Extensive commercial and transactional experience and brings an active and innovative approach to business development

Nick Terrell

UK Country Manager

Petroleum Geoscientist with 17 years' experience and a proven oil explorer in the North Sea. Commercial and technical leadership competence across all E&P activities

Shane Westlake

Technical Director

Geophysicist with over 20 years' experience in the energy sector, including 15 years with Finder. Industry-leading capabilities in seismic interpretation, prospect generation and farming out opportunities

Henry Morris

Technical Manager

Petroleum Geoscientist and successful explorer in the North Sea with over 17 years' experience. Expert in quantitative seismic interpretation and play evaluation

Fred Wehr (PhD, GAICD)

Independent Non-Exec Director

Fred has had a 38-year, worldwide career in the upstream oil and gas sector, including roles with Exxon, Apache and Quadrant Energy. He led the team that made the Dorado discovery in 2018, one of the largest oil discoveries on the Australian NWS

Anthony Benino

CFO/Company Secretary

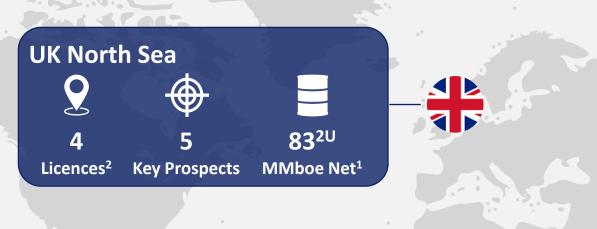

A Chartered Accountant with over 31 years' experience as an accounting, finance and risk management professional

High quality portfolio spanning two 'super basins'

- Deep portfolio of high impact drilling candidates being actively marketed to farmin partners
- FDR operates all licences with proven ability to attract quality partners

UK Infrastructure-Led Exploration (ILX) strategy

P2610

Round 33 priority block award

Boaz material gas/condensate prospect

P2530

New 3D unlocks Upper Jurassic Prospectivity

6 key prospects in a proven petroleum system

P2527/28

On trend with Giant Buzzard Field

3D Repro highlights new Jurassic prospectivity

AC/P 61

Drill Ready Gem Prospect

Large Gem oil prospect surrounded by discoveries

WA-547-P

Dorado oil play extension

Multiple large prospects in exciting Dorado trend

^{1.} Refer resources table in Appendix for further details. Resource estimates do not include resources for Whitsun prospect (P2528) and Boaz prospect (P2610) which are yet to be announced.

^{2.} P2502 and P2524 not included as these licences are due to expire at the end of November 2023.

Track Record

Track record spanning 20 years of finding oil & gas and value accretive transactions **Looking forward...**

- Today our portfolio is stronger than it has ever been
- We are farming out multiple prospects to fund next phase of drilling

Discoveries

UK North Sea – ILX Exploration Portfolio

UK partnerships

Strategic high quality partnerships formed with nearby facility owners Finder's highly experienced technical team operates UK portfolio

DANA PETROLEUM

- JV partner in P2530, P2527 & P2528
- Successful E&P company wholly owned by KNOC (Korea National Oil Company)
- 22 fields producing 40,000 boepd

EQUINOR

- Strategic JV partner in priority P2610 award, close to their extensive offshore Norway production facilities, including Gina Krog and Sleipner
- One of the largest integrated energy companies in the world
- Produces >2 million boepd

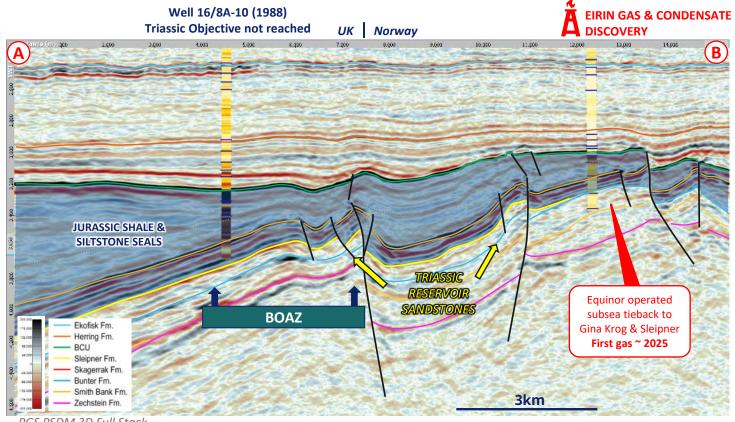

equinor

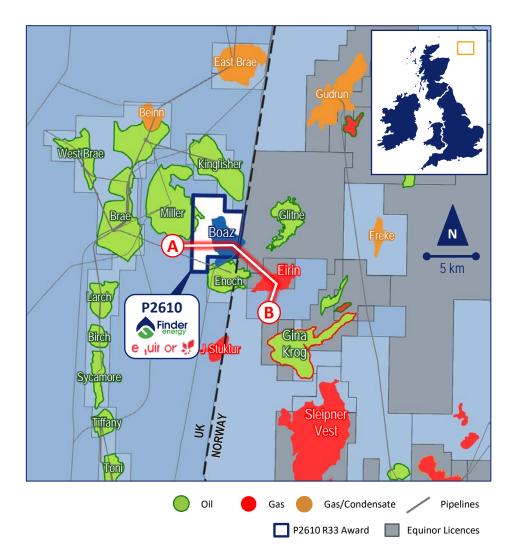

P2610 – Boaz Gas/Condensate Prospect (Finder 50%)

