## **ASX ANNOUNCEMENT**

30th JANUARY 2024

# QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDING 31 DECEMBER 2023

**DeSoto Resources Limited (ASX:DES) ("DeSoto" or the "Company")** is pleased to provide an update on its activities for the December 2023 Quarter.

Throughout the reporting period, DeSoto maintained its focus on exploration activities at the Fenton Gold Project in the Northern Territory. In addition, the company actively pursued various high-priority manganese opportunities.

### **Northern Territory Exploration**

- Drilling completed at Fenton Gold Project, with assays from first two holesB reported during the December quarter<sup>1</sup>.
- Both holes contained broad intercepts of low-grade gold mineralisation withB same geological characteristics as the Homestake discovery holes.
- Wide zones of low-grade gold mineralisation were intersected, the strongerB result being in FMD0002 which included 23m @ 0.37g/t Au from 557mB containing 2m @ 1.78g/t Au.
- Post reporting period, the Company reported the assays from the final two DDholes<sup>2</sup>.
  - Holes FMD0003 and FMD0004 intersected wide zones of low-grade gold mineralisation with the same geological characteristics as the original Homestake discovery holes. Best results include;
    - FMD0003 17m @ 0.62g/t Au from 578m, including 5m @ 1.09g/t Au, extending known mineralisation 350m to the south;
    - FMD0004 72m @ 0.43g/t Au from 528m, including 5m @ 1.02g/t Au;
    - The mineralised shear zone system has been intersected over more than 2km of strike and is open to the North and South.
- Also during the period, Geophysical contractor SkyTEM Australia completed ~830-line km of AEM over the Fenton Shear Zone (FSZ) corridor, the survey was co-funded by the NT Government.

<sup>1</sup>ASX Announcement: First drill holes confirm Fenton gold mineralised system (2<sup>nd</sup> November 2023) <sup>2</sup>ASX Announcement: Drilling and Geophysics confirm the scale of Fenton Gold System (29<sup>th</sup> January 2024)

- Geophysics has been key to focusing drilling on the right areas at Fenton and the new AEM survey results have highlighted the 'blue sky' potential of the project well beyond the drilled area.
- Three high priority AEM anomalies warrant immediate ground geophysical survey follow-up prior to any drill testing.

#### Manganese

- Per the Company's Prospectus, the Company has identified a number of highpriority opportunities generated internally, targeting manganese and other battery metals.
- The Company has progressed discussions regarding these opportunities and expects to announce its final manganese strategy in the coming weeks.

#### **Corporate**

DeSoto is well funded with \$6.4 million in cash at 31 December 2023.

### **Northern Territory Exploration (Detailed)**

A total of 2,683m of combined diamond and RC drilling was completed for the Fenton Gold Project exploration program in H2 2023 (Fig 1).

The Fenton drill program successfully intersected wide zones of gold mineralisation in the prospective Proterozoic Koolpin stratigraphy in all holes drilled. The program has demonstrated that the FSZ is continuous along strike to the north of FEND 14 and the south of FEND 18.

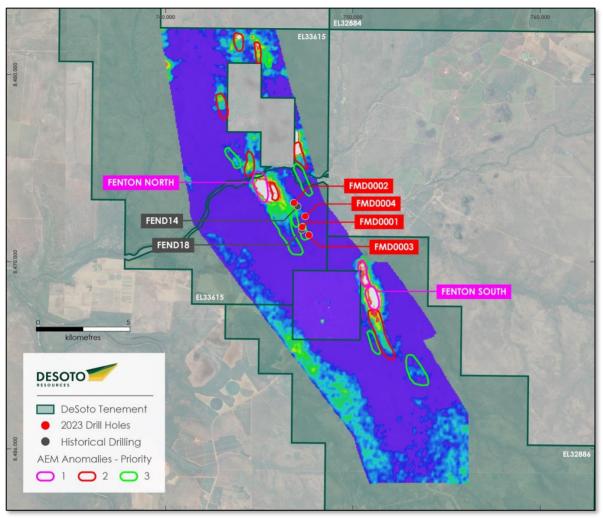

Refining the 3D geological model at Fenton with new drilling, structural and geophysical survey information remains the key to identifying a significant gold deposit at Fenton.

In total, 18 priority bedrock conductivity anomalies have been identified (Figure 1). The highest amplitude responses occur immediately to the west, north and south of the 2023 drill collar positions that focused on testing local scale ground geophysical anomalies proximal to historic drill intercepts at FEND 18 and FEND 14.

Of note are 3 high priority conductivity targets, in particular Fenton North, a very strong late-time conductivity anomaly 2km north along strike of FEND 14. Fenton North is coincident with the intersection of an interpreted NW-SE dilational structure and the hinge position of the Fenton Antiform, which has not been tested by drilling.

3D geological modelling is underway to assist in the design of local scale ground geophysical surveys to follow-up new AEM targets prior to drill testing, which will include Identifying and ranking combined structural and geophysical anomalies with the potential to host higher grade zones of gold mineralisation.

#### **Financial Position**

 As per ASX Listing Rule 5.3.1, a summary of the Company's exploration activities for the quarter is contained herein, with exploration expenditure incurred during the period of circa A\$1,318k.

Project	Cash Expenditure \$'000
Pine Creek Gold and Lithium Project	1,049
Exploration activities associated with potential new projects	269
Total	1,318

- As per ASX Listing Rule 5.3.2, there were no substantive mining production and development activities undertaken during the quarter.
- DeSoto is well funded with cash of \$6.4M at 31 December 2023.
- DeSoto continues to assess various project opportunities on an ongoing basis.

• In accordance with ASX Listing Rule 5.3.4, as the December 2023 quarter was in a period covered by a 'use of funds' statement in the IPO Prospectus, below is a comparison of the Company's actual expenditure to 31 December 2023 against the estimated expenditure in the 'use of funds' statement:

Use Of Funds	Per IPO Prospectus (2 year period)	PTD 31 December 2023 <sup>1</sup>
