This Prospectus expires 13 months from the date it was lodged with ASIC. No securities will be issued on the basis of this Prospectus later than 13 months after the date of this Prospectus. An application will be made to ASX within seven (7) days after the date of this Prospectus for the quotation of the New Listed Options the subject of this Prospectus.

In preparing this Prospectus, regard has been had to the fact that the Company is a disclosing entity for the purposes of the Corporations Act and that certain matters may reasonably be expected to be known to investors and their professional advisers. Section 713 allows the issue of a more concise prospectus in relation to an offer of continuously quoted securities or offer to acquire such securities. This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all information that would be included in a prospectus for an initial public offering.

This document is important and it should be read in its entirety. The New Listed Options to be issued pursuant to this Prospectus should be viewed as a speculative investment and investors should refer to the Section 2 for details of certain risk factors which are considered to be relevant for the purposes of the Offers. Investors should consult their stockbroker, solicitor, accountant or other professional adviser if necessary.

No person is authorised to give any information or to make any representation in relation to the Offers which is not contained in this Prospectus and any such information may not be relied upon as having been authorised by the Directors.

Any failure to comply with any such restrictions may constitute a violation of the applicable securities law.

This Prospectus does not, and is not intended to, constitute an offer of securities in any jurisdiction where, or to any person to whom, it would be unlawful to make such an offer or issue. This Prospectus has not been, nor will it be lodged, filed or registered with any regulatory authority under the securities laws of any other country.

RISK FACTORS

Refer to Section 2 for details of the risks associated with an investment in the Company. As with any securities investment, there are risks associated with investing in the Company. with an investment in some other companies. The principal risks that could affect the financial and market performance of the Company are detailed in Section 2 of this Prospectus. The New Listed Options on offer under this Prospectus should be considered speculative. Accordingly, before deciding to invest in the Company, investors should read this Prospectus in its entirety and should consider all factors in light of their individual circumstances and seek appropriate professional advice.

The Board aims to manage these risks by carefully planning its activities and implementing risk control measures. Some of the risks are, however, highly unpredictable and the extent to which they can be effectively managed is limited.

Risks of investing in the Company's existing assets and general risks are set out in Section 2 of this Prospectus.

Careful consideration should be given to all matters raised in this Prospectus and the relative risk factors prior to applying for New Listed Options offered under this Prospectus. Investors should consider the risk factors described in Section 2, together with the information contained elsewhere in this Prospectus, before deciding whether to apply for New Listed Options.

1. DETAILS OF THE OFFERS

1.1 Background to the Offers

On 20 October 2023, the Company announced it was undertaking a capital raising of \$1,650,000 (before costs) (**Placement**) through the issue of 275,000,000 Shares (**Placement Shares**) to professional and sophisticated investors (**Placement Participants**) at an issue price of \$0.006 per Placement Share. The Placement also consisted of an issue of 275,000,000 free-attaching listed Options in the Company on a 1:1 basis (exercisable at \$0.018 and expiring 12 December 2026) (**Placement Options**). The Company issued the Placement Shares on 26 October 2023 utilising its available placement capacity under Listing Rules 7.1 and 7.1A.

The Company intends to use the proceeds from the Placement to conduct initial lithium exploration works at the Carr Boyd Nickel Project located 80km north-northeast of Kalgoorlie in Western Australia, rock chip assays, costs of the Placement and general working capital.

The Company engaged the services of CoPeak Corporate Pty Ltd <Trustee for Peak Asset Management Unit Trust> (AFSL 382585) (**Peak** or **Lead Manager**) to manage the Placement. Pursuant to the lead manager mandate between the Company and Lead Manager (**Lead Manager Mandate**) the Company has agreed to issue the Lead Manager (or its nominee) 50,000,000 listed Options (exercisable at \$0.018 and expiring 12 December 2026) (**Lead Manager Options**) in consideration for its services in relation to the Placement (being the same terms and conditions as the Placement Options). Refer to Section 5.5 for further details regarding the material terms of the Lead Manager Mandate.

