

BRIGHTSTAR
RESOURCES LIMITED

Building Western Australia's Next Gold Miner

FEBRUARY 2024

RIU
Explorers
Conference

Important Notice & Disclaimer

Important Notices

This Presentation has been prepared by Brightstar Resources Limited (**Brightstar**) and is authorised by the Board of Directors of Brightstar.

Disclaimer

- This Presentation has been prepared by Brightstar based on information from its own and third party sources and is not a disclosure document. No party other than Brightstar has authorised or caused the issue, lodgement, submission, despatch or provision of this Presentation, or takes any responsibility for, or makes or purports to make any statements, representations or undertakings in this Presentation. Except for any liability that cannot be excluded by law, Brightstar and their respective related bodies corporate, directors, employees, servants, advisers and agents disclaim and accept no responsibility or liability for any expenses, losses, damages or costs incurred by you relating in any way to this Presentation including, reliance without limitation, the information contained in or provided in connection with it, any errors or omissions from it however caused, lack of accuracy, completeness, currency or reliability or you or any other person placing any on this Presentation, its accuracy, completeness, currency or reliability.
- This Presentation is not a prospectus, disclosure document or other offering document under Australian law or under any other law. It is provided for information purposes and is not an invitation nor offer of shares or recommendation for subscription, purchase or sale in any jurisdiction. This Presentation does not purport to contain all the information that a prospective investor may require in connection with any potential investment in Brightstar. Each recipient must make its own independent assessment of Brightstar before acquiring any shares in Brightstar.

NOT INVESTMENT ADVICE

- Each recipient of the Presentation should make its own enquiries and investigations regarding all information in this Presentation including but not limited to the assumptions, uncertainties and contingencies which may affect future operations of Brightstar and the impact that different future outcomes might have. Information in this Presentation is not intended to be relied upon as advice to investors or potential investors and has been prepared without taking account of any person's individual investment objectives, financial situation or particular needs. Before making an investment decision, prospective investors should consider the appropriateness of the information having regard to their own investment objectives, financial situation and needs and seek legal, accounting and taxation advice appropriate to their jurisdiction. Brightstar is not licensed to provide financial product advice in respect of their securities.

Forward-Looking Statements

- This announcement contains certain "forward-looking statements". The words "expect", "anticipate", "estimate", "intend", "believe", "guidance", "should", "could", "may", "will", "predict", "plan" and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future financial position or performance are also forward-looking statements. Forward-looking statements, opinions and estimates provided in this announcement are based on assumptions and contingencies which are subject to change without notice and involve known and unknown risks and certainties and other factors which are beyond the control of Brightstar and its respective directors and management. Forward-looking statements are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Actual results, performance or achievements may differ materially from those expressed or implied in such statements and any projections and assumption on which these statements are based. These statements may assume the success of Brightstar business strategies. The success of any of those strategies will be realised in the period for which the forward-looking statement may have been prepared or otherwise. Readers are cautioned not to place undue reliance on forward-looking statements, particularly in light of the current economic climate and the significant volatility, and except as required by law or regulation, none of Brightstar and its respective representatives or advisers assumes any obligation to update these forward-looking statements. No representation or warranty, express or implied, is made as to the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects, or statements in relation to future matters contained in this announcement. The forward-looking statements are based on information available to Brightstar as at the date of this announcement. Except as required by law or regulation (including the ASX Listing Rules), none of Brightstar and its respective representatives or advisers undertakes any obligation to provide any additional or updated information whether as a result of a change in expectations or assumptions, new information, future events, or results or otherwise. Indications of, and guidance or outlook on future financial position or performance are also forward-looking statements.

Compliance Statement

- Mineral Resources: this presentation contains references to Brightstar's JORC Mineral Resources, extracted from the ASX announcements titled "Maiden Link Zone Mineral Resource Estimate" dated 15 November 2023, "Cork Tree Mineral Resource Upgrade Delivers 1Moz Group MRE" dated 23 June 2023 and "Auralia Review" dated 10 September 2020, and ASX announcements for Kingwest Resources Limited titled, "High grade drilling results and high grade resource estimation from the Menzies Goldfield" dated 13 December 2022 and "Menzies JORC gold resources surpass 500,000 ounces" dated 26 April 2022.
- Brightstar confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.
- Unless otherwise stated, all dollar values in this Announcement are reported in Australian dollars.

Cautionary Statement

- The production targets and forecast financial information disclosed in this Presentation are extracted from the Company's ASX announcement titled "Menzies and Laverton Gold Project Mine Restart Study" dated 06/09/2023. All material assumptions underpinning the production targets and forecast financial information derived from the production targets in the previous announcement continue to apply and have not materially changed.

Project Overview

+1Moz JORC Resources – Open and growing to deliver scale to become a material and relevant participant in the WA gold sector

Tier-1 jurisdiction with compelling land position in two proven goldfields with multi-million ounce endowments:

- Significant operations nearby include Granny Smith, Sunrise Dam, Gwalia, Mt Morgans, King of the Hills
- Excellent regional infrastructure and supplier networks

Robust Scoping Study¹ highlights a low capital and low risk pathway to production leveraging existing infrastructure

- 322koz produced over eight years
- **Average production profile over LOM of +40koz Au per annum**
- Staged development delivers low pre-production capex of approximately \$22 million
- **NPV₈ of \$103m and IRR of 79% @ A\$2,900/oz**
 - **NPV₈ of \$153m and IRR of 138% @ A\$3,100/oz (spot gold)**
- LOM C1 cash costs A\$1,765/oz
- Brightstar's refurbished mill in Laverton strategically located to unlock regional assets

Significant Upside to Scoping Study:

- Production target only includes ~30% of current Mineral Resource
- Compelling exploration upside and targets for inclusion in future mine planning
- Mining Pre-Feasibility Studies underway

Mining Pre-Feasibility Studies underway

- Selkirk Mining JV (50:50) underway at the Menzies Gold Project with partner BML Ventures
- Mine plan of +30kt of ore @ 5g/t Au. Processing through Gwalia mill (GMD.ASX) in Q1 '24
- Cash flow enables organic funding for exploration and feasibility studies
- Assessing other small scale mining opportunities at the Menzies Gold Project (= "Selkirk 2.0")

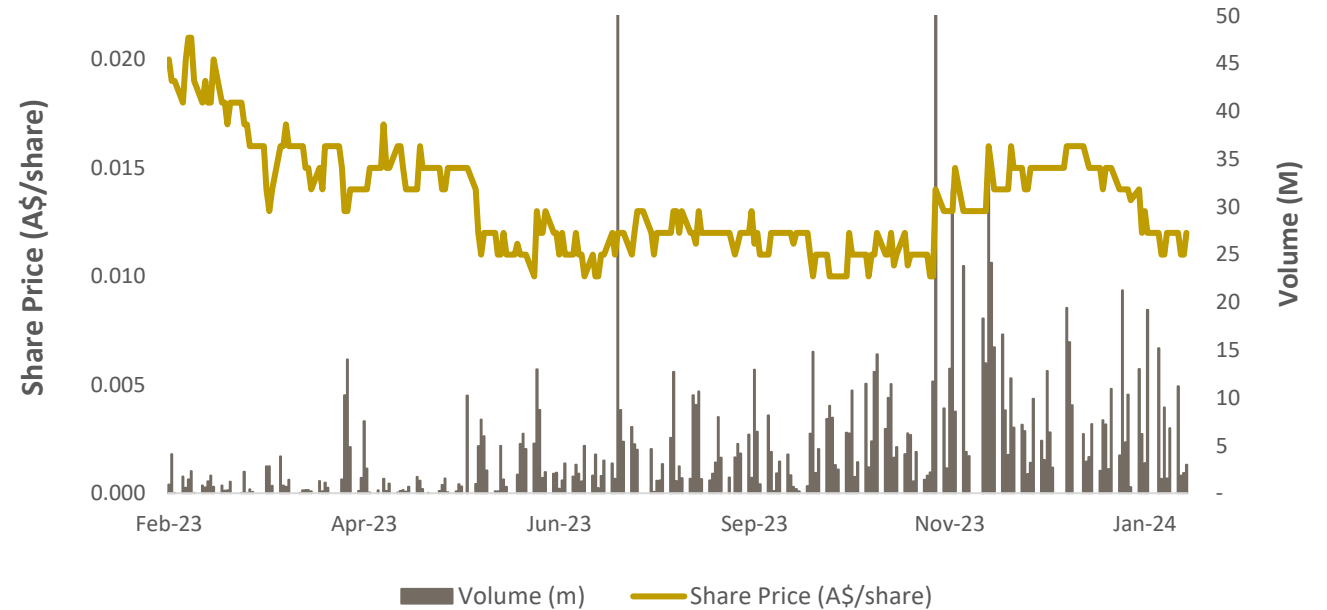

1. Refer to ASX announcement titled "Menzies and Laverton Gold Project Mine Restart Study" dated 6/9/2023

2023 Year In Review

OPERATIONAL:

