Exploration Manager Appointment

Highlights

- Highly experienced geologist Anna Price appointed as Exploration Manager
- Anna brings an outstanding mix of technical skills, management experience and diverse commodity exposure

Sipa Resources Limited (ASX: SRI) (“Sipa” or “the Company”) is pleased to announce the appointment of Anna Price as Exploration Manager, commencing immediately.

Anna has almost 30 years’ experience in the mining and exploration industry in a wide variety of commodities including copper, gold, lithium and base metals across Australia, Oman and Portugal.

Anna’s recent experience includes over three and a half years at Sandfire Resources as Exploration Superintendent, six years with LSE-listed Savannah Resources in Oman and Portugal, as well as senior roles with Silver Lake Resources and De Grey Mining. She holds a B.Sc in Geology from La Trobe University and an M.Sc from CODES University of Tasmania.

Anna’s appointment significantly strengthens Sipa’s exploration capabilities given her considerable and diverse technical experience in a range of commodities and terrains.

Sipa Managing Director Andrew Muir commented:

“We are excited to have a geologist of Anna’s experience and calibre join the Sipa team in this key role. Her diverse experience across a range of key commodities will be instrumental as we look to progress and refine our existing project portfolio and target new growth opportunities.”

This announcement has been authorised for release by the Board of Sipa Resources Limited.

About Sipa

Sipa Resources Limited (ASX: SRI) is an Australian-based exploration company focused on the discovery of gold and base metal deposits, primarily in Western Australia.

- The Skeleton Rocks Project covers outcropping and buried greenstone units, prospective for gold, lithium and nickel-copper-platinum group element (Ni-Cu-PGE) deposits, with limited previous drilling completed.
- The Paterson North Copper-Gold Project is targeting intrusion related copper-gold mineralization concealed by more recent cover sediments and is located to the north-east of Rio Tinto's Winu discovery.
- The Barbwire Terrace base metals project involves an innovative joint venture with energy company, Buru Energy Limited.
- The Warralong Project is prospective for intrusion-hosted gold and lithium-tin-tantalum in the north Pilbara region, in an analogous, parallel structural setting to recent discoveries such as Hemi.
- At Wolfe Basin, extensive base metal anomalism and gossans provide targets for drill testing along a >40km long prospective horizon.