The Company is precluded from issuing a 'cleansing' notice in respect of the Placement Options, Lead Manager Options and Director Placement Options (together, **New Listed Options**). Consequently, the New Listed Options are being offered pursuant to this Prospectus. The Company obtained Shareholder approval at the Annual General Meeting dated 28 November 2023 (**Annual General Meeting**) for the issue of the New Listed Options being offered under this Prospectus.

At the Annual General Meeting, the Company also obtained Shareholder approval for the issue of 300,000 Placement Shares and 300,000 Placement Options (**Director Placement Options**) to Director, Mr Leslie Pereira (**Mr Pereira**) (and/or his nominee), who also participated in the Placement.

The New Listed Options will be issued on the terms and conditions set out in Section 4.2.

For further details regarding the Placement and engagement of the Lead Manager, refer to the Company's announcement (Estrella completes \$1.65m placement to advance Lithium Asset) and Appendix 3B both announced on the ASX Platform on 20 October 2023.

1.8 ASX quotation

Application for Official Quotation of the New Listed Options offered pursuant to this Prospectus will be made to ASX within seven (7) days after the date of this Prospectus. The New Listed Options will only be admitted to Official Quotation if the quotation requirements under the ASX Listing Rules are satisfied. If the quotation requirements are not satisfied or ASX otherwise does not grant Official Quotation of the New Listed Options, the New Listed Options will be issued on an unquoted basis.

The fact that ASX may grant official quotation to the New Listed Options is not to be taken in any way as an indication of the merits of the Company or the New Listed Options now offered under this Prospectus.

1.9 Issue of New Listed Options

The New Listed Options to be issued pursuant to the Offers will be issued in accordance with the timetable set out at the commencement of this Prospectus and otherwise in accordance with the ASX Listing Rules.

Holding statements for New Listed Options issued under the Offers will be mailed in accordance with the timetable set out at the commencement of this Prospectus and otherwise in accordance with the ASX Listing Rules.

1.10 CHESS and Issuer Sponsorship

The Company operates an electronic CHESS sub-register and an electronic issuer sponsored sub-register. These two sub-registers make up the Company's register of securities. The Company will not issue certificates to investors. Rather, holding statements (similar to bank statements) will be dispatched to investors as soon as practicable after issue.

Holding statements will be sent either by CHESS (for new investors who elect to hold their securities on the CHESS sub-register) or by the Company's Share Registry (for new investors who elect to hold their securities on the Issuer sponsored sub-register). The statements will set out the number of New Listed Options issued under the Prospectus and provide details of a Holder Identification Number (for new investors who elect to hold their securities on the Chess sub-register) or Security holder Reference Number (for new investors who elect to hold their securities on the issuer sponsored sub-register). Updated holding statements will also be sent to each new investor following the month in which the balance of their holding of Securities changes, and also as required by the Listing Rules or the Corporations Act.

1.11 Risks

As with any securities investment, there are risks associated with investing in the Company. The principal risks that could affect the financial and market performance of the Company are detailed in Section 2 of this Prospectus. The New Listed Options on offer under this Prospectus should be considered speculative. Accordingly, before deciding to invest in the Company, investors should read this Prospectus in its entirety and should consider all factors in light of their individual circumstances and seek appropriate professional advice.

1.12 Overseas Applicants

The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws. No action has been taken to register or qualify the Securities the subject of this Prospectus or otherwise permit a public offering of the Securities the subject of this Prospectus in any jurisdiction outside Australia.

New Zealand

The Offers are not being made to the public in New Zealand other than to existing Shareholders with registered addresses in New Zealand to whom the Offers are being made in reliance on the *Financial Markets Conduct Act 2013* and the *Financial Markets Conduct (Incidental Offers) Exemption Notice 2016*.

This document has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

1.13 Taxation

It is the responsibility of all persons to satisfy themselves of the particular taxation treatment that applies to them by consulting their own professional tax advisers. Taxation consequences will depend on particular circumstances. Neither the Company nor any of its officers accept any liability or responsibility in respect of the taxation consequences of the matters referred to above or any other taxation consequences connected with an investment in the Securities of the Company.