- ✓ **Drilled +24,000m** across the Menzies and Laverton Gold Projects
- ✓ **Mining operations commenced** at the Selkirk deposit under the JV with BML Ventures
- ✓ **Multiple Mineral Resource upgrades**, taking the total Mineral Resource to +1 million oz Au:
 - Resource upgrade at Cork Tree Well
 - Maiden Resource at the Link Zone deposits in Menzies
- ✓ Robust scoping study released that illustrated the **low capex and highly profitable proposed mining operations** at Menzies & Laverton
- ✓ **Pre-Feasibility Study underway**
- ✓ Commenced diamond drilling at Cork Tree Well

CORPORATE:

- ✓ Completion of merger with Kingwest Resources. **Refreshed Board & Management team**
- ✓ Raised \$10m of equity capital throughout CY23. **Significantly institutionalised and strengthened the share register**
- ✓ **Tenement swap transaction with Ardea Resources (ASX:ARL)** to increase land holding at the Menzies Gold Project
- ✓ **Farmed-out a Joint Venture with Devex Resources (ASX:DEV)** over non-core Nickel exploration targets in Menzies
- ✓ Sensible & opportunistic deployment of balance sheet to **fast-track development and minimise capex**:
 - Purchased 52 room camp at a significant discount to replacement cost
 - Purchased six CIL tanks for the Laverton processing plant at a significant discount to replacement cost
- ✓ Analyst coverage to articulate the **development strategy and value proposition** of Brightstar

Compelling Economics Delivered in a Low-Risk Start-Up

1. C1 cash cost includes mining, processing and administration costs and is calculated based on gold production.

2. 480ktpa fresh rock capacity, representing an increase of 50% on current processing plant throughput capacity

3. Capital intensity is calculated by dividing pre-production capital by annual payable gold production.

4. Payback period calculated from the first month of gold production

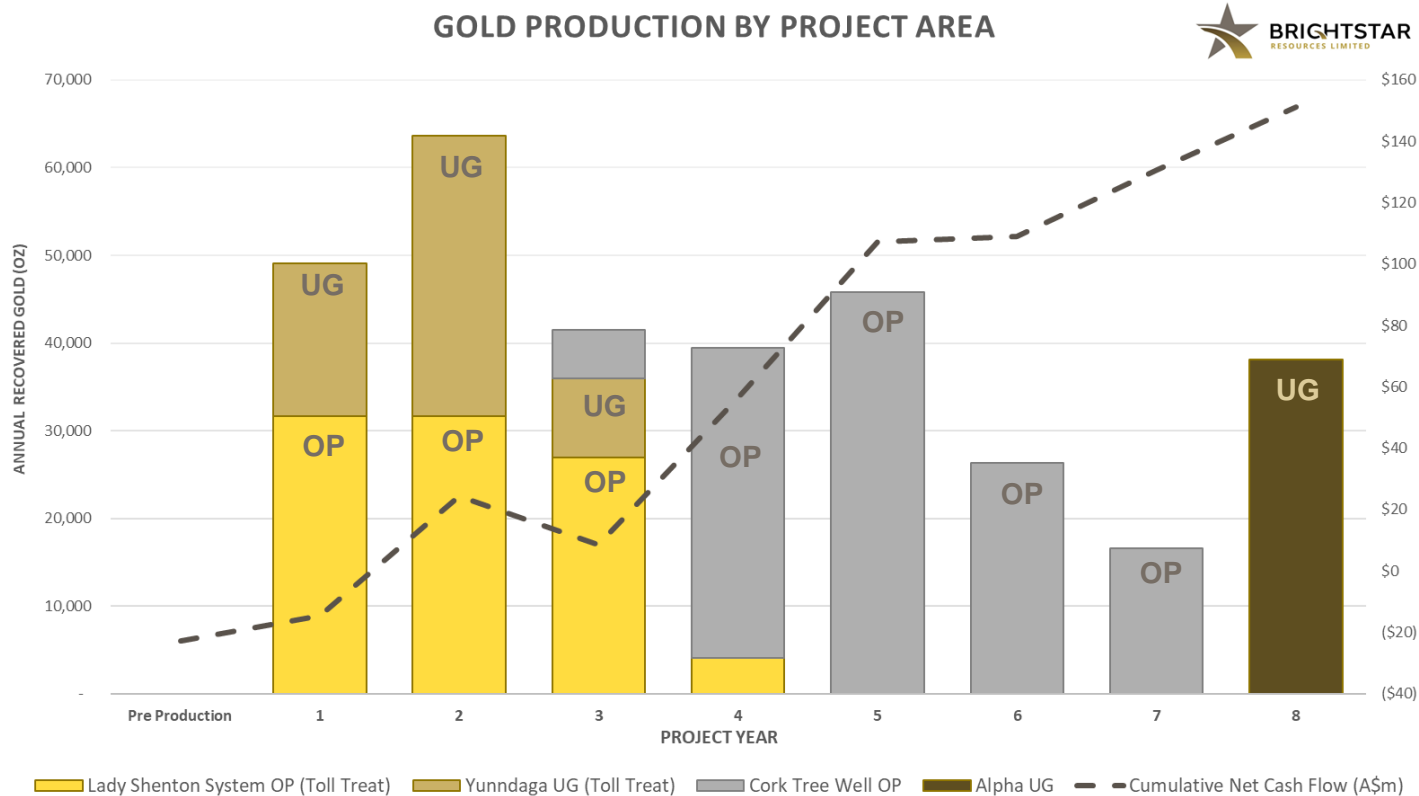

Selkirk Mining Joint Venture

- 50:50 Mining JV with BML Ventures Pty Ltd
- Mine plan of 30kt of ore at +5g/t Au
 - First Blast: Mid-August 2023
 - Mining due to complete: February 2024
 - Processing: Scheduled for processing through the Gwalia processing plant in Q1 2024
- Brightstar are actively assessing other opportunities at Menzies for similar mining Joint Ventures to generate organic free cash flow to fund exploration & development activities

Production Summary and Overview

- Two project areas:
 - Menzies Gold Project (**MGP**)
 - Laverton Gold Project (**LGP**)
- Four mines:
 - 1x open pit and 1x underground at MGP
 - 1x open pit and 1x underground at LGP
- Upfront capital required: **A\$22 million**
- Payback: **1.5 years**
- Cumulative **LOM Net Cash Flow of A\$153 million** at A\$2,900/oz
- Mine plan delivers **optimal sequencing**:
 - Staged development captures synergies with infrastructure, personnel & mining equipment
- Use operational cashflow to fund the development of the Laverton Mill = **minimise equity dilution**
- Toll treating start-up at Menzies delivers a **lower risk WA gold miner**:
 - No up-front plant capex or commissioning risks
 - Minimise debt and hedging exposure during ramp up stage

1 Decrease in cumulative net cash flow in Years 2-3 is due to capex incurred for the Brightstar Plant refurbishment and capital costs associated with the Cork Tree Well pre-production mining costs

Mining Phase 1 – Menzies Gold Project

Menzies Project Areas

- Open Pit Shells
- Goldfields Highway
- Tenement boundary (Mining leases)
- Mineral Resources
- UG Development and stopes

- Development of 1x large open pit complex and 1x underground mine at the MGP
- Lady Shenton System comprised of three open pit mining areas / deposits:
 - Pericles, Stirling (new pits) and Lady Shenton cutback
- Yunndaga underground utilising existing open pit for decline access
- Robust early mine life production profile:
 - Year 1: 49koz, Year 2: 63koz
- **Operating profits from Menzies operations fully funds the development at Cork Tree Well and the refurbishment and expansion of the Laverton mill**
- Combined Processing Physicals
 - 2.6Mt of ore at 1.95 g/t Au head grade
 - **153koz recovered gold**

