

KEY LAND ACCESS AGREEMENTS SECURED FOR DYNASTY GOLD PROJECT

Key Highlights

- Key agreements secured with Yaraco and Lucarqui communities at Dynasty Gold Project, substantially increasing Titan's exploration footprint, providing access to highly prospective land, never previously explored.
- Community relationships continue to strengthen with mutually beneficial agreements set to pave the way for exploration and development of the Dynasty Gold Project
- Exploration work programs rapidly progressing over new areas to define exploration targets and grow resources at the Dynasty Gold Project.

Titan's CEO Melanie Leighton commented:

"Execution of land access agreements with the Lucarqui and Yaraco communities represents a significant milestone for the Company, unlocking substantial areas of highly prospective land along the Dynasty 9-kilometre epithermal gold corridor."

"The efforts of our CSR team have been rewarded with the execution of these agreements, enabling mutually beneficial outcomes for both the Company and the communities. We are pleased to be partnering with these communities and are excited about what we might unveil in these large areas that have never been explored before."

"We are wasting no time getting on the ground and collecting foundation datasets including mapping, surface soil and rock chip samples, followed by trench and channel samples, which will enable us to rapidly identify new exploration and resource extensional targets."

Dynasty Exploration Activities Update

Titan Minerals Limited (**Titan** or **the Company**) (**ASX:TTM**) is pleased to provide an update on the Company's 100% held Dynasty Gold Project (Dynasty) in southern Ecuador, where recent access agreements have been executed, opening up large new areas for exploration and resource growth.

Together with several individual agreements, the Company has recently executed land access agreements with the Yaraco and Lucarqui communities, unlocking large new areas at Dynasty.

These new agreements have provided access to large areas of highly prospective land, covering almost 5-kilometres of Dynasty's 9-kilometre epithermal gold corridor, substantially growing Titan's exploration footprint.

Importantly, these newly added areas represent parts of the Dynasty Gold Project that have never previously been explored, providing Titan with a significant opportunity to demonstrate the scale and grow the existing resource inventory of 3.12Moz gold and 22Moz silver.

The Company is pleased to have reached mutually beneficial agreements and is delighted to be offering training and employment opportunities through exploration work programs to landholders.

Exploration work programs have commenced over these new areas, with the geology team collecting mapping and surface geochemistry foundation datasets to rapidly define new exploration targets in preparation for the next campaign of resource growth drilling.

The Company will issue the Performance Rights on or around 12 February 2023 and will utilise its existing ASX Listing Rule 7.1 capacity for the issue of the Performance Rights. The key terms and conditions of the Performance Rights are detailed in the Appendix.

Titan's CEO Melanie Leighton commented:

About the Dynasty Gold Project

The Dynasty Gold Project is an advanced stage exploration project comprising five contiguous concessions and is 139km² in area. Three of these concessions received Environmental Authorisation in 2016 and are fully permitted for all exploration activities.

Exploration works at the Dynasty Gold Project have outlined an extensive zone of epithermal veining over a nine kilometres strike and over one kilometre in width. There is also considerable potential for porphyry gold and copper mineralisation as identified by surface mapping, trenching and drilling at the Kaliman prospect.