1.14 Privacy Disclosure

Persons who apply for New Listed Options pursuant to this Prospectus are asked to provide personal information to the Company, either directly or through the Share Registry. The Company and the Share Registry collect, hold and use that personal information to assess applications for securities to provide facilities and services to Shareholders, and to carry out various administrative functions. 2. RISK FACTORS

2.1 Introduction

The New Listed Options offered under this Prospectus should be considered speculative because of the nature of the Company's business.

Whilst the Directors recommend that Shareholders take up their entitlement to New Listed Options, there are however numerous risk factors involved. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which the Securities will trade.

The following is a summary of the more material matters to be considered and should be read in conjunction with specific matters referred to in the Company's announcements and reports. However, the summary is not exhaustive and potential investors should examine the contents of this Prospectus in its entirety and consult their professional advisors before deciding whether to apply for the New Listed Options.

2.2 Company specific

2.2.1 Going concern

The Company's annual report for the year ended 30 June 2023 includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.

Notwithstanding the 'going concern' paragraph included in the interim financial report, the Directors believe that the Company will have sufficient funds to adequately meet the Company's current expenditure commitments and short term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long term working capital costs of the Company.

The Directors believe that there are reasonable grounds that the Company will be able to continue as a going concern, after consideration of the following factors:

- (a) The Directors are confident the Company will be successful in sourcing further capital from the issue of additional equity securities to fund the ongoing operations of the Company; and
- (b) The ability of the Company to further scale back certain parts of their activities that are non-essential so as to conserve cash.

In the event that the Company is unable to secure sources of funding, the Company may be required to realise assets and extinguish liabilities other than in the normal course of business.

2.2.2 Fluctuations in Commodity Prices

The price of nickel, cobalt, gold and other base metals and other minerals fluctuates widely and is affected by numerous factors beyond the control of the Company such as industrial and retail supply and demand, exchange rates, inflation rates, changes in global economies, confidence in the global monetary system, forward sales of metals by producers and speculators as well as other global or regional political, social or economic events. The supply of metals consists of a combination of new mine production and existing stocks held by governments, producers, speculators and consumers.

Depending on the price of nickel, cobalt, gold and other base metals and other minerals, the Company could be forced to discontinue any current or planned exploration and may lose its interest in, or may be forced to sell, some of its properties.

Declining commodity prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if a project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may eventually interrupt operations until a satisfactory reassessment can be completed.

2.2.3 Exploration, Development, Mining and Processing Risks

There is no assurance that nickel, cobalt, gold or other base metals will be discovered in the areas in which the Company has an interest. Even if further nickel, cobalt, gold or other base metals are discovered in those areas, there is no assurance that commercial quantities of these minerals can be recovered from the Company's permits.

Mineral exploration, project development and mining by their nature contain elements of significant risk. Ultimate and continuous success of these activities is dependent on many factors such as:

- (a) the discovery and/or acquisition of economically recoverable ore resources;
- (b) successful conclusions to bankable feasibility studies;
- (c) access to adequate capital for project development;
- (d) design and construction of efficient mining and processing facilities within capital expenditure budgets;
- (e) securing and maintaining title to tenements;
- (f) obtaining consents and approvals necessary for the conduct of exploration and mining;
- (g) access to competent operational management and prudent financial administration, including the availability and reliability of appropriately skilled and experienced employees, contractors and consultants;
- (h) native title risks; and
- (i) adverse weather conditions over a prolonged period which may adversely affect exploration and mining operations and the timing of revenues.

Whether or not income will result from development of tenements depends on the successful establishment of mining operations. Factors including costs, actual mineralisation, consistency and reliability of ore grades and commodity prices affect successful project development and mining operations.

2.2.4 Environmental risks and regulations

The exploration activities undertaken by the Company to date and to be undertaken by the Company are subject to environmental laws and regulations. The Company will endeavour to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. However, the cost and complexity may prevent the Company from being able to develop potentially economically viable mineral deposits.

Furthermore, the existence of environmental legislation means that the Company may potentially face a liability risk relating to its activities and/or be restricted from engaging in certain exploration activities due to environmental legislation. The Company is unable to predict the effect of additional environmental laws and regulations, which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

There can be no assurance that new environment laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company to incur significant expenses and undertake significant investments in such respect which could have a material adverse effect on the Company's business, financial condition and results of operation.