Lady Shenton Project Area

Menzies Gold Project

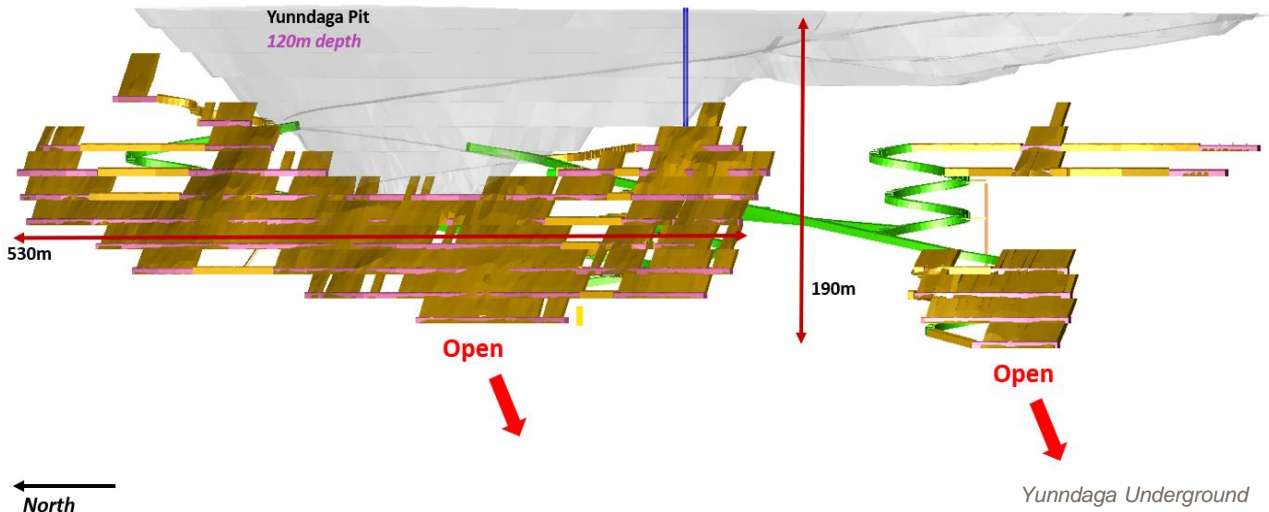

Simultaneous development of open pit mining at Lady Shenton system and underground mining at Yunndaga

Lady Shenton Open Pits

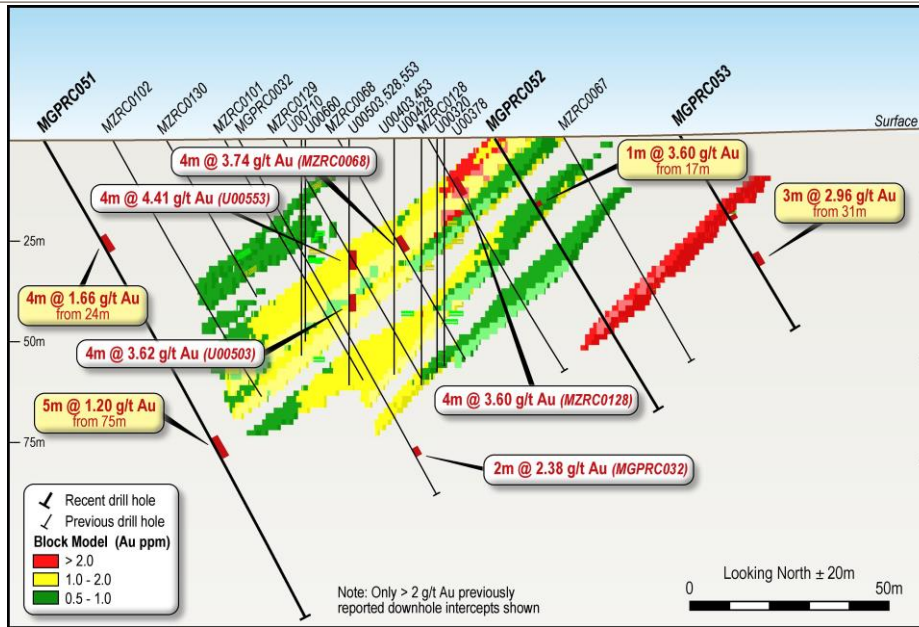

- 3 open pit mining areas at Lady Shenton
- Mining Physicals:
 - Total movement of 10 million BCM
 - Average strip ratio of **10.8:1**
 - Ore of **1.9Mt @ 1.63g/t Au for 100koz** mined
- Optimisation and COG based on A\$2,750/oz Au price
- 9 quarters (2.25 years) of open pit production
- Leverage experienced open pit mining contractor with conventional 100t fleet
- 14 quarters of processing combined with Yunndaga

Yunndaga Underground

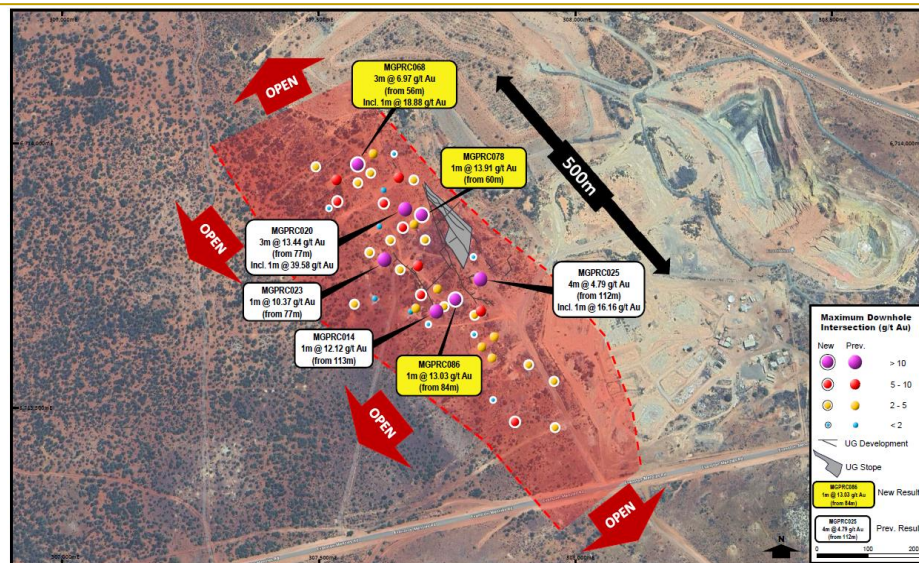

- Underground mining at Yunndaga to 190m depth
- Historically produced 270koz down to 600m vertical depth
- Mining Physicals:
 - Ore of **650kt @ 2.91g/t Au for 60koz** mined
- Stope optimisation and COG based on A\$2,750/oz Au price
- 10 quarters (2.5 years) of underground production
- Mining fleet based on conventional Western Australian UG gold operations

Menzies Gold Project – Upside Through Exploration

Link Zone

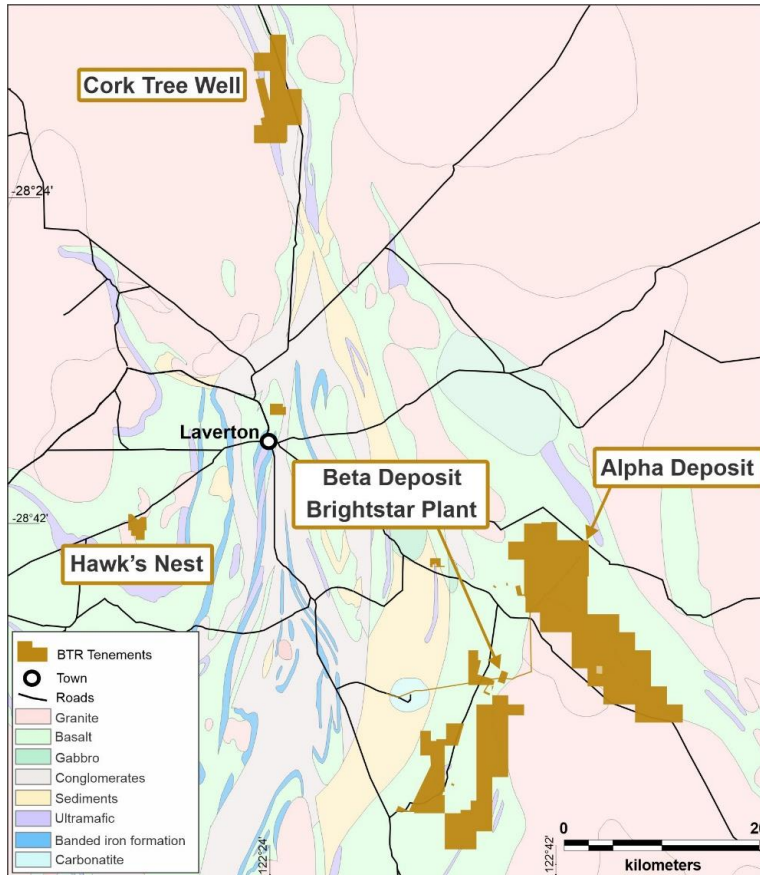

- Maiden Mineral Resource released in Q4 2023 of **21koz @ 1.1g/t Au**
- Presents as an opportunity for **near term monetisation** as a shallow open pit mine
- Recent drilling results illustrate shallow, stacked lodes:
 - **1m @ 54.77g/t Au** from 10m (MGPRC049)
 - **7m @ 3.09g/t Au** from 84m (MGPRC050)
 - **2m @ 4.46g/t Au** from 6m (MGPRC059)
 - **1m @ 13.95g/t Au** from 45m (MGPRC036)
 - **3m @ 4.29g/t Au** from 45m (MGPRC037)
- Discussions with potential mining JV partners underway. Brightstar independently advancing permitting and approvals to support near term production activities.

