### **Mr Dusko Ljubojevic, Managing Director of Raiden commented:** “I

would like to personally thank on behalf of Raiden the continued engagement and assistance of the Ngarluma Aboriginal Corporation in relation to the progress of the surveys across our projects. We are eager to continue the progress on what we believe is an exciting lithium project in one of the best mining jurisdictions in the world. With this heritage survey commencing, the Company is closer to our objective of drill testing out defined high-grade pegmatite targets”.

**Raiden Resources Limited (ASX: RDN DAX: YM4) (“Raiden” or “the Company”)** is pleased to announce that it has secured an archaeological/anthropological heritage survey, with the Ngarluma Aboriginal Corporation (“NAC”), over its priority lithium-bearing pegmatite targets at the Andover South Project area (E47/4061 & E47/4062).

The heritage survey has been scheduled to commence on the 25<sup>th</sup> of March 2024, and will encompass areas where Raiden has defined priority targets for drilling over the high-grade lithium-bearing pegmatites at Andover South.

The Company is pleased to proactively engage with the Ngarluma Traditional Owners across the project area, where our objective is to ensure the Traditional Owners knowledge of the area is utilised to avoid areas of cultural significance.

It is the Company’s objective to commence with drilling activities as soon as possible after the heritage survey has been concluded, and once all regulatory processes currently underway for the grant of tenement E47/4062 have been completed.

In parallel with the Andover South heritage survey, management are working to secure an additional survey over the Andover North project area (E47/3849, P47/2028, E47/4063 & E47/4603), which will allow the company to dual track a parallel exploration campaign over this area, which will hopefully lead to further definition of potential pegmatite mineralisation.