2.2.5 General Litigation risks

The Company is exposed to possible litigation risks including contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.

2.3 General risks

2.3.1 Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

2.3.2 Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (a) general economic outlook;
- (b) introduction of tax reform or other new legislation;
- (c) interest rates and inflation rates;
- (d) changes in investor sentiment toward particular market sectors;
- (e) the demand for, and supply of, capital; and
- (f) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

2.3.3 Additional requirements for capital

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed,

it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

2.3.4 Change in Regulations

Any material changes in government policies, legislation or shifts in political attitude in Australia that affect mineral mining and exploration activities, tax laws, royalty regulations, government subsidies and environmental issues may affect the viability of a project or the Company.

No assurance can be given that amendments to current laws and regulations or new rules and regulations will not be enacted, or that existing rules and regulations will not be applied in a manner which could substantially limit or affect the Company's exploration.

2.3.5 Title risk and native title

The permits in which the Company will, or may, in the future, acquire an interest, are subject to the applicable local laws and regulations. There is no guarantee that any permit, applications or conversions in which the Company has a current or potential interest will be granted.

Permits (or applications) in which the Company has an interest are (or, if granted, will be) subject to the relevant conditions applying in each jurisdiction. Failure to comply with these conditions may render the permits liable to forfeiture.

All of the projects in which the Company has an interest will be subject to application for permit renewal from time to time. Renewal of the term of each permit is subject to applicable legislation. If the permit is not renewed for any reason, the Company may suffer significant damage through loss of the opportunity to develop and discover any mineral resources on that permit.

The projects in which the Company has an interest extend over areas in which legitimate common law native title rights of indigenous Australians exist. The ability of the Company to gain access to its projects and to conduct exploration, development and mining operations remains subject to native title rights and the terms of registered native title agreements. The Directors will closely monitor the potential effect of native title claims on its projects.

2.3.6 Ability to exploit success

Any successful exploitation of discoveries would require obtaining the necessary production permit and the relevant government approvals as required by the relevant Government agencies. The required approvals may be issued at the discretion of the relevant authorities and might be issued subject to conditions or preconditions.

2.3.7 Future performance of business activities

The value of the Company's business activities is subject to the various and unpredictable influences of the market it operates in and the economy in general. Accordingly, adverse economic and market conditions may be experienced by the Company which are outside of its control and may have an adverse effect on the Company.

2.3.8 Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There

can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

2.4 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Listed Options offered under this Prospectus.

Therefore, the New Listed Options (and those Securities that are subsequently converted into Shares) subsequently converted carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for New Listed Options pursuant to this Prospectus.

3. PURPOSE AND EFFECT OF THE OFFERS

3.1 Purpose of the Offers

The primary purposes of this Prospectus are to:

- (a) issue the New Listed Options under the Offers;
- (b) obtain Quotation of the New Listed Options;
- (c) facilitate secondary trading of the New Listed Options issued under the Offers; and
- (d) facilitate secondary trading of any Shares issued upon exercise of the New Listed Options issued under the Offers.

Section 707(3) of the Corporations Act generally requires that a prospectus is issued in order for a person to whom securities were issued without disclosure under Part 6D of the Corporations Act to on-sell those securities within twelve (12) months of the date of their issue.

The Corporations Act provides an exception to section 707(3) where an entity issues a 'cleansing' notice under section 708A(5). However, the Company is precluded from issuing a 'cleansing' notice in respect of the New Listed Options as they are not in a class of securities that were quoted securities at all times in the last three (3) months.

Consequently, the Company has issued this Prospectus in respect of the Offers to the Placement Participants, Lead Manager and Mr Pereira. Issuing the New Listed Options under this Prospectus will enable persons who are issued the New Listed Options to on-sell their New Listed Options, and any Shares issued on exercise of the New Listed Options pursuant to *ASIC Corporations (Sale Offers That Do Not Need Disclosure) Instrument 2016/80*.