Aspacia

- Consistent, high-grade mineralisation delineated over 600m of strike length & down to 180m
- Presents as an opportunity for narrow-vein underground mining
- Mineral Resource estimation underway. Due for delivery in Q1 2024
- Recent drilling results illustrate high-grade narrow mineralised veins:
 - **1m @ 39.58g/t Au** from 56m (MGPRC020)
 - **1m @ 18.88g/t Au** from 56m (MGPRC068)
 - **1m @ 13.95g/t Au** from 45m (MGPRC036)
 - **1m @ 13.91g/t Au** from 60m (MGPRC078)
 - **1m @ 16.16g/t Au** from 112m (MGPRC025)

Mining Phase 2 – Laverton Gold Project

Laverton Project Areas

Alpha & Beta Project Area

- Portfolio is spread across multiple project areas:
 - **Cork Tree Well** (6.4Mt @ 1.4g/t Au for 303koz Au)
 - **Alpha** (1.4Mt @ 2.3g/t Au for 106koz Au)
 - **Beta** (1.9Mt @ 1.7g/t Au for 102koz Au)
- Development of 4 open pits at Cork Tree Well and 1x underground mine (Alpha) proposed
- Excellent regional infrastructure including road network
- Combined processing physicals:
 - 2.7Mt of ore at 2.04 g/t Au head grade
 - **Recovered gold 169koz Au**

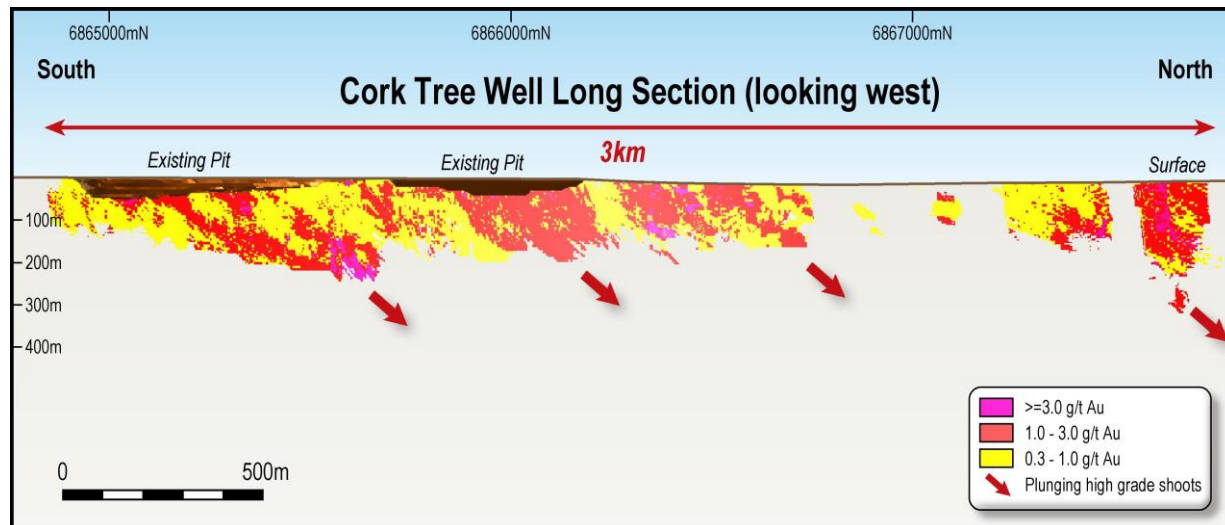

Cork Tree Well Project Area

Laverton Gold Project

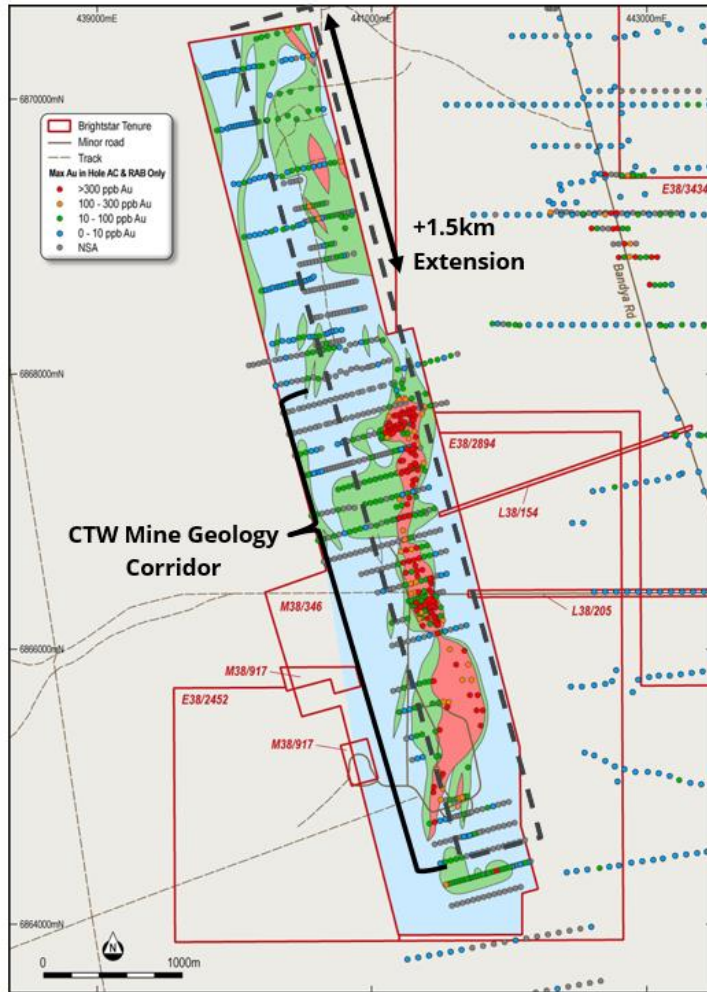

Staged development of open pit mining at Cork Tree Well and underground mining at Alpha

- 4 open pit mining areas at Cork Tree Well:
 - 2 cut-backs (South 1 & 2), 2 new open pits (Central & Delta)
- Mining Physicals:
 - Total movement of 12 million BCM
 - Average strip ratio of 11.2:1
 - Ore of **2.3Mt @ 1.85g/t Au for 136koz** mined
 - 77% oxide and transitional material
- Optimisation and COG based on A\$2,750/oz Au price
- 12 quarters (3 years) of open pit production
- Wider orebodies facilitate larger sized mining fleet to drive operational efficiencies across multiple mining areas

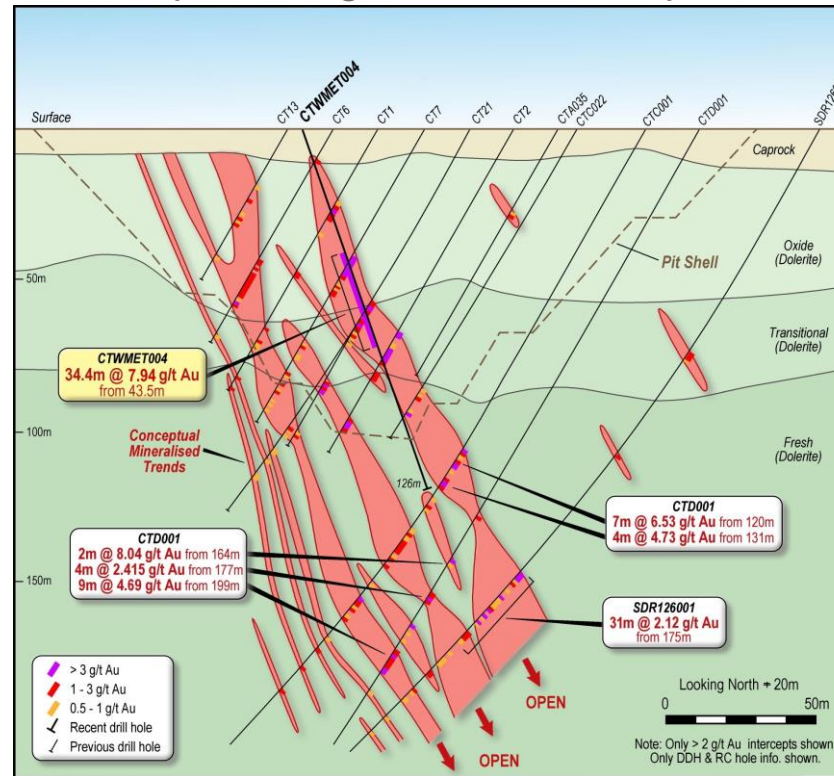

- Underground mining proposed at the Alpha deposit
- Previously mined as an OP by Brightstar in 2010
- Mining Physicals:
 - Ore of **430kt @ 3.03g/t Au for 42koz** mined
- Stope optimisation and COG based on A\$2,750/oz Au price
- 7 quarters (1.75 years) of underground production
- Conventional Western Australian development and stoping methods / machinery utilising contractor model