Priority licence award in 33rd UK round

- Finder (Operator) with strategic partner Equinor
- Large Boaz gas/condensate prospect covered by modern geostreamer 3D seismic data
- ILX strategy with Equinor operated Gina Krog and Sleipner facilities nearby
- Phase A technical work program with drill decision prior to end 2027

P2530 – Fulmar ILX Prospects (Finder 60%)

Bancroft

Turner

Big Bird 3D reprocessing unlocks Fulmar play prospectivity

- New 2022 broadband pSDM 3D repro
- Jurassic Fulmar play proven by nearby Kittiwake, Goosander and Grouse fields
- 3 'classic Fulmar interpod' ILX prospects clearly imaged on new data
- Significant follow up prospectivity with success
- Licence advance into Phase B with drill decision prior to 30 November 2025

Table Notes/Reference:

- Refer ASX announcement 27 June 2023 P2530 Contingent and Prospective Resources, UK Central North Sea for details and methodology used for the resource estimation.
 - Finder determines the Wagtail Discovery contingent resources to fall within the SPE-PRMS – 'Development Unclarified' sub-class. Development Unclarified projects are seen to have potential for eventual commercial development, but further appraisal/evaluation activities are ongoing to clarify the potential for eventual commercial development.
- Wagtail requires an appraisal well to move the current contingent resources to a more mature sub-class. Finder estimates an appraisal well COS of 57%, where the well is designed to intersect improved reservoir quality and resource size sufficient for development.

ASX Disclosure:

- Contingent resources are estimated quantities of petroleum that are potentially recoverable but not yet considered mature enough for commercial development due to one more contingencies such as technological or business hurdles or where evaluation of the accumulation is insufficient to clearly assess commerciality. These estimates have a risk of development. Further appraisal and/or evaluation is required to mature the contingent resources and move it into the reserves category.
- The Prospective Resources have also not been adjusted for the geological chance of success (COS) or chance of development (COD). Quantifying the COD requires consideration of both economic contingencies and other contingencies, such as legal, regulatory, market access, political, social licence, internal and external approvals and commitment to project finance and development timing.
- Prospective Resources are the estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) related to undiscovered accumulations. These estimates have both a risk of discovery and a risk of development. Further exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially recoverable hydrocarbons.
- Competent persons statement The information in these tables is based on, and fairly and accurately represents, in the form and context in which it appears, information and supporting documentation prepared by, or under the supervision of, Aaron Bond, a member of the American Association of Petroleum Geologists, having sufficient experience which is relevant to the evaluation and estimation of Prospective Resources to qualify as a Qualified Reserves and Resources Evaluator as defined in the ASX Listing Rules. Mr Bond is employed by Finder as Exploration Manager and has consented to the form and context in which this statement appears.

NWS Australia - Prospective Resources

Permit	Equity	Brospost	Unrisked	COS (%)			
	Lquity	Prospect	1U (Low)	2U (Best)	Pmean	3U (High)	CO3 (76)

		Brees-Caley	16.1	60.7	77.0	193.6	15 %

ERC Equipoise Pte Ltd (ERCE) – Independent Technical Specialist Report (ITSR) Evaluation Date 11 February 2022

NOTES:

- The Prospective Resources and methodology for their estimation is set out in Annexure F of the Prospectus dated 25 February 2022.
- The Prospective Resources information in the ITSR has been estimated and is classified in accordance with SPE PRMS (Society of Petroleum Engineers Resources Management Systems)
- The Prospective Resources presented here are the result of probabilistic method using Monte Carlo simulation for a single zone reservoir. Recovery factor has been applied deterministically to the STOIIP.
- Net working Interest Prospective Resources are based on Finder's working interest percent in the permit. (100% of AC/P61, 100% of WA-547-P.)
- The Prospective Resources have also not been adjusted for the geological chance of success (COS) or chance of development (COD). Quantifying the COD requires consideration of both economic contingencies and other contingencies, such as legal, regulatory, market access, political, social licence, internal and external approvals and commitment to project finance and development timing.
- The estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.
- competent persons statement The ITSR has been prepared by independent oil and gas consultancy firm ERCE Australia Pty Ltd (ERCE) and has been supervised by Stewart Easton, a Director of ERCE. Stewart Easton has 23 years' experience in the upstream hydrocarbon industry. He is a fellow of the Geological Society and a member of the Society of Petroleum Evaluation Engineers. Stewart Easton holds a Bachelor of Science (Honours), Geology with the University of Edinburgh and a Masters of Science, Geology/Earth Science with the Royal Holloway University of London. Stewart Easton is a Qualified Petroleum Reserves and Resources Evaluator as defined by Listing Rules.