3.2 Proposed use of funds

No funds will be raised from the issue of the New Listed Options pursuant to this Prospectus as the:

- (a) Placement Options are offered as free attaching to the Placement Shares on a 1:1 basis;
- (b) Lead Manager Options are being issued as consideration for services provided to the Company in connection with the Placement; and
- (c) Director Placement Options are offered as free attaching to the Placement Shares on a 1:1 basis.

The Company intends to use the proceeds from the Placement to conduct initial lithium exploration works at the Carr Boyd Nickel Project located 80km north-northeast of Kalgoorlie in Western Australia, rock chip assays, costs of the Placement and general working capital.

The above is a statement of current intentions at the date of this Prospectus. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way the funds are applied on this basis.

Refer to Section 5.10 for details of the estimated expenses of the Offers.

3.3 Effect of the Offers

The principal effect of the Offers (assuming all New Listed Options offered under this Prospectus are issued) will be that 325,300,000 New Listed Options will be issued (being 275,000,000 Placement Options, 50,000,000 Lead Manager Options and 300,000 Director Placement Options).

5. ADDITIONAL INFORMATION

5.1 Company Update

Details of the Company's current activities are set out in the announcements made by the Company to the ASX and are available from the ASX, or the Company's website at <https://www.estrellaresources.com.au/>.

5.2 Nature of this Prospectus

The New Listed Options to be issued pursuant to this Prospectus are options over continuously quoted securities. This Prospectus is issued under the special prospectus content rules for continuously quoted securities in Section 713 of the Corporations Act. This enables listed disclosing entities, such as the Company, to issue a prospectus for continuously quoted securities with modified disclosure requirements if they satisfy certain requirements.

The information in this Prospectus principally concerns the terms and conditions of the Offers and the information reasonably necessary to make an informed assessment of:

- (a) the effect of the Offers on the Company; and
- (b) the rights and liabilities attaching to the New Listed Options offered pursuant to this Prospectus and the underlying securities.

The Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore also have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest in the Company.

5.3 Continuous Reporting and Disclosure Obligations

As the Company is admitted to the official list of ASX, the Company is a "disclosing entity" for the purposes of the Corporations Act. As such, it is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose to the market any information it has which a reasonable person would expect to have a material effect on the price or the value of the Company's securities.

Price sensitive information is publicly released through ASX before it is disclosed to Shareholders and market participants. Distribution of other information to Shareholders and market participants is also managed through disclosure to ASX. In addition, the Company posts information on its website after the ASX confirms an announcement has been made, with the aim of making the information readily accessible to the widest audience.

Investors are encouraged to check and monitor any further announcements made by the Company to ASX prior to securities being issued under the Offers. To do so, please refer to the Company's ASX announcements platform via www.asx.com.au.

By virtue of section 713 of the Corporations Act, the Company is entitled to issue a "transaction-specific" prospectus in respect of the Offers.

In general terms, a "transaction-specific prospectus" is only required to contain information in relation to the effect of the issue of securities on the Company and the rights and liabilities attaching to the securities. It is not necessary to include general information in relation to all

of the assets and liabilities, financial position and performance, profits and losses or prospects of the issuing company.

As a disclosing entity under the Corporations Act, the Company states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with ASIC in relation to the Company may be obtained from, or inspected at, an office of ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
 - (i) the annual financial report of the Company for the financial year ended 30 June 2023;
 - (ii) any half-year financial report of the Company lodged with ASIC after the lodgement of the annual financial report referred to above and before the lodgement of this Prospectus with ASIC; and
 - (iii) all continuous disclosure notices given by the Company after the lodgement of the annual financial report referred to above and before the lodgement of this Prospectus with ASIC (see below).

There is no information which has been excluded from a continuous disclosure notice in accordance with the ASX Listing Rules that investors or their professional advisers:

- (a) would reasonably require for the purpose of making an informed assessment of:
 - (i) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; and
 - (ii) the rights and liabilities attaching to the securities the subject of this Prospectus; and
- (b) would reasonably expect to find in this Prospectus.

This Prospectus contains information specific to the Offers. If investors require further information in relation to the Company, they are recommended to take advantage of the opportunity to inspect or obtain copies of the documents referred to above.