Laverton Gold Project – Upside Through Exploration

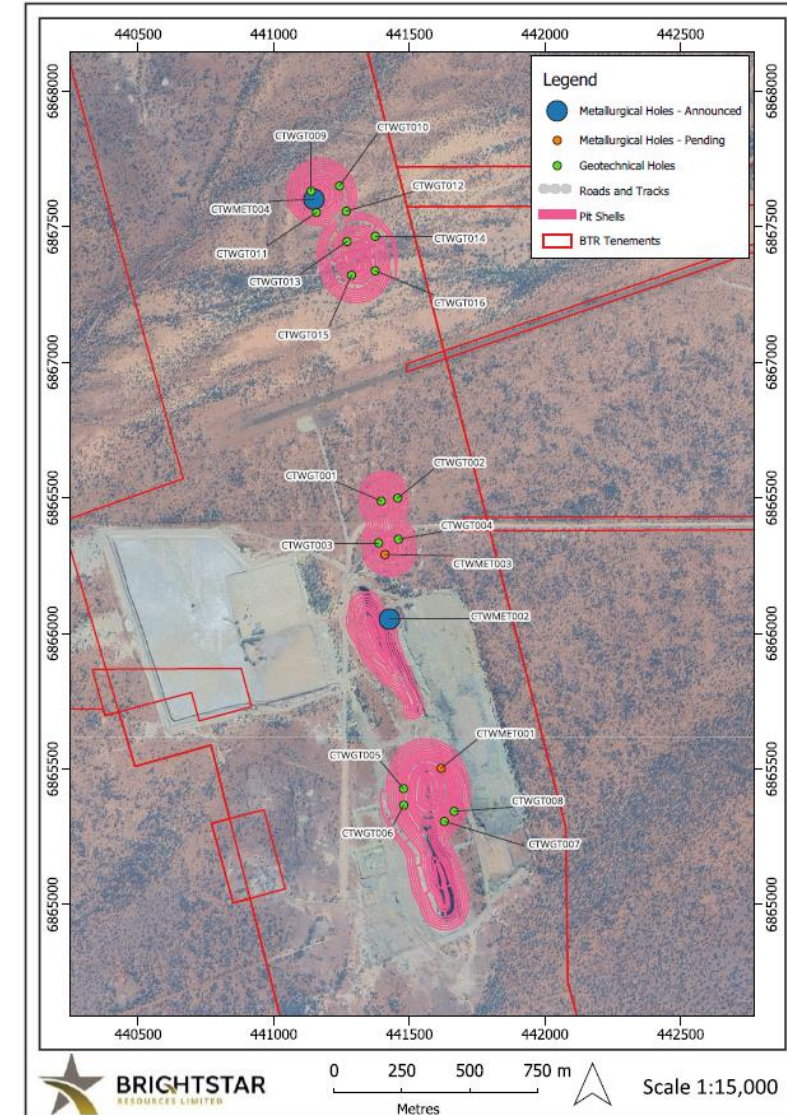

CTW is open along strike to the north with highly anomalous aircore drilling results and potential for parallel repeat structures

Mineral Resource Estimate:
 +303koz @ 1.4g/t Au
 Open along strike and at depth

Significant upside to continue to grow CTW at depth. Open at depth along the 3km of strike.

Grades supportive of potential UG mining after initial open pit operations

Laverton Gold Project – Upside Through Exploration

34.4m @ 7.94g/t Au from 43.5m (CTWMET004¹)
 Foliated metadolerite with intervals of brecciated quartz veins

1. Source - Refer ASX announcement released 13/02/2024

Laverton Processing Strategy

- **Infrastructure has an independent replacement valuation of A\$60 million**

- The 2023 Scoping Study articulated a refurbishment and expansion study to upgrade to 480ktpa (fresh rock throughput)
- **Total Capital Cost \$18.5 million**
 - Replace entire crushing circuit and upgrade existing grinding circuit
 - Services upgrades including power reticulation, electrics and instrumentation upgrades
 - Installation of administration buildings and associated NPI

- **Capital costs fully funded by the operations at the Menzies Gold Project in years 1-3**

- **Current mine plan for +5 year LOM** processing Brightstar ore through upgraded & refurbished plant

- Significant scope to increase mine life and production profile per annum through:
 - Exploration upside including increased head grades from potential depth / underground extensions across BTR portfolio
 - Opportunistic and strategic expansions of infrastructure and gold resources out of cashflow

- Assessing **options for increasing throughput to 1Mtpa** in the PFS currently underway to significantly increase production profile

- Recent opportunistic purchase of second-hand CIL tanks and a 52-room accommodation camp expected to **decrease capex and fast-track development**

Laverton Processing Plant. May 2023

Attractive Low Capital Development vs Peers

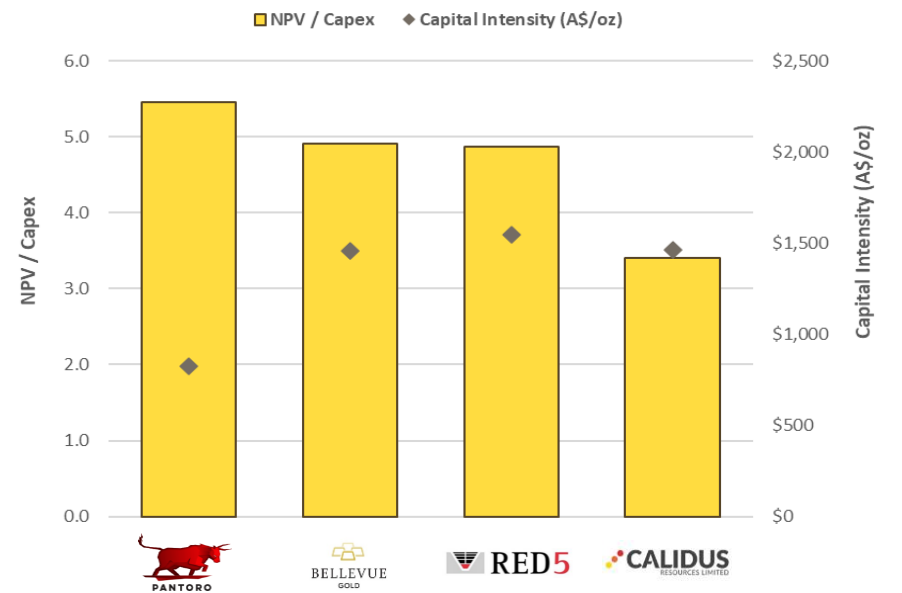

Scoping Study outputs indicate a readily fundable project with a compelling return on capital investment

Upside and Opportunities for PFS

MENZIES	LAVERTON
Infill drilling to convert Inferred Resources to Indicated classification	Infill drilling to convert Inferred Resources to Indicated classification
Targeted drilling on the edges / adjacent to optimised pit shells to draw additional ounces into mine plan	Extensional drilling at Cork Tree Well (northern strike extensions)
Infill and extensional drilling at Yunndaga to increase mine life (see image RHS)	Greenfields exploration for 'CTW 2.0' (Delta 2 Prospect)
Target delineation of high-grade underground opportunity at Aspacia	High-grade plunging shoots at depth in Cork Tree Well for UG mining potential
"Link Zone" recent drilling indicates shallow oxide material, pre-Resource	Review and assess regional opportunities for M&A

Yunndaga Upside

- Yunndaga was historically mined down to 600m vertical depth
 - Historical production of **270koz @ 16g/t Au**
- Current mine plan is down to 190m vertical depth (existing OP down to 120m)
- Mine plan limited by lack of resource definition drilling informing current MRE
 - Investigate opportunities for MRE upgrades & potential conversion to Reserves

Key Catalysts and Value Drivers

Targeted Ongoing Gold Production									

Summary

+30% conversion of Resource ounces to Mine Plan delivering **322koz recovered** from 1.02Moz JORC Resource base

De-risked staged mine plan:
2 project areas with 1x open pit and 1x underground mine in each project

Laverton processing plant unlocks inorganic opportunities in the Laverton district

Strategic development of Menzies to de-risk project and fully fund Laverton re-start

