Heavy Minerals Limited (ASX: HVY) (**Heavy Minerals, HVY** or the **Company**) is pleased to advise that it is undertaking a capital raising via an SPP to raise up to \$750,000 (before costs) through the issue of up to 9,146,342 fully paid ordinary shares in the Company (**Shares**) at an issue price of \$0.082 per Share (**New Shares**).

The SPP offer period will open on Wednesday, 21 February 2024 and is expected to close at 5:00pm (AWST) on Wednesday, 6 March 2024. As the SPP is not underwritten, the Company may raise more or less than this amount. If the sum of applications received under the SPP is greater than \$750,000, the Directors in their absolute discretion may decide to scale back or to accept applications (in whole or in part) that results in the SPP raising more than the \$750,000, subject to compliance with the ASX Listing Rules and the *Corporations Act 2001* (Cth) (**Corporations Act**).

The full terms and conditions of the SPP will be set out in the SPP Offer Booklet, which is expected to be released to the ASX and dispatched to Eligible Shareholders via their preferred method of contact on Wednesday, 21 February 2024. New Shares to be issued under the SPP will rank equally in all respects with the Company's existing Shares, from their respective date of issue.

The Company has lodged an ASX Appendix 3B for the SPP, and will lodge a cleansing notice under ASIC Corporations (Share and Interest Purchase Plans) Instrument 2019/547 on the SPP opening date and an ASX Appendix 2A on completion of the SPP.

### About Heavy Minerals Limited

Heavy Minerals Limited (ASX: HVY) is an Australian ASX listed industrial mineral exploration company.

The Company's projects are prospective for industrial minerals including but not limited to Garnet, Zircon, Rutile and Ilmenite. The Company's initial focus is the Port Gregory and Red Hill Garnet Projects in Western Australia with the Port Gregory project having a JORC (2012) Mineral Resource of 166 million tonnes @ 4.0% Total Heavy Minerals. This comprises a Measured Mineral Resource of 126 Mt @ 3.8% THM; an Indicated Mineral Resource of 20 Mt @ 6.5% THM; and an Inferred Mineral Resource of 20 Mt @ 2.9% THM. This includes 5.9 million tonnes of contained Garnet and 260 thousand tonnes of ilmenite<sup>1</sup>.

An Exploration Target has been defined for Red Hill using cut-off grades for reporting of 3% THM and 1% THM and ranging from 90 to 150 Mt of material @ 5.4% to 4.1% THM. The Exploration Target also contains between 5 and 6 Mt of THM and 3.8 and 4.5 Mt of garnet<sup>2</sup>. The potential quality and grade of the Exploration Target is conceptual in nature and there has been insufficient exploration activity to determine a Mineral Resource estimate and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

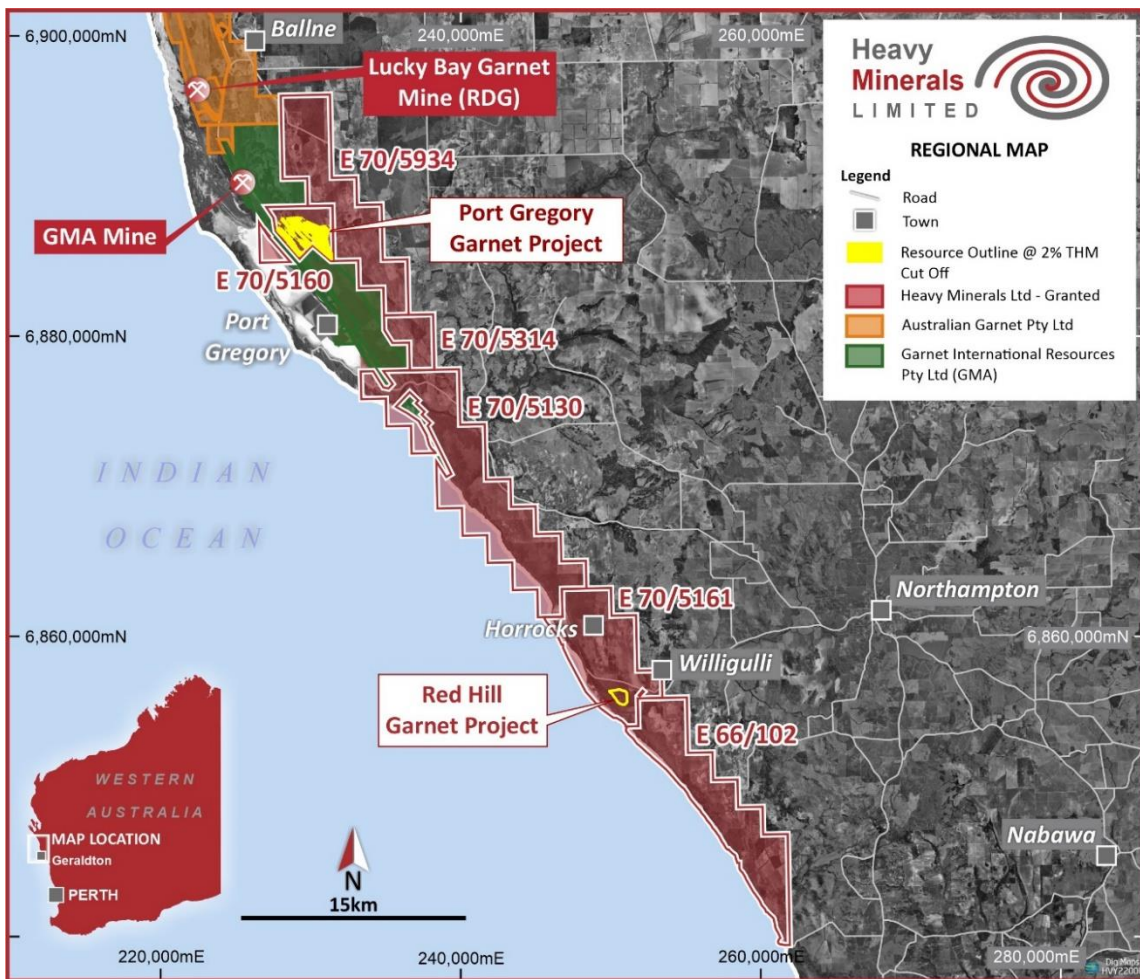

The Company's other project is the Inhambane Heavy Mineral Project in Mozambique which contains an ilmenite dominated JORC (2012) Inferred Mineral Resource of 90 million tonnes @ 3.0% Total Heavy Mineral<sup>3</sup>.