Low Entry Cost and Significant Upside¹:
EV/Resource metrics and EV/NPV extremely undemanding with Brightstar trading at a **A\$25/oz EV/Resource multiple** and **< 0.2x NPV₈** based on Scoping Study outputs on spot gold price

Short term cashflow via Selkirk Mining JV (and other opportunities) to organically fund exploration and development expenditure

1. EV/Resource multiple based on enterprise value as at 12/02/2024, Appendix 11

PROJECT OVERVIEW

Laverton Gold Project Overview

Base load resources with material exploration upside and a processing solution

Approximately 300km² of **100%-owned** tenure in the Laverton Tectonic Zone which is renowned for its significant mines currently being mined to **>1,500m depth** (Sunrise Dam and Granny Smith)

Portfolio is spread across multiple project areas:

- Cork Tree Well (6.4Mt @ 1.4g/t Au for 303koz Au)
- Alpha (1.4Mt @ 2.3g/t Au for 106koz Au)
- Beta (1.9Mt @ 1.7g/t Au for 102koz Au)
- Brightstar South / Comet Well

Current total JORC Mineral Resource Estimate of **9.7Mt @ 1.6g/t Au for 511koz** (52% Measured & Indicated; 48% Inferred)

All MRE are located on **granted mining leases** and are within 70km of the Laverton Processing Plant

Resources are all **open along strike and at depth**

Only minor drilling programs completed in nine years at Laverton prior to Brightstar's recent RC drilling campaigns in 2021 and 2022. **Significant exploration upside exists**

Cork Tree Well – Scale & Upside

*Open pit +303koz JORC Resource
Open Along Strike and at Depth*

JORC Mineral Resource upgrade to 6.4Mt @ 1.4g/t Au for 303koz

- Including 157koz @ 1.6g/t Au in Indicated classification

Cork Tree Well’s detailed exploration to date has been limited to close proximity to the historic open pits, with significant potential across the project area

Resource envelope defined over a **strike length of +3km and down to 200m**

Significant exploration potential along a further 1.5km of untested strike length with the same structural and lithological setting untested at depth

- 2023 aircore drilling indicated exploration upside along strike to the north

Despite the Laverton Tectonic Zone’s demonstrable depth potential and Brightstar’s historic mining operations, limited drilling beneath 100m has been completed across the land holding

Brightstar’s maiden diamond drilling program at Cork Tree Well returned extremely high grades and abundant visible gold¹

Menzies Gold Project Overview

Contiguous land package in prolific historic mining field

Consists of a tenement holding of a contiguous land package of granted mining leases over a **strike length of +20km**

Majority of deposits are hosted along the Menzies Shear Zone and located **adjacent to Goldfields Highway** in Menzies (130km north of Kalgoorlie)

A series of historically mined high-grade gold deposits that produced **+800,000oz at 19g/t Au** (including 643,000oz @ 22.5g/t Au¹ from underground)

Total Current Resource: **12.4Mt @ 1.3g/t Au for 525koz Au²** (40% Measured and Indicated; 60% Inferred)

Immense exploration potential to find high-grade gold deposits including structural repetitions around known producers including Yunndaga (**270koz @ 16g/t mined**), Lady Shenton (**191koz @ 31g/t**) and First Hit (**171koz @ 32g/t**)¹

Modern open pit mining in 1990's yielded **145koz @ 2.6g/t²** including production from Lady Irene which was found 'under cover' in the Northern Trend

Mapping and sampling underway to assess potential for LCT (Lithium-Caesium-Tantalum) mineralogy. Pegmatites delineated over +4km of strike extent³

Exploration Upside – Menzies Gold Project

Limited and ineffective historical exploration provides high-grade opportunities at Menzies

Despite a long and successful mining history, exploration drilling at Menzies was historically focused on:

- Near mine exploration in and around the active mining centres; or
- Shallow exploration investigating for large, low-grade oxide targets

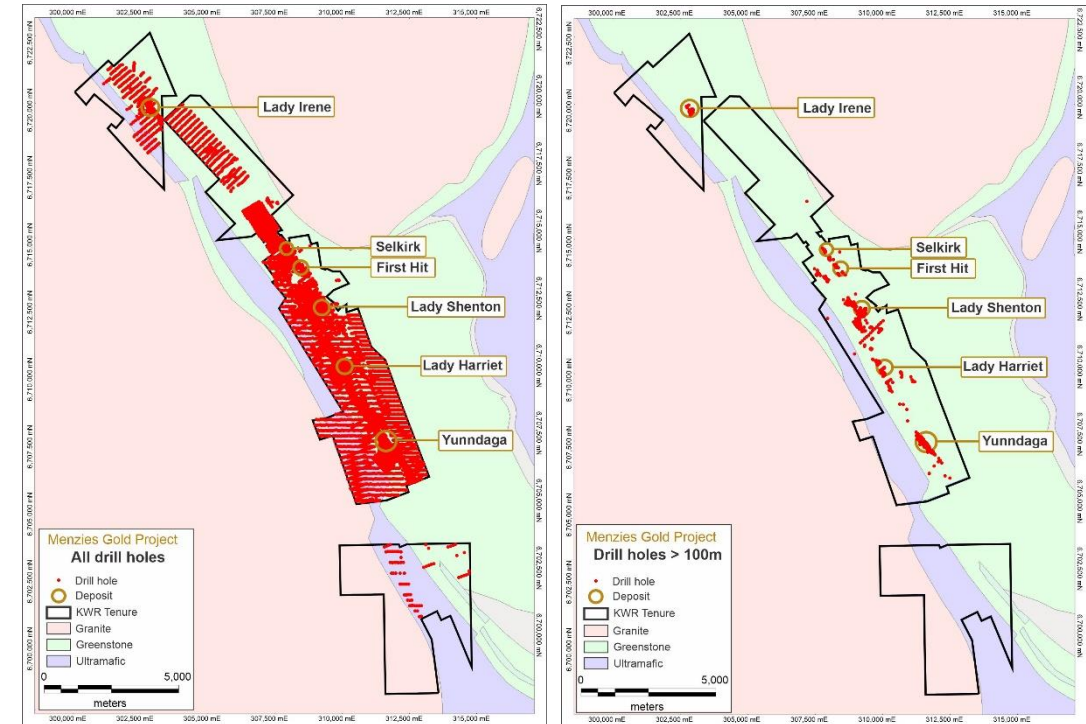

Historic deposits were found at surface, then mined underground to 600m (Yundaga) with **mine grades +15g/t**

Northern Trend: 7km strike extent between Lady Irene and Selkirk mines with minimal effective drill testing beneath shallow cover. Lady Irene found under ~5m of cover in 1990's

- 'Walk up' targets at St Francis (e.g. SARC2 6m @ 5.6g/t from 38m)¹

Southern Trend: In a similar strike length, the southern Menzies goldfield between the First Hit and Yundaga mines has a **total known mineral endowment of +1.3Moz Au²**

Opportunities to find virgin discoveries along Northern Trend and resource additions in Southern Trend

All holes drilled at Menzies

>100m depth holes drilled at Menzies

¹ Refer to Appendix 4 | ² Total mineral endowment inclusive of the existing JORC MRE of 505,000oz and the historically mined 800,000oz

APPENDICES

Board & Management

ALEX ROVIRA MANAGING DIRECTOR

Mr Rovira is a qualified geologist and an experienced investment banker having focused on the metals and mining sector since 2013.

Mr Rovira has experience in ASX equity capital markets activities, including capital raisings, IPOs and merger and acquisitions.

DEAN VALLVE CHIEF OPERATING OFFICER

Mr Vallve holds technical qualifications in geology & mining engineering from the WA School of Mines, an MBA, and a WA First Class Mine Managers Certificate.

Mr Vallve was previously in senior mining and study roles at ASX listed mid-cap resources companies Hot Chili Ltd (ASX: HCH) and Calidus Resources Ltd (ASX: CAI).

GREG BITTAR NON-EXECUTIVE CHAIRMAN

Mr Bittar holds a Master of Finance from the London Business School, a Bachelor of Economics and a Bachelor of Laws (Hons) from the University of Sydney.

Mr Bittar has extensive experience in public and private markets mergers and acquisitions, capital markets and strategic advisory assignments across a range of sectors.

JONATHAN DOWNES NON-EXEC DIRECTOR

Mr Downes has over 30 years' experience in the minerals industry and has worked in various geological and corporate capacities. Experienced with gold and base metals, he has been intimately involved with the exploration process through to production.

Mr Downes is currently the Managing Director of Kaiser Reef Limited, a high grade gold producer, NED of Cazaly Resources Limited, and was a founding Director of Galena Mining Limited.

JOSH HUNT NON-EXEC DIRECTOR

Mr Hunt is an experienced capital markets and mergers and acquisitions lawyer and has extensive experience in all aspects of mining and energy project acquisitions and disposals and general mining legislation compliance throughout Australia. He has advised on numerous IPOs, fundraisings, and acquisitions by both public and private companies on the ASX and internationally.

This Presentation contains references to Brightstar's JORC Mineral Resources, extracted from the ASX announcements titled "Maiden Link Zone Mineral Resource Estimate" dated 15 November 2023, "Cork Tree Mineral Resource Upgrade Delivers 1Moz Group MRE" dated 23 June 2023 and "Auralia Review" dated 10 September 2020, and ASX announcements for Kingwest Resources Limited titled, "High grade drilling results and high grade resource estimation from the Menzies Goldfield" dated 13 December 2022 and "Menzies JORC gold resources surpass 500,000 ounces" dated 26 April 2022

Appendix 2

Production Summary

Total gold produced of 322koz at an AISC of A\$2,041/oz over the life of mine

- LOM production underpinned by 66% production of ounces from Measured and Indicated Resource classification
- Payback period (first 1.5 years of production) comprised of 70% Mineral Resources in the M&I classification

KEY PHYSICAL OUTCOMES		
Initial Mine Life	Years	8
OPEN PIT MINING PRODUCTION		
Total Ore Mined	Mt	4.2
Grade ¹	g/t	1.75
Ounces Recovered	koz	224
UNDERGROUND MINING PRODUCTION		
Total Ore Mined	Mt	1.1
Grade ¹	g/t	2.96
Ounces Recovered	koz	98
PROCESSING PHYSICALS		
Ore Processed	Mt	5.3
Grade	g/t	2.0
Total Ounces Recovered	Koz	322

¹ Diluted mined grade

Appendix 3

PROJECT COSTS		
CAPITAL COSTS		
Pre-Production Capital	A\$m	22
Sustaining Capital	A\$m	53
Growth Capital	A\$m	94
OPERATING COSTS		
Open Pit Mining Cost	A\$/oz	871
Underground Mining Cost	A\$/oz	866
Menzies Processing Cost (toll treat, incl. haulage)	A\$/oz	893
Laverton Processing Cost (incl. haulage)	A\$/oz	789
Resource Definition Drilling	A\$/oz	7
Site G&A	A\$/oz	52
C1 Cash Costs	A\$/oz	1,765
Royalties	A\$/oz	111
Sustaining Capital	A\$/oz	165
All In Sustaining Costs (AISC)	A\$/oz	2,041

UNITS OPERATING COSTS – \$/ORE TONNE		
Open Pit Mining Cost	A\$/t	56
Underground Mining Cost	A\$/t	49
Menzies Processing Cost	A\$/t	53
Laverton Processing Cost	A\$/t	49

NOTES:

1 Spot gold price of A\$3,000/oz as at 16/10/2023

2 Unleveraged NPV based on a discount rate of 8% and pre-tax basis

3 Capital intensity is calculated by dividing pre-production capital by annual payable gold production.

4 See Appendix 4 for cost waterfall chart & additional information

FINANCIAL METRICS SUMMARY		
Gold Price Assumed	A\$/oz	A\$2,900
Spot Gold Price ¹	A\$/oz	A\$3,000
Discount Rate	%	8
PROJECT VALUATION @ A\$2,900/oz		
LOM EBITDA	A\$m	153
NET PRESENT VALUE² (NPV ₈ pre-tax)	A\$m	103
Project IRR	%	79
Payback Period	Years	1.5
Capital Intensity³	A\$/oz	559
NPV / Pre-Production Capital	ratio	4.6x
PROJECT VALUATION @ A\$3,100/oz (Spot)		
NPV₈ pre-tax	A\$m	153
Project IRR	%	138

Notes on All In Sustaining Costs ⁴

- Mining and processing costs obtained from June 2023 quotes
- Opportunities to reduce AISC through schedule optimisations
- Modelled Toll treat costs excludes any potential discount applicable to the significant tonnages of Menzies ore
- Further increases in processing throughput rates in Laverton will bring down processing unit costs
- Potential to renegotiate third party royalties

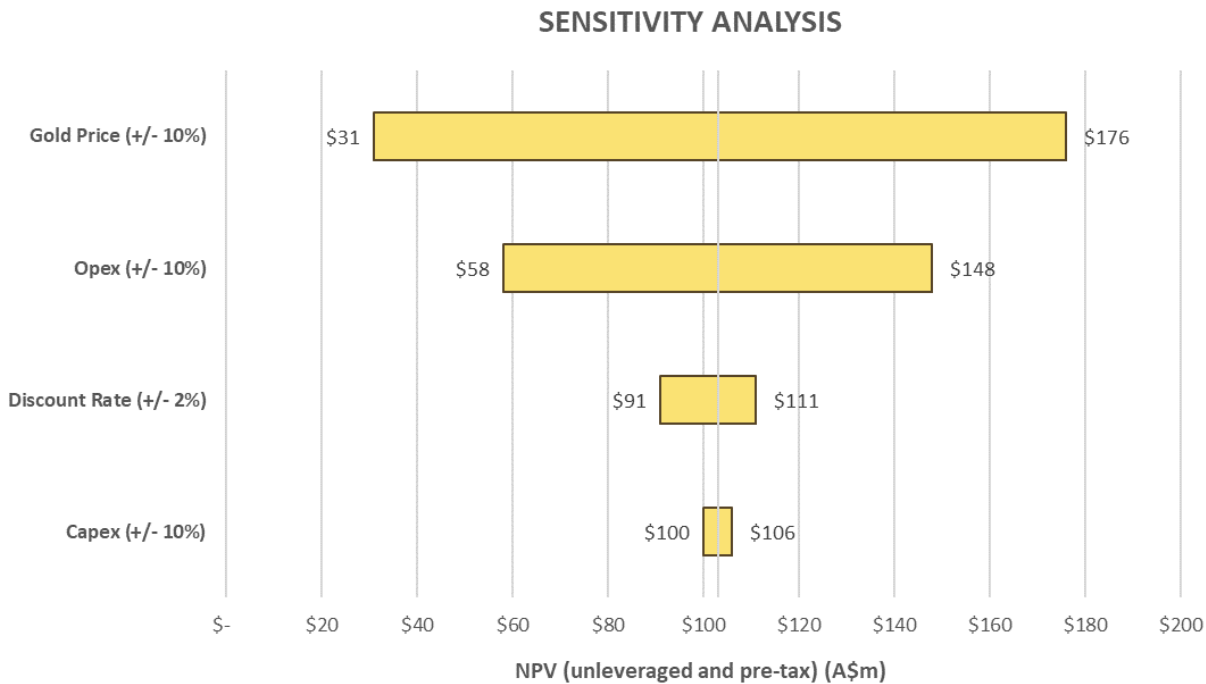

Appendix 4

Project Sensitivity Analysis

The combined development displays robust financial metrics under different scenario analysis and various downside scenarios

Project NPV (unleveraged and pre-tax) Sensitivity Analysis

Scenario Analysis (Gold Price Assumptions)

		Base case		Current spot	
Gold Price (A\$/oz)	\$2,800	\$2,900	\$3,000	\$3,100	\$3,200
NPV ₈ (A\$m)	78	103	128	153	178
IRR (%)	56	79	106	138	173
Payback ¹ (Yrs)	1.8	1.5	1.3	1.0	0.75
Annual EBITDA (A\$m)	15.1	19.1	23.1	27.1	31.1
LOM EBITDA (A\$m)	121	153	185	217	249

1. Payback period calculated from the first month of gold production

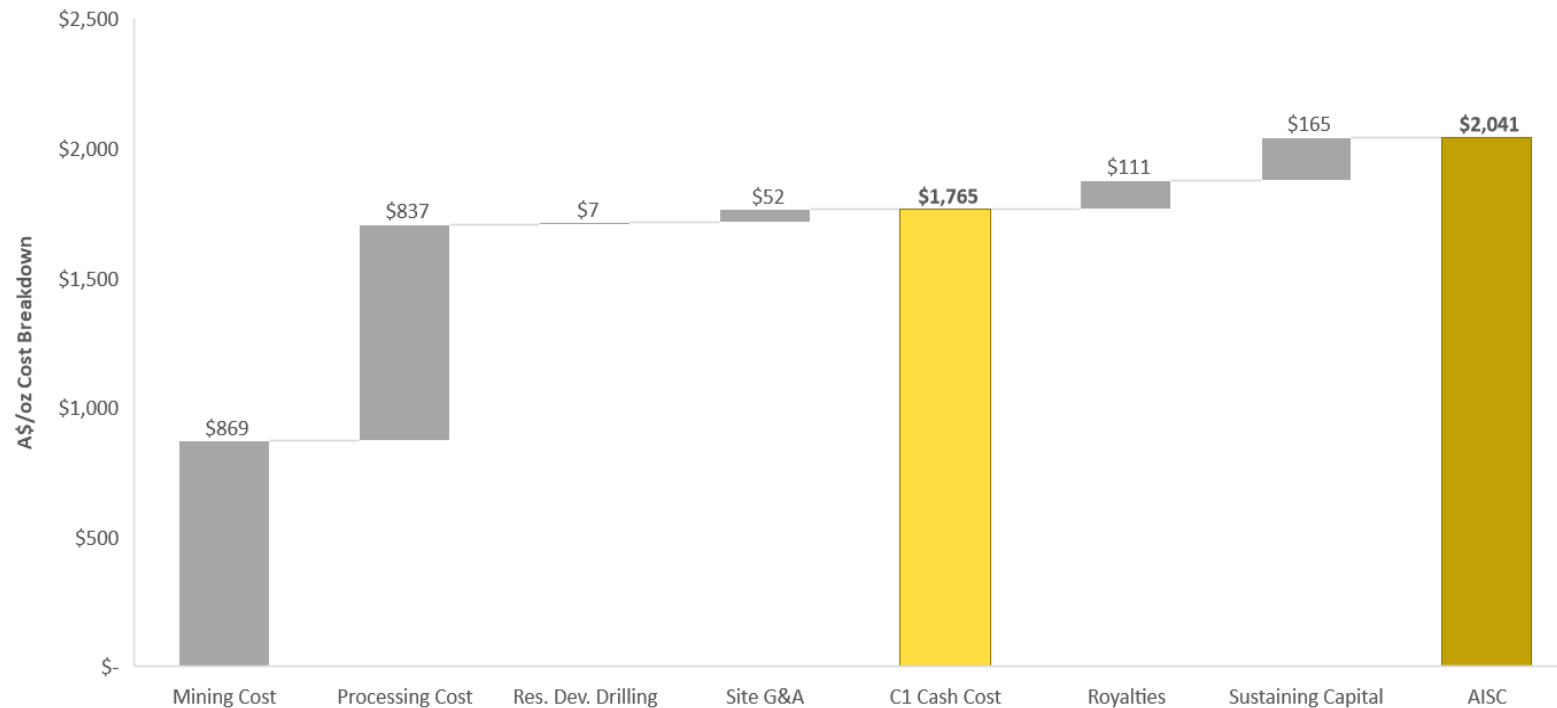

Appendix 5

Project All In Sustaining Costs

The project displays attractive LOM AISC margins utilising conservative gold price assumption at A\$2,900/oz

LOM C1 CASH COST AND AISC BREAKDOWN¹

- Application of real mining and processing costs obtained from June 2023 market quotes
- Opportunities to reduce AISC through further optimisation of mining and processing schedule to maximise efficiencies
- Further increases in processing throughput rates in Laverton will bring down processing unit costs
- Modelled Toll treat costs excludes any potential discount applicable to the significant tonnages of Menzies ore
- Potential to renegotiate third party royalties

¹ C1 cash cost and AISC are calculated based on gold produced and in Australian dollars unless stated otherwise. C1 cash cost includes mining, processing, resource development drilling and administration costs and is calculated based on gold production. All-In Sustaining Cost (AISC) per ounce includes C1 cash cost, royalties and sustaining capital calculated based on gold production. It does not include corporate cost and non-sustaining capital.

Appendix 6

Menzies Gold Project Physicals

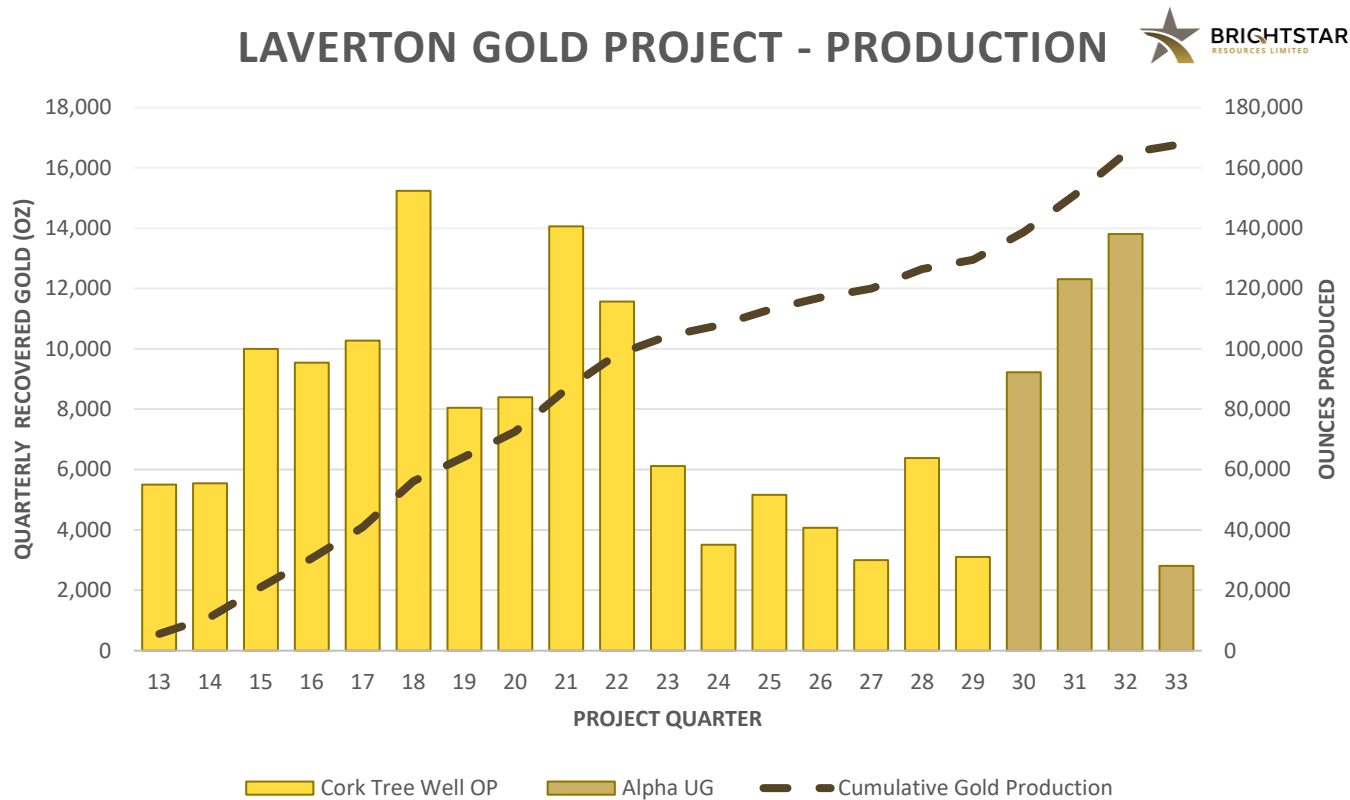

- 3.5 years of toll treatment processing
- Combined processing physicals:
 - 2.6Mt of ore
 - Average head grade of 1.95g/t Au
 - **Recovered gold 153koz Au**
 - Recovery 95%
- Robust early mine life production profile:
 - Year 1: 49koz
 - Year 2: 63koz
 - Year 3: 36koz
- Wind down of mining operations in Year 3 coincides with mobilisation of open pit equipment and personnel to Laverton Gold Project
- On-going processing of ore stockpiles post demobilisation of mining fleet
- Significant upside exists with Res Dev drilling at Yunndaga to increase mine life once underground
- **Operating profits from Menzies operations fully funds the development at Cork Tree Well and the refurbishment and expansion of the Laverton mill**

Appendix 7

Laverton Gold Project Physicals

- +5 years of owner operator processing
- Cork Tree Well open pit and Alpha underground mine
- Combined processing physicals:
 - 2.7Mt of ore
 - Average head grade of 2.04g/t Au
 - **Recovered gold 169koz Au**
- Average annual production 35koz
- **Significant opportunity to increase LOM and ‘fill the mill’ with infill drilling and regional third party ore-feed opportunities**
- No upside allocated to potential underground mining opportunities at CTW Deeps, Alpha, Beta
- Multiple stranded assets within trucking distance of the processing plant
- **Future studies to investigate renewable energy sources to reduce carbon footprint & operating costs**

Appendix 8

Recent M&A Increase in WA Pre-development Gold Space

M&A activity for ASX-listed WA pre-production gold assets
Enterprise Value per Ounce (A\$/oz) (M,I&I)¹

Appendix 9

Peer Comparison - combination of attractively priced ounces that belies the inherent value of Brightstar's assets
